(2) To demonstrate initial compliance with § 63.745(d), § 63.746(c), or § 63.747(d) when affected HAP emission points are controlled by an emission control device other than a fixed-bed carbon adsorption system with individual exhaust stacks for each carbon adsorber vessel, each owner or operator of an affected source shall perform a gaseous emission test using the following procedures.

(i) Construct the overall HAP emission reduction system so that all volumetric flow rates and total HAP or VOC emissions can be accurately determined by the applicable test methods and procedures specified in § 63.750(g) (9) through (14).

(ii) Determine capture efficiency from the HAP emission points by capturing, venting, and measuring all HAP emissions from the HAP emission points. During a performance test, the owner or operator of affected HAP emission points located in an area with other gaseous emission sources not affected by this subpart shall isolate the affected HAP emission points from all other gaseous emission points by one of the following methods:

(A) Build a temporary total enclosure around the affected HAP emission point(s); or

(B) Shut down all gaseous emission points not affected by this subpart and continue to exhaust fugitive emissions from the affected HAP emission points through any building ventilation system and other room exhausts such as drying ovens. All ventilation air must be vented through stacks suitable for testing.

(iii) Operate the emission control device with all affected HAP emission points connected and operating.

(iv) Determine the efficiency (E) of the control device using equation 10:

(v) Determine the efficiency (F) of the capture system using equation 11:

$$E = \frac{\sum_{i=1}^{n} Q_{bi} C_{bi} - \sum_{j=1}^{P} Q_{aj} C_{aj}}{\sum_{i=1}^{n} Q_{bi} C_{bi}} \qquad \text{Eq. 10}$$

$$F = \frac{\sum_{i=1}^{n} Q_{di} C_{di}}{\sum_{i=1}^{n} Q_{di} C_{di} + \sum_{k=1}^{P} Q_{fk} C_{fk}} \qquad \text{Eq. 11}$$

(vi) For each HAP emission point subject to § 63.745(d), § 63.746(c), or § 63.747(d), compliance is demonstrated if the product of (E) × (F) is equal to or greater than the overall HAP control efficiencies required under § 63.745(d), § 63.746(c), or § 63.747(d).

(3) To demonstrate compliance with § 63.745(d), § 63.746(c), or § 63.747(d) when affected HAP emission points are controlled by a fixed-bed carbon adsorption system with individual exhaust stacks for each carbon adsorber vessel, each owner or operator of an affected source shall perform a gaseous emission test using the following procedures:

(i) Construct the overall HAP emission reduction system so that each volumetric flow rate and the total HAP emissions can be accurately determined by the applicable test methods and procedures specified in § 63.750(g) (9) through (14);

(ii) Assure that all HAP emissions from the affected HAP emission point(s) are segregated from gaseous emission points not affected by this subpart and that the emissions can be captured for measurement, as described in § 63.705(g)(2)(ii) (A) and (B);

(iii) Operate the emission control device with all affected HAP emission points connected and operating;

(iv) Determine the efficiency (H_v) of each individual carbon adsorber vessel (v) using equation 12:

$$H_v = \frac{Q_{gv} C_{gv} - Q_{hv} C_{hv}}{Q_{gv} C_{gv}} \qquad \text{Eq. 12}$$

(v) Determine the efficiency of the carbon adsorption system (H_{sys}) by computing the average efficiency of the individual carbon adsorber vessels as weighted by the volumetric flow rate (Q_{hv}) of each individual carbon adsorber vessel (v) using equation 13:

$$H_{sys} = \frac{\sum_{v=1}^{q} H_v Q_{hv}}{\sum_{v=1}^{q} Q_{hv}} \qquad \text{Eq. 13}$$

(vi) Determine the efficiency (F) of the capture system using equation 11.

(vii) For each HAP emission point subject to § 63.745(d), § 63.746(c), or § 63.747(d), compliance is demonstrated if the product of (H_{sys}) × (F) is equal to or greater than the overall HAP control efficiency required by § 63.745(d), § 63.746(c), or § 63.747(d).

(4) An alternative method of demonstrating compliance with § 63.745(d), § 63.746(c), or § 63.747(d) is the installation of a total enclosure around the affected HAP emission point(s) and the ventilation of all HAP emissions from the total enclosure to a control device with the efficiency specified in paragraph (g)(4)(iii) of this section. If this method is selected, the compliance test methods described in paragraphs (g)(1), (g)(2), and (g)(3) of this section are not required. Instead, each owner or operator of an affected source shall:

(i) Demonstrate that a total enclosure is installed. An enclosure that meets the requirements in paragraphs (g)(4)(i) (A) through (D) of this section shall be considered a total enclosure. The owner or operator of an enclosure that does not meet these requirements may apply to the Administrator for approval of the enclosure as a total enclosure on a case-by-case basis. The enclosure shall be considered a total enclosure if it is demonstrated to the satisfaction of the Administrator that all HAP emissions from the affected HAP emission point(s) are contained and vented to the control device. The requirements for automatic approval are as follows:

(A) The total area of all natural draft openings shall not exceed 5% of the total surface area of the total enclosure's walls, floor, and ceiling;

(B) All sources of emissions within the enclosure shall be a minimum of four equivalent diameters away from each natural draft opening;

(C) The average inward face velocity (FV) across all natural draft openings shall be a minimum of 3,600 meters per hour as determined by the following procedures:

(*1*) All forced makeup air ducts and all exhaust ducts are constructed so that the volumetric flow rate in each can be accurately determined by the test methods and procedures specified in § 63.750(g) (10) and (11); volumetric flow rates shall be calculated without the adjustment normally made for moisture content; and

(*2*) Determine FV by equation 14:

$$FV = \frac{\sum_{j=1}^{n} Q_{out\,j} - \sum_{i=1}^{p} Q_{in\,i}}{\sum_{k=1}^{q} A_k} \qquad \text{Eq. 14}$$

(D) The air passing through all natural draft openings shall flow into the enclosure continuously. If FV is less than or equal to 9,000 meters per hour, the continuous inward flow of air shall be verified by continuous observation using smoke tubes, streamers, tracer gases, or other means approved by the Administrator over the period that the volumetric flow rate tests required to determine FV are carried out. If FV is greater than 9,000 meters per hour, the direction of airflow through the natural draft openings shall be presumed to be inward at all times without verification.

(ii) Determine the control device efficiency using equation 10 or equations 12 and 13, as applicable, and the test methods and procedures specified in § 63.750(g) (9) through (14).

(iii) Compliance shall be achieved if the installation of a total enclosure is demonstrated and the value of E determined from equation 10 (or the value of H_{sys} determined from equations 12 and 13, as applicable) is equal to or greater than the overall HAP control efficiencies required under § 63.745(d), § 63.746(c), or § 63.747(d).

(5) When nonregenerative carbon adsorbers are used to comply with § 63.745(d), § 63.746(c), or § 63.747(d), the owner or operator may conduct a design evaluation to demonstrate initial compliance in lieu of following the compliance test procedures of paragraphs (g)(1), (2), (3), and (4) of this section. The design evaluation shall consider the vent stream composition, component concentrations, flow rate, relative humidity, and temperature, and shall establish the design exhaust vent stream organic compound concentration level, capacity of the carbon bed, type and working capacity of activated carbon used for the carbon bed, and design carbon replacement interval based on the total carbon working capacity of the control device and the emission point operating schedule.

(6)(i) To demonstrate initial compliance with § 63.745(d), § 63.746(c), or § 63.747(d) when hard piping or ductwork is used to direct VOC and HAP emissions from a VOC and HAP source to the control device, each owner or operator shall demonstrate upon inspection that the criteria of paragraph (g)(6)(i)(A) and paragraph (g)(6)(i) (B) or (C) of this section VR/FD are met.

(A) The equipment shall be vented to a control device.

(B) The control device efficiency (E or H_{sys}, as applicable) determined using equation 10 or equations 12 and 13, respectively, and the test methods and procedures specified in § 63.750(g) (9) through (14), shall be equal to or greater than the overall HAP control efficiency required by § 63.745(d), § 63.746(c), or § 63.747(d).

(C) When a nonregenerative carbon adsorber is used, the ductwork from the affected emission point(s) shall be vented to the control device and the carbon adsorber shall be demonstrated, through the procedures of § 63.750(g) (1), (2), (3), (4), or (5), to meet the requirements of § 63.745(d), § 63.746(c), or § 63.747(d).

(7) Startups and shutdowns are normal operation for this source category. Emissions from these activities are to be included when determining if the standards specified in § 63.745(d), § 63.746(c), or § 63.747(d) are being attained.

(8) An owner or operator who uses compliance techniques other than those specified in this subpart shall submit a description of those compliance procedures, subject to the Administrator's approval, in accordance with § 63.7(f) of subpart A.

(9) Either EPA Method 18 or EPA Method 25A of appendix A of part 60, as appropriate to the conditions at the site, shall be used to determine VOC and HAP concentration of air exhaust streams as required by § 63.750(g) (1) through (6). The owner or operator shall submit notice of the intended test method to the Administrator for approval along with the notification of the performance test required under § 63.7(b). Method selection shall be based on consideration of the diversity of organic species present and their total

concentration and on consideration of the potential presence of interfering gases. Except as indicated in paragraphs (g)(9) (i) and (ii) of this section, the test shall consist of three separate runs, each lasting a minimum of 30 minutes.

(i) When either EPA Method 18 or EPA Method 25A is to be used in the determination of the efficiency of a fixed-bed carbon adsorption system with a common exhaust stack for all the individual carbon adsorber vessels pursuant to § 63.750(g) (2) or (3), the test shall consist of three separate runs, each coinciding with one or more complete sequences through the adsorption cycles of all of the individual carbon adsorber vessels.

(ii) When either EPA Method 18 or EPA Method 25A is to be used in the determination of the efficiency of a fixed-bed carbon adsorption system with individual exhaust stacks for each carbon adsorber vessel pursuant to § 63.750(g) (3) or (4), each carbon adsorber vessel shall be tested individually. The test for each carbon adsorber vessel shall consist of three separate runs. Each run shall coincide with one or more complete adsorption cycles.

(10) EPA Method 1 or 1A of appendix A of part 60 is used for sample and velocity traverses.

(11) EPA Method 2, 2A, 2C, or 2D of appendix A of part 60 is used for velocity and volumetric flow rates.

(12) EPA Method 3 of appendix A of part 60 is used for gas analysis.

(13) EPA Method 4 of appendix A of part 60 is used for stack gas moisture.

(14) EPA Methods 2, 2A, 2C, 2D, 3, and 4 shall be performed, as applicable, at least twice during each test period.

(h) *Overall VOC and/or organic HAP control efficiency—control devices other than carbon adsorbers.* Calculate the overall control efficiency of a control system with a control device other than a carbon adsorber using the following procedure.

(1) Calculate the overall control efficiency using equation 15:

$$E_k = R_k F_k \qquad \text{Eq. 15}$$

where

E_k=overall VOC and/or organic HAP control efficiency (expressed as a decimal) of control system k.

R_k=destruction or removal efficiency (expressed as a decimal) of total organic compounds or total organic HAP for control device k as determined under paragraph (h)(2) of this section.

F_k=capture efficiency (expressed as a decimal) of capture system k as determined under paragraph (h)(3) of this section.

(2) The organic HAP destruction or removal efficiency R_k of a control device other than a carbon adsorber shall be determined using the procedures described below. The destruction efficiency may be measured as either total organic HAP or as TOC minus methane and ethane according to these procedures.

(i) Use Method 1 or 1A of 40 CFR part 60, appendix A, as appropriate, to select the sampling sites.

(ii) Determine the gas volumetric flow rate using Method 2, 2A, 2C, or 2D of 40 CFR part 60, appendix A, as appropriate.

(iii) Use Method 18 of 40 CFR part 60, appendix A, to measure either TOC minus methane and ethane or total organic HAP. Alternatively, any other method or data that have been validated according to the applicable procedures in Method 301 of this part may be used.

(iv) Use the following procedure to calculate the destruction or removal efficiency:

(A) The destruction or removal efficiency test shall consist of three runs. The minimum sampling time for each run shall be 1 hour in which either an integrated sample or a minimum of four grab samples shall be taken. If grab sampling is used, the samples shall be taken at approximately equal intervals in time such as 15-minute intervals during the run.

(B) Calculate the mass rate of either TOC (minus methane and ethane) or total organic HAP (E_i, E_o using equations 16 and 17:

$$E_i = K_2\left(\sum_{j=1}^{n} C_{ij} M_{ij}\right) Q_i \qquad \text{Eq. 16}$$

$$E_o = K_2\left(\sum_{j=1}^{n} C_{oj} M_{oj}\right) Q_o \qquad \text{Eq. 17}$$

where

E_i, E_o=mass rate of TOC (minus methane and ethane) or total organic HAP at the inlet and outlet of the control device, respectively, dry basis, kg/hr.

K_2=constant, 2.494×10^{-6} (parts per million)$^{-1}$ (gram-mole per standard cubic meter) (kilogram/gram) (minute/hour), where standard temperature for (gram-mole per standard cubic meter) is 20° C.

n=number of sample components in the gas stream.

C_{ij}, C_{oj}=concentration of sample component j of the gas stream at the inlet and outlet of the control device, respectively, dry basis, parts per million by volume.

M_{ij}, M_{oj}=molecular weight of sample component j of the gas stream at the inlet and outlet of the control device, respectively, gram/gram-mole.

Q_i, Q_o=flow rate of gas stream at the inlet and outlet of the control device, respectively, dry standard cubic meter per minute.

(*1*) Where the mass rate of TOC is being calculated, all organic compounds (minus methane and ethane) measured by EPA Method 18 shall be summed using equation 16 in paragraph (h)(2)(iv)(B) of this section.

(*2*) Where the mass rate of total organic HAP is being calculated, only the organic HAP species shall be summed using equation 17 in paragraph (h)(2)(iv)(B) of this section. The list of organic HAP is provided in § 63.104 of subpart F of this part.

(C) Calculate the destruction or removal efficiency for TOC (minus methane and ethane) or total organic HAP using equation 18:

$$R = \frac{E_i - E_o}{E_i} \times 100 \qquad \text{Eq. 18}$$

where

R=destruction or removal efficiency of control device, percent.

E_i=mass rate of TOC (minus methane and ethane) or total organic HAP at the inlet to the control device as calculated under paragraph (h)(2)(iv)(B) of this section, kg TOC per hour or kg organic HAP per hour.

E_o=mass rate of TOC (minus methane and ethane) or total organic HAP at the outlet of the control device, as calculated under paragraph (h)(2)(iv)(B) of this section, kg TOC per hour or kg organic HAP per hour.

(3) Determine the capture efficiency F_k of each capture system to which organic HAP and VOC emissions from coating operations are vented. The capture efficiency value shall be determined using Procedure T—Criteria for and Verification of a Permanent or Temporary Total Enclosure as found in appendix B to § 52.741 of part 52 of this chapter for total enclosures, and the capture efficiency protocol specified in § 52.741(a)(4)(iii) of part 52 of this chapter for all other enclosures.

(i)(1) *Alternative application method—primers and topcoats.* Each owner or operator seeking to use an alternative application method (as allowed in § 63.745(f)(1)(ix)) in complying with the standards for

primers and topcoats shall use the procedures specified in paragraphs (i)(2) and (i)(3) of this section to determine the organic HAP and VOC emission levels of the alternative application technique as compared to either HVLP or electrostatic spray application methods.

(2)(i) For the process or processes for which the alternative application method is to be used, the total organic HAP and VOC emissions shall be determined for an initial 30-day period, the period of time required to apply coating to five completely assembled aircraft, or a time period approved by the permitting agency. During this initial period, only HVLP or electrostatic spray application methods shall be used. The emissions shall be determined based on the volumes, organic HAP contents (less water), and VOC contents (less water and exempt solvents) of the coatings as applied.

(ii) Upon implementation of the alternative application method, use the alternative application method in production on actual production parts or assemblies for a period of time sufficient to coat an equivalent amount of parts and assemblies with coatings identical to those used in the initial 30-day period. The actual organic HAP and VOC emissions shall be calculated for this post-implementation period.

(iii) Calculate both the organic HAP and VOC emission reduction using equation 19:

$$P = \frac{E_b - E_a}{E_b} \times 100 \qquad \text{Eq. 19}$$

where

P=organic HAP or VOC emission reduction, percent.

E_b=organic HAP or VOC emissions, in pounds, before the alternative application technique was implemented, as determined under paragraph (i)(2)(i) of this section.

E_a=organic HAP or VOC emissions, in pounds, after the alternative application technique was implemented, as determined under paragraph (i)(2)(ii) of this section.

(3) Each owner or operator seeking to demonstrate that an alternative application method achieves emission reductions equivalent to HVLP or electrostatic spray application methods shall comply with the following:

(i) Each coating shall be applied such that the dried film thickness is within the range specified by the applicable specification(s) for the aerospace vehicle or component being coated.

(ii) If no such dried film thickness specification(s) exists, the owner or operator shall ensure that the dried film thickness applied during the initial 30-day period is equivalent to the dried film thickness applied during the alternative application method test period for similar aerospace vehicles or components.

(iii) Failure to comply with these dried film thickness requirements shall invalidate the test results obtained under paragraph (i)(2)(i) of this section.

(j) *Spot stripping and decal removal.* Each owner or operator seeking to comply with § 63.746(b)(3) shall determine the volume of organic HAP-containing chemical strippers used per aircraft using the procedure specified in paragraphs (j)(1) through (j)(3) of this section.

(1) For each chemical stripper used for spot stripping and decal removal, determine for each annual period the total volume as applied using the procedure specified in paragraph (d)(2) of this section.

(2) Determine the total number of aircraft for which depainting operations began during the annual period as determined from company records.

(3) Calculate the annual average volume of organic HAP used for spot stripping and decal removal per aircraft using equation 20:

$$C = \frac{\sum_{i=1}^{n} V_{si}}{A} \qquad \text{Eq. 20}$$

where

C=annual average volume (gal per aircraft) of organic HAP-containing chemical stripper used for spot stripping and decal removal.

n=number of organic HAP-containing chemical strippers used in the annual period.

V_{si}=volume (gal) of organic HAP-containing chemical stripper i used during the annual period.

A=number of aircraft for which depainting operations began during the annual period.

(k) *Organic HAP content level determination—compliant chemical milling maskants.* For those uncontrolled chemical milling maskants complying with the chemical milling maskant organic HAP content limit specified in § 63.747(c)(1) without being averaged, the following procedures shall be used to determine the mass of organic HAP emitted per volume of coating (less water) as applied.

(1) For coatings that contain no exempt solvents, determine the total organic HAP content using manufacturer's supplied data or Method 24 of 40 CFR part 60, appendix A to determine the VOC content. The VOC content shall be used as a surrogate for total HAP content for coatings that contain no exempt solvent. If there is a discrepancy between the manufacturer's formulation data and the results of the Method 24 analysis, compliance shall be based on the results from the Method 24 analysis.

When Method 24 is used to determine the VOC content of water-reducible coatings, the precision adjustment factors in Reference Method 24 shall be used. If the adjusted analytical VOC content is less than the formulation solvent content, then the analytical VOC content should be set equal to the formulation solvent content.

(l) *Organic HAP content level determination—averaged chemical milling maskants.* For those uncontrolled chemical milling maskants that are averaged together in order to comply with the chemical milling maskant organic HAP content level specified in § 63.747(c)(1), the procedure specified in paragraphs (l)(1) through (l)(4) of this section shall be used to determine the monthly volume-weighted average mass of organic HAP emitted per volume of chemical milling maskant (less water) as applied, unless the permitting agency specifies a shorter averaging period as part of an ambient ozone control program.

(1) Determine the total organic HAP weight fraction as applied of each chemical milling maskant used during each 30-day period using the procedure specified in paragraph (d)(1) of this section.

(2) Determine for each 30-day period:

(i) The individual volume of each chemical milling maskant applied in terms of total gallons (less water) (using the procedure specified in paragraph (d)(2) of this section), and

(ii) The total volume in gallons of all chemical milling maskants (less water) as applied by summing the individual volumes of each chemical milling maskant as applied (less water).

(3) Determine the density of each chemical milling maskant as applied used during each 30-day period using the procedure specified in paragraph (d)(3) of this section.

(4) Calculate the volume-weighted average mass of organic HAP emitted per unit volume (lb/gal) of chemical milling maskant (less water) as applied for all chemical milling maskants during each 30-day period using equation 21:

$$H_a = \frac{\sum_{i=1}^{n} W_{Hi} D_{mi} V_{mi}}{M_{lw}} \qquad \text{Eq. 21}$$

where

H_a=volume-weighted mass of organic HAP emitted per unit volume of chemical milling maskants (lb/gal) (less water) as applied during each 30-day period for those chemical milling maskants being averaged.

n=number of chemical milling maskants being averaged.

W_{Hi}=weight fraction (expressed as a decimal) of organic HAP in chemical milling maskant i (less water) as applied during each 30-day period that is averaged.

D_{mi}=density (lb chemical milling maskant per gal coating) of chemical milling maskant i as applied during each 30-day period that is averaged.

V_{mi}=volume (gal) of chemical milling maskant i (less water) as applied during the 30-day period that is averaged.

M_{lw}=total volume (gal) of all chemical milling maskants (less water) as applied during each 30-day period that is averaged.

(m) *VOC content level determination—compliant chemical milling maskants*. For those uncontrolled chemical milling maskants complying with the chemical milling maskant VOC content limit specified in § 63.747(c)(2) without being averaged, the procedure specified in paragraphs (m)(1) and (m)(2) of this section shall be used to determine the mass of VOC emitted per volume of chemical milling maskant (less water and exempt solvents) as applied.

(1) Determine the mass of VOC emitted per unit volume of chemical milling maskant (lb/gal) (less water and exempt solvents) as applied, G_i, for each chemical milling maskant using the procedures specified in paragraphs (e)(1) and (e)(2) of this section.

(2)(i) If the VOC content is found to be different when EPA Method 24 is used during an enforcement inspection from that used by the owner or operator in calculating G_i, compliance shall be based, except as provided in paragraph (m)(2)(ii) of this section, upon the VOC content obtained using EPA Method 24.

(ii) If the VOC content of a chemical milling maskant obtained using EPA Method 24 would indicate noncompliance as determined under § 63.749(h)(3)(i), an owner or operator may elect to average the chemical milling maskant with other uncontrolled chemical milling maskants and (re)calculate G_a (using the procedure specified in paragraph (n) of this section), provided appropriate and sufficient records were maintained for all chemical milling maskants included in the average recalculation. The (re)calculated value of G_a for the averaged chemical milling maskants shall then be used to determine compliance.

(n) *VOC content level determination—averaged chemical milling maskants.* For those uncontrolled chemical milling maskants that are averaged together in order to comply with the chemical milling maskant VOC content limit specified in § 63.747(c)(2), the procedure specified in paragraphs (n)(1) through (n)(4) of this section shall be used to determine the monthly volume-weighted average mass of VOC emitted per volume of chemical milling maskant (less water and exempt solvents) as applied, unless the permitting agency specifies a shorter averaging period as part of an ambient ozone control program.

(1) Determine the VOC content of each chemical milling maskant (less water and exempt solvents) as applied used during each 30-day period using the procedure specified in paragraph (f)(1) of this section.

(2)(i) Determine the individual volume of each chemical milling maskant applied in terms of total gallons (less water and exempt solvents) using the procedure specified in paragraph (f)(2) of this section, and

(ii) Calculate the total volume in gallons of all chemical milling maskants (less water and exempt solvents) as applied by summing the individual volumes of each chemical milling maskant (less water and exempt solvents) as applied.

(3) Calculate the volume-weighted average mass of VOC emitted per unit volume (lb/gal) of chemical milling maskant (less water and exempt solvents) as applied during each 30-day period using equation 22:

$$G_a = \frac{\sum_{i=1}^{n} (VOC)_{mi} V_{mi}}{M_{lwes}} \qquad \text{Eq. 22}$$

where

G_a=volume-weighted average mass of VOC per unit volume of chemical milling maskant (lb/gal) (less water and exempt solvents) as applied during each 30-day period for those chemical milling maskants that are averaged.

n=number of chemical milling maskants being averaged.

$(VOC)_{mi}$=VOC content (lb/gal) of chemical milling maskant i (less water and exempt solvents) as applied during the 30-day period that is averaged.

V_{mi}=volume (gal) of chemical milling maskant i (less water and exempt solvents) as applied during the 30-day period that is averaged.

M_{lwes}=total volume (gal) of all chemical milling maskants (less water and exempt solvents) as applied during each 30-day period that is averaged.

(4)(i) If the VOC content is found to be different when EPA Method 24 is used during an enforcement inspection from that used by the owner or operator in calculating G_a, recalculation of G_a is required using the new value. If more than one chemical milling maskant is involved, the recalculation shall be made once using all of the new values.

(ii) If recalculation is required, an owner or operator may elect to include in the recalculation of G_a uncontrolled chemical milling maskants that were not previously included provided appropriate and sufficient records were maintained for these other chemical milling maskants to allow daily recalculations.

(iii) The recalculated value of G_a under either paragraph (n)(4)(i) or (n)(4)(ii) of this section shall be used to determine compliance.

§ 63.751 Monitoring requirements.

(a) *Enclosed spray gun cleaners.* Each owner or operator using an enclosed spray gun cleaner under § 63.744(c)(1) shall visually inspect the seals and all other potential sources of leaks associated with each enclosed gun spray cleaner system at least once per month. Each inspection shall occur while the system is in operation.

(b) *Incinerators and carbon adsorbers—initial compliance demonstrations.* Each owner or operator subject to the requirements in this subpart must demonstrate initial compliance with the requirements of § 63.745(d), § 63.746(c), and § 63.747(d) of this subpart. Each owner or operator using a carbon adsorber to comply with the requirements in this subpart shall comply with the requirements specified in paragraphs (b)(1) through (b)(7) of this section. Each owner or operator using an incinerator to comply with the requirements in this subpart shall comply with the requirements specified in paragraphs (b)(9) through (b)(12) of this section.

(1) Except as allowed by paragraph (b)(2) or (b)(5) of this section, for each control device used to control organic HAP or VOC emissions, the owner or operator shall fulfill the requirements of paragraph (b)(1) (i) or (ii) of this section.

(i) The owner or operator shall establish as a site-specific operating parameter the outlet total HAP or VOC concentration that demonstrates

compliance with § 63.745(d), § 63.746(c), or § 63.747(d) as appropriate; or

(ii) The owner or operator shall establish as the site-specific operating parameter the control device efficiency that demonstrates compliance with § 63.745(d), § 63.746(c), or § 63.747(d).

(iii) When a nonregenerative carbon adsorber is used to comply with § 63.745(d), § 63.746(c), or § 63.747(d), the site-specific operating parameter value may be established as part of the design evaluation used to demonstrate initial compliance. Otherwise, the site-specific operating parameter value shall be established during the initial performance test conducted according to the procedures of § 63.750(g).

(2) For each nonregenerative carbon adsorber, in lieu of meeting the requirements of § 63.751(b)(1), the owner or operator may establish as the site-specific operating parameter the carbon replacement time interval, as determined by the maximum design flow rate and organic concentration in the gas stream vented to the carbon adsorption system. The carbon replacement time interval shall be established either as part of the design evaluation to demonstrate initial compliance or during the initial performance test conducted according to the procedures in § 63.750(g) (1), (2), (3), or (4).

(3) Each owner or operator venting solvent HAP emissions from a source through a room, enclosure, or hood, to a control device to comply with § 63.745(d), § 63.746(c), or § 63.747(d) shall:

(i) Submit to the Administrator with the compliance status report required by § 63.9(h) of the General Provisions a plan that:

(A) Identifies the operating parameter to be monitored to ensure that the capture efficiency measured during the initial compliance test is maintained;

(B) Discusses why this parameter is appropriate for demonstrating ongoing compliance; and

(C) Identifies the specific monitoring procedures;

(ii) Set the operating parameter value, or range of values, that demonstrate compliance with § 63.745(d), § 63.746(c), or § 63.747(d), as appropriate; and

(iii) Conduct monitoring in accordance with the plan submitted to the Administrator unless comments received from the Administrator require an alternate monitoring scheme.

(4) Owners or operators subject to § 63.751(b) (1), (2), or (3) shall calculate the site-specific operating parameter value, or range of values, as the arithmetic average of the maximum and/or minimum operating parameter values, as appropriate, that demonstrate compliance with § 63.745(d), § 63.746(c), or § 63.747(d) during the multiple test runs required by § 63.750 (g)(2) and (g)(1).

(5) For each solvent recovery device used to comply with § 63.745(d), § 63.746(c), or § 63.747(d), in lieu of meeting the requirements of paragraph (b)(1) of this section, the results of the material balance calculation conducted in accordance with § 63.750(g)(1) may serve as the site-specific operating parameter that demonstrates compliance with § 63.745(d), § 63.746(c), or § 63.747(d).

(6) *Continuous compliance monitoring.* Following the date on which the initial compliance demonstration is completed, continuous compliance with § 63.745(d), § 63.746(c), or § 63.747(d) of this subpart shall be demonstrated as outlined in this paragraph.

(i) Each owner or operator of an affected source subject to § 63.745(d), § 63.746(c), or § 63.747(d) of this subpart shall monitor the applicable parameters specified in paragraph (b)(6)(ii), (b)(6)(iii), or (b)(6)(iv) of this section depending on the type of control technique used.

(ii) Compliance monitoring shall be subject to the following provisions:

(A) Except as allowed by paragraph (b)(7)(iii)(A)(*3*) of this section, all continuous emission monitors shall comply with performance specification (PS) 8 or 9 in 40 CFR part 60, appendix B, as appropriate depending on whether VOC or HAP concentration is being measured. The requirements in appendix F of 40 CFR part 60 shall also be followed. In conducting the quarterly audits required by appendix F, owners or operators shall challenge the monitors with compounds representative of the gaseous emission stream being controlled.

(B) If the effluent from multiple emission points are combined prior to being channeled to a common control device, the owner or operator is required only to monitor the common control device, not each emission point.

(iii) Owners or operators complying with § 63.745(d), § 63.746(c), or § 63.747(d) through the use of a control device and establishing a site-specific operating parameter in accordance with paragraph (b)(1) shall fulfill the requirements of paragraph (b)(7)(iii)(A) of this section and paragraph (b)(7)(iii)(B) or (C) of this section, as appropriate.

(A) The owner or operator shall install, calibrate, operate, and maintain a continuous emission monitor.

(*1*) The continuous emission monitor shall be used to measure continuously the total HAP or VOC concentration at both the inlet and the outlet whenever HAP from coating and paint stripping operations are vented to the control device, or when continuous compliance is demonstrated through a percent efficiency calculation; or

(*2*) For owners or operators using a nonregenerative carbon adsorber, in lieu of using continuous emission monitors as specified in paragraph (b)(7)(iii)(A)(*1*) of this section, the owner or operator may use a portable monitoring device to monitor total HAP or VOC concentration at the inlet and outlet, or the outlet of the carbon adsorber, as appropriate.

(*a*) The monitoring device shall be calibrated, operated, and maintained in accordance with the manufacturer's specifications.

(*b*) The monitoring device shall meet the requirements of part 60, appendix A, Method 21, sections 2, 3, 4.1, 4.2, and 4.4. The calibration gas shall either be representative of the compounds to be measured or shall be methane, and shall be at a concentration associated with 125% of the expected organic compound concentration level for the carbon adsorber outlet vent.

(*c*) The probe inlet of the monitoring device shall be placed at approximately the center of the carbon adsorber outlet vent. The probe shall be held there for at least 5 minutes during which flow into the carbon adsorber is expected to occur. The maximum reading during that period shall be used as the measurement.

(B) If complying with § 63.745(d), § 63.746(c), or § 63.747(d) through the use of a carbon adsorption system with a common exhaust stack for all of the carbon vessels, the owner or operator shall not operate the control device at an average control efficiency less than that required by § 63.745(d), § 63.746(c), or § 63.747(d) for three consecutive adsorption cycles.

(C) If complying with § 63.745(d), § 63.746(c), or § 63.747(d) through the use of a carbon adsorption system with individual exhaust stacks for each of the multiple carbon adsorber vessels, the owner or operator shall not operate any carbon adsorber vessel at an average control efficiency less than that required by § 63.745(d), § 63.746(c), or § 63.747(d) as calculated daily using a 7 to 30-day rolling average.

(D) If complying with § 63.745(d), § 63.746(c), or § 63.747(d) through the use of a nonregenerative carbon adsorber, in lieu of the requirements of paragraph (b)(7)(iii)(B) or (C) of this section, the owner or operator may replace the carbon in the carbon adsorber system with fresh carbon at a regular predetermined time interval as determined in accordance with paragraph (b)(2) of this section.

(iv) Owners or operators complying with § 63.745(d), § 63.746(c), or § 63.747(d) by capturing emissions through a room, enclosure, or hood shall install, calibrate, operate, and maintain the instrumentation necessary to measure continuously the site-specific operating parameter established in accordance with paragraph (b)(3) of this section whenever VOC and HAP from coating and stripper operations are vented through the capture device. The capture device shall not be operated at an average value greater than or less than (as appropriate) the operating parameter value established in accordance with paragraph (b)(3) of this section for any 3-hour period.

(7) Owners or operators complying with paragraph (b)(4) or (b)(5) of this section shall calculate the site-specific operating parameter value as the arithmetic average of the minimum operating parameter values that demonstrate compliance with § 63.745(d)and § 63.747(d) during the three test runs required by § 63.750(h)(2)(iv).

(8) All temperature monitoring equipment shall be installed, calibrated, maintained, and operated according to manufacturer's specifications. Every 3 months, facilities shall replace the temperature sensors or have the temperature sensors recalibrated. As an alternative, a facility may use a continuous emission monitoring system (CEMS) to verify that there has been no change in the destruction efficiency and effluent composition of the incinerator.

(9) Where an incinerator other than a catalytic incinerator is used, a thermocouple equipped with a continuous recorder shall be installed and continuously operated in the firebox or in the ductwork immediately downstream of the firebox in a position before any substantial heat exchange occurs.

(10) Where a catalytic incinerator is used, thermocouples, each equipped with a continuous recorder, shall be installed and continuously operated in the gas stream immediately before and after the catalyst bed.

(11) For each incinerator other than a catalytic incinerator, each owner or operator shall establish during each performance test during which compliance is demonstrated, including the initial performance test, the minimum combustion temperature as a site-specific operating parameter. This minimum combustion temperature shall be the operating parameter value that demonstrates compliance with § 63.745(d) and § 63.747(d).

(12) For each catalytic incinerator, each owner or operator shall establish during each performance test during which compliance is demonstrated, including the initial performance test, the minimum gas temperature upstream of the catalyst bed and the minimum gas temperature difference across the catalyst bed as site-specific operating parameters. These minimum temperatures shall be the operating parameter values that demonstrate compliance with § 63.745(d) and § 63.747(d).

(c) *Dry particulate filter, HEPA filter, and waterwash systems—primer and topcoat application operations.*

(1) Each owner or operator using a dry particulate filter system or a HEPA filter system to meet the requirements of § 63.745(g)(2) shall continuously monitor the pressure drop across the system.

(2) Each owner or operator using a waterwash system to meet the requirements of § 63.745(g)(2) shall continuously monitor the water flow rate through the system.

(d) *Particulate filters and waterwash booths—depainting operations.* Each owner or operator using a dry particulate filter or waterwash system in accordance with the requirements of § 63.746(b)(4) shall continuously monitor the pressure drop across the particulate filters or the water flow rate through the waterwash system.

(e) *Use of an alternative monitoring method.*

(1) *General.* Until permission to use an alternative monitoring method has been granted by the Administrator under this paragraph, the owner or operator of an affected source shall remain subject to the requirements of this section.

(2) After receipt and consideration of written application, the Administrator may approve alternatives to any monitoring methods or procedures of this section including, but not limited to, the following:

(i) Alternative monitoring requirements when the affected source is infrequently operated; or

(ii) Alternative locations for installing continuous monitoring systems when the owner or operator can demonstrate that installation at alternate locations will enable accurate and representative measurements; or

(iii) Alternatives to the American Society for Testing and Materials (ASTM) test methods or sampling procedures specified in this section.

(3) If the Administrator finds reasonable grounds to dispute the results obtained by an alternative monitoring method, requirement, or procedure, the Administrator may require the use of a method, requirement, or procedure specified in this section. If the results of the specified and the alternative method, requirement, or procedure do not agree, the results obtained by the specified method, requirement, or procedure shall prevail.

(4)(i) *Request to use alternative monitoring method.* An owner or operator who wishes to use an alternative monitoring method shall submit an application to the Administrator as described in paragraph (e)(4)(ii) of this section. The application may be submitted at any time provided that the monitoring method is not used to demonstrate compliance with a relevant standard or other requirement. If the alternative monitoring method is to be used to demonstrate compliance with a relevant standard, the application shall be submitted not later than with the site-specific test plan required in § 63.7(c) (if requested) or with the site-specific performance evaluation plan (if requested), or at least 60 days before the performance evaluation is scheduled to begin.

(ii) The application shall contain a description of the proposed alternative monitoring system and information justifying the owner's or operator's request for an alternative monitoring method, such as the technical or economic infeasibility, or the impracticality, of the affected source using the required method.

(iii) The owner or operator may submit the information required in this paragraph well in advance of the submittal dates specified in paragraph (e)(4)(i) of this section to ensure a timely review by the Administrator in order to meet the compliance demonstration date specified in this subpart.

(5) *Approval of request to use alternative monitoring method.*

(i) The Administrator will notify the owner or operator of his/her intention to deny approval of the request to use an alternative monitoring method within 60 calendar days after receipt of the original request and within 60 calendar days after receipt of any supplementary information that is submitted. If notification of intent to deny approval is not received within 60 calendar days, the alternative monitoring method is to be considered approved. Before disapproving any request to use an alternative monitoring method, the Administrator will notify the applicant of the Administrator's intent to disapprove the request together with:

(A) Notice of the information and findings on which the intended disapproval is based; and

(B) Notice of opportunity for the owner or operator to present additional information to the Administrator before final action on the request. At the time the Administrator notifies the applicant of his or her intention to disapprove the request, the Administrator will specify how much time the owner or operator will have after being notified of the intended disapproval to submit the additional information.

(ii) If the Administrator approves the use of an alternative monitoring method for an affected source under paragraph (e)(5)(i) of this section, the owner or operator of such source shall continue to use the alternative monitoring method until approval is received from the Administrator to use another monitoring method as allowed by paragraph (e) of this section.

(f) *Reduction of monitoring data.*

(1) The data may be recorded in reduced or nonreduced form (e.g., parts per million (ppm) pollutant and % O_2 or nanograms per Joule (ng/J) of pollutant).

(2) All emission data shall be converted into units specified in this subpart for reporting purposes. After conversion into units specified in this subpart, the data may be rounded to the same number of significant digits as used in this subpart to specify the emission limit (e.g., rounded to the nearest 1% overall reduction efficiency).

§ 63.752 Recordkeeping requirements.

(a) *General.* Each owner or operator of a source subject to this subpart shall fulfill all recordkeeping requirements specified in § 63.10 (a), (b), (d), and (f).

(b) *Cleaning operation.* Each owner or operator of a new or existing cleaning operation subject to this subpart shall record the information specified in paragraphs (b)(1) through (b)(5) of this section, as appropriate.

(1) The name, vapor pressure, and documentation showing the organic HAP constituents of each cleaning solvent used at the facility.

(2) For each cleaning solvent used in hand-wipe cleaning operations that complies with the composition requirements specified in § 63.744(b)(1) or for semi-aqueous cleaning solvents used for flush cleaning operations:

(i) The name of each cleaning solvent used;

(ii) All data and calculations that demonstrate that the cleaning solvent complies with one of the composition requirements; and

(iii) Annual records of the volume of each solvent used, as determined from facility purchase records or usage records.

(3) For each cleaning solvent used in hand-wipe cleaning operations that does not comply with the composition requirements in § 63.744(b)(1), but does comply with the vapor pressure requirement in § 63.744(b)(2):

(i) The name of each cleaning solvent used;

(ii) The composite vapor pressure of each cleaning solvent used;

(iii) All vapor pressure test results, if appropriate, data, and calculations used to determine the composite vapor pressure of each cleaning solvent; and

(iv) The amount (in gallons) of each cleaning solvent used each month at each operation.

(4) For each cleaning solvent used for the exempt hand-wipe cleaning operations specified in § 63.744(e) that does not conform to the vapor pressure or composition requirements of § 63.744(b):

(i) The identity and amount (in gallons) of each cleaning solvent used each month at each operation; and

(ii) A list of the processes set forth in § 63.744(e) to which the cleaning operation applies.

(5) A record of all leaks from enclosed spray gun cleaners identified pursuant to § 63.751(a) that includes for each leak found:

(i) Source identification;

(ii) Date leak was discovered; and

(iii) Date leak was repaired.

(c) *Primer and topcoat application operations—organic HAP and VOC.* Each owner or operator required to comply with the organic HAP and VOC content limits specified in § 63.745(c) shall record the information specified in paragraphs (c)(1) through (c)(6) of this section, as appropriate.

(1) The name and VOC content as received and as applied of each primer and topcoat used at the facility.

(2) For uncontrolled primers (organic HAP content less than 350 g/l (2.9 lb/gal) less water as applied and VOC content less than 350 g/l (2.9 lb/gal) less water and exempt solvents as applied) and topcoats that meet the organic HAP and VOC content limits in § 63.745(c)(1) through (c)(4) without averaging:

(i) The mass of organic HAP emitted per unit volume of coating as applied (less water) (H_i) and the mass of VOC emitted per unit volume of coating as applied (less water and exempt solvents) (G_i) for each coating formulation within each coating category used each month (as calculated using the procedures specified in § 63.750(c) and (e));

(ii) All data, calculations, and test results (including EPA Method 24 results) used in determining the values of H_i and G_i; and

(iii) The volume (gal) of each coating formulation within each coating category used each month.

(3) For "low HAP content" uncontrolled primers with organic HAP content less than or equal to 250 g/l (2.1 lb/gal) less water as applied and VOC content less than or equal to 250 g/l (2.1 lb/gal) less water and exempt solvents as applied:

(i) Annual purchase records of the total volume of each primer purchased; and

(ii) All data, calculations, and test results (including EPA Method 24 results) used in determining the organic HAP and VOC content as applied. These records shall consist of the manufacturer's certification when the primer is applied as received, or the data and calculations used to determine H_i if not applied as received.

(4) For primers and topcoats complying with the organic HAP or VOC content level by averaging:

(i) The monthly volume-weighted average masses of organic HAP emitted per unit volume of coating as applied (less water) (H_a) and of VOC emitted per unit volume of coating as applied (less water and exempt solvents) (G_a) for all coatings (as determined by the procedures specified in § 63.750(d) and (f)); and

(ii) All data, calculations, and test results (including EPA Method 24 results) used to determine the values of H_a and G_a.

(5) For primers and topcoats that are controlled by a control device other than a carbon adsorber:

(i) The overall control efficiency of the control system (as determined using the procedures specified in § 63.750(h)) and all test results, data, and calculations used in determining the overall control efficiency;

(ii) If an incinerator other than a catalytic incinerator is used, continuous records of the firebox temperature recorded under § 63.751(b)(9) and all calculated 3-hour averages of the firebox temperature; and

(iii) If a catalytic incinerator is used, continuous records of the temperature recorded under § 63.751(b)(10) and all calculated 3-hour averages of the recorded temperatures.

(6) For primer and topcoats that are controlled by a carbon adsorber:

(i) The overall control efficiency of the control system (as determined using the procedures specified in § 63.750(g)) and all test results, data, and calculations used in determining the overall control efficiency. The length of the rolling material balance period and all data and calculations used for determining this rolling period. The record of the certification of the accuracy of the device that measures the amount of HAP or VOC recovered; or

(ii) For nonregenerative carbon adsorbers, the overall control efficiency of the control system (as determined using the procedures specified in § 63.750(g)) and all test results, data, and calculations used in determining the overall control efficiency. The record of the carbon replacement time established as the site-specific operating parameter to demonstrate compliance.

(d) *Primer and topcoat application operations—inorganic HAP emissions.*

(1) Each owner or operator complying with § 63.745(g) for the control of inorganic HAP emissions from primer and topcoat application operations through the use of a dry particulate filter system or a HEPA filter system shall record the pressure drop across the operating system once each shift during which coating operations occur.

(2) Each owner or operator complying with § 63.745(g) through the use of a waterwash system shall record the water flow rate through the operating system once each shift during which coating operations occur.

(3) This log shall include the acceptable limit(s) of pressure drop or water flow rate, as applicable, as specified by the filter or booth manufacturer or in locally prepared operating procedures.

(4) If 3-stage or HEPA filters are used at a new facility to control emissions from chromated primers or topcoats, records shall be kept of documentation supplied by the filter manufacturer that the filters in use meet the 3-stage or HEPA filter requirements.

(e) *Depainting operations.* Each owner or operator subject to the depainting standards specified in § 63.746 shall record the information specified in paragraphs (e)(1) through (e)(7) of this section, as appropriate.

(1) *General.* For all chemical strippers used in the depainting operation:

(i) The name of each chemical stripper; and

(ii) Monthly volumes of each organic-HAP containing chemical stripper used.

(2) For HAP-containing chemical strippers that are controlled by a carbon adsorber:

(i) The overall control efficiency of the control system (as determined using the procedures specified in § 63.750(g)) and all test results, data, and calculations used in determining the overall control efficiency. The length of the rolling material balance period and all data and calculations used for determining this rolling period. The record of the certification of the accuracy of the device that measures the amount of HAP or VOC recovered; or

(ii) For nonregenerative carbon adsorbers, the overall control efficiency of the control system (as determined using the procedures specified in § 63.750(g)) and all test results, data, and calculations used in determining the overall control efficiency. The record of the carbon replacement time established as the site-specific operating parameter to demonstrate compliance.

(3) For HAP-containing chemical strippers that are controlled by a control device other than a carbon adsorber:

(i) The overall control efficiency of the control system (as determined using the procedures specified in § 63.750(h)) and all test results, data, and calculations used in determining the overall control efficiency;

(4) For each type of aircraft depainted at the facility, a listing of the parts, subassemblies, and assemblies normally removed from the aircraft before depainting. Prototype, test model or aircraft that exist in low numbers (i.e., less than 25 aircraft of any one type) are exempt from this requirement.

(5) *Non-chemical based equipment.* If dry media blasting equipment is used to comply with the organic HAP emission limit specified in § 63.746(b)(1):

(i) The names and types of non-chemical based equipment; and

(ii) For periods of malfunction,

(A) The non-chemical method or technique that malfunctioned;

(B) The date that the malfunction occurred;

(C) A description of the malfunction;

(D) The methods used to depaint aerospace vehicles during the malfunction period;

(E) The dates that these methods were begun and discontinued; and

(F) The date that the malfunction was corrected.

(6) *Spot stripping and decal removal.* For spot stripping and decal removal, the volume of organic HAP-containing chemical stripper used, the annual average volume of organic HAP-containing stripper used per aircraft, the annual number of aircraft stripped, and all data and calculations used.

(7) *Inorganic HAP emissions.* The actual pressure drop across the particulate filters or the visual continuity of the water curtain and water flow rate for waterwash systems, once each shift in which the depainting process is in operation. This log shall include the acceptable limit(s) of the pressure drop as specified by the filter manufacturer and the visual continuity of the water curtain and water flow rate for waterwash systems as specified by the booth manufacturer or in locally prepared operating procedures.

(f) *Chemical milling maskant application operations.* Each owner or operator seeking to comply with the organic HAP and VOC content limits for the chemical milling maskant application operation, as specified in § 63.747(c), shall record the information specified in paragraphs (f)(1) through (f)(4) of this section, as appropriate.

(1) For uncontrolled chemical milling maskants that meet the organic HAP or VOC content limit without averaging:

(i) The mass of organic HAP emitted per unit volume of chemical milling maskant as applied (less water) (H_i) and the mass of VOC emitted per unit volume of chemical milling maskant as applied (less water and exempt solvents) (G_i) for each chemical milling maskant formulation used each month (as determined by the procedures specified in § 63.750 (k) and (m));

(ii) All data, calculations, and test results (including EPA Method 24 results) used in determining the values of H_i and G_i; and

(iii) The volume (gal) of each chemical milling maskant formulation used each month.

(2) For chemical milling maskants complying with the organic HAP or VOC content level by averaging:

(i) The monthly volume-weighted average masses of organic HAP emitted per unit volume of chemical milling maskant as applied (less water) (H_a) and of VOC emitted per unit volume of chemical milling maskant as applied (less water and exempt solvents) (G_a) for all chemical milling maskants (as determined by the procedures specified in § 63.750 (l) and (n)); and

(ii) All data, calculations, and test results (including EPA Method 24 results) used to determine the values of H_a and G_a.

(3) For chemical milling maskants that are controlled by a carbon adsorber:

(i) The overall control efficiency of the control system (as determined using the procedures specified in § 63.750(g)) and all test results, data, and calculations used in determining the overall control efficiency. The length of the rolling material balance period and all data and calculations used for determining this rolling period. The record of the certification of the accuracy of the device that measures the amount of HAP or VOC recovered; or

(ii) For nonregenerative carbon adsorbers, the overall control efficiency of the control system (as determined using the procedures specified in § 63.750(g)) and all test results, data, and calculations used in determining the overall control efficiency. The record of the carbon replacement time established as the site-specific operating parameter to demonstrate compliance.

(4) For chemical milling maskants that are controlled by a control device other than a carbon adsorber:

(i) The overall control efficiency of the control system (as determined using the procedures specified in § 63.750(h)) and all test results, data, and calculations used in determining the overall control efficiency;

(ii) If an incinerator other than a catalytic incinerator is used, continuous records of the firebox temperature recorded under § 63.751(b)(9) and all calculated 3-hour averages of the firebox temperature; and

(iii) If a catalytic incinerator is used, continuous records of the temperature recorded under § 63.751(b)(10) and all calculated 3-hour averages of the recorded temperatures.

§ 63.753 Reporting requirements.

(a)(1) Except as provided in paragraphs (a)(2) and (a)(3) of this section, each owner or operator subject to this subpart shall fulfill the requirements contained in § 63.9 (a) through (e) and (h) through (j), Notification requirements, and § 63.10 (a), (b), (d), and (f), Recordkeeping and reporting requirements, of the General Provisions, 40 CFR part 63, subpart A, except that the initial notification requirements for new or reconstructed affected sources in § 63.9(b) (3) through (5) shall not apply. In addition to the requirements of § 63.9(h), the notification of compliance status shall include:

(i) Information detailing whether the source has operated within the specified ranges of its designated operating parameters.

(ii) For each coating line, where averaging will be used along with the types and quantities of coatings the facility expects to use in the first year of operation. Averaging schemes shall be approved by the Administrator or delegated State authority and shall be included as part of the facility's title V or part 70 permit.

(2) For the purposes of this subpart, a title V or part 70 permit application may be used in lieu of the initial notification required under § 63.9(b)(2), provided the same information is contained in the permit application as required by § 63.9(b)(2), and the State to which the permit application has been submitted has an approved operating permit program under part 70 of this chapter and has received delegation of authority from the EPA. Permit applications shall be submitted by the same due dates as those specified for the initial notifications.

(3) For the purposes of this subpart, the Administrator will notify the owner or operator in writing of approval or disapproval of the request for an adjustment to a particular time period or postmark deadline submitted under § 63.9(i) within 30 calendar days of receiving sufficient information to evaluate the request, rather than 15 calendar days as provided for in § 63.9(i)(3).

(b) *Cleaning operation.* Each owner or operator of a cleaning operation subject to this subpart shall submit the following information:

(1) Semiannual reports occurring every 6 months from the date of the notification of compliance status that identify:

(i) Any instance where a noncompliant cleaning solvent is used for a non-exempt hand-wipe cleaning operation;

(ii) A list of any new cleaning solvents used for hand-wipe cleaning in the previous 6 months and, as appropriate, their composite vapor pressure or notification that they comply with the composition requirements specified in § 63.744(b)(1);

(iii) Any instance where a noncompliant spray gun cleaning method is used;

(iv) Any instance where a leaking enclosed spray gun cleaner remains unrepaired and in use for more than 15 days; and

(v) If the operations have been in compliance for the semiannual period, a statement that the cleaning operations have been in compliance with the applicable standards. Sources shall also submit a statement of compliance signed by a responsible company official certifying that the facility is in compliance with all applicable requirements.

(c) *Primer and topcoat application operations.* Each owner or operator of a primer or topcoat application operation subject to this subpart shall submit the following information:

(1) Semiannual reports occurring every 6 months from the date of the notification of compliance status that identify:

(i) For primers and topcoats where compliance is not being achieved through the use of averaging or a control device, each value of H_i and G_i, as recorded under § 63.752(c)(2)(i), that exceeds the applicable organic HAP or VOC content limit specified in § 63.745(c);

(ii) For primers and topcoats where compliance is being achieved through the use of averaging, each value of H_a and G_a, as recorded under § 63.752(c)(4)(i), that exceeds the applicable organic HAP or VOC content limit specified in § 63.745(c);

(iii) If incinerators are used to comply with the standards, all periods when the 3-hour average combustion temperature(s) is (are) less than the average combustion temperature(s) established under § 63.751(b) (11) or (12) during the most recent performance test during which compliance was demonstrated;

(iv) If a carbon adsorber is used;

(A) each rolling period when the overall control efficiency of the control system is calculated to be less than 81%, the initial material balance calculation, and any exceedances as demonstrated through the calculation; or,

(B) for nonregenerative carbon adsorbers, submit the design evaluation, the continuous monitoring system performance report, and any excess emissions as demonstrated through deviations of monitored values.

(v) For control devices other than an incinerator or carbon adsorber, each exceedance of the operating parameter(s) established for the control device under the initial performance test during which compliance was demonstrated;

(vi) All times when a primer or topcoat application operation was not immediately shut down when the pressure drop across a dry particulate filter or HEPA filter system, or the water flow rate through a waterwash system, as appropriate, was outside the limit(s) specified by the filter or booth manufacturer or in locally prepared operating procedures;

(vii) If the operations have been in compliance for the semiannual period, a statement that the operations have been in compliance with the applicable standards; and,

(2) Annual reports beginning 12 months after the date of the notification of compliance status listing the number of times the pressure drop or water flow rate for each dry filter or waterwash system, as applicable, was outside the limit(s) specified by the filter or booth manufacturer or in locally prepared operating procedures.

(d) *Depainting operation.* Each owner or operator of a depainting operation subject to this subpart shall submit the following information:

(1) Semiannual reports occurring every 6 months from the date of the notification of compliance status that identify:

(i) Any 24-hour period where organic HAP were emitted from the depainting of aerospace vehicles, other than from the exempt operations listed in § 63.746 (a), (b)(3), and (b)(5).

(ii) Any new chemical strippers used at the facility during the reporting period;

(iii) The organic HAP content of these new chemical strippers;

(iv) For each chemical stripper that undergoes reformulation, its organic HAP content;

(v) Any new non-chemical depainting technique in use at the facility since the notification of compliance status or any subsequent semiannual report was filed;

(vi) For periods of malfunctions:

(A) The non-chemical method or technique that malfunctioned;

(B) The date that the malfunction occurred;

(C) A description of the malfunction;

(D) The methods used to depaint aerospace vehicles during the malfunction period;

(E) The dates that these methods were begun and discontinued; and

(F) The date that the malfunction was corrected;

(vii) All periods where a non-chemical depainting operation subject to § 63.746 (b)(2) and (b)(4) for the control of inorganic HAP emissions was not immediately shut down when the pressure drop or water flow rate was outside the limit(s) specified by the filter or booth manufacturer or in locally prepared operational procedures;

(viii) A list of new and discontinued aircraft models depainted at the facility over the last 6 months and a list of the parts normally removed for depainting for each new aircraft model being depainted; and

(ix) If the depainting operation has been in compliance for the semiannual period, a statement signed by a responsible company official that the operation was in compliance with the applicable standards.

(2) Annual reports occurring every 12 months from the date of the notification of compliance status that identify:

(i) The average volume per aircraft of organic HAP-containing chemical strippers used for spot stripping and decal removal operations if it exceeds the limits specified in § 63.746(b)(3); and

(ii) The number of times the pressure drop limit(s) for each filter system or the number of times the water flow rate limit(s) for each waterwash system were outside the limit(s) specified by the filter or booth manufacturer or in locally prepared operating procedures.

(3) Where a control device is used to control organic HAP emissions, semiannual reports that identify:

(i) If a carbon adsorber is used,

(A) each rolling period when the overall control efficiency of the control system is calculated to be less than 81% for existing systems or less than 95% for new systems, the initial material balance calculation, and any exceedances as demonstrated through the calculation; or,

(B) for nonregenerative carbon adsorbers, submit the design evaluation, the continuous monitoring system performance report, and any excess emissions as demonstrated through deviations of monitored values.

(ii) For control devices other than a carbon adsorber, each exceedance of the operating parameter(s) established for the control device under the initial performance test during which compliance was demonstrated;

(iii) Descriptions of any control devices currently in use that were not listed in the notification of compliance status or any subsequent report.

(e) *Chemical milling maskant application operation.* Each owner or operator of a chemical milling maskant application operation subject to this subpart shall submit semiannual reports occurring every 6 months from the date of the notification of compliance status that identify:

(1) For chemical milling maskants where compliance is not being achieved through the use of averaging or a control device, each value of H_i and G_i, as recorded under § 63.752(f)(1)(i), that exceeds the applicable organic HAP or VOC content limit specified in § 63.747(c);

(2) For chemical milling maskants where compliance is being achieved through the use of averaging, each value of H_a and G_a, as recorded under § 63.752(f)(2)(i), that exceeds the applicable organic HAP or VOC content limit specified in § 63.747(c);

(3) Where a control device is used,

(i) If incinerators are used to comply with the standards, all periods when the 3-hour average combustion temperature(s) is (are) less than the average combustion temperature(s) established under § 63.751(b) (11) or (12) during the most recent performance test during which compliance was demonstrated;

(ii) If a carbon adsorber is used,

(A) each rolling period when the overall control efficiency of the control system is calculated to be less than 81%, the initial material balance calculation, and any exceedances as demonstrated through the calculation; or,

(B) for nonregenerative carbon adsorbers, submit the design evaluation, the continuous monitoring system performance report, and any excess emissions as demonstrated through deviations of monitored values.

(iii) For control devices other than an incinerator or carbon adsorber, each exceedance of the operating parameter(s) established for the control device under the initial performance test during which compliance was demonstrated;

(4) All chemical milling maskants currently in use that were not listed in the notification of compliance status or any other subsequent semiannual report;

(5) Descriptions of any control devices currently in use that were not listed in the notification of compliance status or any subsequent report; and

(6) If the operations have been in compliance for the semiannual period, a statement that the chemical milling maskant application operation has been in compliance with the applicable standards.

Indian Child Protection and Family Violence Prevention; Proposed Rule

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 63

RIN 1076–AC 97

Indian Child Protection and Family Violence Prevention

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Proposed rule.

SUMMARY: The Bureau of Indian Affairs (BIA) is proposing to establish regulations as mandated by the Indian Child Protection and Family Violence Prevention Act that prescribe minimum standards of character and suitability of employment for individuals whose duties and responsibilities allow them regular contact with or control over Indian children, and establish the method for distribution of funds appropriated for Indian child protection and family violence prevention programs, including appropriate caseload standards and staffing requirements for these tribally operated programs.

DATES: Comments must be received on or before October 31, 1995.

ADDRESSES: Mail comments to Betti A. Delrow, Child Protection Coordinator, Department of the Interior, Bureau of Indian Affairs, 1849 C St. NW, Mail Stop 4603–MIB, Washington, DC 20240; OR, hand deliver them to Room 4603 at the above address.

FOR FURTHER INFORMATION CONTACT: Joann Sebastian Morris, Acting Director, Office of Tribal Services, telephone (202) 208–3463.

SUPPLEMENTARY INFORMATION:

Background

In enacting the Indian Child Protection and Family Violence Prevention Act (Act), Pub. L. 101–630, 104 Stat. 4544, 25 U.S.C. 3201–3211, the Congress recognized there is no resource more vital to the continued existence and integrity of Indian tribes than their children and that the United States has a direct interest, as trustee, in protecting Indian children who are members of, or are eligible for membership in, an Indian tribe.

The purpose of these proposed regulations is:

- To propose minimum standards of character and suitability for employment for individuals whose duties and responsibilities allow them regular contact with or control over Indian children as required by Title IV, Section 408 of the Act, 25 U.S.C. 3207(b).
- To propose the method for distribution of funds to support tribally operated programs to protect Indian children and reduce the incidents of family violence in Indian country as authorized by Title IV, Section 411 of the Act, 25 U.S.C. 3210(f)(3).
- To propose appropriate caseload standards and staffing requirements for Indian child protection and family violence prevention programs as required by Title IV, Section 411 of the Act, 25 U.S.C. 3210(f)(2).

These proposed regulations were developed in consultation with tribes. A working group of tribal and BIA representatives developed a draft of each section which was then presented to participants at a national tribal consultation meeting in Oklahoma City, Oklahoma, August 31 through September 1, 1994.

The transcript of the national tribal consultation meeting indicates that, after lengthy discussion, participants accepted a two part formula in which 49% of appropriated funds are distributed equally to all tribes and 49% is distributed on a per capita basis according to the population of children residing in the service area (25 U.S.C. 3210(f)(3) a & b)), with a two percent set aside for special circumstances (25 U.S.C. 3210(f)(3)(d)). In any year appropriations do not exceed fifty percent of the authorization, funds will be equitably distributed (25 U.S.C. 3210(f)(5)), with a two percent set aside for special circumstances (25 U.S.C. 3210(f)(3)(d)).

Participants agreed that the proposed formula should *not* include projected number of cases per month because many tribes have not had the opportunity to develop statistics. It was recommended the proposed formula serve as an interim formula until the BIA has developed baseline data using the standard assessment methodology developed for the Indian Child Welfare Act program. It was also recommended that Indian Child Protection and Family Violence Prevention Program grants be combined with ICWA grants to avoid duplication of effort and paperwork.

Participants acknowledged that the Act requires caseload standards be developed as a part of the funding formula, but indicated that caseload standards do not represent the variety of activities contemplated by the Act, e.g., prevention and public education. Participants agreed that caseload standards can indicate whether funding is sufficient to support a child protection and family violence prevention program, but such standards should dictate program design and staffing requirements at the local level.

Representatives of the 1994 tribal consultation meeting were then asked to assist the tribal/BIA working group with the revision of the draft regulations. The revision was completed October 23, 1994, and rewritten in "Plain English" in January, 1995.

It is with appreciation to the many tribal representatives who gave of their time and experience that these proposed regulations are published.

Publication of the proposed rule by the Department of the Interior (Department) provides the public an opportunity to participate in the rulemaking process. Interested persons may submit written comments regarding the proposed rule to the location identified in the "addresses" section of this document.

The Department has certified to the Office of Management and Budget (OMB) that these proposed regulations meet the applicable standards provided in sections 2(a) and 2(b)(2) of Executive Order 12778.

This proposed rule is a significant regulatory action under Executive Order 12866 and requires review by the Office of Management and Budget.

Depending upon the number of positions for which determinations of suitability for employment are required, the cost of background investigations (including the current $22 fee for each Federal Bureau of Investigation fingerprint check) may have an economic effect on each tribal government and tribal organization under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) and require additional outlays by tribal governments, tribal organizations, and the Federal Government. However, these costs are not projected to exceed $100,000 and are minimal when compared to the long-term societal and economic impact on families and communities when children are the victims of crimes of violence, sexual assault, molestation, exploitation, contact or prostitution.

In accordance with Executive Order 12630, the Department has determined that this proposed rule does not have "significant takings" implications. The proposed rule does not pertain to "taking" of private property interests, nor does it impact private property.

The Department has determined that this proposed rule does not have significant federalism effects under Executive Order 12612 and will not interfere with the roles, rights and responsibilities of states.

The Department has determined that this proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement is required pursuant to the National Environmental Policy Act of 1969.

The information collection requirements contained in this part will be approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* This information is necessary to conduct background investigations of individuals in positions that involve regular contact with or control over Indian children. The information collected includes an annual program report and statistical data as required by the contract or grant award agreement.

Public reporting for this information collection is estimated to average 32 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the information collected, and completing the required reports.

Drafting Information

The primary authors of this document are Judy A. Baggett, Division of Social Services, Office of Tribal Services, Janice Ruffin, Division of Law Enforcement Services, Bureau of Indian Affairs, Department of Interior, and Bettie Rushing, Division of Tribal Government Services.

List of Subjects in 25 CFR Part 63

Child welfare, Employment, Indians, Maternal and child health.

For the reasons given in the preamble, part 63 of title 25, chapter I of the Code of Federal Regulations is proposed to be added as set forth below.

PART 63—INDIAN CHILD PROTECTION AND FAMILY VIOLENCE PREVENTION

Subpart A—Purpose, Policy, and Definitions

Sec.
63.1 Purpose.
63.2 Policy.
63.3 Definitions.
63.4–63.9 [Reserved].

Subpart B—Minimum Standards of Character and Suitability for Employment

63.10 Purpose.
63.11 What is a determination of suitability for employment and efficiency of service?
63.12 What are minimum standards of character?
63.13 Who is required to determine suitability for employment and efficiency of service?
63.14 What positions require a determination of suitability for employment or retention?
63.15 What questions should an employer ask?
63.16 Who conducts the background investigation and prepares determinations of suitability for employment?
63.17 How does an employer determine suitability for employment and efficiency of service?
63.18 Are the requirements for Bureau of Indian Affairs adjudication different from the requirements for Indian tribes and tribal organizations?
63.19 When should an employer deny employment or dismiss an employee?
63.20 What should an employer do if an individual has been charged with an offense but the charge is pending or no disposition has been made by a court?
63.21 Are there other factors that may disqualify an applicant, volunteer or employee from placement in a sensitive position?
63.22 What rights does an applicant, volunteer or employee have during this process?
63.23 What protections must employers provide to applicants, volunteers and employees?
63.24–63.29 [Reserved].

Subpart C—Indian Child Protection and Family Violence Prevention Program

63.30 What is the purpose of the Indian child protection and family violence prevention program?
63.31 Can both the Bureau of Indian Affairs and tribes operate Indian child protection and family violence prevention programs?
63.32 Under what authority are Indian child protection and family violence prevention funds awarded?
63.33 What must an application for Indian child protection and family violence funds include?
63.34 How are Indian child protection and family violence prevention program funds distributed?
63.35 How may Indian child protection and family violence prevention program funds be used?
63.36 What are the special requirements for Indian child protection and family violence prevention programs?
63.37–63.50 [Reserved].

Authority: 5 U.S.C. 301; 25 U.S.C. 2, 9, 13, 200, 3201 *et seq.*

Subpart A—Purpose, Policy, and Definitions

§ 63.1 Purpose.

The purpose of these regulations is to prescribe minimum standards of character and suitability for employment for individuals whose duties and responsibilities allow them regular contact with or control over Indian children, and to establish the method for distribution of funds to support tribally operated programs to protect Indian children and reduce the incidents of family violence in Indian country as authorized by the Indian Child Protection and Family Violence Prevention Act of 1990, Pub. L. 101–630, 104 Stat. 4544, 25 U.S. C. 3201–3211.

§ 63.2 Policy.

In enacting the Indian Child Protection and Family Violence Prevention Act, the Congress recognized there is no resource more vital to the continued existence and integrity of Indian tribes than their children and that the United States has a direct interest, as trustee, in protecting Indian children who are members of, or are eligible for membership in, an Indian tribe. The minimum standards of character and suitability of employment for individuals ensure that Indian children are protected, and the Indian child protection and family violence prevention programs will emphasize the unique values of Indian culture and community involvement in the prevention and treatment of child abuse, child neglect and family violence.

§ 63.3 Definitions.

Bureau means the Bureau of Indian Affairs of the Department of the Interior;

Child means an individual who is not married, and has not attained 18 years of age.

Child abuse includes but is not limited to any case in which a child is dead, or exhibits evidence of skin bruising, bleeding, malnutrition, failure to thrive, burns, fracture of any bone; subdural hematoma, or soft tissue swelling, and this condition is not justifiably explained or may not be the product of an accidental occurrence; and any case in which a child is subjected to sexual assault, sexual molestation, sexual exploitation, sexual contact, or prostitution.

Child neglect includes but is not limited to, negligent treatment or maltreatment of a child by a person, including a person responsible for the child's welfare, under circumstances which indicate that the child's health or welfare is harmed or threatened.

Family violence means any act, or threatened act, of violence, including any forceful detention of an individual, which results, or threatens to result, in physical or mental injury, and is committed by an individual against another individual to whom such person is, or was, related by blood or marriage or otherwise legally related, or with whom such person is, or was, residing.

Indian means any individual who is a member of an Indian tribe.

Indian child means any unmarried person who is under age eighteen and is either a member of an Indian tribe or eligible for membership in an Indian tribe and is the biological child of a member of an Indian tribe.

Indian country The term "Indian country" is used instead of "Indian reservation" for consistency. Indian country means:

(1) All land within the limits of any Indian reservation under the jurisdiction of the United States Government, notwithstanding the issuance of any patent, and, including rights-of-way running through the reservation;

(2) All dependent Indian communities within the borders of the United States whether within the original or subsequently acquired territory thereof; and

(3) All Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through the same.

Indian reservation means any Indian reservation, public domain Indian allotment, former Indian reservation in Oklahoma, or lands held by incorporated Native groups, regional corporations, or village corporations under the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 *et seq.*).

Indian tribe means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 *et seq.*) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

Inter-tribal consortium means a partnership between an Indian tribe or tribal organization of an Indian tribe, and one or more Indian tribes or tribal organizations of one or more Indian tribes.

Must is used in place of shall and indicates a mandatory or imperative act or requirement.

Local child protective services agency is an agency of the Federal Government, state, or Indian tribe that has the primary responsibility for child protection on any Indian reservation, or within any community in Indian country.

Local law enforcement agency is that Federal, tribal, or state law enforcement agency that has primary responsibility for the investigation of an instance of alleged child abuse within the involved Indian jurisdiction.

Person responsible for a child's welfare is any person who has legal or other recognized duty for the care and safety of a child, and may include any employee or volunteer of a children's residential facility, and any person providing out-of-home care, education, or services to children.

Related assistance means the counseling and self-help services for abusers, victims, and dependents in family violence situations; referrals for appropriate health-care services (including alcohol and drug abuse treatment); and may include food, clothing, child care, transportation, and emergency services for victims of family violence and their dependents.

Secretary means the Secretary of the Interior.

Service means the Indian Health Service of the Department of Health and Human Services.

Shelter means the temporary refuge and related assistance in compliance with applicable Federal and tribal laws and regulations governing the provision, on a regular basis, of shelter, safe homes, meals, and related assistance to victims of family violence or their dependents.

Tribal organization means the recognized governing body of any Indian tribe; any legally established organization of Indians which is controlled, sanctioned, or chartered by such governing body or which is democratically elected by the adult members of the Indian community to be served by such organization and which includes the maximum participation of Indians in all phases of its activities: *Provided,* That in any case where a contract is let or grant made to an organization to perform services benefitting more than one Indian tribe, the approval of each such Indian tribe must be a prerequisite to the letting or making of such contract or grant.

§ 63.4–63.9 [Reserved]

Subpart B Minimum Standards of Character and Suitability for Employment

§ 63.10 Purpose.

The purpose of this part is to establish:

(a) Procedures for determining suitability for employment and efficiency of service as mandated by the Indian Child Protection and Family Violence Prevention Act; and

(b) *Minimum standards of character* to ensure that individuals having regular contact with or control over Indian children have not been convicted of certain types of crimes or acted in a manner that placed others at risk or raised questions about their trustworthiness.

§ 63.11 What is a determination of suitability for employment and efficiency of service?

(a) *Determinations of suitability measure the fitness or eligibility* of an applicant, volunteer, or employee for a particular position. Suitability for employment does not evaluate an applicant's education, skills, knowledge, experience, etc. Rather, it requires that the employer investigate the background of each applicant, volunteer, and employee to:

(1) Determine the degree of risk the applicant, volunteer, or employee brings to the position; and

(2) Certify that the applicant's, volunteer's, or employee's past conduct would not interfere with his/her performance of duties, nor would it create an immediate or long-term risk for any Indian child.

(b) *Efficiency of service* is the employer's verification that the applicant or employee is able to perform the duties and responsibilities of the position, and his/her presence on the job will not inhibit other employees or the agency from performing their functions.

§ 63.12 What are minimum standards of character?

Minimum standards of character are established by an employer and refer to identifiable character traits and past conduct. An employer may use character traits and past conduct to determine whether an applicant, volunteer, or employee can effectively perform the duties of a particular position without risk of harm to others. Minimum standards of character ensure that no applicant, volunteer, or employee will be placed in a position with regular contact with or control over Indian children if he/she has been found guilty of or entered a plea of nolo contendere or guilty to any offense under Federal, state, or tribal law involving crimes of violence, sexual assault, molestation, exploitation, contact or prostitution, or crimes against persons.

§ 63.13 Who is required to determine suitability for employment and efficiency of service?

(a) *The Bureau of Indian Affairs* must compile a list of all authorized positions which involve regular contact with or control over Indian children; investigate the character of each individual who is employed, or is being considered for employment; and, prescribe minimum standards of character which each individual must meet to be appointed to such positions.

(b) All Indian tribes or tribal organizations receiving funds under the

authority of the Indian Self-Determination and Education Assistance Act or the Tribally Controlled Schools Act of 1988 must conduct a background investigation for individuals whose duties and responsibilities would allow them regular contact with or control over Indian children, and employ only individuals who meet standards of character that are no less stringent than those prescribed for the Bureau of Indian Affairs.

§ 63.14 What positions require a determination of suitability for employment or retention?

All positions that allow an applicant, employee, or volunteer regular contact with or control over Indian children are subject to a background investigation and determination of suitability for employment.

§ 63.15 What questions should an employer ask?

Employment applications must:

(a) Ask whether the applicant, volunteer, or employee has been arrested or convicted of a crime involving a child, violence, sexual assault, molestation, exploitation, contact or prostitution, or crimes against persons;

(b) Ask the disposition of the arrest or charge;

(c) Require that an applicant, volunteer or employee sign, under penalty of perjury, a statement verifying the truth of all information provided in the employment application; and,

(d) Inform the applicant, volunteer or employee that a criminal history record check is a condition of employment and require the applicant, volunteer or employee to consent, in writing, to a record check.

§ 63.16 Who conducts the background investigation and prepares determinations of suitability for employment?

(a) The Bureau of Indian Affairs must use the OPM to conduct background investigations for Federal employees. The BIA must designate qualified security personnel to adjudicate the results of background investigations.

(b) Indian tribes and tribal organizations may conduct their own background investigations, contract with private firms, or request the United States Office of Personnel Management (OPM) to conduct an investigation. The investigation should cover the past five years of the individual's employment, education, etc.

§ 63.17 How does an employer determine suitability for employment and efficiency of service?

(a) Adjudication is the process employers use to determine suitability for employment and efficiency of service. The adjudication process protects the interests of the employer and the rights of applicants and employees. Adjudication requires uniform evaluation to ensure fair and consistent judgment.

(b) Each case is judged on its own merits. All available information, both favorable and unfavorable, must be considered and assessed in terms of accuracy, completeness, relevance, seriousness, overall significance, and how similar cases have been handled in the past.

(c) An adjudicating official conducts the adjudication. Each Federal agency, Indian tribe, or tribal organization must appoint an adjudicating official, who must first have been the subject of a favorable background investigation.

(1) Indian tribes and tribal organizations must ensure that persons charged with the responsibility for adjudicating employee background investigations are well-qualified and trained.

(2) Indian tribes and tribal organizations should also ensure that individuals who are not trained to adjudicate these types of investigations are supervised by someone who is experienced and receive the training necessary to perform the task.

(d) Each adjudicating official must be thoroughly familiar with all laws, regulations, and criteria involved in making a determination for suitability.

(e) The adjudicating official must review the background investigation to determine the character, reputation, and trustworthiness of the individual. At a minimum, the background investigation must:

(1) Review each security investigation form and employment application and compare the information provided;

(2) Review the results of written record searches requested from local law enforcement agencies, former employers, former supervisors, employment references, and schools; and

(3) Review the results of the fingerprint charts maintained by the Federal Bureau of Investigation or other law enforcement information maintained by other agencies.

(f) Relevancy is a key objective in evaluating investigative data. The adjudicating official must consider prior conduct in light of:

(1) The nature and seriousness of the conduct in question;

(2) The recency and circumstances surrounding the conduct in question;

(3) The age of the individual at the time of the incident;

(4) Societal conditions that may have contributed to the nature of the conduct;

(5) The probability that the individual will continue the type of behavior in question;

(6) The individual's commitment to rehabilitation and a change in the behavior in question; and

(7) The degree of public trust and the possibility the public would be placed at risk if the individual is appointed to the position.

§ 63.18 Are the requirements for Bureau of Indian Affairs adjudication different from the requirements for Indian tribes and tribal organizations?

(a) Yes. In addition to the minimum requirements for background investigations found in § 63.12, Bureau of Indian Affair's adjudicating officials must review the results of searches by state human services agencies, the OPM National Agency Check and Inquiries plus Credit, which includes a search of the OPM Security/Suitability Investigations Index (SII) and the Defense Clearance and Investigations Index (DCII).

(b) All Bureau of Indian Affairs employees who have regular contact with or control over Indian children must be reinvestigated every five years during their employment in that or any other position which allows regular contact with or control over Indian children.

§ 63.19 When should an employer deny employment or dismiss an employee?

(a) An employer may deny employment or dismiss an employee when an individual has been found guilty of or entered a plea of guilty or nolo contendere to any Federal, state or tribal offense involving a crime of violence, sexual assault, molestation, child exploitation, sexual contact, prostitution, or crimes against persons.

(b) An employer may deny employment or dismiss an employee when an individual has been convicted of an offense involving a child victim, sex crime or violence against a person.

§ 63.20 What should an employer do if an individual has been charged with an offense but the charge is pending or no disposition has been made by a court?

(a) The employer may deny the applicant employment until the charge has been resolved.

(b) The employer may deny the employee any on-the-job contact with children until the charge is resolved.

(c) The employer may detail or reassign the employee to other duties that do not involve contact with children.

(d) The employer may place the employee on administrative leave until the court has disposed of the charge.

§ 63.21 Are there other factors that may disqualify an applicant, volunteer or employee from placement in a sensitive position?

(a) An applicant, volunteer, or employee may be disqualified from consideration or continuing employment if it is found that:

(1) The individual's misconduct or negligence interfered with or affected a prior employer's performance of duties and responsibilities.

(2) The individual's criminal or dishonest conduct affected the individual's performance or the performance of others.

(3) The individual made an intentional false statement, deception or fraud on an examination or in obtaining employment.

(4) The individual has refused to furnish testimony or cooperate with an investigation.

(5) The individual's alcohol or substance abuse is of a nature and duration that suggests the individual could not perform the duties of the position or would directly threaten the property or safety of others.

(6) The individual has illegally used narcotics, drugs, or other controlled substances without evidence of substantial rehabilitation.

(7) The individual knowingly and willfully engaged in an act or activities designed to disrupt government programs.

(b) An individual must be disqualified for Federal employment if any statutory or regulatory provision would prevent his/her lawful employment.

(c) An employer may still certify that the individual is suitable for employment in a non-sensitive or sensitive position having no contact with children if the prior conduct would not interfere with performance of duties and the position does not involve a high degree of public trust or potential for risk for Indian children.

§ 63.22 What rights does an applicant, volunteer, or employee have during this process?

(a) The applicant, volunteer, or employee must be provided an opportunity to explain, deny, or refute unfavorable and incorrect information gathered in an investigation, before the adjudication is final. The applicant, volunteer, or employee should receive a written summary of all derogatory information and be informed of the process for explaining, denying, or refuting unfavorable information.

(b) Employers and adjudicating officials must *not* release the actual background investigative report to an applicant, volunteer, or employee. However, they may issue a written summary of the derogatory information.

(c) The applicant, volunteer, or employee who is the subject of a background investigation may obtain a copy of the reports from the originating (Federal, state, or other tribal) agency and challenge the accuracy and completeness of any information maintained by that agency.

(d) The results of an investigation cannot be used for any purpose other than to determine suitability for employment in a position that involves regular contact with or control over Indian children.

(e) Investigative reports contain information of a highly personal nature and should be maintained confidentially and secured in locked files. Investigative reports should be seen only by those officials who in performing their official duties need to know the information contained in the report.

§ 63.23 What protections must employers provide to applicants, volunteers and employees?

(a) Indian tribes and tribal organizations must comply with the privacy requirements of any Federal, state, or other tribal agency providing background investigations. Indian tribes and tribal organizations must establish and comply with personnel policies that safeguard information derived from background investigations.

(b) The Bureau of Indian Affairs must comply with all policies, procedures, criteria, and guidance contained in the Bureau of Indian Affairs Manual or other appropriate guidelines.

(c) Federal agencies exercising authority under this part by delegation from OPM must comply with OPM policies, procedures, criteria, and guidance.

§§ 63.24–63.29 [Reserved]

Subpart C—Indian Child Protection and Family Violence Prevention Program

§ 63.30 What is the purpose of the Indian child protection and family violence prevention program?

The purpose of this program is to develop tribally-operated programs to protect Indian children and reduce the incidents of family violence on Indian reservations.

§ 63.31 Can both the Bureau of Indian Affairs and tribes operate Indian child protection and family violence prevention programs?

Yes. However, tribes are encouraged to develop and operate programs to protect Indian children and reduce the incidence of family violence in Indian country.

§ 63.32 Under what authority are Indian child protection and family violence funds awarded?

The Secretary is authorized to enter into contracts with Indian tribes, tribal organizations, or tribal consortia pursuant to the Indian Self-Determination and Education Assistance Act, as amended, 25 U.S.C. 450, *et seq.*, for the development and establishment of Indian child protection and family violence prevention programs. This includes compacting with tribes under the Self-Governance program procedures.

§ 63.33 What must an application for Indian child protection and family violence funds include?

In addition to the Indian Self-Determination and Education Assistance Act, as amended, 25 U.S.C. 450, et seq., contracting requirements, each application must provide the following information:

(a) The name and address of the agency or official to be responsible for the investigation of reported cases of child abuse and child neglect, the treatment and prevention of incidents of family violence, and the provision of immediate shelter and related assistance for victims of family violence and their dependents;

(b) Projected service population of the program;

(c) Projected service area of the program; and

(d) Projected number of cases per month.

§ 63.34 How are Indian child protection and family violence prevention program funds distributed?

(a) Funds will be distributed, subject to the availability of appropriations, and:

(1) In any fiscal year that the appropriation exceeds 50 percent of the level of funding authorized for this purpose by the Act, 49 percent must be distributed equally to all tribes and tribal organizations and 49 percent must be distributed on a per capita basis according to the population of children residing in the service area. Two percent of the annual appropriation will be set aside for distribution to tribes demonstrating special circumstances.

(2) In any fiscal year that the appropriation does not exceed 50 percent the level of funding authorized for this purpose by the Act, funding must be distributed in equal amounts to all tribes. Two percent of the annual appropriation will be set aside for distribution to tribes demonstrating special circumstances.

(3) Special circumstances include but are not limited to a high incidence of child sexual abuse, a high incidence of violent crimes, a high incidence of violent crimes against women, or the existence of a significant victim population within the community.

(i) This 2 percent will be subject to discretionary distribution by the Assistant Secretary—Indian Affairs, or his or her designee. Tribes may request these funds through their respective area offices. All requests must demonstrate a high incidence of child sexual abuse, a high incidence of violent crimes, a high incidence of violent crimes against women, or the existence of a significant victim population within the community.

(ii) Funds will remain available through the third quarter of each fiscal year; in the fourth quarter, unallocated funds will be redistributed based upon the criteria set forth in this section.

(b) Any tribe not wishing to receive Indian child protection and family violence prevention funds must inform its respective area office in writing within 90 days after receiving notice of the allocation from the area office. Each area office may reallocate unused Indian child protection and family violence prevention program funds as provided by § 63.35.

(c) Funds may be used as matching shares for other federally funded programs which contribute to and promote prevention of child abuse, child neglect, and family violence on Indian reservations, but may not be used to supplant funds available for the same general purposes.

(d) Any income resulting from the operation of Indian child protection and family violence prevention programs may be retained and used to promote prevention of child abuse, child neglect, and family violence on Indian reservations.

§ 63.35 How may Indian child protection and family violence prevention program funds be used?

Indian child protection and family violence prevention program funds may be used to:

(a) Establish child protective services programs.

(b) Establish family violence prevention and treatment programs.

(c) Develop and implement multidisciplinary child abuse investigation and prosecution programs.

(d) Provide immediate shelter and related assistance to victims of family violence and their dependents, including construction or renovation of facilities to establish family violence shelters.

(e) Purchase of equipment to assist in the investigation of cases of child abuse and child neglect.

(f) Develop protocols and intergovernmental or interagency agreements among tribal, Federal, state law enforcement, courts of competent jurisdiction, and related agencies to ensure investigations of child abuse cases to minimize the trauma to the child victim, to define and specify each party's responsibilities, and to provide for the coordination of services to victims and their families.

(g) Develop child protection codes and regulations that provide for the care and protection of children and families on Indian reservations.

(h) Establish community education programs for tribal members and school children on issues of family violence, child abuse, and child neglect.

(i) Establish training programs for child protective services, law enforcement, judicial, medical, education, and related services personnel in the investigation, prevention, protection, and treatment of child abuse, child neglect, and family violence.

(j) Establish other innovative and culturally relevant programs and projects that show promise of successfully preventing and treating family violence, child abuse, and child neglect.

§ 63.36 What are the special requirements for Indian child protection and family violence prevention programs?

(a) Each tribe must develop appropriate standards of service, including caseload standards and staffing requirements. The following caseload standards and staffing requirements are comparable to those recommended by the Child Welfare League of America, and are included to assist tribes in developing standards for Indian child protection and family violence prevention programs:

(1) Caseworkers providing services to abused and neglected children and their families have a caseload of 20 active ongoing cases and five active investigations per caseworker.

(2) Caseworkers providing services to strengthen and preserve families with children have a caseload of 20 families. If intensive family-centered crisis services are provided, a caseload of 10 families per caseworker is recommended.

(3) It is recommended that there be one supervisor for every six caseworkers.

(b) The negotiation and award of contract and grant agreements under these regulations must include the following requirements:

(1) Performance of background investigations to ensure that only those individuals who meet the standards of character contained in § 63.1 2 are employed in positions which involve regular contact with or control over Indian children.

(2) Submission of an annual report to the contracting officer's representative which details program activities, number of children and families served, and the number of child abuse, child neglect, and family violence reports received.

(3) Assurance that the identity of any person making a report of child abuse or child neglect will not be disclosed, without the consent of the individual, and that all reports and records collected pursuant to these regulations are confidential and to be disclosed only as provided by Federal or tribal law.

(4) Assurance that persons who, in good faith, report child abuse or child neglect will not suffer retaliation from their employers.

§§ 63.37–63.50 [Reserved]

Dated: August 9, 1995.

Ada E. Deer,

Assistant Secretary—Indian Affairs.

Food Stamp Program; Collecting Food Stamp Recipient Claims From Federal Income Tax Refunds and Federal Salaries; Final Rule

DEPARTMENT OF AGRICULTURE

Food and Consumer Service

7 CFR Parts 271, 272 and 273

[Amdt. No. 367]

RIN 0584–AB89

Food Stamp Program: Collecting Food Stamp Recipient Claims From Federal Income Tax Refunds and Federal Salaries

AGENCY: Food and Consumer Service, USDA.

ACTION: Final rule.

SUMMARY: This rule establishes methods of collecting two types of Food Stamp Program (FSP) recipient claims from Federal income tax refunds and from Federal salaries. The two types of recipient claims are inadvertent household error (IHE) and intentional Program violation (IPV) claims. These claims represent amounts of benefits which households received but to which they were not entitled. Under this rule claims of these types will be collected from individuals who are no longer participating in the FSP. This rule establishes operating procedures, due-process notices, and appeal rights and other rights and responsibilities of individuals.

DATES: This final rule is effective and must be implemented by October 2, 1995 except that State agencies currently participating in the Federal Income Tax Refund Offset Program (FTROP) must implement 7 CFR 272.2(d)(1)(xii) no later than November 30, 1995.

FOR FURTHER INFORMATION CONTACT: James I. Porter, Supervisor, Issuance and Accountability Section, State Administration Branch, Program Accountability Division, Food Stamp Program, 3101 Park Center Drive, Room 907, Alexandria, Virginia 22302, telephone (703) 305–2385.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule has been determined to be significant and was reviewed by the Office of Management and Budget under Executive Order 12866.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule and related notice to 7 CFR 3015, Subpart V (48 FR 29115), this Program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

This final action has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, 94 Stat. 1164, September 19, 1980). William E. Ludwig, Administrator of the Food and Consumer Service, has certified that this rule does not have a significant economic impact on a substantial number of small entities. This rule affects the State and local agencies which administer the Food Stamp Program and certain individuals who have received excess food stamp benefits. Half of substantially all State and local administrative costs for administering the Food Stamp Program are reimbursed by the Department.

Executive Order 12778

This rulemaking has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full implementation. This rule is not intended to have retroactive effect. Prior to any judicial challenge to the provisions of this rule or the application of its provisions, all applicable administrative procedures must be exhausted.

Paperwork Reduction Act

The information collection requirements in this rule were approved by the Office of Management and Budget (OMB) in connection with the test of FTROP and were assigned OMB Control #0584–0446. This rule makes some changes in those requirements. An estimate of the revised burden associated with this collection will be submitted to OMB according to the requirements of the Paperwork Reduction Act. Comments regarding the information collection requirements in this rule, including suggestions to reduce this burden may be sent to: U.S. Department of Agriculture, Clearance Officer, OIRM, Room 404–W, Washington, DC 20250 and to the Office of Management and Budget, Paperwork Reduction Project (OMB #0584–0446), Washington, DC 20503.

Background

A. General

The Department published a proposed rule on FTROP and the Federal Salary Offset Program (salary offset) on June 28, 1995 at 60 FR 33612. A total of nine comment letters were received on this proposed rule, eight from State agencies and one from a research and action group concerned with nutrition and related issues (an action group). Those comments are discussed below.

The abbreviated citations in the subheadings of section B of this preamble correspond to paragraphs in section 272.18(g)(5), the subheadings in part C correspond to paragraphs in section 273.18(g)(6).

Three State agencies expressed concern that there would not be sufficient time to implement a final rule for the 1996 offset year and recommended that the final rule be phased in for 1997. With the exception of the 60-day notice, the Department believes that State agencies can implement the requirements of the final rule within the 30-day implementation period. As discussed later in this preamble, for October 1, 1995 State agencies which cannot implement the 60-day notice specified in the proposed rule and made final here may use the format and contents for the 60-day notice as used during the test of FTROP.

B. Federal Income Tax Refund Offset Program (FTROP)

Types of claims referable under FTROP—(ii)(A)(1): The action group objected to the inclusion of IHE claims as a type of claim subject to FTROP because it believes such inclusion conflicts with the Food Stamp Act (7 U.S.C. § 2011, et seq.) (the Act). In B.2.c. of the preamble to the proposed rule, the Department explained that Section 13 of the Act authorizes State agencies to use "other means of collection" such as FTROP for both IHE and IPV claims when households do not pay them through voluntary allotment reduction, a cash repayment schedule or involuntary allotment reduction. Consequently, under the final rule IHE claims continue to be subject to collection under FTROP.

Properly established claims—(ii)(A)(1): One State agency supported the deletion of the term "delinquency" in favor of listing criteria for determining claims past due and legally enforceable, and cited support for the deletion of the three-month "delinquency period." One State agency objected to the proposed requirement that claims be properly established, including the requirement that additional demand letters be provided prior to initiating other collection actions. The State agency believed that this language required additional work for State agencies and was ineffective. The requirement as proposed was intended only to incorporate current requirements for recipient claim demand letters. Claims for which applicable FSP requirements were met would be considered properly established, and no greater number of demand letters would be required for them to be considered subject to FTROP than are required under current food stamp regulations. To avoid confusion on this point, the final rule deletes the reference to additional demand letters from section 273.18(g)(5)(ii)(A)(*1*).

The action group objected that the proposed rule did not set a minimum period for which a claim must be overdue before it could be referred for offset. The group suggested 90 days, since in some cases, such as where demand letters are hand delivered, the group contended that required notices might be delivered and after only a few days a determination made that the debt was past due. Regardless of how delivered, demand letters provide the household with 90 days to request a fair hearing. In addition to this 90-day period, as the action group acknowledges in its comment, under proposed FTROP procedures, at least 60 more days will elapse before a claim can actually be referred for offset, since under FTROP individuals have 60 days to request a State agency review. Furthermore, just prior to when offsets actually begin in late January, State agencies are required to submit lists of claims to be deleted from IRS offset files due to payments and other adjustments made after the end of the 60-day period. Consequently, individuals have ample opportunity to challenge the intended offset under the procedures as proposed, and the final rule does not specify a 90-day minimum "delinquency period."

Joint and several liability—(ii)(A)(2): The proposed rule required that, for claims to be considered past due and legally enforceable (referable under FTROP), State agencies must verify that there is no individual who is jointly and severally liable for the claim also currently participating in the FSP in the State. One State agency supported this requirement, stating that such verification is a part of their on-line claims tracking system. Another State agency objected because they did not have the capability for such verification. While food stamp regulations do not specify a method for such verification, 7 CFR 273.18(a) is clear that State agencies are required to establish claims against all households which received more food stamp benefits than they were entitled to receive or which have a household member who received an overissuance as part of another household. Current food stamp regulations at 7 CFR 273.18(d) specify that households which otherwise fail to pay IHE and IPV claims will have their allotments reduced. Consequently, the verification criteria stated in the proposed rule should be information available to State agencies as part of their ongoing claims collection activities.

The action group also suggested that if an individual begins participating in the FSP after a claim is referred but before it is actually offset, the State agency should be required to collect the claim by implementing an allotment reduction and withdrawing the referral. FCS agrees, which is one reason why the proposed rule at section 273.18(g)(5)(ii)(A)(2) provided that a claim cannot be referred under FTROP where any individual liable for the claim is participating within the State. If the individual is (re)certified after the claim has been referred but before it is offset, as stated in section 273.18(g)(5)(ix)(A), the State agency is obligated to delete the claim from the IRS file. Should an overpayment occur because there is not sufficient time to delete the claim, as stated in section 273.18(g)(5)(ix)(B), the State agency is required to refund any resulting overpayment. The Department believes these provisions address the concerns raised by the group.

The action group raised a number of other objections relating to the impact of joint and several liability for food stamp overissuances on the proposed rule. Section 13(a)(2) of the Act (7 U.S.C. 2022(a)(2)) provides that all adult members of a household at the time of an overissuance are jointly and severally liable for the overissuance. The group felt that in some instances the proposal to collect the claim first by allotment reduction if any person liable for the claim is currently participating in the program is unfair, for example, where a nonparticipating former household member was actually culpable for the overissuance. The action group stated that the equities favor apportioning the claim against the nonparticipating party that actually caused the overissuance. The Department believes that this issue was decided by Congress in Section 13 of the Act when it established joint and several liability for overissuances and the requirement that the remaining household members must repay any overissuance by allotment reduction. The Act makes allotment reduction mandatory for all IPV and IHE claims unless the household agrees to an alternate form of repayment. Moreover, Sections 6 and 13 of the Act clearly contemplate that, in the case of an IPV, the culpable party will be disqualified from participating in the FSP, leaving the claim to be paid by remaining household members.

10-year period—(ii)(A)(4): The proposed rule provided several criteria for determining if a claim was subject to FTROP. One such criteria was that the initial claim demand letter must be dated within 10 years of January 31 of the offset year. As stated in B.3.b of the preamble to the proposed rule, the Department believes that the demand letter establishes when the right of action accrues on recipient claims. Two State agencies stated that the 10-year period should be measured back to the date of the last payment (assuming some were made). The action group objected to the proposal because it felt that it was inconsistent with what the group termed the statute of limitation of six years for pursuing IPV claims and IHE claims. It recommended that the period should begin with the date of the last overpayment.

The Department believes the policy as stated in the proposed rule is consistent with the concept of a "right of action" under the IRS tax offset regulations, as that term has been interpreted by a number of reviewing courts. See, e.g. *Grider* v. *Cavasos*, 911 F2d 1158 (5th Cir., 1990); *Jones* v. *Cavasos*, 889 F.2d 1043 (11 Cir., 1989). The courts have permitted tax offset for administrative claims not reduced to judgment even where the judicial statute of limitations has already expired, reasoning that the Federal Government's right of action does not necessarily accrue until the claim is assigned to the Federal Government, or where the judicial statue of limitation has expired but the 10-year FTROP administrative limitation has not.

In addition, the Department believes the proposed rule is also consistent with discovery-tolled statutes of limitation, such as that in 28 U.S.C. 2416. Moreover, the IRS modified its FTROP regulations, substituting the phrase "right of action" for "date of delinquency," in order to clarify that in cases such as defaulted student loans, the 10 years for FTROP referral is counted from the date the defaulted loan is assigned to the Federal Government, and not the earlier date on which the actual default occurred. See 57 FR 13035, 13036. The State agency would still be required to establish and calculate the claim by including only those overissuances which occurred within six years of the discovery of the claim as required by 7 CFR 273.18(b) for IHE claims and 7 CFR 273.18(c)(2) for IPV claims. Once the claim is established, however, the State would have 10 years to try to collect it under FTROP. Accordingly, the final rule makes no change in the language of the proposed rule on the matter of the 10-year period for determining a claim subject to FTROP.

Voluntary payments—(ii)(A)(5): One State agency stated that individuals often regularly pay on claims without signing an agreement to do so. They believed such individuals are indicating willingness to pay the claim as much as if they had signed an agreement. They recommended that the rule language be revised to delete reference to 7 CFR 272.18(g)(2), where payment schedules are discussed. The Department agrees that whether a written agreement exists is not as important as whether a claim is being repaid and that State agencies should have the flexibility to decide if claims are being repaid regularly and so are not subject to FTROP. Accordingly, the final rule makes the recommended change. For consistency, the adjective "scheduled" as applied in the proposed rule to involuntary payments is replaced with "regular."

The proposed rule stated that claims for which the State agency has received voluntary payments and scheduled, involuntary payments would be considered past due and legally enforceable 30 days after the due date for a regular payment which was not received. The action group contended that the proposed 30-day period for a default on a payment agreement does not permit sufficient time for the State agency to issue the required notice of such default under section 273.18(g)(2). That section of FSP regulations requires that State agencies provide households notice when an installment payment is not received and an opportunity to negotiate a new payment schedule before other collection actions are initiated. These requirements apply to claims which State agencies may want to refer for collection under FTROP. To clarify this matter, in section 273.18(g)(5)(ii)(A)(5) this final rule replaces the proposed 30-day default period with the provision that claims for which State agencies have been receiving regular payments will be deemed past due and legally enforceable if the individual does not respond to a notice of default of a payment agreement and remedy the default as specified in section 273.18(g)(2).

Combined claims/judgment claims—(ii)(B)(2): The proposed rule stated that claims reduced to judgment cannot be combined with other claims. The preamble explained the reason: the IRS requires that judgment claims, which are not subject to the 10-year limit for referral under FTROP, be identified as such. One State agency recommended that the rule be changed to allow combining judgment claims and other claims if the judgment claim is less than 10 years past due. This cannot be done due to the IRS requirement that judgment claims be separately identified. (See IRS Revenue Procedure, "Magnetic Media Reporting for Federal Income Tax Refund Offset Program (Debtor Master File).)

Another State agency asked if, when an individual owes a judgment claim and another claim and the judgment claim is referred, can the other claim also be referred. In such a case, the other claim cannot be referred for that individual. The IRS would identify those referrals as duplicate records and both would be rejected. In these circumstances, the State agency must refer either the judgment claim or the other claim. Multiple, non-judgment claims may be consolidated.

One State agency asked for a definition of judgment, in particular whether it refers to a civil or criminal action. The word "judgment" generally refers to debts resulting from civil actions but restitutionary orders may also result from criminal actions. Since circumstances vary and depend on State and local law, State agencies should consult with their legal counsel if they have questions about how a judgment on a recipient claim affects the 10-year period for being subject to collection from FTROP.

The action group urged that FTROP be limited to collecting debts reduced to judgment. However, the group acknowledged that Congress and the courts have not required this. The group argued that to permit tax offset of non-judgment debts is inconsistent with the Act, and in particular with the provisions in Section 13(c)(2) (7 U.S.C. 2022(c)(2)) which provide for garnishment of State unemployment benefits to recover FSP overissuances. That provision requires either consent of the individual or a "writ, order, summons, or other similar process in the nature of a garnishment from a court * * *" The Department believes that the judicial process requirement in Section 13(c)(2) was intended to recognize that unemployment benefits are paid by individual States from State funds, and that it is necessary to follow State procedures to garnish them. In contrast, FTROP involves funds held by another Federal agency, the IRS, for which Congress itself has established the necessary requirements to effect a "garnishment." The Department believes its proposed procedures meet these requirements.

Undelivered 60-day notices—(iii)(D): The proposed rule stated that claims for which 60-day notices are returned as undeliverable may be referred for collection under FTROP. One State agency supported this provision. The action group opposed it on the grounds that it violates due process. As discussed in B.3.c. of the preamble to the proposed rule, IRS regulations provide that the use of the most current address for the debtor provided by the IRS constitutes a reasonable effort to notify the individual about the intended referral for offset. As mentioned in the background to the August 1991 General Notice, the IRS requires that taxpayers notify the IRS of their current address. The Department recognizes that taxpayers may not always comply with this requirement and may move before a timely submitted change of address is processed. For these reasons, among others, in B.3.d. of the preamble to the proposed rule when discussing requests for review, the Department pointed out that State agencies are required to refund over collections if after the 60-day period for requesting such reviews individuals document that a claim collected through FTROP is not past due and legally enforceable. The proposed rule incorporated a reference to this requirement at section 273.18(g)(5)(viii)(B). Consequently, this final rule makes no change in the provision that claims for which 60-day notices are returned as undeliverable may be referred for collection under FTROP.

Contents of the 60-day notice—(iv): Two State agencies supported the inclusion of information and instructions about requesting reviews. One State agency included recommendations for certain editorial changes and reorganization. We considered those recommendations and as a result modified the final rule in section 273.18(g)(5)(iv)(I) to replace the acronym "FTROP" with the phrase "the Federal Income Tax Refund Offset Program." The action group also suggested some editorial changes to the proposed 60-day notice language. We are adopting their suggestion to move the second sentence of section 273.18(g)(5)(iv)(D) so it becomes the first sentence of section 273.18(g)(5)(iv)(E) in the final rule. We agree that this change improves the clarity of the notice.

One State agency opposed the proposed 60-day notice on the grounds that the notice would be two pages long and in their experience individuals did not read the information provided in the shorter notice during the test of FTROP. The Department believes that the additional information should be provided for the reasons stated in B.3.d. of the preamble to the proposed rule.

The action group recommended other changes and additions to the 60-day notice, specifically that it contain a statement of the standard for when offset is proper, an explicit offer to renegotiate an installment plan, and a list of possible defenses to offset. As discussed above, the final rule clarifies that current FSP regulations on renegotiating installment plans apply to determining if claims may be referred for collection under FTROP. As the action group acknowledges, the Department proposed the addition of a substantive amount of information to help individuals determine why their claim is considered subject to FTROP and how to request a review of the intended collection action. (The reasons for the additional information were discussed in B.3.d. of the preamble to the proposed rule with respect to the contents of the 60-day notice in general and documenting that a claim is not referrable under FTROP.) The Department has reviewed the action group's suggestions and believes that the additions would not improve the 60-day notice with respect to helping individuals understand the basis for the intended collection action or how to request a review. For example, the action group suggests defining "jointly and severally liable" and emphasizing that the notice recipient had to be an *adult* household member at the time of the overissuance in order to be liable for the claim. The proposed rule at section 273.18(g)(5)(iv)(D) required that the 60-day notice state that all adults who were household members when excess food stamp benefits were issued to the household are jointly and severally liable for the value of those benefits, and that collection of claims for such benefits may be pursued against all such individuals. The language clearly states the policy of liability with respect to adult household members, and the Department believes that stating that "collection of claims for such benefits may be pursued against all such individuals" is sufficient explanation of "joint and several liability" for purposes of the 60-day notice. Consequently, the final rule makes no changes in the proposed rule with respect to this provision. The Department has carefully reviewed all of the action group's suggestions and believes that they would unnecessarily lenghten the 60-day notice. Accordingly, the Department is not adopting them.

One State agency commented that if this rule were published thirty days after the end of the comment period, there would be insufficient time to revise the content of the 60-day notice in time for mailing prior to October 1, 1995. The Department recognizes that this may be a problem for some State agencies and has decided to allow State agencies which cannot make the necessary changes in time to use the same notice format used during the test of FTROP in previous years for offset year 1996. Section 273.18(g)(5)(iii)(A) has been revised to reflect this option. While the Department believes that the previous notice format was sufficient to provide adequate notice to persons potentially subject to offset, because the new format is an improvement in that it provides more information, the Department urges all State agencies to use the new format for the 1996 offset year if possible. All State agencies will be required to use the new format for the 1997 and subsequent offset years.

Tax refunds subject to offset—(iv)(B): The action group asserted that tax refunds which represent an Earned Income Tax Credit (EITC) should not be subject to offset because such an action is at cross purposes with the EITC. As discussed in B.2.c. of the preamble to the proposed rule, the Department does not agree with this position since Congress has not enacted legislation excluding EITC from such debt collection as FTROP. Additionally, the Department wishes to point out that the Supreme Court resolved this issue by holding in *Sorenson* v. *Secretary of the Treasury*, 475 U.S. 851 (1986), that an EITC refund is subject to offset under FTROP.

Offset fee—(iv)(C): The proposed rule stated that the 60-day notice must advise individuals that a charge for the administrative cost of collection would be added to their claims and that amount would also be deducted if the claim, or any portion of the claim, was deducted from their tax refund. Two State agencies supported this proposal. The action group opposed it on the grounds that it is burdensome, that the IRS could increase the amount of the charge, and that there is no authority for it in the Act. As stated in B.3.d. of the preamble to the proposed rule, individuals can avoid paying the fee by paying the claim voluntarily. The IRS bases the amount of the offset fee on the cost of operating FTROP. Section 13(a) of the Act (5 U.S.C. 2022(a)) gives the Secretary general authority with respect to recipient claims, and the Department believes that this entails authority to impose reasonable administrative charges for collecting claims. Accordingly, the final rule makes no change in this provision for assessing offset fees against individuals.

There are instances during a particular offset year when more than one offset for a food stamp claim is made against a tax refund due an individual. One State agency asked whether in such cases the IRS charges a second offset fee. The IRS currently charges an offset fee each time it makes an offset, and they deduct that fee from the amount offset before sending funds to FCS. FCS will add the amount of the IRS fee to a claim referred under FTROP only once for a particular offset year. The Department will advise State agencies about funding additional offset fees.

One State agency commented that notifying individuals about the amount of the offset fee would be burdensome to State agencies and increase Federal costs. The proposed rule required that State agencies notify individuals about the amount of the offset fee when they notify them about the amount of any offset. (See section 273.18(g)(5)(viii)(A).) As stated in the preamble to the proposed rule, FCS will advise State agencies of the amount of the fee. FCS expects to so in December or early January. This should give State agencies sufficient time to insert the amount in offset notices to be sent to individuals. State agencies would need to redesign current offset notices to accommodate this information. State agencies should be able to use their current offset notices to inform individuals about any second offsets made.

One State agency suggested that IRS should be able to determine the amount of the fee in time for it to be included in the 60-day notice or that a flat $10 fee be charged. FCS will not know the amount of the fee in time to provide it to State agencies for those notices. As a result, the Department believes the 60-day notice should advise individuals of the approximate amount of the fee. Accordingly, the final rule requires that 60-day notices include such information. For the foreseeable future, the amount to be used is $10.00. FCS will advise State agencies should that amount need to be changed.

In light of State agency comments indicating that implementation of the offset fee would be difficult to accomplish for the 1996 offset year and the fact that this final rule is being published later in the tax cycle than was originally hoped, the Department has decided to delay implementation of the offset fee until the 1997 offset year. State agencies which elect to utilize the new 60-day notice as discussed above will be required to delete any reference in the notice to the collection of the fee.

Toll-free/collect phone numbers—(iv)(E) and (vii)(B): The proposed rule required that, because of IRS requirements, the telephone number of the State agency contact in both the 60-day notice and the notice to individuals about offsets must be either toll-free or collect. One State agency objected to these requirements. The final rule retains them because of the IRS requirements.

Review requests—(iv)(F): The proposed rule required that 60-day notices advise individuals that review requests must be in writing. One State agency supported that requirement. The action group favored allowing oral requests. The group stated that requiring written requests imposes a burden on people with limited literacy skills. As discussed in B.3.d. of the preamble to the proposed rule, we continue to believe that review requests must be submitted in writing to avoid the difficulty of discerning whether an oral or telephonic contact is simply to inquire about the claim or constitutes a formal review request. Individuals with limited literacy skills could obtain assistance from whomever helps with their other written communications. They might also advise State agencies about their difficulty so that a solution appropriate to the particular circumstances could be worked out.

The action group also questioned whether it is appropriate to require documentation to be submitted along with the request for review since it may take time for an individual to obtain the necessary documentation and this could cause them to miss the 60-day deadline for a review. The action group suggested that adjournment for good cause should be allowed to provide time to obtain documents. As the Department explained in B.3.e. of the preamble to the proposed rule, DEFRA requires that the State agency consider any evidence that the debt is not past due or legally enforceable which is submitted within 60 days of the notice. The 60-day limit in the proposed rule complies with this requirement. Moreover, as the Department stressed in B.3.h. of the proposed rule, if after the 60-day period the individual produces documentation showing the claim is not past-due or legally enforceable, existing FSP regulations require that any amount collected on the claim be refunded. Accordingly, the final rule does not change the requirement that documentation or evidence be submitted with the review request.

Bankruptcy—(iv)(G): The proposed rule stated that the 60-day notice must state that a claim is not legally enforceable if a bankruptcy prevents collection of the claim. Under the August 1991 General Notice, the individual was required to document an assertion of bankruptcy. Three State agencies commented on the proposed change. They asked what the new language meant, objected to it on the grounds that individuals' bankruptcy petitions were often denied, and stated that individuals should be required to document bankruptcy. As discussed in B.3.d. of the preamble to the proposed rule, bankruptcy law prohibits requiring documentation of bankruptcy. If it is necessary to validate an individual's assertion of bankruptcy, a State agency should check the records of the appropriate bankruptcy court.

State agency action on review requests—(v): One State agency reported that when a review request is received without documentation, it reviews its case files to determine whether the claim is past due and legally enforceable. They found this burdensome and difficult to accomplish within the 60-day period. They recommended a two stage response for such situations, the first a notice that adequate documentation was not received, the second detailing information about the claim from the case file.

The proposed rule provided for expanded guidance to individuals (in 60-day notices) about documenting the status of their claim, and stated that State agencies must determine whether or not claims are past due and legally enforceable based on a review of their records, and of documentation, evidence or other information from the individual. The proposed rule also stated that a reason for a determination that a claim was past due and legally enforceable is the individual's failure to provide documentation to the contrary. The Department expects that the scope of State agency file review will be sufficient to respond to the issues raised by the documentation, evidence and/or explanation provided with the review request. One State agency supported the requirement for stating the reason for the decision on the review, including citing inadequate documentation. The final rule makes no change in the requirement.

The action group contended that the review by the State agency of a proposed tax refund offset must be a full hearing when an individual alleges in the FTROP review process that they never received a demand letter. As discussed above in connection with review requests, and as discussed in B.3.d. of the preamble to the proposed rule, the Department believes that the review rights provided in the proposed rule comply with statutory and regulatory requirements. The group also argued for an additional full fair hearing on the grounds that some households which are not participating when they receive their fair hearing notice do not respond because they believe the State agency has no way to collect the overpayment except by allotment reduction if the household again participates in the program. The Department does not find that the equities in such a situation favor providing an additional opportunity for a fair hearing merely because a household now views the collection threat as credible.

One State agency stated that referring claims denied for lack of documentation to FCS will be a waste of FCS time since in such situations individuals will have no more documentation to provide FCS than they did the State agency. Individuals, not State agencies, request FCS reviews of State agency decisions. The opportunity for such review is required in IRS rules as discussed in B.3.e. of the preamble to the proposed rule. Accordingly, the requirement is retained in the final rule.

October 31 cut-off—(v)(E): In the FTROP process there are two important due-process time frames, the 60-day period individuals have to request a State agency review and the 30-day period to request an FCS review. To accommodate these time frames and to provide State agencies time to prepare and submit certified files in early December of each year, the proposed rule provided that State agencies could not refer for offset a claim for which a timely State agency review request is received unless by October 31 preceding the offset year the State agency determined the claim past due and legally enforceable, and notified the individual of that decision.

Two State agencies objected to the October 31 cut-off date because of the number of claims for which review requests are received between October 31 and November 30. The Department is concerned that the October 31 cut-off will reduce the number of claims which might otherwise be referable for collection under FTROP. Because more time is needed to give due consideration to alternatives for dealing with this matter, this rule makes no change in proposed rule with respect to the cut-off. The Department intends to address the cut-off date in a later rulemaking.

Actions on offsets—(viii): The action group urged the Department to provide post-deprivation hearings in addition to the two pre-offset reviews which are available, particularly to insure that claims which are mistakenly offset are repaid promptly. The Department believes that the proposed system of a State agency review followed by an FCS review is sufficient to provide adequate due process to individuals. Moreover, section 273.18(g)(5)(viii)(B) of this rule references the provision at section 273.18(i)(4) of food stamp regulations which requires that the State agency return overpayments as soon as possible after the overpayment becomes known.

Reporting—(ix)(C): The proposed rule eliminated the management report required by the August 1991 General Notice and replaced it with a requirement that annually and no later than the tenth of October of the year prior to the offset year State agencies report in writing to the FCS regional office the number of 60-day notices mailed and the total dollar value of the claims associated with those notices. One State agency supported this change. To be consistent with change in the mailing date of 60-day notices, this final rule requires that the report be submitted no later than 10 days after 60-day notices are mailed.

Alternate 60-day notice—(x): The required contents for this 60-day notice are set forth in section 273.18(g)(5)(x). This section contains the specifications from the August 1991 General Notice, updated to reflect a statutory change and slightly modified in response to experience during the test of FTROP. FCS has previously provided State agencies language for this notice and has discussed it during training sessions.

C. Federal Salary Offset

As stated in the proposed rule, the Department tested salary offset under the authority of a General Notice published August 29, 1994 at 59 FR 44400. The Department received one formal comment on that General Notice and is responding to that comment in this preamble. In addition, the Department used experience from the test of salary offset as well as comments received on the proposed rule in developing these final salary offset regulations.

Claims subject to salary offset—(i): One State agency recommended that, because of the overall work required of State agencies in connection with salary offset, only those claims owed by Federal employees which are not collected by offset from tax refunds should be pursued through salary offset. All claims submitted for FTROP are matched against Federal employee records to identify claims owed by Federal employees. The IRS requires that all such claims be stripped from the files of claims which will be referred for collection through FTROP. Consequently, to the extent that they are identified by this procedure, claims owed by Federal employees may not be referred for collection by FTROP and are accordingly subject to the salary offset procedures.

Two State agencies commented that State agencies should not be required to participate in salary offset as a condition of participating in tax offset. They argued that the salary collection effort is burdensome and not cost effective. FCS is requiring State agencies to participate to ensure that Federal employees are held to the same standards of repayment as other citizens. Although FCS has not changed the requirement in the proposed rule that State agencies participating in tax offset also participate in salary offset, FCS wants to clarify what the required participation entails for State agencies. Particularly, FCS does not intend this rule to change current policy at 7 CFR 273.18(d)(4)(iv), and 7 CFR 273.18 (e)(1) and (e)(2) which allow State agencies to cease collection activities when they are not cost effective.

FCS acknowledges that to date experience with salary offset is limited. FCS intends to work with State agencies in partnership to apply new experience and new technologies to develop the most cost effective collection methods possible. In support of that goal, FCS wants to clarify that just as State agencies would not be required to pursue collection of every claim no matter how small, FCS will not necessarily refer every claim identified as being owed by a Federal employee to State agencies for the collection effort specified in the salary offset regulation.

The action group was concerned that the State agency may collect an amount which exceeds the claim by continuing other means of collection while salary offset procedures are pending, including food stamp allotment reductions. All claims referred for salary offset must also meet the eligibility requirements for FTROP, including the requirements in section 273.18(G)(5)(ii) that the portion of the claim referred under FTROP or salary offset must not be simultaneously subject to other forms of collection and that no individual liable for the claim is currently participating in the FSP.

Confidentiality requirements—(ii)(C): One State agency stated that, since personnel have been advised of the confidentiality requirements for FTROP data, repeating the security agreements would not serve a useful purpose. The IRS specifies data security requirements for FTROP, the Department of Defense and the United States Postal Service for salary offset. Security procedures for FTROP and salary offset data may be identical in a State agency, but State agencies should review the security procedures for salary offset to make sure that they meet the requirements of this final rule and take steps to assure that personnel understand that salary offset data must be accorded the specified confidentiality and security protection.

Notices—(iii) and (v)(E): The action group urged the Department to require the same level of detail in what the group called the "notice of impending salary offset" as in the 60-day notice used for FTROP. As proposed, salary offset utilizes two notices. First, the proposed rule requires State agencies to provide individuals with an "advance notice of salary offset." This notice is provided so that the State agency may offer the debtor a chance to voluntarily pay the debt before it is referred to FCS. The second notice is required by Departmental rules at 7 CFR 3.55 which details the contents of the "Notice of Intent" of salary offset. The proposed rule specified that the FSP notice of intent would comply with Departmental requirements subject to several modifications. The Departmental regulations detail the information which is required to be provided debtors in the notice of intent to assure that, among other things, they have sufficient information about appealing the intent salary offset. The Department believes that the contents of these two notices provide ample information for debtors about their rights and responsibilities with respect to salary offset. Accordingly, the final rule makes no changes in the proposed requirements for the two salary offset notices.

Referrals to FCS—(iii)(B): The proposed rule required that within 90 days of the date of the advance notice, the State agency refer to FCS all claims for which the State agency does not receive timely and adequate response as specified in the advance notice. The advance notice gave debtors 30 days to respond to State agencies. Consequently, State agencies had 60 days to refer "no-response" claims to FCS. One State agency commented that this 60-day period was inconsistent with the 30 days for determining a voluntary payment for a claim under FTROP overdue. There was no inconsistency since the two time periods applied to two different types of action.

The State agency commenting on the General Notice stated that the requirements for documentation of salary offset claims referred to FCS were excessive. This same concern was expressed during the test of FTROP by State agencies in connection with the requirements for documenting claims appealed to FCS regional offices. The proposed rule modified the requirements for documentation in both situations to allow for copies of electronic records of demand letters, for example. One State agency commenting on the proposed rule stated that the documentation requirements for salary offset claims were still burdensome. The Department believes that the documentation requirements for referred salary offset claims give State agencies significant flexibility to provide documents and records in the way most feasible for their paper and electronic record systems. Accordingly, the final rule makes no change in the requirement as proposed.

$50 minimum—(iii)(C)(3): The action group suggested that the proposed $50 per month minimum voluntary payment to avoid salary offset is too high. They recommend $50 or 10 percent of disposable income, whichever is less. The Department set the $50 level of payment to be consistent with the standards for involuntary salary withholding established at 7 CFR 3.64 of USDA regulations and for this reason has retained the $50 minimum payment in this final rule.

Information encouraged in the advance notice—(iii)(C)(1): The proposed rule encouraged State agencies to include certain information about the specific claim in their advance notice to the debtor. One State agency commented that including the encouraged information with the advance notice would make automated notices impossible. Including the information is not required. State agencies are encouraged to include such information in order to demonstrate that the claim is valid. Accordingly, the final rule includes the language unchanged.

Appeals to FCS—(iii)(C)(5): One State agency stated that providing an appeal to FCS delays collection of the debts. The right to a Federal level hearing is provided by statute (5 U.S.C. 5514(a)(2)), which also provides that debtors must request such hearings within 30 days of receipt of the notice of intent from FCS, and the hearing must be concluded within 60 days of the date of the debtor's request. The final rule makes no changes in the proposed regulations for hearings on collections of recipient claims through salary offset.

FCS actions on referred claims—(v): The action group urged the Department to adopt a "post-taking hearing" so that employees will have an opportunity to appeal over collections from their salary which may occur if collection continues beyond the amount of the claim, or if collections are made and the employee did not receive the initial notice of offset. With respect to collections beyond the amount of the claim, Departmental regulations at 7 CFR 3.67 require that any over collection be promptly refunded. Employees will have verified records of their claim amounts and pay stubs reflecting the offsets from salaries. Refunds of collections beyond the amount of the claims would be made if employees bring any such errors to the attention of their employing agency.

With respect to the action group's second comment, there may be instances where employees do not receive the notice of intent from FCS. Departmental regulations at 7 CFR 3.56(c) provide that appeals received after the 30-day opportunity to make such appeals may be granted if the employee shows that he or she did not receive the notice of intent.

Implementation

State agencies must implement this rule by October 2, 1995, except that State agencies currently participating in FTROP must submit the amendment to the Plan of Operation required at 7 CFR 272.2(d)(1)(xii) no later than November 30, 1995.

List of Subjects

7 CFR Part 271

Administrative practice and procedures, Food stamps, Grant programs—social programs.

7 CFR Part 272

Alaska, Civil rights, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Food stamps, Fraud, Grant programs—social programs, Penalties, Records, Reporting and recordkeeping requirements, Social Security, Students.

Accordingly, 7 CFR parts 271, 272 and 273 are amended as follows:

PART 271—GENERAL INFORMATION AND DEFINITIONS

1. The authority citation for parts 271, 272 and 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2032.

2. In § 271.2, the definition of *Offset year* is added in alphabetical order to read as follows:

§ 271.2 Definitions.

* * * * *

Offset year means the calendar year during which offsets may be made to collect certain recipient claims from individuals' Federal income tax refunds.

* * * * *

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

3. In § 272.1, a new paragraph (g)(143) is added to read as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) *Implementation.* * * *

(143) *Amendment 367.* The provisions of Amendment 367 must be implemented no later than October 2, 1995 except that State agencies currently participating in the Federal Income Tax Refund Offset Program (FTROP) must implement section 272.2(d)(1)(xii), which relates to the submission of the Plan of Operations, within November 30, 1995.

4. In § 272.2, a new sentence is added to the end of paragraph (a)(2) and a new paragraph (d)(1)(xii) is added to read as follows:

§ 272.2 Plan of operation.

(a) *General Purpose and Content.* * * *

(2) *Content.* * * * The Plan's attachments shall also include the commitment to conduct the optional Federal Income Tax Refund Offset Program and the Federal Salary Offset Program.

* * * * *

(d) *Planning Documents.*

(1) * * *

(xii) If the State agency chooses to implement the Federal Income Tax Refund Offset Program and the Federal Salary Offset Program, the Plan's attachments shall include a statement in which the State agency states that it will comply with the provisions of Sections 273.18 (g)(5) and (g)(6) of this chapter.

* * * * *

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

5. In § 273.18 new paragraphs (g)(5) and (g)(6) are added to read as follows:

§ 273.18 Claims against households.

* * * * *

(g) *Method of collecting payments.* * * *

(5) *Federal income tax refund offset program.*

(i) *General requirements.* State agencies which choose to implement the Federal income tax refund offset program (FTROP) shall:

(A) Submit an amendment to their Plan of Operation as specified in Section 272.2(d)(1)(xii) of this chapter stating that they will comply with the requirements for FTROP and with the requirements for the Federal Salary Offset Program (salary offset). Such amendments shall be submitted to the appropriate FCS regional office no later than twelve months before the beginning of a State agency's first offset year.

(B) Submit data for FTROP to FCS in the record formats specified by FCS and/or the Internal Revenue Service (IRS), and according to schedules and by means of magnetic tape, electronic data transmission or other method specified by FCS.

(ii) *Claims referable for offset.* State agencies may submit for collection from Federal income tax refunds recipient claims which are past due and legally enforceable.

(A) Such claims must be:

(*1*) Only inadvertent household error claims or intentional Program violation claims. These claims shall be properly established according to the requirements of this section (which pertains to claims against households) and the requirements of section 273.16 (which pertains to disqualification for intentional Program violations). In addition, these claims shall be properly established no later than the date the State transmits its final request for IRS addresses for the particular offset year. Furthermore, the State agency shall have electronic records and/or paper documents showing that the claim was properly established. These records and documents include such items as claim demand letters, results of fair hearings, advance notices of disqualification hearings, results of such hearings, and records of payments.

(*2*) Claims for which the State agency has verified that no individual who is jointly and severally liable as specified in paragraph (a) of this section is also currently participating in the FSP in the State.

(*3*) Claims which meet at least the minimum dollar amount established by the IRS.

(*4*) Claims for which the date of the initial demand letter is within 10 years of January 31 of the offset year, except that claims reduced to final court judgments ordering individuals to pay the debt are not subject to this 10-year limitation.

(*5*) Claims for which the State agency is receiving neither regular voluntary payments nor regular, involuntary payments such as wage garnishment. Claims for which a State agency has been receiving regular payments under paragraph (g)(2) of this section are considered past due and legally enforceable if the individual does not respond to a notice of default as specified in paragraph (g)(2) of this section.

(*6*) Claims for which collection is not barred by a bankruptcy.

(*7*) Claims for which the State agency has provided the individual with all of the notification and opportunities for review as specified in paragraphs (g)(5)(iii), (g)(5)(iv), (g)(5)(v) and (g)(5)(vi) of this section.

(B) In addition:

(*1*) All claims to be submitted for collection under FTROP shall be reduced by any amounts subject to collection from State income tax refunds or from other sources which may result in collections during the offset year.

(*2*) If a claim to be submitted for collection under FTROP is a combination of two or more recipient claims, the date of the initial demand letter for each claim combined shall be within the 10-year range specified in paragraph (g)(5)(ii)(A)(*4*) of this section. Claims reduced to judgment shall not be combined with claims which are not reduced to judgment.

(*3*) If a claim to be submitted under FTROP is apportioned between two or more individuals who are jointly and severally liable for the claim pursuant to paragraphs (a) and (f) of this section, the sum of the amounts submitted shall not exceed the total amount of the claim.

(iii) *60-Day notice to individuals.* (A) Prior to referring claims for collection under FTROP, the State agency shall provide individuals from whom it seeks to collect such claims with a notice, called a 60-day notice. For offset year 1996, State agencies have the option of providing the 60-day notice specified in paragraph (g)(5)(iv) of this section or in paragraph (g)(5)(x) of this section. For offset year 1997 and subsequent years, State agencies shall provide the 60-day notice specified in paragraph (g)(5)(iv).

(B) With the exception of such State-specific information as names and job titles and information required for State agency contacts, a State agency's 60-day notice shall contain only the information specified in paragraph (g)(5)(iv) of this section. In the certification letter required in paragraph (g)(5)(vii) of this section, the State agency shall include a statement that its 60-day notice conforms to this requirement. This requirement shall not apply to State agencies which choose to use the 60-day specified in paragraph (g)(5)(x) of this section for offset year 1996.

(C) Unless otherwise notified by FCS, the State agency shall mail 60-day notices for claims to be referred for collection through FTROP no later than October 1 preceding the offset year during which the claims would be offset.

(D) The State agency shall mail 60-day notices using the address information provided by the IRS unless the State agency receives clear and concise notification from the taxpayer that notices from the State agency are to be sent to an address different from the address obtained from the IRS. Such clear and concise notification shall mean that the taxpayer has provided the State agency with written notification including the taxpayer's name and identifying number (which is generally the taxpayer's SSN), the taxpayer's new address, and the taxpayer's intent to have notices from the State agency sent to the new address. Claims for which 60-day notices addressed as required in this paragraph are returned as undeliverable may be referred for collection under FTROP.

(iv) *Contents of the 60-day notice.* Except that the language set out in paragraph (g)(5)(iv)(C) of this section shall not be included in the notice for offset year 1996, the State agency's 60-day notice shall state that:

(A) [Name of the State agency or an equivalent phrase] has records documenting that you, [the name of the individual], Social Security Number: [the individual's Social Security Number] are liable for [the unpaid balance of the recipient claim(s) the State agency intends to refer] resulting from overissued food stamp benefits. [The name of the State agency or equivalent phrase] has previously mailed or otherwise delivered demand letters notifying you about the claim, including the right to a fair hearing on the claim, and has made any other required collection efforts.

(B) The Deficit Reduction Act of 1984, as amended, authorizes the Internal Revenue Service (IRS) to deduct such debts from tax refunds if they are past due and legally enforceable. [Name of the State agency or an equivalent phrase] has determined that your debt is past due and legally enforceable as specified by the Deficit Reduction Act of 1984, the IRS regulations, and Food Stamp Program (FSP) regulations. We intend to refer the claim for deduction from your Federal income tax refund unless you pay the claim within 60 days of the date of the notice or make other repayment arrangements acceptable to us.

(C) If we refer your claim to the IRS, a charge for the administrative cost of collection will be added to your claim and that amount will also be deducted if the claim, or any portion of the claim, is deducted from your tax refund. This charge will be approximately [the amount provided by FCS].

(D) All adults who were household members when excess food stamp benefits were issued to the household are jointly and severally liable for the value of those benefits, and collection of claims for such benefits may be pursued against all such individuals.

(E) Our records do not show that the claim is being paid according to either a voluntary agreement with us or through scheduled, involuntary payments. To pay the claim voluntarily or to discuss it, you should contact: [an office, administrative unit and/or individual, the contact's street address or post office box, and a toll-free or collect telephone number].

(F) You are entitled to request a review of the intended collection action. We must receive your request for review within 60 days of the date of this notice. Such a request must be written, must be submitted to the address provided in this notice and must contain your Social Security Number. We will not refer your claim for offset while our review is pending.

(G) The claim is not legally enforceable if a bankruptcy prevents collection of the claim.

(H) You may want to contact your local office of the IRS before filing your Federal income tax return. This is true where you are filing a joint return, and your spouse is not liable for the food stamp claim and has income and withholding and/or estimated Federal income tax payments. In such circumstances your spouse may be entitled to receive his or her portion of any joint refund. Your own liability for this claim, including any charge for administrative costs, may still be collected from your share of such a joint refund.

(I) If you request a review of our intent to collect the claim from your income tax refund, you should provide documentation showing that at least one of the items listed below is incorrect for the claim cited in this notice. If you do not have such documentation, for example a cancelled check, you should explain in detail why you believe that the claim is not collectible under the Federal Income Tax Refund Offset Program.

(J) The claim cited in this notice is subject to collection from your tax refund for the following reasons:

(*1*) The claim was properly established according to Food Stamp Program regulations and was caused by an inadvertent household error or an intentional Program violation;

(*2*) No individual who is jointly and severally liable for the claim is also currently participating in the Food Stamp Program in [the name of State initiating the collection action];

(*3*) The claim is for at least [the minimum dollar amount required by the IRS];

(*4*) The date of the initial demand letter for the claim is within 10 years of January 31, [the offset year]. If the claim was reduced to a final court judgment ordering you to pay the debt, this 10-year period does not apply, and the date of the initial demand letter may be older than 10 years; and

(*5*) We are neither receiving voluntary payments pursuant to an agreed upon schedule of payments as provided in current Food Stamp Program regulations nor are we receiving scheduled, involuntary payments such as wage garnishment. Claims for which we have been receiving regular payments under current Food Stamp Program regulations are considered past due and legally enforceable if you did not respond to a notice of default.

(K) In addition, collection of the claim is not barred by bankruptcy.

(v) *State agency action on requests for review.* (A) For all written requests for review received within 60 days of the date of the 60-day notice, the State agency shall determine whether or not the subject claims are past due and legally enforceable, and shall notify individuals in writing of the result of such determinations.

(B) The State agency shall determine whether or not claims are past due and legally enforceable based on a review of its records, and of documentation, evidence or other information the individual may submit.

(C) If the State agency decides that a claim for which a review request is received is past due and legally enforceable, it shall notify the individual that:

(*1*) The claim was determined past due and legally enforceable, and the reason for that determination. Acceptable reasons for such a determination include the individual's failure to provide adequate documentation that the claim is not past due or legally enforceable;

(*2*) The State agency intends to refer the claim to the IRS for offset;

(*3*) The individual may ask FCS to review the State agency decision. FCS must receive the request for review within 30 days of the date of the State agency decision. FCS will provide the individual a written response to such a request stating its decision and the reasons for its decision. The claim will not be referred to the IRS for offset pending the FCS decision; and

(*4*) A request for an FCS review must include the individual's SSN and must be sent to the appropriate FCS regional office. The State agency decision shall provide the address of that regional office, including in that address the phrase "Tax Offset Review."

(D) If the State agency determines that the claim is not past due or legally enforceable, in addition to notifying the individual that the claim will not be referred for offset, the State agency shall take any actions required by food stamp regulations with respect to establishing the claim, including holding appropriate hearings and initiating collection action.

(E) The State agency shall not refer for offset a claim for which a timely State agency review request is received unless by October 31 preceding the offset year the State agency determines the claim past due and legally enforceable, and notifies the individual of that decision as specified in paragraphs (g)(5)(v)(C)(*1*), (g)(5)(v)(C)(*2*), and (g)(5)(v)(C)(*3*) of this section.

(vi) *FCS action on appeals of State agency reviews.*

(A) FCS shall act on all timely requests for FCS reviews of State agency review decisions as specified in paragraph (g)(5)(v)(C) of this section. A request for FCS review is timely if it is received by FCS within 30 days of the date of the State agency's review decision.

(B) If a timely request for FCS review is received, and the State agency's decision is dated on or before October 31 of the year prior to the offset year, FCS shall:

(*1*) Complete a review and notification as specified in paragraphs (g)(5)(vi)(C), (g)(5)(vi)(D), and (g)(5)(vi)(E) of this section, including providing State agencies and individuals the required notification of its decision; or

(*2*) Notify the State agency that it has not completed its review and that the State agency must delete the claims in question from files to be certified to FCS according to paragraph (g)(5)(vii) of this section. If FCS fails to timely notify the State agency and because of that failure a claim is offset which FCS later finds does not meet the criteria specified in paragraph (g)(5)(ii) of this section, FCS will provide funds to the State agency for refunding the charge for the offset fee.

(C) If a timely request for FCS review is received, and the State agency's decision is dated after October 31 of the year prior to the offset year, FCS shall complete a review as specified in paragraphs (g)(5)(vi)(D), (g)(5)(vi)(E) and (g)(5)(vi)(F) of this section, but the claim shall not be referred for offset as

specified in paragraph (g)(5)(v)(E) of this section.

(D) When FCS receives an individual's request to review a State agency decision, FCS shall:

(*1*) Request pertinent documentation from the State agency about the claim. Such documentation shall include such things as printouts of electronic records and/or copies of claim demand letters, results of fair hearings, advance notices of disqualification hearings, the results of such hearings, records of payments, 60-day notices, review requests and documentation, decision letters, and pertinent records of such things as telephone conversations; and

(*2*) Decide whether the State agency correctly determined the claim in question is past due and legally enforceable.

(E) If FCS finds that the State agency correctly determined that the claim is past due and legally enforceable, FCS will notify the State agency and individual of its decision, and the reason(s) for that decision, including notice to the individual that any further appeal must be made through the courts.

(F) If FCS finds that the State agency incorrectly determined that the claim is past due and legally enforceable, FCS will notify the State agency and individual of its decision, and the reason(s) for that decision. FCS will also notify the State agency about any corrective action the State agency must take with respect to the claim and related procedures.

(vii) *Referral of claims for offset.* (A) State agencies shall submit to FCS a certified file of claims for collection through FTROP by the date specified by FCS in schedules which FCS will provide as stated in paragraph (g)(5)(i) of this section. At the same time State agencies shall also provide to their FCS regional office a letter which specifically certifies that all claims contained in that certified file meet the criteria for claims referable for FTROP as specified in paragraph (g)(5)(ii) of this section, and that for all such claims a notice and opportunity to request a review as required in paragraphs (g)(5)(iii), (g)(5)(iv), (g)(5)(v) and (g)(5)(vi) of this section have been provided. The certification letter shall also state that the State agency has not included in the certified file of claims any claim which, as provided in paragraph (g)(5)(vi) of this section, FCS notified the State agency is not past due or is not legally enforceable, or any claim for which FCS notified the State agency that it has not completed a timely requested review, or for which the State agency has not completed a timely requested review. Finally, the certification letter shall also state that with the exception of State-specific information such as names and positions and State-specific information required for State agency contacts, the State agency's 60-day notice contains only the information specified in paragraph (g)(5)(iv) of this section.

(B) The State agency shall provide to FCS the name, address and toll-free or collect telephone numbers of State agency contacts to be included in IRS notices of offset. State agencies shall state in the letter required in paragraph (g)(5)(vii)(A) of this section how they determined that such information is accurate and shall provide FCS updates of that information if and when that information changes.

(viii) *State agency actions on offsets made.* (A) Promptly after receiving notice from FCS that offsets have been made, the State agency shall notify affected individuals of offsets made, including the amount charged for offset fees, and the status of the claims in question.

(B) As close in time as possible to the notice of offset required in paragraph (g)(5)(viii)(A) of this section, the State agency shall refund to the individual (as required by paragraph (i)(4) of this section) any over collection which resulted from the offset of the individual's Federal income tax refund.

(C) If an offset results from a State agency including in the certified file of claims required by paragraph (g)(5)(vii)(A) of this section a claim which does not meet the criteria specified in paragraph (g)(5)(ii) of this section, the State agency shall refund the amount offset to the individual, including any amounts collected to pay for the offset fee charged by the IRS. The State agency may claim any such latter amount as an allowable administrative cost under Part 277 of this chapter. The State agency shall not be responsible for refunding any portion of the charges for offset fees incurred for IRS reversals of offsets when, for example, the IRS refunds amounts offset, including offset fees, to taxpayers who properly notified the IRS that they are not liable for claims which were collected in whole or part from their share of a joint Federal income tax refund.

(ix) *Monitoring and reporting offset activities.* State agencies shall monitor FTROP activities and shall take all necessary steps to:

(A) Update IRS files, reducing the amounts of or deleting claims from those files to reflect payments made after referral to FCS, or deleting claims which for other reasons no longer meet the criteria for being collectible under FTROP.

(B) Promptly refund to the individual any over collection of claims as required in paragraph (g)(5)(viii)(B) of this section.

(C) Annually and no later than the tenth of October of the year prior to the offset year report in writing to the FCS regional office the number of 60-day notices mailed and the total dollar value of the claims associated with those notices.

(D) Submit data security and voluntary payment reports as required by FCS and the IRS.

(E) Report collections of all recipient claims collected under the procedures of paragraph (g)(5) of this section as required by paragraph (i)(2) of this section.

(x) *Contents of the alternate 60-day notice.* As specified in paragraph (g)(5)(iii)(A) of this section, for offset year 1996 State agencies may use a 60-day notice specifying the following information:

(A) The State agency has records documenting that the individual, identified with his or her Social Security Number, is liable for a specified, unpaid balance of a claim for overissued food stamp benefits, and that the State agency has notified the individual about the claim and made prior collection efforts as required by the Food Stamp Program. The notice must also state that the claim is past due and legally enforceable.

(B) The Deficit Reduction Act of 1984, as amended by the Emergency Unemployment Act of 1991, authorizes the Internal Revenue Service to deduct such debts from tax refunds, and the State agency intends to refer the claim for such deduction unless the individuals pays the claim within 60 days of the date of the notice, or makes other repayment arrangements acceptable to the State agency.

(C) Instructions about how to pay the claim, including the name, address and telephone number of an office, administrative unit or person in the State agency who can discuss the claim and the intended offset with the individual.

(D) The following information about requesting a review of the intended offset:

(*1*) The individual is entitled to request a review of the intended referral for offset;

(*2*) The State agency will not act on review requests which it receives later than 60 days after the date of the 60-day notice;

(*3*) Claims for which timely review requests have been received will not be referred for offset while under review;

(*4*) A review request must provide evidence or documentation why the individual believes that the claim is not past due or is not legally enforceable;

(*5*) A review request is not considered received until the State agency receives such evidence or documentation; and

(*6*) A review request must contain the individual's Social Security Number.

(E) The individual should contact the State agency if he or she believes that a bankruptcy proceeding prevents collection of the claim or if the claim has been discharged in bankruptcy.

(F) The individual may want to contact the Internal Revenue Service before filing his or her Federal income tax return if the individual is married, filing a joint return, and if his or her spouse is not liable for the food stamp claim and has income and withholding and/or estimated Federal income tax payments. In such circumstances the spouse may be entitled to receive his or her portion of any joint refund. False claims concerning such liability may subject individuals to legal action.

(G) All individuals are jointly and severally liable for overpayment of food stamps if they were adult household members when the food stamps were overissued.

(6) *Federal salary offset program.*

(i) *Claims subject to salary offset.* All recipient claims submitted by State agencies participating in the Federal income tax refund offset program (FTROP) shall be subject to the matching procedures specified in this paragraph. Individuals identified by the match shall be subject to the salary offset procedures specified in this paragraph.

(ii) *Identification of recipient claims owed by Federal employees.* (A) FCS will match all recipient claims submitted by State agencies participating in FTROP against Federal employment records maintained by the Department of Defense and the United States Postal Service. FCS will remove recipient claims matched during this procedure from the list of recipient claims to be referred to the Internal Revenue Service (IRS) for collection through FTROP.

(B) When FCS receives a list of Federal employees matched against recipient claims for a particular State agency, it will notify the State agency in writing accompanied by a data security and confidentiality agreement containing the requirements specified in paragraph (g)(6)(ii)(C) of this section for the State agency to sign and return. When that agreement is returned, signed by an appropriate official of the State agency, FCS will provide the list of matched Federal employees to the State agency.

(C) State agencies which receive lists of matched employees shall take the actions specified in this paragraph to ensure the security and confidentiality of information about those employees and their apparent debts, and shall ensure that any contractors or other non-State agency entities to which the records may be disclosed also take these actions:

(*1*) By such means as card keys, identification badges and security personnel, limit access to computer facilities handling the data to persons who need to perform official duties related to the salary offset procedures. By means of a security package, limit access to the computer system itself to such persons;

(*2*) During off-duty hours, keep magnetic tapes and other hard copy records of data in locked cabinets in locked rooms. During on-duty hours, maintain those records under conditions that restrict access to persons who need them in connection with official duties related to salary offset procedures;

(*3*) Use the data solely for salary offset purposes as specified in paragraph (g)(6) of this section, including not extracting, duplicating or disseminating the data except for salary offset purposes;

(*4*) Retain the data only as long as needed for salary offset purposes as specified in paragraph (g)(6) of this section, or as otherwise required by FCS;

(*5*) Destroy the data by shredding, burning or electronic erasure; and

(*6*) Advise all personnel having access to the data about the confidential nature of the data and their responsibility to abide by the security and confidentiality provisions stated in paragraph (g)(6)(ii)(C) of this section.

(D) Prior to taking any action to collect recipient claims as specified in paragraph (g)(6)(iii) of this section, State agencies shall review the claims records of matched Federal employees to verify the amount of the recipient claim owed, and to remove from the list of claims any recipient claims which have been paid, which are being paid according to an agreed to schedule, or which for other reasons are not collectible.

(iii) *State agency advance notice of salary offset.* (A) Following the review specified in paragraph (g)(6)(ii)(D) of this section, State agencies shall provide each Federal employee verified as owing a recipient claim (debtor) with an advance notice of salary offset (advance notice). This advance notice shall be mailed to the debtor at the address provided by FCS, or shall be otherwise provided, within 60 days of State agency receipt of the list specified in paragraph (g)(6)(ii)(B) of this section.

(B) Within 90 days of the date of the advance notice, the State agency shall refer to FCS all claims for which the State agency does not receive timely and adequate response as specified in the advance notice. Such referrals shall consist of a copy of the advance notice sent to the debtor and copies of records relating to the recipient claim. Records relating to the recipient claims include such things as copies of printouts of electronic records and/or copies of claim demand letters, results of fair hearings, advance notices of disqualification hearings, the results of such hearings, records of payments, review requests and documentation, decision letters, and pertinent records of such things as telephone conversations.

(C) The advance notice shall state that:

(*1*) According to State agency records the debtor is liable for a claim for a specified dollar amount due to receiving excess food stamp benefits. State agencies are encouraged to include as much other information about the claim as possible, including such things as whether it was caused by household error or intentional Program violation, the date of the initial demand letter, any hearings or court actions which relate to the claim, and what, if any, payments have reduced the amount of the original claim;

(*2*) Through a computer match the debtor was found to be employed by [the name and address of the employing agency of the debtor]. The computer match was conducted under the authority of and according to procedures required by the Privacy Act of 1974, as amended;

(*3*) Collection from the wages of Federal and USPS employees for debts such as food stamp recipient claims is authorized by the Debt Collection Act of 1982. The claim will be referred to FCS for such collection action unless within 30 days of the date of the advance notice the State agency receives either:

(*i*) Payment of the claim in full. Claims of $50 or less shall be paid in full within 30 days or they will be referred to FCS for collection from the individual's Federal salary; or

(*ii*) The first installment payment for the claim. Claims of more than $50, if not paid in full within 30 days, must be paid in installments of at least $50 a month. Debtors may pay more than $50 on any installment payment. The advance notice shall state the monthly due date of installment payments and that if a monthly installment payment of at least $50 is not received by the due date, the claim will be referred to FCS for offset from the individual's Federal salary with no further opportunity to enter a voluntary repayment agreement;

(*4*) The name, address and a toll-free or collect telephone number of a State agency contact (an individual or unit) for repayment and/or discussion of the claim; and

(*5*) Debtors may submit documentation to State agencies showing such things as payments of claims or other circumstances which would prevent collection of claims. Unless the State agency receives such documentation within 30 calendar days of the date of the advance notice and the documentation clearly shows that the claim has been paid or is not legally collectible, the State agency shall refer the claim to FCS for collection from the debtor's salary. The State agency shall notify debtors in writing when claims for which an advance notice was issued will not be referred for collection from salaries. Debtors have the right to a formal appeal to FCS. Notification about how to make such appeals is required and will be provided to debtors before any collection action from salaries is taken.

(iv) *State agency retention and reporting of collections.* (A) State agencies shall retain collections of recipient claims paid voluntarily to State agencies and to FCS through salary offsets at the rates specified in paragraph (h) of this section for the appropriate reporting period. From time to time as volume warrants, FCS will report and transfer amounts collected from salaries to State agencies. Collections by State agencies and by FCS on all such claims shall be reported as appropriate.

(B) If a debtor fails to make an installment payment, within 60 days of the date the payment was due, State agencies shall refer the claim to FCS, reporting the default, the dollar amount collected and the balance due.

(v) *FCS actions on claims referred by State agencies.* Departmental procedures at 7 CFR 3.51–3.68 shall apply to claims referred by State agencies to FCS as required by paragraphs (g)(6)(iii)(B) and (g)(6)(iv)(B) of this section subject to the following modifications:

(A) In addition to the definitions set forth at 7 CFR 3.52, the term "debts" shall further be defined to include recipient claims established according to this section; and the terms "State agency" and "FCS" shall be defined as set forth in section 271.2 of this chapter.

(B) Pursuant to 7 CFR 3.34(c)(4) and 7 CFR 3.55(d), the Secretary has determined that collection of interest, penalties and administrative costs provided at 7 CFR 3.65 is not in the best interests of the United States and hereby waives collection of such charges.

(C) In addition to providing the right to inspect and copy Departmental records as specified at 7 CFR 3.60(a), the Secretary shall provide copies of records relating to the debt in response to timely requests. For a request to be timely, FCS must receive it within 30 calendar days of the date of the notice of intent.

(D) Pursuant to 5 CFR 550.1104(d)(6), an opportunity to establish a written repayment agreement provided at 7 CFR 3.61 shall not be provided.

(E) The notice of intent for FSP salary offset shall comply with the requirements of the Departmental notice of intent which are set forth at 7 CFR 3.55, subject to the following modifications:

(*1*) In addition to the statement that the debtor has the right to inspect and copy Departmental records relating to the debt, the notice of intent shall state that if timely requested by the debtor, the Secretary shall provide the debtor copies of such records. It shall further advise, as required by 7 CFR 3.60(a), that to be timely such requests must be received within 30 days of the date of the notice of intent; and

(*2*) The statement of the right to enter a written repayment agreement provided by 7 CFR 3.55(f) shall not be included.

* * * * *

Dated: August 29, 1995.

Ellen Haas,

Under Secretary for Food, Nutrition and Consumer Services.

Part VI

Department of Education

34 CFR Part 75
Direct Grant Programs; Proposed Rule

DEPARTMENT OF EDUCATION

34 CFR Part 75

RIN 1880–AA69

Direct Grant Programs

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the Education Department General Administrative Regulations (EDGAR) that govern discretionary grant programs. These proposed amendments would reduce the need for specific regulations governing individual programs. The proposed amendments would authorize the Secretary to establish selection criteria for a discretionary grant program based on provisions in the statute authorizing that program and on existing selection criteria in EDGAR. The amendments also would clarify the Secretary's authority to establish annual funding priorities for grant competitions.

DATES: Comments must be received on or before October 2, 1995.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Jacinta Ma, U.S. Department of Education, 600 Independence Avenue SW., Washington, DC 20202. Comments also may be sent through the Internet to Selection _ Criteria@ed.gov.

FOR FURTHER INFORMATION CONTACT: Ms. Jacinta Ma, U.S. Department of Education, 600 Independence Avenue SW., Washington, DC 20202–2241. Telephone: (202) 401–8300. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: These proposed amendments would allow the Secretary to establish selection criteria based on statutory provisions, clarify the Secretary's authority to establish one or more annual priorities, and allow the Secretary to establish the maximum score for each selection criterion on a competition-by-competition basis. The proposed amendments also would conform existing regulations in §§ 75.1 and 75.200 to reflect the additional method for establishing selection criteria.

In addition, the proposed amendments would eliminate requirements in § 75.101(c) that are unnecessary. The inclusion of the information required by § 75.101(c) in an application notice is already adequately provided for in § 75.101(a).

The following is a summary of the major provisions of the proposed amendments.

Section 75.105 Annual Priorities

The Secretary proposes to amend § 75.105 to clarify that if a statute authorizing a program includes one or more specific priorities, the Secretary may establish those priorities as annual funding priorities without first submitting them to public comment. Statutory priorities include provisions that require the Secretary to give preference or special consideration to certain applicants. Because these priorities are established by statute, public comment could affect only the way the Department implements the statutory priority, e.g., what weight to give to the priority or choosing among priorities. This amendment would codify the Department's long-standing interpretation of the current provisions in § 75.105 regarding priorities. In addition, the proposed regulations would allow the Secretary to establish without public comment annual funding priorities selected from allowable activities specified in a program statute assuming that there is legal authority to establish this type of priority. Through these amendments, the Secretary would be able to assign an appropriate weight to the statutory priority or priority selected from allowable activities, and, in an application notice published in the **Federal Register**, indicate how the priority will apply to the particular competition.

Sections 75.200, 75.201, 75.209, and 75.210 Selection Criteria

EDGAR provides selection criteria for choosing among competing grant applications (34 CFR 75.210) under programs that do not have implementing regulations or have implementing regulations that do not include selection criteria. However, the EDGAR selection criteria are necessarily very general, and for some programs the EDGAR criteria may not adequately enable reviewers to evaluate the extent to which grant applications respond to specific provisions contained in the program statutes that govern the competitions. Therefore, in an effort to create more targeted selection criteria in appropriate situations and to reduce the amount of rulemaking for discretionary grant programs, the Secretary proposes these amendments to Part 75 to authorize the Secretary to establish selection criteria for a grant competition based on the authorizing statute. The Secretary believes these amendments will reduce the amount of rulemaking for discretionary programs because, in the past, the Department regularly had to develop program-specific regulations to meet the need for more specific selection criteria.

The Secretary proposes a new provision (§ 75.209) that would allow the Secretary to establish selection criteria based on statutory provisions. For example, the Secretary could establish criteria based on provisions such as specified statutory selection criteria, allowable activities, application content requirements, or other pre-award or post-award conditions. The new selection criteria would mirror statutory language and the Secretary would evaluate each application to determine how well the applicant's proposed project meets each of the criteria. The Secretary has already published a notice in the **Federal Register** (March 7, 1995 at 60 FR 12648) authorizing this procedure for conducting certain FY 1995 grant competitions under the Improving America's Schools Act of 1994.

If a program does not have implementing regulations establishing selection criteria or has implementing regulations that do not include selection criteria, these amendments would authorize the Secretary to evaluate applications by applying the general selection criteria in part 75, selection criteria based on provisions in the authorizing statute for the program, or a combination of these criteria. These amendments would also allow the Secretary the flexibility to weigh the criteria according to the needs of each individual competition.

Rather than establishing in regulations the total number of points an application may receive and the maximum number of points that an application may receive for a particular selection criterion (either established from a statutory provision or found in EDGAR), the Secretary will notify applicants of the total possible score and the maximum points for each selection criterion in the application package. If no point allocation is specified, the Secretary would assign an equal maximum value to each selection criterion.

Because the selection criteria would be included in an application package, the criteria would be subject to prior public comment in accordance with the Paperwork Reduction Act of 1995. That statute requires the Department to publish in the **Federal Register** a notice of proposed information collection that solicits public comment. Anyone who wishes to comment may contact the

Department and obtain a copy of the proposed application package.

The Secretary proposes to preserve § 75.210 of EDGAR, which establishes general selection criteria, except that the maximum point value assigned to each selection criterion would be removed to allow for the proposed process of assigning a maximum possible point value to each criterion according to the needs of the competition. In addition, because the Secretary would be able to weigh each criterion by establishing the total number of points and assigning a maximum possible point value to each selection criterion, there would no longer be a need to retain § 75.210(c), which allows for the distribution of an unassigned 15 points among the criteria in § 75.210(b).

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

These regulations could affect States, State agencies, and individuals. States, State agencies, and individuals, however, are not defined as "small entities" in the Regulatory Flexibility Act.

The small entities that could be affected by these regulations are institutions of higher education, local educational agencies, community-based organizations, and nonprofit organizations receiving Federal funds under a direct grant program. The proposed regulations, however, would not have a significant economic impact on these entities, if affected, because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The proposed regulations would impose minimal requirements for the Secretary to select grantees.

Paperwork Reduction Act of 1980

The proposed amendments have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Intergovernmental Review

Some of the programs that would be affected by these regulations are subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for these programs.

Invitation to comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 5100, 600 Independence Avenue SW., Washington, DC, between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 75

Administrative practice and procedure, Continuation funding, Education, Grant programs—education, Grants administration, Incorporation by reference, Performance reports, Reporting and recordkeeping requirements, Unobligated funds.

Dated: August 28, 1995.

Richard W. Riley,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number does not apply)

The Secretary proposes to amend part 75 of Title 34 of the Code of Federal Regulations as follows:

PART 75—DIRECT GRANT PROGRAMS

1. The authority citation for part 75 is revised to read as follows:

Authority: 20 U.S.C. 1221e–3 and 3474, unless otherwise noted.

2. Section 75.1 is amended by revising the Note to read as follows:

§ 75.1 Programs to which part 75 applies.

* * * * *

Note: See part 76 for the general regulations that apply to programs that allocate funds among eligible States. For a description of the two kinds of direct grant programs see § 75.200(b) for a description of a discretionary grant program and § 75.200(c) for a description of a formula grant program. Also see §§ 75.201, 75.209, and 75.210 for the selection criteria for discretionary grant programs that do not have implementing regulations or whose implementing regulations do not include selection criteria.

§ 75.101 [Amended]

3. Section 75.101 is amended by removing paragraph (c).

4. Section 75.105 is amended by removing the word "or" following paragraph (b)(2)(ii), replacing the period at the end of paragraph (b)(2)(iii) with a semicolon, adding new paragraphs (b)(2)(iv) and (b)(2)(v), and revising the first sentence in paragraph (c)(2)(i) to read as follows:

§ 75.105 Annual priorities.

* * * * *

(b) * * *

(2) * * *

(iv) The program statute requires or authorizes the Secretary to establish specified priorities; or

(v) The annual priorities are chosen from allowable activities specified in the program statute.

(c) * * *

(2) * * *

(i) The Secretary may award some or all bonus points to an application depending on the extent to which the application meets the priority. * * *

5. Section 75.200 is amended by revising paragraph (b)(3) to read as follows:

§ 75.200 How applications for new grants and cooperative agreements are selected for funding; standards for use of cooperative agreements.

* * * * *

(b) * * *

(3) If a discretionary grant program does not have implementing regulations or has implementing regulations that do not include selection criteria, the Secretary uses one of the following to evaluate applications for new grants under the program:

(i) Selection criteria established under § 75.209.

(ii) Selection criteria in § 75.210.

(iii) A combination of selection criteria established under § 75.209 and selection criteria in § 75.210.

* * * * *

6. Section 75.201 is revised to read as follows:

§ 75.201 How to use the selection criteria.

(a) If points are assigned to the selection criteria, the Secretary informs applicants of—

(1) The total possible score for all of the criteria for a program; and

(2) The maximum possible score for each criterion.

(b) If no points are assigned to the selection criteria, the Secretary evaluates each criterion equally.

(Authority: 20 U.S.C. 1221e–3 and 3474)

7. A new § 75.209 is added to read as follows:

§ 75.209 Selection criteria based on statutory provisions.

(a) If a discretionary grant program does not have implementing regulations or has implementing regulations that do not include selection criteria, the Secretary may evaluate applications by—

(1) Establishing selection criteria based on particular statutory provisions that may include but are not limited to—

(i) Specific statutory selection criteria;

(ii) Allowable activities;

(iii) Application content requirements; or

(iv) Other pre-award and post-award conditions; and

(2) Assigning the maximum possible score for each of the criteria established under paragraph (a)(1) of this section.

(b) The Secretary reviews each application to determine how well the applicant's proposed project meets each of the criteria established under paragraph (a)(1) of this section.

Example: If a program statute requires that each application address how the applicant will serve the needs of limited English proficient children, under § 75.209 the Secretary could establish a criterion and evaluate applications based on how well the applicant's proposed project meets that statutory provision. The Secretary might decide to award up to 10 points for this criterion. Applicants who have the best proposals to serve the needs of limited English proficient children would score the highest under the criterion in this example.

(Authority: 20 U.S.C. 1221e–3 and 3474)

8. Section 75.210 is amended by revising the heading, removing paragraphs (a) and (c), removing the point designations following the italicized headings in paragraphs (b) (1), (2), (3), (4), (5), (6), and (7), adding undesignated introductory text, removing "*The criteria—*" in paragraph (b), and redesignating paragraphs (b) (1), (2), (3), (4), (5), (6), and (7) as paragraphs (a), (b), (c), (d), (e), (f), and (g), respectively, to read as follows:

§ 75.210 General selection criteria.

The Secretary may use one or more of the following selection criteria, together with one or more criteria established under § 75.209, if any, to evaluate applications for new grants under a discretionary grant program:

(a) *Meeting the purposes of the authorizing statute.* * * *

(b) *Extent of need for the project.* * * *

(c) *Plan of operation.* * * *

(d) *Quality of key personnel.* * * *

(e) *Budget and cost effectiveness.* * * *

(f) *Evaluation plan.* * * *

(g) *Adequacy of resources.* * * *

(Authority: 20 U.S.C. 1221e–3 and 3474)

Part VII

Department of the Interior

Bureau of Indian Affairs

Mission Valley Power Utility, Montana; Power Rate Adjustment; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Mission Valley Power Utility, Montana; Power Rate Adjustment

AGENCY: Bureau of Indian Affairs, Department of the Interior.

ACTION: Notice of rate change.

SUMMARY: The Bureau of Indian Affairs (BIA) is increasing the cost of electric power to customers of Mission Valley Power (MVP), the entity operating the power facility of the Flathead Irrigation and Power Project of the Flathead Reservation. The BIA has been informed by the Bonneville Power Administration (BPA) that it is increasing its wholesale power and transmission rates by 4.0 percent through an interim surcharge. At the present time, the BPA supplies the majority of MVP's wholesale power requirements through a contract, which will expire in the year 2001.

Accordingly, the BIA is adjusting MVP rates and charges to reflect the increased cost of service and power provided to MVP by the BPA. The rate change will impact MVP's Basic Charge, Demand Charge, Horsepower Charge and various energy rates within each rate class. The effective date of the BPA rate change is October 1, 1995, through September 30, 1996. MVP will adjust its rates and charges effective October 1, 1995, through September 30, 1996, accordingly.

DATES: These rates will become effective October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Area Director, Bureau of Indian Affairs, Portland Area Office, 911 N.E. 11th Avenue, Portland, Oregon 97232–4169, telephone (503) 231–6702; or, General Manager, Mission Valley Power, P.O. Box 890, Polson, Montana 59860–0890. Telephone (406) 883–5361 or 1–800–823–3758 (in-State Watts). For further specific information on the surcharge to be imposed by the Bonneville Power Administration please contact the Bonneville Power Administration, Corporate Communications, P.O. Box 12999, Portland, Oregon, or call them at (503) 230–4201.

SUPPLEMENTARY INFORMATION: The authority to issue this document is vested in the Secretary of the Interior by 5 U.S.C. 301; the Act of August 7, 1946, c. 802, Section 3 (60 Stat. 895; 25 U.S.C. 385c); the Act of May 25, 1948 (62 Stat. 269); and the Act of December 23, 1981, section 112 (95 Stat. 1404). The Secretary has delegated this authority to the Assistant Secretary—Indian Affairs pursuant to part 209 Departmental Manual, Chapter 8. 1A and Memorandum dated January 25, 1994, from Chief of Staff, Department of the Interior, to Assistant Secretaries, and Heads of Bureaus and Offices.

A notice of proposed rate change was published in the **Federal Register** on July 6, 1995 (60 FR 35315–35317). A 30-day comment period was allowed. The Bureau received 1 comment.

The single comment received addressed concerns on the equitable application of the 4% increase throughout the rate structure. The application of the increase was reviewed and determined to be appropriate. The BIA will respond directly to the commentator. This rate increase is necessary to recover costs passed on to the BIA by BPA.

The following table illustrates the impact of the surcharge.

BPA WHOLESALE POWER RATE REVISION FROM BPA TO MVP

Rate class	Present rate	Retail rate Oct. 1, 1995
Residential:		
Basic charge	$11.00/mo.(includes 127 kwh)	$11.00(includes 125 kwh).
Energy charge	$0.04724/kwh (over 127 kwh)	$0.04817/kwh(over 125 kwh).
#2 General:		
Basic charge	$11.00/mo.(includes 109 kwh)	$11.00/mo.(includes 107 kwh).
Energy charge	$0.05511/kwh (over 109 kwh)	$0.05604/kwh(over 107 kwh).
Irrigation:		
Horsepower charge	$10.84/HP	$11.25/HP.
Energy charge	$0.03605/kwh	$0.03638/kwh.
Minimum seasonal charge:	$132.00 or $6.00/HP, whichever is greater	Same.
Small and large commercial:		
Basic charge	None	None.
Monthly minimum	$38.00	$38.00.
Demand rate	$4.34/KW of billing demand	$4.50/KW of billing demand.
Energy charge	$0.04269/kwh—First 18,000 kwh	$0.04305/kwh—First 18,000 kwh.
	0.03551/kwh—Over 18,000 kwh	$0.03588/kwh—Over 18,000 kwh.
	Monthly rate	Monthly rate
Area lights installed on existing pole or structure:		
7,000 lumen unit, M.V.*	$6.98	$7.00.
20,000 lumen unit, M.V.*	$9.73	$10.00.
9,000 lumen unit, H.P.S	$6.30	$6.50.
22,000 lumen unit, H.P.S	$8.58	$8.75.
Area lights installed with new pole:		
7,000 lumen unit, M.V.*	$8.70	$8.75.
20,000 lumen unit, M.V.*	$11.43	$11.50.
9,000 lumen unit, H.P.S	$8.01	$8.25.
22,000 lumen unit, H.P.S	$10.28	$10.50.
Street lighting (metered):		
Basic charge	$11.00/mo.(over 109 kwh)	$11.00/mo.(for 107 kwh).
Energy charge	$0.05511(over 109 kwh)	$0.05604(over 107 kwh).
Street lighting (unmetered): This rate class applies to municipalities or communities where there are ten or more lighting units billed in a group. This rate schedule is subject to a negotiated contract with MVP.		

*Continuing Service Only.

Dated: August 29, 1995.

Ada E. Deer,

Assistant Secretary—Indian Affairs.

Department of the Interior

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting: Federal Indian Reservations and Ceded Lands; Final Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018-AC79

Migratory Bird Hunting: Migratory Bird Hunting Regulations on Certain Federal Indian Reservations and Ceded Lands for the 1995-96 Early Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes special early season migratory bird hunting regulations for certain tribes on Federal Indian reservations, off-reservation trust lands and ceded lands. This is in response to tribal requests for Service recognition of their authority to regulate hunting under established guidelines. This rule is necessary to allow establishment of season bag limits and, thus, harvest at levels compatible with populations and habitat conditions.

EFFECTIVE DATE: This rule takes effect on September 1, 1995.

ADDRESSES: Comments received, if any, on the proposed special hunting regulations and tribal proposals are available for public inspection during normal business hours in Room 634, Arlington Square Building, 4401 N. Fairfax Drive, Arlington, VA. Communications regarding the documents should be sent to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Room 634-ARLSQ, 1849 C Street, NW, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Ron W. Kokel or Dr. Keith A. Morehouse, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, (703/358-1714).

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), authorizes and directs the Secretary of the Department of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds, to determine when, to what extent, and by what means such birds or any part, nest or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported or transported.

In the August 17, 1995 **Federal Register** (60 FR 42960), the U.S. Fish and Wildlife Service (Service) proposed special migratory bird hunting regulations for the 1995-96 hunting season for certain Indian tribes, under the guidelines described in the June 4, 1985, **Federal Register** (50 FR 23467). The guidelines were developed in response to tribal requests for Service recognition of their reserved hunting rights, and for some tribes, recognition of their authority to regulate hunting by both tribal members and nonmembers on their reservations. The guidelines include possibilities for: (1) on-reservation hunting by both tribal members and nonmembers, with hunting by nontribal members on some reservations to take place within Federal frameworks but on dates different from those selected by the surrounding State(s); (2) on-reservation hunting by tribal members only, outside of usual Federal frameworks for season dates and length, and for daily bag and possession limits; and (3) off-reservation hunting by tribal members on ceded lands, outside of usual framework dates and season length, with some added flexibility in daily bag and possession limits. In all cases, the regulations established under the guidelines have to be consistent with the March 10-September 1 closed season mandated by the 1916 Migratory Bird Treaty with Canada.

Tribes that desired special hunting regulations in the 1995-96 hunting season were requested in the March 24, 1995, **Federal Register** (60 FR 15642) to submit a proposal that included details on: (1) requested season dates and other regulations to be observed; (2) harvest anticipated under the requested regulations; (3) methods that will be employed to measure or monitor harvest; (4) steps that will be taken to limit level of harvest, where it could be shown that failure to limit such harvest would impact seriously on the migratory bird resource; and (5) tribal capabilities to establish and enforce migratory bird hunting regulations. No action is required if a tribe wishes to observe the hunting regulations that are established by the State(s) in which an Indian reservation is located. The guidelines have been used successfully since the 1985-86 hunting season, and they were made final beginning with the 1988-89 hunting season (August 18, 1988; 53 FR 31612).

Although the proposed rule includes generalized regulations for both early and late season hunting, this rulemaking addresses only the early season proposals. Late season hunting will be addressed in the rulemaking to follow in September 1995. As a general rule, early seasons begin during September each year and have a primary emphasis on such species as mourning and white-winged dove. Late seasons are those that begin about October 1 or later each year and have a primary emphasis on waterfowl.

Comments and Issues Concerning Tribal Proposals

For the 1995-96 migratory bird hunting season, the Service proposed regulations for seventeen tribes and/or Indian groups that followed the 1985 guidelines and were considered appropriate for final rulemaking. Some of the proposals submitted by the tribes have both early and late season elements. However, as noted earlier, only those with early season proposals are included in this final rulemaking; 9 tribes have proposals with early seasons. Comments and revised proposals received to date are addressed in the following section. The comment period for the proposed rule, published on August 18, 1995, closed on August 28, 1995. Because of the brief comment period that was necessary, any comments received on the proposed rule and/or these early season regulations not responded to herein will be addressed in the late season final rule to be published in September.

Great Lakes Indian Fish and Wildlife Commission, Odanah, Wisconsin

To date, the Service has received one letter regarding the proposal of the Great Lakes Indian Fish and Wildlife Commission (GLIFWC). The State of Wisconsin Department of Natural Resources (WIDNR) July 6, 1995 letter to the GLIFWC, was copied to the Service. In this letter, the WIDNR communicated concerns regarding: (1) Canada goose bag limits of 10 per day, and concern for the harvest of local giant Canada geese. With regard to giant Canada geese, WIDNR cited 10 or more years of effort to restore breeding populations that could be jeopardized by overharvest locally; (2) the length of other goose seasons and bag limits for the GLIFWC in comparison to those required for non-tribal hunters by the State of Wisconsin. The WIDNR thought that GLIFWC goose seasons and bag limits should be consistent with those of the State; (3) the September 15 opening of the duck season. The WIDNR continues to oppose the early duck season opener in concern for late nesting hens and their broods that might still be in molt or just recovering from the molt that would make them especially vulnerable to harvest; (4) the proposed duck daily bag limit to 20. The WIDNR believes that the proposed bag limits may negatively impact efforts by the State and others, including the GLIFWC, to restore local duck breeding populations in northern Wisconsin; and (5) honoring the noon opening for shooting hours for the first day of the State's duck season.

It is necessary to place this proposal by the GLIFWC in the context of a tribal entity having court established legal rights on ceded lands. Further, it is the policy of the Service to recognize treaty rights wherever there is substantial proof that they occur, e.g., more recently in the Michigan 1836 Treaty area. Thus, the GLIFWC proposal has as its umbrella the recognition by the Federal Government of those reserved rights by bands to an unquantified amount of any harvestable migratory bird surpluses in the ceded areas. Our position derives from the special status that Native Americans have with regard to the Federal Government's trust responsibility, as well as precedent setting court decisions in Wisconsin and elsewhere when these reserved treaty rights have been at issue.

As to the details of the proposal comments, our response continues to be that while the Commission's proposed bag limits are somewhat greater than they were several years ago, we disagree that they are "inconsistent with past FWS harvest and population management strategies" and "excessive" for geese. The Service's position is that the current populations of birds can support the limited harvest of the bands. In past years, the numbers of ducks and geese taken annually by the Commission's member bands have been about 2,000 and 500, respectively. In 1994-95, under nearly identical regulations, 1901 ducks and 719 geese were taken. Under the proposed regulations, the annual harvest is anticipated to be approximately 3,000 ducks and 900 geese. Further, the Commission has proposed specific sex and species considerations, in line with current management concerns. If approved, the Commission will be obligated to monitor the harvest to ensure that local breeding populations of ducks are not being adversely affected.

The September 15 opening date for the GLIFWC meets the framework the Service has established for approval of tribal duck seasons. This date should provide ample time for even late broods and molting ducks to be flighted. These referenced guidelines were originally established by the Service's Region 3 Office in the Twin Cities, Minnesota, for use in the Great Lakes areas but have been generally applied elsewhere in the States, as appropriate. The Service also requests that tribal members honor both the noon opening for shooting hours for the first day of the State's duck season and Wisconsin's open water hunting restrictions.

As these regulations are being approved in this early season final rule, it is incumbent upon the GLIFWC to continue to closely monitor both the duck and goose harvests to ensure that local and/or regional breeding populations are not being negatively impacted by an increased harvest.

In summary, this rule amends section 20.110 of 50 CFR to make current for the early 1995-96 migratory bird hunting season the regulations that will apply on Federal Indian reservations, off-reservation trust lands and ceded lands. These regulations take into account the improved status of ducks and the need to maintain somewhat restrictive regulations to reduce harvest on some migratory bird populations.

NEPA Consideration

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)), the "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75-74)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the **Federal Register** on June 13, 1975, (40 FR 25241). A supplement to the final environmental statement, the "Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (SEIS 88-14)" was filed on June 9, 1988, and notice of availability was published in the **Federal Register** on June 16, 1988 (53 FR 22582), and June 17, 1988 (53 FR 22727). In addition, an August 1985 environmental assessment titled "Guidelines for Migratory Bird Hunting Regulations on Federal Indian Reservations and Ceded Lands" is available from the Service.

Endangered Species Act Considerations

Section 7 of the Endangered Species Act (ESA), as amended (16 U.S.C. 1531-1543; 87 Stat. 884), provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act" (and) shall "insure that any action authorized, funded or carried out ... is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of [critical] habitat..." Thus, the Service initiated Section 7 consultation for the proposed migratory bird hunting seasons including those which occur on Federally recognized Indian reservations and ceded lands. The Service's biological opinion resulting from its consultation under Section 7 of the ESA may be inspected by the public in, and will be available from, the Service's address given under the caption **ADDRESSES**.

In an August 1995 finding, the Service concluded that the proposed action is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of their critical habitats. Among other reasons, hunting regulations are designed to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species and their habitats.

Regulatory Flexibility Act, Executive Order 12866, and the Paperwork Reduction Act.

In the **Federal Register** dated March 24, 1995 (60 FR 15642), the Service reported measures it had undertaken to comply with requirements of the Regulatory Flexibility Act and the Executive Order. These included preparing an Analysis of Regulatory Effects and an updated Final Regulatory Impact Analysis (FRIA), and publication of a summary of the latter. Although a FRIA is no longer required, the economic analysis contained in the FRIA was reviewed and the Service determined that it met the requirements of E.O. 12866. In addition, the Service prepared a Small Entity Flexibility Analysis, under the Regulatory Flexibility Act (5 U.S.C. 601 et seq), which further document the significant beneficial economic effect on a substantial number of small entities. This rule was not subject to review by the Office of Management and Budget under E.O. 12866.

These regulations contain no information collections subject to OMB review under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). However, the Service does utilize information acquired through other various information collections in the formulation of migratory game bird hunting regulations. These information collection requirements have been approved by OMB and assigned clearance numbers 1018-0005, 1018-0006, 1018-0008, 1018-0009, 1018-0010, 1018-0015, 1018-0019, and 1018-0023.

Authorship

The primary authors of this early season final rule are Ron W. Kokel and Dr. Keith A. Morehouse, Office of Migratory Bird Management.

Regulations Promulgation

The rulemaking process for migratory bird hunting must, by its nature, operate under severe time constraints. However, the Service is of the view that every attempt should be made to give the public the greatest possible opportunity to comment on the regulations. Thus, when the proposed hunting regulations for certain tribes were published on August 18, 1995, the Service established the longest possible period for public comments. In doing this, the Service recognized that time would be of the essence. However, the comment period provided the maximum amount of time possible while ensuring that this final rule would be published before the beginning of the early hunting season beginning on September 1, 1995.

Under the authority of the Migratory Bird Treaty Act of July 3, 1918, as amended (40 Stat. 755; 16 U.S.C. 703 et seq.), the Service prescribes final hunting regulations for certain tribes on Federal Indian reservations (including off-reservation trust lands) and ceded lands. The regulations specify the species to be hunted and establish season dates, bag and possession limits, season length, and shooting hours for migratory game birds other than waterfowl.

Therefore, for the reasons set out above, the Service finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and this final rule will take effect on September 1, 1995.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

Accordingly, Part 20, Subchapter B, Chapter I of Title 50 of the Code of Federal Regulations is amended as follows:

PART 20–[AMENDED]

1. The authority citation for Part 20 continues to read as follows:

AUTHORITY: 16 U.S.C. 703-711, 16 U.S.C. 712, and 16 U.S.C. 742 a-j. (Editorial Note: The following hunting regulations provided for by §20.110 of 50 CFR Part 20 will not appear in the Code of Federal Regulations because of their seasonal nature).

2. Section 20.110 is revised to read as follows:

§20.110 Seasons, limits and other regulations for certain Federal Indian reservations, Indian Territory, and ceded lands.

(a) Colorado River Indian Tribes, Parker, Arizona (Tribal Members and Nonmembers)

Doves

Season Dates: Open September 1, close September 10, 1995; then open November 25, close January 14, 1996.

Daily Bag and Possession Limits: For the early season, daily bag limit is 10 mourning or 10 white-winged doves, singly, or in the aggregate per day. For the late season, the daily bag limit is 10 mourning doves. Possession limits are twice the daily bag limits.

General Conditions: A valid Colorado River Indian Reservation hunting permit is required for all persons 14 years and older and must be in possession before taking any wildlife on tribal lands. Any person transporting game birds off the Colorado River Indian Reservation must have a valid transport declaration form. Other tribal regulations apply, and may be obtained at the Fish and Game Office in Parker, Arizona.

(b) Grand Traverse Band of Ottawa and Chippewa Indians, Suttons Bay, Michigan (Tribal Members Only)

Canada Geese

Michigan, 1836 Treaty Zone:

Season Dates: Open September 1, close November 30, 1995, and open January 1, close February 7, 1996.

Daily Bag Limit: The daily bag limit is 5.

General Conditions: A valid Grand Traverse Band Tribal license is required for all persons 12 years and older and must be in possession before taking any wildlife. All other basic regulations contained in 50 CFR part 20 are valid. Other tribal regulations apply, and may be obtained at the tribal office in Suttons Bay, Michigan.

(c) Great Lakes Indian Fish and Wildlife Commission, Odanah, Wisconsin (Tribal Members Only)

Ducks

Wisconsin and Minnesota 1837, 1842 and 1854 Zones:

Season Dates: Open September 15, close November 7, 1995.

Daily Bag Limit: The daily bag limit is 20, including no more than 10 mallards; only 5 of which may be hen mallards; 4 black ducks; 4 redheads, 4 pintails and 2 canvasbacks.

Mergansers

Wisconsin and Minnesota Zones:

Season Dates: Open September 15, close November 7, 1995.

Daily Bag Limit: The daily bag limit is 5.

Canada Geese

Wisconsin and Minnesota Zones:

Season Dates: Open September 15, close December 1, 1995.

Daily Bag Limit: The daily bag limit is 10, minus the number of blue, snow or white-fronted geese taken.

Michigan, 1842 Treaty Zone:

Season Dates: Open September 1, close September 10, 1995.

Daily Bag Limit: The daily bag limit is 5.

Michigan, 1836 Treaty Zone:

Season Dates: Open September 1, close September 10, 1995, except for that small portion of the ceded territory which coincides with the State of Michigan's Southern Zone will open September 1 and close on September 15.

Daily Bag Limit: The daily bag limit is 5.

Other Geese (Blue, Snow, and White-fronted)

Wisconsin and Minnesota 1837, 1842 and 1854 Zones:

Season Dates: Open September 15, close December 1, 1995.

Daily Bag Limit: The daily bag limit is 10, minus the number of Canada geese taken.

Coots and Common Moorhens (Gallinule)

Wisconsin and Minnesota 1837, 1842 and 1854 Zones:

Season Dates: Open September 15, close November 7, 1995.

Daily Bag Limit: The daily bag limit is 20, singly or in the aggregate.

Sora and Virginia Rails

Wisconsin and Minnesota 1837, 1842 and 1854 Zones:

Season Dates: Open September 15, close November 7, 1995.

Daily Bag Limit: The daily bag limit is 25, singly or in the aggregate. The possession limit is 25.

Michigan, 1842 and 1836 Zones:

Season Dates: Open September 15, close November 14, 1995.

Daily Bag and Possession Limits: The daily bag limit is 25, singly or in aggregate. The possession limit is 25.

Common Snipe

Wisconsin and Minnesota 1837, 1842 and 1854 Zones:

Season Dates: Open September 15, close November 7, 1995.

Daily Bag Limit: The daily bag limit is 8.

Michigan, 1842 and 1836 Zones:

Season Dates: Open September 15, close November 14, 1995.

Daily Bag Limit: The daily bag limit is 8.

Woodcock

Wisconsin and Minnesota 1837, 1842 and 1854 Zones:

Season Dates: Open September 5, close November 30, 1995.

Daily Bag Limit: The daily bag limit is 5.

Michigan, 1842 and 1836 Zones:

Season Dates: Open September 15, close November 14, 1995.

Daily Bag Limit: The daily bag limit is 5.

General Conditions:

(i) While hunting waterfowl, a tribal member must carry on his/her person a valid tribal waterfowl hunting permit.

(ii) Except as otherwise noted, tribal members will be required to comply with tribal codes that will be no less restrictive than the provisions of Chapter 10 of the Model Off-Reservation Code. This Model Code was the subject of the stipulation in Lac Courte Oreilles v. State of Wisconsin regarding migratory bird hunting. Except as modified herein, these amended regulations parallel Federal requirements, 50 CFR Part 20, and shooting hour regulations in 50 CFR Part 20, subpart K, as to hunting methods, transportation, sale, exportation and other conditions generally applicable to migratory bird hunting.

(iii) Tribal members in each zone will comply with State regulations providing for closed and restricted waterfowl hunting areas.

(iv) Minnesota and Michigan–Duck Blinds and Decoys. Tribal members hunting in Minnesota will comply with tribal codes that contain provisions parallel to applicable State statutes. Tribal members hunting in Michigan will comply with tribal codes that contain provisions parallel to Michigan law regarding duck blinds and decoys.

(v) Possession limits for each species are double the daily bag limit, except on the opening day of the season, when the possession limit equals the daily bag limit, unless otherwise specified.

(vi) Possession limits are applicable only to transportation and do not include birds which are cleaned, dressed, and at a member's primary residence. For purposes of enforcing bag and possession limits, all migratory birds in the possession or custody of tribal members on ceded lands will be considered to have been taken on those lands unless tagged by a tribal or State conservation warden as having been taken on-reservation. In Wisconsin, such tagging will comply with applicable State statutes. All migratory birds which fall on reservation lands will not count as part of any off-reservation bag or possession limit.

(d) Navajo Indian Reservation, Window Rock, Arizona (Tribal Members and Nonmembers).

Band-tailed Pigeons

Season Dates: Open September 1, close September 30, 1995.

Daily Bag and Possession Limits: The daily bag limit is 5 and the possession limit is 10.

Mourning Doves

Season Dates: Open September 1, close September 30, 1995.

Daily Bag and Possession Limits: The daily bag limit is 10 and the possession limit is 20.

General Conditions: Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20, regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Navajo Nation also apply on the reservation.

(e) Oneida Tribe of Indians of Wisconsin, Oneida, Wisconsin (Tribal Members).

Ducks

Season Dates: Open September 15, close November 30, 1995.

Daily Bag and Possession Limits: Daily bag limit is 5, including no more than 3 mallards (only 1 of which can be a mallard hen), 4 wood ducks, 1 canvasback, 1 redhead, 2 pintails, and 1 hooded merganser. Possession limit is twice the daily bag limit.

Geese

Season Dates: Open September 1, close November 30, 1995.

Daily Bag and Possession Limits: Daily bag limit is 2 Canada geese, that must be tagged after harvest with tribal tags. The tribe will reissue tags upon registration of the daily bag limit. A season quota of 150 birds is adopted. If the quota is reached before the season concludes, the season will be closed at that time.

Mourning Dove

Season Dates: Open September 1, close November 30, 1995.

Daily Bag and Possession Limits: Daily bag limit is 10, and the possession limit is 20.

Woodcock

Season Dates: Open September 1, close November 30, 1995.

Daily Bag and Possession Limits: Daily bag limit is 6, and the possession limit is 12.

General Conditions: Indians and non-Indians hunting on the Oneida Indian Reservation or on lands under the jurisdiction of the Oneida Nation will observe all basic Federal migratory bird hunting regulations found in 50 CFR. Indian hunters are exempt from the requirement to purchase a Migratory Waterfowl Hunting and Conservation Stamp (Duck Stamp) and the plugging of shotgun to limit capacity to 3 shells.

(f) Seminole Tribe of Florida, Big Cypress Seminole Reservation, Clewiston, Florida (Tribal and Non-tribal Members).

Mourning Doves

Season Dates: Open September 20, 1995, close January 15, 1996.

Daily Bag and Possession Limits: The daily bag limit is 12 and the possession limit is 24.

General Conditions: Hunting would be on Sundays only from 1:00 p.m. to sunset. All other Federal regulations contained in 50 CFR part 20 would apply.

(g) Squaxin Island Tribe, Squaxin Island Reservation, Shelton, Washington (Tribal Members)

Ducks

Season Dates: Open September 15, 1995, close January 15, 1996.

Daily Bag and Possession Limits: Daily bag limit is 5, including no more than 1 canvasback. The season on harlequin ducks is closed. Possession limit is twice the daily bag limit.

Geese

Season Dates: Open September 15, 1995, close January 15, 1996.

Daily Bag and Possession Limits: Daily bag limit is 4 birds per day and can include no more than 2 snow geese and 1 dusky Canada goose. The season on Aleutian and Cackling Canada geese is closed. Possession limit is twice the daily bag limit.

Brant

Season Dates: Open September 15, close December 31, 1995.

Daily Bag and Possession Limits: Daily bag limit is 2, and the possession limit is 4.

Coots

Season Dates: Open September 15, 1995, close January 15, 1996.

Daily Bag and Possession Limits: Daily bag limit is 25.

Snipe

Season Dates: Open September 15, 1995, and close January 15, 1996.

Daily Bag and Possession Limits: The daily bag limit is 8, with 16 in possession.

Band-tailed Pigeons

Season Dates: Open September 15, close December 1, 1995.

Daily Bag and Possession Limits: Daily bag limit is 2, and the possession limit is 4.

General Conditions: All tribal hunters must obtain a Tribal Hunting Tag and Permit from the tribe's Natural Resources Department and must have the permit, along with the member's treaty enrollment card, on his or her person while hunting. Shooting hours are one-half hour before sunrise to one-half hour after sunset and steel shot is required for all migratory bird hunting. Other special regulations are available at the tribal office in Shelton, Washington.

(h) Tulalip Tribes of Washington, Tulalip Indian Reservation, Marysville, Washington (Tribal Members)

Ducks/Coot

Season Dates: Open September 15, 1995, and close February 1, 1996.

Daily Bag and Possession Limits: The daily bag limit is 6, with 12 in possession; except that bag and possession limits are restricted for blue-winged teal, canvasback, harlequin, pintail and wood duck to those established for the Pacific Flyway by final Federal frameworks, to be announced.

Geese

Season Dates: Open September 15, 1995, and close February 1, 1996.

Daily Bag and Possession Limits: The daily bag limit is 6, with 12 in possession; except that the bag limits for brant and cackling and dusky Canada geese are those established for the Pacific Flyway in accordance with final Federal frameworks, to be announced. The tribes also set a maximum annual bag limit on ducks and geese for those tribal members who engage in subsistence hunting.

Snipe

Season Dates: Open September 1, 1995, and close February 1, 1996.

Daily Bag and Possession Limits: The daily bag limit is 6, with 12 in possession.

General Conditions: All waterfowl hunters, members and non-members, must obtain and possess while hunting a valid hunting permit from the Tulalip tribes. Also, non-tribal members sixteen years of age and older, hunting pursuant to Tulalip Tribes' Ordinance No. 67, must possess a validated Federal Migratory Bird Hunting and Conservation Stamp and a validated State of Washington Migratory Waterfowl Stamp. All Tulalip tribal members must have in their possession while hunting, or accompanying another, their valid tribal identification card. All hunters are required to adhere to a number of other special regulations enforced by the tribes and available at the tribal office.

(i) White Mountain Apache Tribe, Fort Apache Indian Reservation, Whiteriver, Arizona (Tribal Members and Nonmembers).

Band-tailed Pigeons

Season Dates: Open September 1, close September 10, 1995.

Daily Bag and Possession Limits: The daily bag limit is 3 and the possession limit is 6.

Mourning Doves

Season Dates: Open September 1, close September 10, 1995.

Daily Bag and Possession Limits: The daily bag limit is 8 and the possession limit is 16.

General Conditions: All non-tribal hunters hunting band-tailed pigeons and mourning doves on Reservation lands shall have in their possession a valid White Mountain Apache Daily or Yearly Small Game Permit. In addition to a small game permit, all non-tribal hunters hunting band-tailed pigeons must have in their possession a White Mountain Special Band-tailed Pigeon Permit. Other special regulations established by the White Mountain Apache Tribe apply on the reservation. Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours and manner of taking.

Dated: August 29, 1995

George T. Frampton, Jr.,

George T. Frampton, Jr., Assistant Secretary for Fish and Wildlife and Parks.

FAX-ON-DEMAND

You may access our Fax-On-Demand service. You only need a fax machine and there is no charge for the service except for long distance telephone charges the user may incur. The list of documents on public inspection and the daily Federal Register's table of contents are available using this service. The document numbers are 7050-Public Inspection list and 7051-Table of Contents list. The public inspection list will be updated immediately for documents filed on an emergency basis.

NOTE: YOU WILL ONLY GET A LISTING OF DOCUMENTS ON FILE AND NOT THE ACTUAL DOCUMENT. Documents on public inspection may be viewed and copied in our office located at 800 North Capitol Street, N.W., Suite 700. The Fax-On-Demand telephone number is: **301–713–6905**

FEDERAL REGISTER PAGES AND DATES, SEPTEMBER

45647–46016............................1

CFR PARTS AFFECTED DURING SEPTEMBER

At the end of each month, the Office of the Federal Register publishes separately a List of CFR Sections Affected (LSA), which lists parts and sections affected by documents published since the revision date of each title.

TABLE OF EFFECTIVE DATES AND TIME PERIODS—SEPTEMBER 1995

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

DATE OF FR PUBLICATION	15 DAYS AFTER PUBLICATION	30 DAYS AFTER PUBLICATION	45 DAYS AFTER PUBLICATION	60 DAYS AFTER PUBLICATION	90 DAYS AFTER PUBLICATION

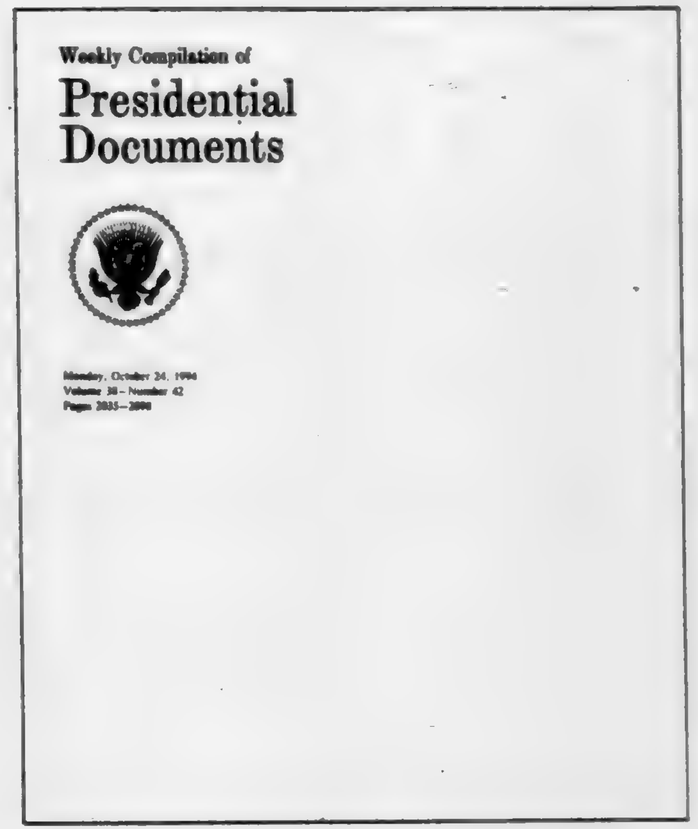
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**



Weekly Compilation of
Presidential Documents

Monday, October 24, 1994
Volume 30—Number 42

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

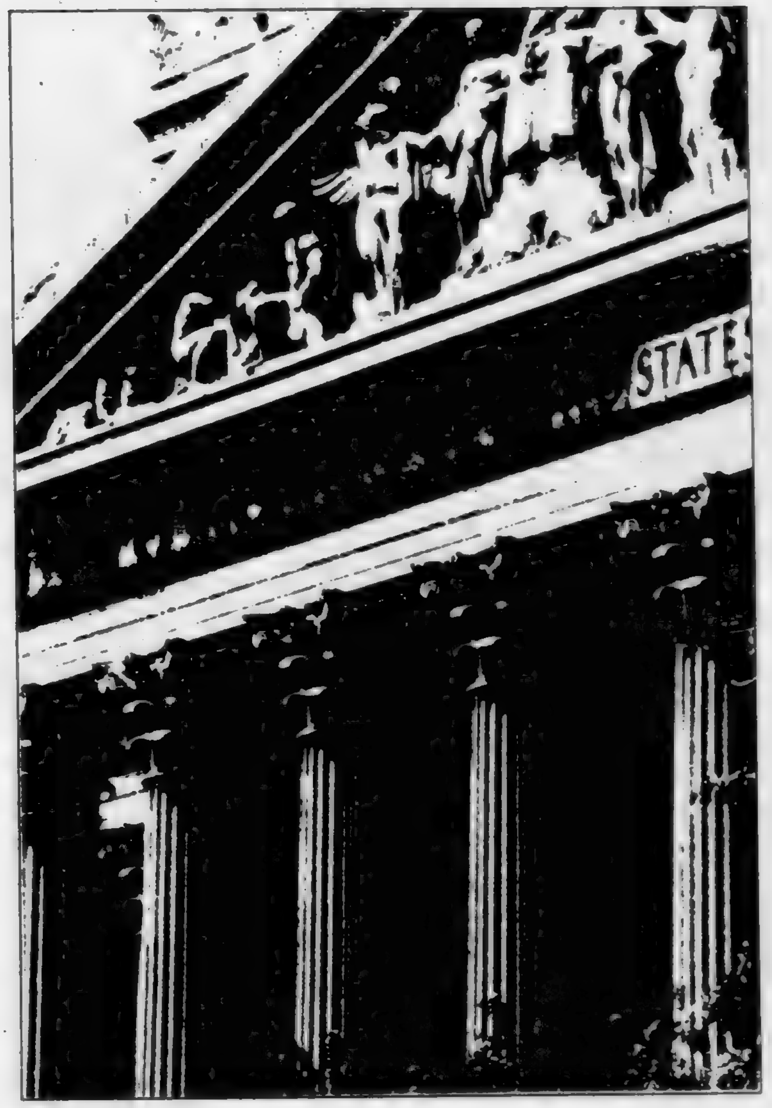
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.



LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$26.00 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$24.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example*:

A renewal notice will be sent approximately 90 days before this date.

```
AFR  SMITH212J                DEC95 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

A renewal notice will be sent approximately 90 days before this date.

```
AFRDO  SMITH212J              DEC95 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9375.

To order a new subscription: Please use the order form provided below.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 60, No. 171
Tuesday, September 5, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 945

[Docket No. FV95–945–1FIR]

Irish Potatoes Grown in Certain Designated Counties in Idaho, and Malheur County, OR; Expenses and Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting as a final rule, without change, the provisions of an interim final rule that authorized expenses and established an assessment rate that generated funds to pay those expenses under Marketing Order No. 945 for the 1995–96 fiscal period. That rule also increased the level of authorized expenses for the 1993–94 fiscal period. Authorization of this budget enables the Idaho-Eastern Oregon Potato Committee (Committee) to incur expenses that are reasonable and necessary to administer the program. Authorization of the increase in the level of authorized expenses for the 1993–94 fiscal period is necessary because the Committee exceeded its budget for that period. Funds to administer this program are derived from assessments on handlers.

EFFECTIVE DATE: Section 945.248 is effective August 1, 1995, through July 31, 1996. The amendment to § 945.246 was effective August 1, 1993, through July 31, 1994.

FOR FURTHER INFORMATION CONTACT: Martha Sue Clark, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456, telephone 202–720–9918; or Dennis L. West, Northwest Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, Green-Wyatt Federal Building, room 369, 1220 Southwest Third Avenue, Portland, OR 97205, telephone 503–326–2724.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 98 and Order No. 945, both as amended (7 CFR part 945), regulating the handling of Irish potatoes grown in designated counties in Idaho, and Malheur County, Oregon. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

The Department is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the provisions of the marketing order now in effect, Idaho-Eastern Oregon potatoes are subject to assessments. Funds to administer the Idaho-Eastern Oregon potato marketing order are derived from such assessments. It is intended that the assessment rate as issued herein will be applicable to all assessable potatoes handled during the 1995–96 fiscal period, which began August 1, 1995, and ends July 31, 1996. This final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 2,100 producers of Idaho-Eastern Oregon potatoes under this marketing order, and approximately 60 handlers. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000. The majority of Idaho-Eastern Oregon potato producers and handlers may be classified as small entities.

The budget of expenses for the 1995–96 fiscal period was prepared by the Idaho-Eastern Oregon Potato Committee, the agency responsible for local administration of the marketing order, and submitted to the Department for approval. The members of the Committee are producers and handlers of Idaho-Eastern Oregon potatoes. They are familiar with the Committee's needs and with the costs of goods and services in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the Committee was derived by dividing anticipated expenses by expected shipments of fresh Idaho-Eastern Oregon potatoes. Because that rate will be applied to actual shipments, it must be established at a rate that will provide sufficient income to pay the Committee's expenses.

The Committee met June 6, 1995, and unanimously recommended a 1995–96 budget of $111,732, $11,853 more than the previous year. Budget items for 1995–96 which have increased compared to those budgeted for 1994–95 (in parentheses) are: Salaries, $63,232 ($55,479), meetings and miscellaneous, $2,500 ($2,000), Federal payroll taxes, $5,300 ($4,700), and reserve/auto purchase, $9,000 ($6,000). All other items are budgeted at last year's amounts.

The Committee also unanimously recommended an assessment rate of $0.0026 per hundredweight, the same as each year for the past decade. This rate, when applied to anticipated shipments of 34,000,000 hundredweight, will yield $88,400 in assessment income. This, along with $23,332 from the Committee's authorized reserve, will be adequate to cover budgeted expenses. Funds in the Committee's authorized reserve at the beginning of the 1995–96 fiscal period, estimated at about $80,000, will be within the maximum permitted by the order of one fiscal period's expenses.

The 1993–94 budget was published in the **Federal Register** as an interim final rule on July 16, 1993 (58 FR 38274) and finalized on October 28, 1993 (58 FR 57957). That rule authorized Committee expenses of $98,942. The Committee exceeded its authorized expenses by $713, for total expenses of $99,655. Funds to cover this increase were taken from the Committee's authorized reserve. The 1993–94 budget is amended to cover this increase.

An interim final rule was published in the **Federal Register** on July 17, 1995 (60 FR 36339). That interim final rule added § 945.248 to authorize expenses and establish an assessment rate for the Committee. That rule also amended § 945.246 to increase the level of authorized expenses for the 1993–94 fiscal period. That rule provided that interested persons could file comments through August 16, 1995. No comments were received.

While this rule will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be offset by the benefits derived by the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this rule will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant material presented, including the information and recommendations submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

It is further found that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553) because the Committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis. The 1995–96 fiscal period began on August 1, 1995. The marketing order requires that the rate of assessment for the fiscal period apply to all assessable potatoes handled during the fiscal period. In addition, handlers are aware of this rule which was recommended by the Committee at a public meeting and published in the **Federal Register** as an interim final rule.

List of Subjects in 7 CFR Part 956

Marketing agreements, Potatoes, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 945 is amended as follows:

PART 945—IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

Accordingly the interim final rule amending § 945.246 and adding § 945.248, which was published at 60 FR 36339 on July 17, 1995, is adopted as a final rule without change.

Dated: August 29, 1995.

Ron Cioffi,

Acting Deputy, Director, Fruit and Vegetable Division.

[FR Doc. 95–21936 Filed 9–1–95; 8:45 am]

BILLING CODE 3410–02–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Part 399

[Docket No. OST–95–397]

RIN 2105–AC–27

Aviation Economic Rules; Correction

AGENCY: Department of Transportation, Office of the Secretary.

ACTION: Correction to final rule.

SUMMARY: This document contains a correction to the final rule (Docket OST–95–397) published Tuesday, August 22, 1995 (60 FR 43521). The regulation at issue—14 CFR 399.21—sets forth the policy of the Department concerning requests for exemptions from 49 U.S.C. 41102 by air carriers seeking to perform charter air transportation.

EFFECTIVE DATE: September 21, 1995.

FOR FURTHER INFORMATION CONTACT: Carol A. Woods, Air Carrier Fitness Division, X–56, Department of Transportation, 400 Seventh Street, S.W., Washington, DC 20590, (202) 366–9721.

SUPPLEMENTARY INFORMATION:

Background

By final rule (Docket OST–95–397) published on August 22, 1995 (60 FR 43521), the Department amended various provisions regarding aviation economic rules in order to eliminate obsolete provisions and correct outdated organizational and statutory references.

Need for Correction

As published, the final rule contains an error which may prove to be misleading and is in need of correction. Specifically, the rule (at page 43531, second column, paragraph 172) states erroneously that § 399.21 is being removed; rather, that section is being amended in the manner stated in the following paragraph on that page (paragraph 173).

Correction of Publication

Accordingly, the publication on August 22, 1995, of the final rule (Docket OST–95–397) that was the subject of 60 FR 43521, is corrected as follows:

§ 399.21 [Corrected]

1. On page 43531, second column, paragraph 172, remove the reference "399.21".

Dated: August 29, 1995.

Patrick V. Murphy,

Acting Assistant Secretary for Aviation and International Affairs.

[FR Doc. 95–21956 Filed 9–1–95; 8:45 am]

BILLING CODE 4910–62–P

DEPARTMENT OF JUSTICE

28 CFR Part 0

[DEA–136F]

Redelegation of Functions; Delegation of Authority to Drug Enforcement Administration Official

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: Under delegated authority, the Administrator of the Drug Enforcement Administration (DEA), Department of Justice, is amending the appendix to the Justice Department regulations to redelegate certain functions and authority which were vested in the Attorney General by the Controlled Substances Act and subsequently redelegated to the Administrator and to make a technical correction to reflect a change in position title.

EFFECTIVE DATE: August 21, 1995.

FOR FURTHER INFORMATION CONTACT: G. Thomas Gitchel, Chief, Liaison and Policy Section, Office of Diversion Control, Drug Enforcement Administration, Washington, D.C. 20537, Telephone (202) 307–7297.

SUPPLEMENTARY INFORMATION: The Controlled Substances Act (CSA) (21 U.S.C. 801 *et seq.*) establishes a comprehensive system of controls over the manufacture, distribution, dispensing, importation and exportation of controlled substances and listed chemicals. The CSA requires that persons who manufacture, distribute, dispense, import or export controlled substances or certain listed chemicals obtain a registration from DEA and make certain records and reports concerning their activities with controlled substances and listed chemicals. On June 22, 1995, DEA published a Final Rule to implement the Domestic Chemical Diversion Control Act of 1993 in the **Federal Register**. In part, the final rule amended Chapter II of Title 21, Code of Federal Regulations, to add a new Part 1309, relating to the registration of manufacturers, distributors, importers and exporters of List I chemicals. The amendment becomes effective on August 21, 1995.

The Attorney General has delegated her functions under the CSA to the Administrator of the Drug Enforcement Administration and authorized the Administrator to redelegate any of his functions to any of his subordinates. See 21 U.S.C. 871(a), 28 CFR 0.100(b) and 28 CFR 0.104. To further enhance the administration of the CSA and its attendant regulations, the Administrator is redelegating to the Deputy Assistant Administrator of the DEA Office of Diversion Control the authority to exercise all necessary functions with respect to the promulgation and implementation of the regulations in Part 1309 of Chapter II, title 21, Code of Federal Regulations incident to the registration of manufacturers, distributors, importers and exporters of List I chemicals, except that final orders in connection with suspension, denial, or revocation of registration shall be made by the Deputy Administrator of DEA.

In a separate matter, Section 9 of the Appendix to Subpart R is being amended to redelegate the authority to furnish, or cause to be furnished, descriptions of persons with whom regulated transactions may not be completed without prior approval of the DEA; to approve such transactions pursuant to 21 U.S.C. 830(b) and 21 CFR 1310.05(b); and to approve or disapprove regular customer or regular importer status under 21 U.S.C. 971 and 21 CFR 1313.15 and 1313.24 to the Chief of Operations of the DEA, Operations Division. This redelegation reflects a recent organizational change within DEA. Prior to the reorganization, the Deputy Assistant Administrator, Office of Diversion Control reported to the Deputy Assistant Administrator of Operations, Operations Division; the Deputy Assistant Administrator, Office of Diversion now reports to the Chief of Operations of the DEA, Operations Division. The redelegation also reflects the removal of regular supplier status and addition of regular importer status to the regulations by the Domestic Chemical Diversion Control Act of 1993.

The Administrator certifies that this action will have no impact upon entities whose interests must be considered under the Regulatory Flexibility Act (5 U.S.C. 601). Pursuant to Executive Order 12866, this is not a significant regulatory action since it relates only to the organization of functions within DEA. Accordingly, it has not been reviewed by the Office of Management and Budget and does not require certification under Executive Order 12778. This action has been analyzed in accordance with Executive Order 12616. It has been determined that this matter has no federalism implications which would require preparation of a federalism assessment.

List of Subjects in 28 CFR Part 0

Authority Delegations (Government Agencies), Organizations and functions (Government Agencies).

For the reasons set forth above, and pursuant to the authority vested in the Administrator of the Drug Enforcement Administration by 28 CFR 0.100 and 0.104, and 21 U.S.C. 871, title 28 of the Code of Federal Regulations, part 0, appendix to subpart R, Redelegation of Functions, is amended as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

1. The authority citation for part 0 continues to read as follows:

Authority: 5 U.S.C. 301: 28 U.S.C. 509, 510, 515–519.

2. The Appendix to subpart R is amended by redesignating paragraphs 7(h) through 7(k) as 7(i) through 7(l), inserting a new paragraph 7(h), and revising Section 9 to read as follows:

Appendix to Subpart R—Redelegation of Functions

* * * * *

Sec. 7. * * *

(h) Part 1309, incident to the registration of manufacturers, distributors, importers and exporters of List I chemicals, except that final orders in connection with suspension, denial or revocation of registration shall be made by the Deputy Administrator of DEA.

* * * * *

Sec. 9. *Chemical Diversion Act Functions.* The Chief of Operations of the DEA, Operations Division, is authorized to furnish, or cause to be furnished, descriptions of persons with whom regulated transactions may not be completed without prior approval of the DEA; to approve such transactions pursuant to 21 U.S.C. 830(b) and 21 CFR 1310.05(b); and to approve or disapprove regular customer or regular importer status under 21 U.S.C. 971 and 21 CFR 1313.15 and 1313.24.

* * * * *

Dated: August 24, 1995.

Thomas A. Constantine,

Administrator.

BILLING CODE 4410–09–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 92

Military Whistle Protection; Removal of Part

AGENCY: Department of Defense.

ACTION: Final rule.

SUMMARY: This document removes the Department of Defense's rule concerning the Military Whistleblower Protection. The part has served the purpose for which it was intended for the Code of Federal Regulations, and is no longer necessary.

EFFECTIVE DATE: September 5, 1995.

FOR FURTHER INFORMATION CONTACT: L. Bynum or P. Toppings, 703–697–4111.

SUPPLEMENTARY INFORMATION: At the present time, there are two(2) documents codified as 32 CFR part 92. The Military Whistleblower Protection document should be removed. DoD Directive 7050.6, same title, is presently available from the National Technical Information Service. The most current version, August 12, 1995, will be available from NTIS at a later date. Requests for the Directive should be forwarded to: National Technical

Information Service, 5285 Port Royal Road, Springfield, VA 22161. On August 19, 1994, 59 FR 42752, the Department of Defense published 32 CFR part 92. However, on August 8, 1995, 60 FR 40277, DoD duplicated the use of part 92 before they removed the original part 92. Part 92 published at 60 FR 40277 remains unchanged and should not be connected in any manner with the document to be removed.

List of Subjects in 32 CFR Part 92

Administrative practice and procedure; Investigations; Military personnel; Whistleblowing

PART 92—[REMOVED]

Accordingly, by the authority of 10 U.S.C. 301, 32 CFR part 92 published at 59 FR 42752, is removed.

Dated: August 29, 1995.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[NC–071–1–6960a; FRL–5269–5]

Approval and Promulgation of Implementation Plans North Carolina: Approval of Revisions to the North Carolina State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: On October 14, 1994, the State of North Carolina, through the North Carolina Department of Environment, Health and Natural Resources, submitted a revision to the North Carolina State Implementation Plan (SIP). This revision is the adoption of an amendment to rule 15A NCAC 2D .0518 Miscellaneous Volatile Organic Compounds Emissions. This amendment was included to define that diacetone alcohol is considered to be a nonphotochemically reactive solvent. This rule is applicable to all sources of VOC emissions for which no other VOC emission standards are applicable.

DATES: This final rule is effective November 6, 1995 unless notice is received by October 5, 1995 that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Written comments should be addressed to: Randy Terry, Regulatory Planning and Development Section, Air Programs Branch, Air, Pesticides & Toxics Management Division, Region 4 Environmental Protection Agency, 345 Courtland Street, NE, Atlanta, Georgia 30365.

Copies of the material submitted by the NCDEHNR may be examined during normal business hours at the following locations:

Air and Radiation Docket and Information Center (Air Docket 6102), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460.

Environmental Protection Agency, Region 4 Air Programs Branch, 345 Courtland Street, NE, Atlanta, Georgia 30365.

North Carolina Department of Environment, Health and Natural Resources, 512 North Salisbury Street, Raleigh, North Carolina 27604.

FOR FURTHER INFORMATION CONTACT: Randy Terry, Regulatory Planning and Development Section, Air Programs Branch, Air, Pesticides & Toxics Management Division, Region 4 Environmental Protection Agency, 345 Courtland Street, NE, Atlanta, Georgia 30365. The telephone number is 404/347–3555 extension 4212.

SUPPLEMENTARY INFORMATION: On October 14, 1994, the State of North Carolina, through the North Carolina Department of Environment, Health and Natural Resources, submitted a revision covering the adoption of an amendment to rule 15A NCAC 2D .0518 Miscellaneous Volatile Organic Compound Emissions. This amendment was included to define that diacetone alcohol is considered to be a nonphotochemically reactive solvent. This rule is applicable to all sources of VOC emissions for which no other VOC emission standards are applicable. This revision was the subject of public hearings held on March 28 and 30, 1994. EPA is approving the amendment of rule 15A NCAC 2D .0518 because this revision is consistent with the requirements of the Clean Air Act and EPA guidance.

Final Action

EPA is approving the above referenced revision to the North Carolina SIP. This action is being taken without prior proposal because the EPA views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, the EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 6, 1995 unless, by October 5, 1995 adverse or critical comments are received.

If the EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective November 6, 1995.

Under Section 307(b)(1) of the CAA, 42 U.S.C. 7607(b)(1), petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 6, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See Section 307(b)(2) of the Act, 42 U.S.C. 7607 (b)(2)).

The OMB has exempted these actions from review under Executive Order 12866.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the

State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. Section 7410(a)(2) and 7410 (k)(3).

Unfunded Mandates

Under Sections 202, 203 and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under section 110 of the Clean Air Act. These rules may bind State, local and tribal governments to perform certain duties. To the extent that the rules being approved by this action will impose any mandate upon the State, local or tribal governments either as the owner or operator of a source or as a regulator, or would impose any mandate upon the private sector. EPA's action will impose no new requirements; such sources are already subject to these regulations under State law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action. EPA has also determined that this or final action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and Recordkeeping requirements, Sulfur oxides.

Dated: July 25, 1995.

Patrick M. Tobin,

Acting Regional Administrator.

Part 52 of chapter I, title 40, *Code of Federal Regulations*, is amended as follows:

1. The authority citation for part 52 continues to read as follows:

Authority: 42.U.S.C. 7401–7671q.

Subpart II

2. Section 52.1770, is amended by adding paragraph (c)(81) to read as follows:

§ 52.1770 Identification of plan.

* * * * *

(c) * * *

(81) The VOC revision to the North Carolina State Implementation Plan which were submitted on October 14, 1994.

(i) Incorporation by reference. Addition of new North Carolina regulations 15A NCAC 2D .0518 which was state effective on September 1, 1994.

(ii) Other material. None.

40 CFR Part 52

[AK–8–1–6733a; FRL–5286–8]

Approval and Promulgation of Implementation Plans: Alaska

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) approves the State of Alaska Implementation Plan (SIP) revision submitted by the State of Alaska for the purpose of establishing a Small Business Stationary Source Technical and Environmental Compliance Assistance Program. The implementation plan was submitted by the State to satisfy the Federal mandate of the Clean Air Act (CAA or Act), to ensure that small businesses have access to the technical assistance and regulatory information necessary to comply with the CAA. The rationale for the approval is set forth in this document; additional information is available at the address indicated below.

DATES: This final rule is effective on November 6, 1995 unless notice is received by October 5, 1995, that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Written comments should be addressed to: Montel Livingston, SIP Manager, Air and Radiation Branch (AT–082), EPA, 1200 Sixth Avenue, Seattle, WA 98101.

Documents which are incorporated by reference are available for public inspection at the Air and Radiation Docket and Information Center, Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460. Copies of material submitted to EPA may be examined during normal business hours at the following locations: EPA, Region 10, Air & Radiation Branch, 1200 Sixth Avenue (AT–082), Seattle, WA 98101, and Alaska Department of Conservation, 410 Willoughby Avenue, Suite 105, Juneau, AK 99801–1795.

FOR FURTHER INFORMATION CONTACT: David J. Dellarco, Air and Radiation Branch (AT–082), EPA, 1200 Sixth Avenue, Seattle, WA 98101, (206) 553–4978.

SUPPLEMENTARY INFORMATION:

I. Background

Implementation of the provisions of the Clean Air Act (CAA), as amended in 1990, will require regulation of many small businesses so that areas may attain and maintain the national ambient air quality standards (NAAQS) and reduce the emission of air toxics. Small businesses frequently lack the technical expertise and financial resources necessary to evaluate such regulations and to determine the appropriate mechanisms for compliance. In anticipation of the impact of these requirements on small businesses, the CAA requires that States adopt a Small Business Stationary Source Technical and Environmental Compliance Assistance Program (PROGRAM), and submit this PROGRAM as a revision to the Federally approved SIP. In addition, the CAA directs the Environmental Protection Agency (EPA) to oversee these small business assistance programs and report to Congress on their implementation. The requirements for establishing a PROGRAM are set out in Section 507 of Title V of the CAA. In January 1992, EPA issued *Guidelines for the Implementation of Section 507 of the 1990 Clean Air Act Amendments*, in order to delineate the Federal and State roles in meeting the new statutory provisions and as a tool to provide further guidance to the States on submitting acceptable SIP revisions.

The State of Alaska has submitted a SIP revision to EPA in order to satisfy the requirements of Section 507. In order to gain full approval, the State submittal must provide for each of the following PROGRAM elements: (1) the establishment of a Small Business Assistance Program (SBAP) to provide technical and compliance assistance to small businesses; (2) the establishment of a State Small Business Ombudsman to represent the interests of small businesses in the regulatory process; and (3) the creation of a Compliance Advisory Panel to determine and report on the overall effectiveness of the SBAP.

II. Analysis

1. Small Business Assistance Program

Section 507(a) sets forth six requirements[1] that the State must meet to have an approvable SBAP. The first requirement is to establish adequate mechanisms for developing, collecting and coordinating information concerning compliance methods and technologies for small business stationary sources, and programs to encourage lawful cooperation among such sources and other persons to further compliance with the Act. The State of Alaska has met this requirement by developing its SBAP with both proactive and reactive components. The proactive element will use outreach techniques to develop and distribute compliance and technical information to small businesses, including details on their rights and obligations, alternative control technologies, and compliance methods. These techniques will include direct mail, public service announcements, and meetings with small businesses. The reactive element will use a telephone hot line to receive questions from small businesses. In addition, the SBAP will maintain a clearinghouse of information, in the form of a library of documents and computer files, relevant to the compliance alternatives available to small businesses.

The second requirement is to establish adequate mechanisms for assisting small business stationary sources with pollution prevention and accidental release detection and prevention, including providing information concerning alternative technologies, process changes, products and methods of operation that help reduce air pollution. The State has met this requirement by planning to provide small businesses with information and assistance on accidental release prevention and detection. This information may include requirements under the accidental release provisions of the CAA, requirements of the Superfund Amendments and Reauthorization Act title III, Occupational Safety and Health administration process safety standards, as well as general information on prevention practices and technologies. The State of Alaska's non-regulatory pollution prevention program will provide the SBAP with direct pollution prevention support and expertise. The pollution prevention office will utilize both State and regional pollution prevention resources to provide direct pollution prevention technical assistance to small businesses.

The third requirement is to develop a compliance and technical assistance program for small business stationary sources which assists small businesses in determining applicable requirements and in receiving permits under the Act in a timely and efficient manner. The State has met this requirement by planning to develop its SBAP with a main emphasis on assisting small businesses in obtaining any necessary air quality operating permits. The SBAP plans to use workshops to guide small businesses through the air quality operating permit application process. In addition, the SBAP will develop source specific outreach materials on the responsibilities of small businesses established through existing and future CAA requirements.

The fourth requirement is to develop adequate mechanisms to assure that small business stationary sources receive notice of their rights under the Act in such manner and form as to assure reasonably adequate time for such sources to evaluate compliance methods and any relevant or applicable proposed or final regulations or standards issued under the Act. The State has met this requirement by planning to use direct mailing, public service announcements, and meetings with small businesses to notify them of their rights and obligations under air quality requirements in a timely manner.

The fifth requirement is to develop adequate mechanisms for informing small business stationary sources of their obligations under the Act, including mechanisms for referring such sources to qualified auditors or, at the option of the State, for providing audits of the operations of such sources to determine compliance with the Act. The State has met this requirement by planning to establish a voluntary on-site evaluation program to help small businesses determine if their operations comply with the Act.

The sixth requirement is to develop procedures for consideration of requests from small business stationary sources for modification of (A) any work practice or technological method of compliance, or (B) the schedule of milestones for implementing such work practice or method of compliance preceding any applicable compliance date, based on the technological and financial capability of any such small business stationary source. The State has met this requirement by planning to develop procedures, by regulation, to respond to requests from small businesses for work practice modifications. The State of Alaska will develop these procedures concurrently with its revisions to Alaska's air quality regulations, and follow the requirements of Alaska's Administrative Procedure Act. The regulations that address requirements for work practice modification requests will be submitted by Alaska with its Title V Operating Permits Program, and become effective upon EPA approval of Alaska's Title V Operating Permits Program.

2. Ombudsman

Section 507(a)(3) requires the designation of a State office to serve as the Ombudsman for small business stationary sources. The State has met this requirement by establishing the position of Small Business Advocate, which will promote the rights and concerns of small businesses. The Small Business Advocate is separate from the SBAP and independent from Alaska's Air Quality Management Program.

3. Compliance Advisory Panel

Section 507(e) requires the State to establish a Compliance Advisory Panel (CAP) that must include two members selected by the Governor who are not owners or representatives of owners of small businesses; four members selected by the State legislature who are owners, or represent owners, of small businesses; and one member selected by the head of the agency in charge of the Air Pollution Permit Program. The State has met this requirement by appointing its CAP in accordance with the above requirements.

In addition to establishing the minimum membership of the CAP the CAA delineates four responsibilities of the Panel: (1) to render advisory opinions concerning the effectiveness of the SBAP, difficulties encountered and the degree and severity of enforcement actions; (2) to periodically report to EPA concerning the SBAP's adherence to the principles of the Paperwork Reduction Act, the Equal Access to Justice Act, and the Regulatory Flexibility Act[2]; (3) to review and assure that information for small business stationary sources is easily understandable; and (4) to develop and disseminate the reports and advisory opinions made through the SBAP. The State has met these requirements by directing its CAP to meet the above areas of responsibility.

4. Eligibility

Section 507(c)(1) of the CAA defines the term "small business stationary source" as a stationary source that:

(A) Is owned or operated by a person who employs 100 or fewer individuals;

(B) Is a small business concern as defined in the Small Business Act;

(C) Is not a major stationary source;

(D) Does not emit 50 tons per year (tpy) or more of any regulated pollutant; and

(E) Emits less than 75 tpy of all regulated pollutants.

In addition, under Section 507(c)(2) of the CAA a State may, upon petition by a source and after notice and opportunity for comment, include as a "small business stationary source" any source that does not meet the provisions of Sections 507(c)(1) (C), (D), and (E) of the CAA but does not emit more than 100 tpy of all regulated pollutants.

Under Alaska's PROGRAM, a facility is a "small business facility" and thus eligible for assistance under the PROGRAM if the facility:

(A) Is owned or operated by a person who employs 100 or fewer individuals;

(B) Is a small business concern as defined in 15 U.S.C. 631 (Small Business Act); and

(C) Emits less than 100 tpy of regulated air contaminants. Alaska Statutes 46.14.990(22). Alaska has therefore expanded PROGRAM eligibility by statute to include all sources that could apply for eligibility on a case-by-case basis under Section 507(c)(2) of the CAA after notice and opportunity for comment. Based on assurances from the State, EPA believes that Alaska's definition of eligible sources will not interfere with the State's obligation to provide assistance to "small business stationary sources" as defined under Section 507(c)(1) of the CAA and that it is therefore consistent with Section 507(c) of the Clean Air Act.

In addition, the State of Alaska has provided, as required by Section 507(3) of the CAA, for exclusion from the small business stationary source definition, after consultation with the EPA and the Small Business Administration Administrator and after providing notice and opportunity for public comment, of any category or subcategory of sources that the State determines to have sufficient technical and financial capabilities to meet the requirements of the CAA. The State of Alaska has also established a mechanism based on direct assistance from the Small Business Advocate for ascertaining the eligibility of a source to receive assistance under the PROGRAM, including an evaluation of a source's eligibility under Section 507(c) of the CAA.

III. This Action

In this action, EPA approves the SIP revision submitted by the State of Alaska.

The State of Alaska has submitted a SIP revision implementing each of the PROGRAM elements required by Section 507 of the CAA. At this time, the SBAP, Small Business Advocate, and CAP are in place.

IV. Administrative Review

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

By this action, the EPA is approving a State program created for the purpose of assisting small businesses in complying with existing statutory and regulatory requirements. The program being approved in this action does not impose any new regulatory burden on small businesses; it is a program under which small businesses may elect to take advantage of assistance provided by the state. Therefore, because the EPA's approval of this program does not impose any new regulatory requirements on small businesses, I certify that it does not have a significant economic impact on any small business entities affected.

SIP approvals under section 110 and subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the state is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S.E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

Under Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated costs to State, local, or tribal governments in the aggregate; or to the private sector, of $100 million or more. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the approval action promulgated does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new Federal requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

The EPA has reviewed this request for revision of the Federally-approved SIP for conformance with the provisions of the 1990 Clean Air Act Amendments enacted on November 15, 1990. The EPA has determined that this action conforms with those requirements.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by a July 10, 1995 memorandum from Mary Nichols, Assistant Administrator for Air and Radiation. The Office of Management and Budget (OMB) has exempted this regulatory action from Executive Order 12866 review.

---

[1] A seventh requirement of Section 507(a), establishment of an Ombudsman office, is discussed in the next section.

[2] Section 507(e)(1)(B) requires the CAP to report on the *compliance* of the SBAP with these three Federal statutes. However, since State agencies are not required to comply with them, EPA believes that the State PROGRAM must merely require the CAP to report on whether the SBAP is adhering to the general principles of these Federal statutes.

The EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, the EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 6, 1995 unless, by October 5, 1995, adverse or critical comments are received.

If the EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective November 6, 1995.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 6, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements.

(See section 307(b)(2), 42 U.S.C. 7607(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Small Business Assistance Program.

Note: Incorporation by reference of the Implementation Plan for the State of Alaska was approved by the Director of the Office of Federal Register on July 1, 1982.

Dated: August 15, 1995.

Jane S. Moore,

Acting Regional Administrator.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart C—Alaska

2. Section 52.70 is amended by adding paragraph (c) (20) to read as follows:

§ 52.70 Identification of plan.

* * * * *

(c) * * *

(20) On April 18, 1994, the Commissioner of the Alaska Department of Environmental Conservation (ADEC) submitted "The Alaska Air Quality Small Business Assistance Program State Air Quality Control Plan Amendment," adopted April 8, 1994, as a revision to the Alaska SIP.

(i) Incorporation by reference.

(A) Letter dated April 8, 1994, from the Commissioner of ADEC to the Regional Administrator of EPA, submitting "The Alaska Air Quality Small Business Assistance Program State Air Quality Control Plan Amendment" to EPA; the Alaska Air Quality Small Business Assistance Program State Air Quality Control Plan Amendment (which includes Appendix A the Alaska Statutes Title 46, Chapter 14, Article 3), dated April 1994, and adopted April 8, 1994.

(ii) Additional information.

(A) Letter dated July 24, 1995, from Alaska Department of Environmental Conservation, submitting information necessary for approval of the SBAP revision to EPA; the July 1995 SBAP Update, Responses to EPA Comments, and the Air Quality/Small Business Assistance Compliance Advisory Panel Board Information.

40 CFR Part 52

[AZ 17–1–6710; FRL–5279–8]

Approval and Promulgation of Implementation Plans; Arizona State Implementation Plan Revision, Maricopa County Environmental Services Department—Air Pollution Control

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is finalizing the approval of revisions to the Arizona State Implementation Plan (SIP) proposed in the **Federal Register** on March 10, 1994. The revisions concern rules from the Maricopa County Environmental Services Department—Air Pollution Control (Maricopa County). This approval action will incorporate these rules into the federally approved SIP. The intended effect of approving these rules is to regulate emissions of volatile organic compounds (VOCs) in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). This final action serves as a final determination that the findings of non-submittal that were issued for these rules have been corrected and that any sanctions or Federal Implementation Plan (FIP) obligations triggered by such non-submittal are permanently stopped. These rules control VOC emissions from graphic arts printing and coating operations and from the storage, loading, and transport of organic liquids. Thus, EPA is finalizing the approval of these rules into the Arizona SIP under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas.

EFFECTIVE DATES: This action is effective on October 5, 1995.

ADDRESSES: Copies of the rules and EPA's evaluation report for each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rules are available for inspection at the following locations:

Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Environmental Protection Agency, Air Docket (6102), 401 "M" Street SW., Washington, D.C. 20460.

Maricopa County Environmental Services Department, 2406 South 24th Street, Suite E–214, Phoenix, AZ 85034–6822.

Arizona Department of Environmental Quality, Air Quality Planning Office, 3003 N. Central Avenue, Fifth Floor, Phoenix, AZ 85004.

SUPPLEMENTARY INFORMATION:

Background

On March 10, 1994, EPA proposed approval of the following rules into the Arizona SIP: 337 ("Graphic Arts"), 350 ("Storage of Organic Liquids at Bulk Plants and Terminals"), 351 ("Loading of Organic Liquids"), and 352 ("Gasoline Delivery Vessels"), as

adopted by Maricopa County on April 6, 1992 (Rules 337, 350, and 351) and November 16, 1992 (Rule 352). These rules were submitted by the Arizona Department of Environmental Quality to EPA on June 29, 1992 (Rules 337, 350, and 351) and February 4, 1993 (Rule 352). These rules were submitted in response to EPA's 1988 SIP-Call and the CAA section 182(a)(2)(A) requirement that nonattainment areas fix their reasonably available control technology (RACT) rules for ozone in accordance with EPA guidance that interpreted the requirements of the pre-amendment Act. A detailed discussion of the background for each of the above rules and nonattainment areas is provided in the Notice of Proposed Rulemaking (NPRM) cited above.

EPA has evaluated all of the above rules for consistency with the requirements of the CAA and with EPA's regulations and interpretation of these requirements as expressed in the various EPA policy guidance documents referenced in the NPRM cited above. EPA has found that the rules meet the applicable requirements. A detailed discussion of the rule provisions and evaluations has been provided in 59 FR 11228 and in technical support documents (TSDs) available at EPA's Region IX office. These TSDs are dated: June 23, 1993 (Rule 337) and July 30, 1993 (Rules 350, 351, and 352).

Response to Public Comments

A 30-day public comment period was provided in 59 FR 11228. EPA did not receive comments on any of the rules.

EPA Action

EPA is finalizing action to approve the above rules for inclusion into the Arizona SIP. EPA is approving the submittal under section 110(k)(3) as meeting the requirements of section 110(a) and Part D of the CAA. This approval action will incorporate these rules into the federally approved SIP. The intended effect of approving these rules is to regulate emissions of VOCs in accordance with the requirements of the CAA.

On June 12, 1991 EPA notified Maricopa County that required elements of the SIP had not been submitted to EPA, thus beginning a FIP clock (under section 110(c) of the CAA) and a sanction clock (under section 179(a) of the CAA). These missing elements included the following source categories: Fixed Roof Storage (Rule 350), Gasoline Bulk Plants and Loading Terminals (Rule 351), Stage I: Service Stations Gasoline Transfer (Rule 353), and Graphic Arts (337). The section 179(a) sanction clock associated with these elements was terminated upon submittal of the rules to EPA. This Final Rule permanently terminates the section 110(c) FIP clock that commenced upon Maricopa County's failure to submit rules 337, 350, and 351.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Unfunded Mandates

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector or to State, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under Part D of the Clean Air Act. These rules may bind State, local, and tribal governments to perform certain actions and also require the private sector to perform certain duties. The rules being approved by this action will impose no new requirements because affected sources are already subject to these regulations under State law. Therefore, no additional costs to State, local, or tribal governments or to the private sector result from this action. EPA has also determined that this final action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

Regulatory Process

The OMB has exempted this action from review under Executive Order 12866.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Note: Incorporation by reference of the State Implementation Plan for the State of Arizona was approved by the Director of the Federal Register on July 1, 1982.

40 CFR Part 52

[OR–31–1–5932a; FRL–5283–4]

Approval and Promulgation of Implementation Plans: Oregon

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) approves the State of Oregon Implementation Plan (SIP) revision submitted by the State of Oregon for the purpose of establishing a Small Business Stationary Source Technical and Environmental Compliance Assistance Program. The implementation plan was submitted by the State to satisfy the Federal mandate, found in Section 507 of the Clean Air Act (CAA or the Act), to ensure that small businesses have access to the

technical assistance and regulatory information necessary to comply with the CAA. The rationale for the approval is set forth in this notice; additional information is available at the address indicated below.

DATES: This final rule is effective November 6, 1995 unless notice is received by unless adverse or critical comments are received by October 5, 1995. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Written comments should be addressed to: Montel Livingston, SIP Manager, Air & Radiation Branch (AT–082), EPA, OR–31–1–5932, 1200 Sixth Avenue, Seattle, Washington 98101.

Documents which are incorporated by reference are available for public inspection at the Air and Radiation Docket and Information Center, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Copies of material submitted to EPA may be examined during normal business hours at the following locations: EPA, Region 10, Air & Radiation Branch, 1200 Sixth Avenue (AT–082), Seattle, Washington 98101, and the Oregon Department of Environmental Quality, 811 SW. Sixth Avenue, Portland, OR 97204.

FOR FURTHER INFORMATION CONTACT: David J. Dellarco, Air and Radiation Branch (AT–082), EPA Region 10, 1200 Sixth Avenue, Seattle, WA 98101, (206) 553–4978.

SUPPLEMENTARY INFORMATION:

I. Background

Implementation of the provisions of the Clean Air Act (CAA or Act), as amended in 1990, will require regulation of many small businesses so that areas may attain and maintain the national ambient air quality standards (NAAQS) and reduce the emission of air toxics. Small businesses frequently lack the technical expertise and financial resources necessary to evaluate such regulations and to determine the appropriate mechanisms for compliance. In anticipation of the impact of these requirements on small businesses, the CAA requires that States adopt a Small Business Stationary Source Technical and Environmental Compliance Assistance Program (PROGRAM), and submit this PROGRAM as a revision to the Federally approved SIP. In addition, the CAA directs the Environmental Protection Agency (EPA) to oversee these small business assistance programs and report to Congress on their implementation. The requirements for establishing a PROGRAM are set out in Section 507 of Title V of the CAA. In January 1992, EPA issued *Guidelines for the Implementation of Section 507 of the 1990 Clean Air Act Amendments*, in order to delineate the Federal and State roles in meeting the new statutory provisions and as a tool to provide further guidance to the States on submitting acceptable SIP revisions.

The State of Oregon has submitted a SIP revision to EPA in order to satisfy the requirements of Section 507. Section 468.330 of the Oregon Revised Statutes establishes a Small Business Stationary Source Technical and Environmental Compliance Assistance Program and requires the Program to include each element specified in section 507(a) of the Act. In order to gain full approval, the State submittal must provide for each of the following PROGRAM elements: (1) the establishment of a Small Business Assistance Program (SBAP) to provide technical and compliance assistance to small businesses; (2) the establishment of a State Small Business Ombudsman to represent the interests of small businesses in the regulatory process; and (3) the creation of a Compliance Advisory Panel to determine and report on the overall effectiveness of the SBAP.

II. Analysis

1. Small Business Assistance Program

Section 507(a) sets forth six requirements[1] that the State must meet to have an approvable SBAP. The first requirement is to establish adequate mechanisms for developing, collecting and coordinating information concerning compliance methods and technologies for small business stationary sources, and programs to encourage lawful cooperation among such sources and other persons to further compliance with the Act. The State has met this requirement through participation in a Pacific Northwest regional effort designed to ensure collection and development of compliance methods and technologies for small businesses. In addition, Oregon's SBAP has an information component and a technical assistance component. The information component advises small business about air quality regulations that may affect them, through education, outreach, and toll-free telephone access. The technical assistance component helps small businesses through direct consultation and site visits.

The second requirement is to establish adequate mechanisms for assisting small business stationary sources with pollution prevention and accidental release detection and prevention, including providing information concerning alternative technologies, process changes, products and methods of operation that help reduce air pollution. The State has met this requirement by coordinating and integrating SBAP activities with its pollution prevention activities, in particular the toxics use and waste reduction program. In addition, Oregon's SBAP will coordinate with the State Fire Marshal, Oregon-OSHA, and local emergency response programs in order to ensure small businesses receive assistance and information on accidental release detection and prevention.

The third requirement is to develop a compliance and technical assistance program for small business stationary sources which assists small businesses in determining applicable requirements and in receiving permits under the Act in a timely and efficient manner. The State has met this requirement by training staff in regulatory and permitting requirements, informing small businesses of their responsibilities through outreach, and providing compliance assistance through the SBAP.

The fourth requirement is to develop adequate mechanisms to assure that small business stationary sources receive notice of their rights under the Act in such manner and form as to assure reasonably adequate time for such sources to evaluate compliance methods and any relevant or applicable proposed or final regulation or standards issued under the Act. The State has met this requirement by ensuring that small business rights are included in education and outreach materials and activities, as well as during the delivery of technical assistance. Oregon follows a policy of providing the regulated community with at least 30 calendar days advance notice before applicable requirements take effect.

The fifth requirement is to develop adequate mechanisms for informing small business stationary sources of their obligations under the Act, including mechanisms for referring such sources to qualified auditors or, at the option of the State, for providing audits of the operations of such sources to determine compliance with the Act. The State has met this requirement through a policy of providing the regulated community with at least 30 calendar days advanced notice of their obligations under state law, developing a program for qualified outside auditors to provide compliance assessments upon request, and providing compliance assistance through the Compliance Assessment Program.

---

[1] A seventh requirement of Section 507(a), establishment of an Ombudsman office, is discussed in the next section.

The sixth requirement is to develop procedures for consideration of requests from a small business stationary source for modification of (A) any work practice or technological method of compliance, or (B) the schedule of milestones for implementing such work practice or method of compliance preceding any applicable compliance date, based on the technological and financial capability of any such small business stationary source. The State has met this requirement by developing standardized criteria and administrative procedures for considering such requests.

2. Ombudsman

Section 507(a)(3) requires the designation of a State office to serve as the Ombudsman for small business stationary sources. The State has met this requirement by establishing and filling a new technical assistance coordinator position located in the administration section of the Department's Regional Operations Division. The technical assistance coordinator is assigned the responsibilities of the Small Business Ombudsman.

3. Compliance Advisory Panel

Section 507(e) requires the State to establish a Compliance Advisory Panel (CAP) that must include two members selected by the Governor who are not owners or representatives of owners of small businesses; four members selected by the State legislature who are owners, or represent owners, of small businesses; and one member selected by the head of the agency in charge of the Air Pollution Permit Program. The State has met this requirement by establishing a Compliance Advisory Panel comprised of these individuals. *See* ORS 468A.330(3).

In addition to establishing the minimum membership of the CAP, the CAA delineates four responsibilities of the Panel: (1) to render advisory opinions concerning the effectiveness of the SBAP, difficulties encountered and the degree and severity of enforcement actions; (2) to periodically report to EPA concerning the SBAP's adherence to the principles of the Paperwork Reduction Act, the Equal Access to Justice Act, and the Regulatory Flexibility Act;[2] (3) to review and assure that information for small business stationary sources is easily understandable; and (4) to develop and disseminate the reports and advisory opinions made through the SBAP. The State has met these requirements by authorizing its CAP to address these responsibilities. *See* ORS 468A.330(2).

4. Eligibility

Section 507(c)(1) of the CAA defines the term "small business stationary source" as a stationary source that:

(A) Is owned or operated by a person who employs 100 or fewer individuals;

(B) Is a small business concern as defined in the Small Business Act;

(C) Is not a major stationary source;

(D) Does not emit 50 tons per year (tpy) or more of any regulated pollutant; and

(E) Emits less than 75 tpy of all regulated pollutants.

The State of Oregon has established a mechanism for ascertaining the eligibility of a source to receive assistance under the PROGRAM, including an evaluation of a source's eligibility using the criteria in Section 507(c)(1) of the CAA.

The State of Oregon has provided for public notice and comment on grants of eligibility to sources that do not meet the provisions of Sections 507(c)(1) (C), (D), and (E) of the CAA but do not emit more than 100 tpy of all regulated pollutants.

The State of Oregon has provided for exclusion from the small business stationary source definition, after consultation with the EPA and the Small Business Administration Administrator and after providing notice and opportunity for public comment, of any category or subcategory of sources that the State determines to have sufficient technical and financial capabilities to meet the requirements of the CAA.

5. Onsite Technical Assistance

The statute establishing the Oregon Small Business Program, ORS 468A.330, provides that onsite technical assistance for the development and implementation of the Small Business Stationary Source Technical and Environmental Compliance Assistance Program shall not result in inspections or enforcement actions except where there is reasonable cause to believe that a clear and immediate danger to the public health and safety or to the environment exists. *See* ORS 468A.330(4)(a). On August 12, 1994, EPA issued a guidance memorandum entitled "Enforcement Response Policy for Treatment of Information Obtained Through Clean Air Act Section 507 Small Business Assistance Programs" signed by Steven A. Herman (herein referred to as the "SBA Enforcement Guidance"), which sets forth EPA's enforcement response policy on the treatment of violations detected during compliance assistance visits under State Small Business Assistance Programs. The SBA Enforcement Guidance endorses State PROGRAMS that either (1) voluntarily seek compliance assistance a limited period to correct violations observed or revealed as a result of compliance assistance or (2) if the PROGRAM is independent of the delegated State air enforcement program, keep confidential information that identifies the names and locations of specific small businesses with violations revealed through compliance assistance.

The Oregon statute does not satisfy the requirements of the first option of the SBA Enforcement Guidance in that ORS 468A.330(4)(a) does not simply give sources that receive onsite technical assistance a limited opportunity to correct a violation, but instead prohibits further enforcement inspections and enforcement actions that result from onsite technical assistance. On May 16, 1995, the State or Oregon submitted to EPA a guidance document entitled "Air Quality Guidance: Restriction of Information Obtained by the AQ Small Business Assistance Program" (hereinafter, "Oregon's SBAP Confidentiality Guidance"). This document requires the PROGRAM to be operated independently of Oregon's air program enforcement efforts and requires the PROGRAM to restrict access by Oregon air enforcement staff to information regarding violations detected through onsite technical assistance visits to small businesses.

EPA has reviewed Oregon's SBAP Confidentiality Guidance and believes that it meets the conditions that apply to State's choosing the confidentiality option. Specifically, Oregon's SBAP Confidentiality Guidance is an official policy that establishes independence between the PROGRAM and the Oregon air enforcement program; it restricts access by Oregon air enforcement staff to information regarding violations detected through onsite technical assistance visits to small businesses; it requires the PROGRAM to report general statistical and other information about small business compliance to the Department of Environmental Quality and requires the PROGRAM to track compliance progress where it identifies violations during onsite technical assistance; the Department retains full discretion to take enforcement action against violations documented independently of onsite technical assistance visits; and Oregon's PROGRAM is subject to the eligibility requirements of Section 507(c) of the Clean Air Act. In summary, EPA believes that ORS 468A.330(4)(a), when implemented in accordance with Oregon's SBA Confidentiality Guidance, is consistent with EPA's SBA Enforcement Guidance.

---

[2] Section 507(e)(1)(B) requires the CAP to report on the *compliance* of the SBAP with these three Federal statutes. However, since State agencies are not required to comply with them, EPA believes that the State PROGRAM must merely require the CAP to report on whether the SBAP is adhering to the general principles of these Federal statutes.

III. This Action

In this action, EPA approves the SIP revision submitted by the State of Oregon. The State of Oregon has submitted a SIP revision implementing each of the required PROGRAM elements required by Section 507 of the CAA. The Program is currently being implemented. EPA is therefore approving this submittal.

IV. Administrative Review

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

By this action, the EPA is approving a State program created for the purpose of assisting small businesses in complying with existing statutory and regulatory requirements. The program being approved in this action does not impose any new regulatory burden on small businesses; it is a program under which small businesses may elect to take advantage of assistance provided by the state. Therefore, because the EPA's approval of this program does not impose any new regulatory requirements on small businesses, I certify that it does not have a significant economic impact on any small business entities affected.

SIP approvals under section 110 and subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the state is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S.E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

Under Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated costs to State, local, or tribal governments in the aggregate; or to the private sector, of $100 million or more. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the approval action promulgated does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new Federal requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

The EPA has reviewed this request for revision of the Federally-approved SIP for conformance with the provisions of the 1990 Clean Air Act Amendments enacted on November 15, 1990. The EPA has determined that this action conforms with those requirements.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table 3 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by a July 10, 1995 memorandum from Mary Nichols, Assistant Administrator for Air and Radiation. The Office of Management and Budget (OMB) has exempted this regulatory action from E.O. 12866 review.

The EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, the EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 6, 1995 unless, within 30 days of its publication, adverse or critical comments are received.

If the EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent notice that will withdraw the final action. All public comments received will be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective November 6, 1995.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 6, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2), 42 U.S.C. 7607(b)(2).

Approval and Promulgation of Air Quality Implementation Plans; West Virginia, 45CSR35, Requirements for Determining Conformity of General Federal Actions to Applicable Air Quality Implementation Plans (General Conformity)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the State of West Virginia. The rule sets forth policy, criteria, and procedures for demonstrating and assuring conformity of such activities to all applicable implementation plans developed pursuant to Section 110 and Part D of the Clean Air Act (CAA). The intended effect of this action is to approve the SIP revision of West Virginia General Conformity Rule. This action is being taken under section 110 of the CAA.

DATES: This final rule is effective November 6, 1995 unless notice is received on or before October 5, 1995 that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments may be mailed to Marcia L. Spink, Associate Director, Air Programs, Mailcode 3AT00, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; the Air and Radiation Docket and Information Center, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460; and the West Virginia Department of Environmental Protection, Office of Air Quality, 1558 Washington Street, East, Charleston, West Virginia, 25311.

FOR FURTHER INFORMATION CONTACT: Rose Quinto, (215) 597–3164, at the EPA Region III address above.

SUPPLEMENTARY INFORMATION: On November 23, 1994, the State of West Virginia submitted a formal revision to its State Implementation Plan (SIP) to EPA for the purpose of meeting the requirements of 40 CFR 51.851, General Conformity. West Virginia had adopted an emergency rule (45CSR35) that adopts the provisions of federal General Conformity Rule (40 CFR Part 93, Subpart B), which was effective on November 16, 1994. The exact same version of 45CSR35, the General Conformity Rule, was submitted to the West Virginia legislature for permanent authorization. On May 16, 1995, the State of West Virginia submitted the final SIP revision of 45CSR35 to EPA, promulgated as final legislative rule in accordance to West Virginia law, that became effective on May 1, 1995. (Note: The Transportation Conformity Rule submitted on May 16, 1995 is the subject of a separate rulemaking action.)

Summary of SIP Revision

West Virginia's rule 45CSR35, Requirements for Determining Conformity of General Federal Actions to Applicable Air Quality Implementation Plans (General Conformity), adopts the requirements of 40 CFR Part 93, Subpart B, Determining Conformity of General Federal Actions to State or Federal Implementation Plans by incorporating these federal regulations by reference. The federal rule was promulgated by EPA to implement Section 176(c) of the CAA, as amended (42 U.S.C. 7401 et seq.) which requires that all federal actions conform to applicable air quality implementation plans. This rule only applies to areas designated nonattainment or maintenance areas under the CAA, as amended.

This rule sets forth policy, criteria, and procedures for demonstrating and assuring conformity of such activities to all applicable implementation plans developed pursuant to Section 110 and Part D of the CAA. The rule generally applies to federal actions except: (1) Those required under the transportation conformity rule (40 CFR Part 93, Subpart A); (2) Actions with associated emissions below specified de minimis levels; and (3) Certain other actions which are exempt or presumed to conform to applicable air quality implementation plans.

Some examples of federal actions requiring conformity determination include: Airport Construction/Modification grants; Leasing of Federal Land; Granting a Permit; Construction of Federal Office Buildings; Private Construction on Federal Land; Prescribed Burning; Reuse of Military Bases; and Water Treatment Plants.

EPA is approving this SIP revision without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document elsewhere in this **Federal Register**, EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 6, 1995 unless, by 30 days of October 5, 1995 adverse or critical comments are received.

If EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. EPA will not institute a second comment period on this action.

Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective on November 6, 1995.

Final Action

EPA is approving the final SIP revision of 45CSR35, submitted by the State of West Virginia on May 16, 1995, which was effective on May 1, 1995.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, part D of the CAA do not create any new requirements but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, the Administrator certifies that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the CAA, preparation of a flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. EPA*, 427 U.S. 246, 255–66 (1976); 42 U.S.C. 7410(a)(2).

Under sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under section 176 of the Clean Air Act. These rules may bind State, local and tribal governments to perform certain actions and also require the private sector to perform certain duties. The rules being approved by this action will impose no new requirements; such sources are already subject to these regulations under State law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action. EPA has also determined that this action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

This action has been classified as a Table 2 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993 memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation. The OMB has exempted this regulatory action from E.O. 12866 review.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action to approve West Virginia's General Conformity Rule must be filed in the United States Court of Appeals for the appropriate circuit by November 6, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

BILLING CODE 6560–50–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA–7624]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule identifies communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If the Federal Emergency Management Agency (FEMA) receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATES: The effective date of each community's suspension is the third date ("Susp.") listed in the third column of the following tables.

ADDRESSES: If you wish to determine whether a particular community was suspended on the suspension date,

contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

FOR FURTHER INFORMATION CONTACT: Robert F. Shea Jr., Division Director, Program Implementation Division, Mitigation Directorate, 500 C Street, SW., Room 417, Washington, DC 20472, (202) 646–3619.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage as authorized under the National Flood Insurance Program, 42 U.S.C. 4001 et seq., unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this document no longer meet that statutory requirement for compliance with program regulations, 44 CFR part 59 et seq. Accordingly, the communities will be suspended on the effective date in the third column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register**.

In addition, the Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Insurance Rate Map (FIRM). The date of the FIRM if one has been published, is indicated in the fourth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Deputy Associate Director finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified.

Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications have been made, this final rule may take effect within less than 30 days.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Considerations. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Deputy Associate Director has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed no longer comply with the statutory requirements, and after the effective date, flood insurance will no longer be available in the communities unless they take remedial action.

Regulatory Classification

This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Paperwork Reduction Act

This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, October 26, 1987, 3 CFR, 1987 Comp., p. 252.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778, October 25, 1991, 56 FR 55195, 3 CFR, 1991 Comp., p. 309.

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

Accordingly, 44 CFR part 64 is amended as follows:

PART 64—[AMENDED]

1. The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 64.6 [Amended]

2. The tables published under the authority of § 64.6 are amended as follows:

BILLING CODE 6718–21–P

---

44 CFR Part 64

[Docket No. FEMA–7625]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule identifies a community where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that is suspended on the effective date listed within this rule because of failure to enforce floodplain management requirements of the program. If FEMA receives documentation of remedial measures taken prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATE: The effective date of the community's suspension is the third date ("Susp.") listed in the fourth column of the following tables.

ADDRESSES: If you wish to determine whether a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor at: Post Office Box 6464, Rockville, MD 20849, (800) 638–6620.

FOR FURTHER INFORMATION CONTACT: Robert F. Shea, Jr., Division Director, Program Implementation Division, Mitigation Directorate, 500 C Street, SW., room 417, Washington, DC 20472, (202) 646–3619.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage as authorized under the National Flood Insurance Program, 42 U.S.C. 4001 *et seq.*, unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The community listed in this document no longer meet the statutory requirement for compliance with program regulations, 44 CFR part 59 *et seq.* Accordingly, the community will be suspended on the effective date in the fourth column. As of that date, flood insurance will no longer be available in the community. However, the community may submit the required documentation of the remedial measures taken after this rule is published but prior to the actual suspension date. The community will not be suspended and will continue its eligibility for the sale of insurance. A notice withdrawing the suspension of the community will be published in the **Federal Register**.

In addition, the Federal Emergency Management Agency has identified the special flood hazard areas in the community by publishing a Flood Insurance Rate Map (FIRM). The date of the FIRM, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the FEMA's initial flood insurance map of the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of Federal assistance becomes effective for the community listed on the date shown in the last column.

The Director finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and unnecessary because the community listed in this final rule have been adequately notified.

This community received a 90-day and two 30-day notifications addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications have been made, this final rule may take effect within less than 30 days.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Asssociate Director certified that this rule will not have a significant economic impact on a substantial number of small entities in accordance with the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

Regulatory Classification

This rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Paperwork Reduction Act

This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987, 3 CFR, 1987 Comp., p.252.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778, October 25, 1991, 56 FR 55195, 3 CFR, 1991 Comp., p. 309.

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

Accordingly, 44 CFR part 64 is amended as follows:

PART 64—[AMENDED]

1. The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 64.6 [Amended]

2. The tables published under the authority of § 64.6 are amended as follows:

State/Location	Community No.	Effective date of authorization/cancellation of sale of flood insurance in community	Current effective map date	Date certain Federal assistance no longer available in special flood hazard areas
Region VI				
Texas:				
Hunt County, unincorporated areas	480363	June 15, 1990, Emerg; Sept. 4, 1991, Reg. Sept. 6, 1995, Susp.	Sept. 4, 1991	Sept. 6, 1995

Code for reading third column: Emerg.— Emergency; Reg.— Regular; Rein.— Reinstatement; Susp.— Suspension.

(Catalog of Federal Domestic Assistance No. 83.100, "Flood Insurance.")

Issued: August 25, 1995.

Robert H. Volland,

Acting Deputy Associate Director, Mitigation Directorate.

BILLING CODE 6718–21–P

---

44 CFR Part 65

[Docket No. FEMA–7152]

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Interim rule.

SUMMARY: This interim rule lists communities where modification of the base (1% annual chance) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base flood elevations for new buildings and their contents.

DATES: These modified base flood elevations are currently in effect on the dates listed in the table and revise the Flood Insurance Rate Map(s) in effect prior to this determination for each listed community.

From the date of the second publication of these changes in a newspaper of local circulation, any person has ninety (90) days in which to request through the community that the Associate Director, Mitigation Directorate, reconsider the changes. The modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street, SW., Washington, DC 20472, (202) 646–2756.

SUPPLEMENTARY INFORMATION: The modified base flood elevations are not listed for each community in this interim rule. However, the address of the Chief Executive Officer of the community where the modified base flood elevation determinations are available for inspection is provided.

Any request for reconsideration must be based upon knowledge of changed conditions, or upon new scientific or technical data.

The modifications are made pursuant to Section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR Part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base flood elevations are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are required to maintain community eligibility in the NFIP. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This interim rule is not a significant regulatory action under the criteria of Section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of Section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR Part 65 is amended to read as follows:

PART 65—[AMENDED]

1. The authority citation for Part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 65.4 [Amended]

2. The tables published under the authority of § 65.4 are amended as follows:

State and County	Location	Dates and name of newspaper where notice was published	Chief executive officer of community	Effective date of modification	Community No.
Arizona:					
Coconino	City of Flagstaff	July 20, 1995, July 27, 1995, *Arizona Daily Sun.*	The Honorable Chris Bavasi, Mayor, City of Flagstaff, 211 West Aspen Avenue, Flagstaff, Arizona 86001.	June 19, 1995	040020
Pima	Unincorporated Areas.	July 7, 1995, July 14, 1995, *Tucson Citizen.*	The Honorable Paul Marsh, Chairman, Pima County Board of Supervisors, 130 West Congress Street, Tucson, Arizona 85701.	June 14, 1995	040073
Pima	City of Tucson	July 13, 1995, July 20, 1995, *Arizona Daily Star.*	The Honorable George Miller, Mayor, City of Tucson, P.O. Box 27210, Tucson, Arizona 85710–7210.	June 26, 1995	040076
California:					
Riverside	City of Corona	July 19, 1995, July 26, 1995, *Corona Independent.*	The Honorable Jeff Bennett, Mayor, City of Corona, P.O. Box 940, Corona, California 91718.	June 20, 1995	060250
Alameda	City of Livermore	July 13, 1995, July 20, 1995, *Tri-Valley Herald.*	The Honorable Cathie Brown, Mayor, City of Livermore, 1052 South Livermore Avenue, Livermore, California 94550–4899.	June 19, 1995	060008
Riverside	City of Riverside	July 19, 1995, July 26, 1995, *Press Enterprise.*	The Honorable Ron Loveridge, Mayor, City of Riverside, 3900 Main Street, Riverside, California 92522.	June 19, 1995	060260
Riverside	Unincorporated Areas.	July 19, 1995, July 26, 1995, *Press Enterprise.*	The Honorable Kay Ceniceros, Chairperson, Riverside County Board of Supervisors, P.O. Box 1359, Riverside, California 92502–1359.	June 19, 1995	060245
Colorado:					
Arapahoe	Unincorporated Areas.	July 13, 1995, July 20, 1995, *The Villager.*	The Honorable Thomas R. Eggert, Chairperson, Arapahoe County Board of Commissioners, 5334 South Prince Street, Littleton, Colorado 80166.	June 20, 1995	080011
Boulder	City of Boulder	July 13, 1995, July 20, 1995, *Daily Camera.*	The Honorable Leslie Durgin, Mayor, City of Boulder, P.O. Box 791, Boulder, Colorado 80306.	June 14, 1995	080024

BILLING CODE 6718–03–P

---

44 CFR Part 65

[Docket No. FEMA–7148]

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Interim rule.

SUMMARY: This interim rule lists communities where modification of the base (1% annual chance) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base flood elevations for new buildings and their contents.

DATES: These modified base flood elevations are currently in effect on the dates listed in the table and revise the Flood Insurance Rate Map(s) (FIRMs) in effect prior to this determination for each listed community.

From the date of the second publication of these changes in a newspaper of local circulation, any person has ninety (90) days in which to request through the community that the Associate Director reconsider the changes. The modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street, SW., Washington, DC 20472, (202) 646–2756.

SUPPLEMENTARY INFORMATION: The modified base flood elevations are not listed for each community in this interim rule. However, the address of the Chief Executive Officer of the community where the modified base flood elevation determinations are available for inspection is provided.

Any request for reconsideration must be based upon knowledge of changed conditions, or upon new scientific or technical data.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 et seq., and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base flood elevations are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are required to maintain community eligibility in the National Flood Insurance Program. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This interim rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

1. The authority citation for part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 65.4 [Amended]

2. The tables published under the authority of § 65.4 are amended as follows:

State and county	Location	Dates and name of newspaper where notice was published	Chief executive officer of community	Effective date of modification	Community No.
Connecticut: Tolland	Town of Somers	June 30, 1995, July 7, 1995, *Journal Enquirer.*	Mr. Robert Pereoski, First Selectman of the Town of Somers, Town Hall, P.O. Box 308, Somers, Connecticut 06071.	June 16, 1995	090112
Maryland: Queen Annes.	Unincorporated Areas	June 28, 1995, July 5, 1995, *The Star-Democrat and Bay Times.*	Mr. Mark Belton, President of the Queen Annes County Commissioners, 107 North Liberty Street, Centreville, Maryland 21617.	June 22, 1995	240054 C
Minnesota: Hennepin	City of Hopkins	June 28, 1995, July 5, 1995, *Hopkins Sun Sailor.*	Mr. Steve Mielke, Manager of the City of Hopkins, 1010 1st Street South, Hopkins, Minnesota 55343.	Dec. 19, 1995	270166 B
Mississippi:					
Madison	City of Madison	June 8, 1995, June 15, 1995, *Madison County Herald.*	The Honorable Mary Hawkins, Mayor of the City of Madison, P.O. Box 40, Madison, Mississippi 39138–0040.	May 31, 1995	280229 D
Madison	Unincorporated Areas	June 8, 1995, June 15, 1995, *Madison County Herald.*	Mr. David Richardson, President of the Board of Supervisors for Madison County, P.O. Box 404, Canton, Mississippi 39046.	May 31, 1995	280228 D
New Hampshire: Grafton.	Town of Littleton	June 14, 1995, June 21, 1995, *The Courier.*	Mr. Donald A. Craigie, Chairman of the Board of Selectmen, 1 Union Street, Littleton, New Hampshire 03561.	June 9, 1995	330064
South Carolina: Richland.	Unincorporated Areas	June 16, 1995, June 23, 1995, *The State.*	Mr. W. Anthony McDonald, Richland County Administrator, P.O. Box 192, Columbia, South Carolina 29202.	June 9, 1995	450170 G
Tennessee:					
Shelby	City of Memphis	June 23, 1995, June 30, 1995, *The Commercial Appeal.*	The Honorable W. W. Herenton, Mayor of the City of Memphis, City Hall, Room 200, 125 North Main Street, Memphis, Tennessee 38103.	June 15, 1995	470177 E
Shelby	Unincorporated Areas	June 23, 1995, June 30, 1995, *The Commercial Appeal.*	Mr. Jim Kelly, Shelby County Chief Administrative Officer, 160 North Main Street, Memphis, Tennessee 38103.	June 15, 1995	470214 E

(Catalog of Federal Domestic Assistance No. 83.100, "Flood Insurance.")

Dated: August 28, 1995.

44 CFR Part 65

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Final rule.

SUMMARY: Modified base (1% annual chance) flood elevations are finalized for the communities listed below. These modified elevations will be used to calculate flood insurance premium rates for new buildings and their contents.

EFFECTIVE DATES: The effective dates for these modified base flood elevations are indicated on the following table and revise the Flood Insurance Rate Map(s) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street, SW, Washington, DC 20472, (202) 646–2756.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency makes the final determinations listed below of the final determinations of modified base flood elevations for each community listed. These modified elevations have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Associate Director has resolved any appeals resulting from this notification.

The modified base flood elevations are not listed for each community in this notice. However, this rule includes the address of the Chief Executive Officer of the community where the modified base flood elevation determinations are available for inspection.

The modifications are made pursuant to Section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR Part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base flood elevations are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities.

These modified elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are required to maintain community eligibility in the NFIP. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This final rule is not a significant regulatory action under the criteria of Section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of Section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

Accordingly, 44 CFR Part 65 is amended to read as follows:

PART 65—[AMENDED]

1. The authority citation for Part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 65.4 [Amended]

2. The tables published under the authority of § 65.4 are amended as follows:

State and county	Location	Dates and name of newspaper where notice was published	Chief executive officer of community	Effective date of modification	Community No.
Montana: Flathead (FEMA Docket No. 7139).	Unincorporated Areas .	March 16, 1995, March 23, 1995, *Daily Inter Lake*.	The Honorable Sharon L. Stratton, Chairman, Flathead County Board of Commissioners, 800 South Main Street, Kalispell, Montana 59901.	Mar. 3, 1995	300023

(Catalog of Federal Domestic Assistance No. 83.100, "Flood Insurance.")

44 CFR Part 67

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Final rule.

SUMMARY: Base (1% annual chance) flood elevations and modified base flood elevations are made final for the communities listed below. The base flood elevations and modified base flood elevations are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATES: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base flood elevations and modified base flood elevations for each community. This date may be obtained by contacting the office where the maps are available for inspection as indicated on the table below.

ADDRESSES: The final base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street, SW., Washington, DC 20472, (202) 646–2756.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA or Agency) makes final determinations listed below of base flood elevations and modified base flood elevations for each community listed. The proposed base flood elevations and proposed modified base flood elevations were published in newspapers of local circulation and an opportunity for the community or individuals to appeal the proposed determinations to or through the community was provided for a period of ninety (90) days. The proposed base flood elevations and proposed modified base flood elevations were also published in the **Federal Register**.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67.

The Agency has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base flood elevations and modified base flood elevations are made final in the communities listed below. Elevations at selected locations in each community are shown.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this rule is exempt from the requirements of the Regulatory Flexibility Act because final or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the National Flood Insurance Program. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is amended as follows:

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.11 [Amended]

2. The tables published under the authority of § 67.11 are amended as follows:

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
DELAWARE	
Dewey Beach (town), Sussex County (FEMA Docket No. 7124)	
Atlantic Ocean:	
Approximately 100 feet east of intersection of Read Avenue and State Route 1.	Depth 2′
Maps available for inspection at the Town Hall, 105 Rodney Avenue, Dewey Beach, Delaware.	
Fenwick Island (town), Sussex County (FEMA Docket No. 7124)	
Atlantic Ocean:	
Approximately 500 feet east of the intersection of James Street and State Route 1.	*13
Approximately 100 feet west of the intersection of Essex Street and Bunting Avenue.	Depth 2′
Maps available for inspection at the Town Hall, 800 Coastal Highway, Fenwick Island, Delaware.	
Sussex County, (unincorporated areas) (FEMA Docket No. 7124)	
Atlantic Ocean:	
Approximately 100 feet east of the intersection of Palmer Avenue and State Route 1.	Depth 2′
Maps available for inspection at the Planning and Zoning Office, Courthouse Circle, Georgetown, Delaware.	
MAINE	
Anson (town), Somerset County (FEMA Docket No. 7136)	
Kennebec River:	
Approximately 5,580 feet downstream of U.S. Route 201A, and U.S. Route 8, 43, and 148.	*201
Approximately 3 miles upstream of the confluence of Carrabassett River.	*275
Carrabassett River:	
At the confluence with Kennebec River.	*270
Approximately 0.56 mile upstream of the confluence with Big Brook.	*345
Getchell Brook:	
Approximately 180 feet downstream of State Routes 43 and 148 (Main Street).	*258
Approximately 545 feet upstream of State Routes 43 and 148 (Main Street).	*258
Maps available for inspection at the Anson Town Hall, Main Street, Anson, Maine.	
Holden (town), Penobscot County (FEMA Docket No. 7136)	
Brewer Lake:	
Entire shoreline within community.	*112
Davis Pond:	
Entire shoreline within community.	*199
Holbrook Pond:	
Entire shoreline within community.	*199
Maps available for inspection at the Holden Town Office, 1460 Main Road, East Holden, Maine.	
Madison (town), Somerset County (FEMA Docket No. 7128)	
Kennebec River:	
At downstream corporate limits.	*193
At Approximately 500 feet upstream of upstream corporate limits.	*275
Jones Brook:	
At confluence with Kennebec River.	*234
At approximately 0.66 mile downstream of Jones Street.	**276
Cold Brook:	
At approximately 1,800 feet downstream of Snowmobile bridge.	*205
At approximately 30 feet upstream of Snowmobile bridge.	*206
Hayden Brook:	
Approximately 50 feet upstream of the confluence with Wesserunsett (Hayden) Lake.	*338
At approximately 60 feet upstream of U.S. Route 201.	*357
Unnamed Brook:	
At approximately 0.3 mile downstream of U.S. Route 201.	*267
At approximately 0.24 mile upstream of U.S. Route 201.	*319
Maps available for inspection at 26 Weston Avenue, Madison, Maine.	
MICHIGAN	
Plymouth (charter township), Wayne County (FEMA Docket No. 7130)	
Middle River Rouge:	
Approximately 2,100 feet downstream of I–275 (At downstream corporate limits).	*667
Approximately 1,000 feet upstream of Pheonix Dam (At upstream corporate limits).	*731
Maps available for inspection at the Township Hall, 42350 Ann Arbor Road, Plymouth, Michigan.	
Plymouth (city), Wayne County (FEMA Docket No. 7130)	
Middle River Rouge:	
Approximately 400 feet downstream of Edward Hines Drive (Downstream of corporate limits).	*671
Approximately 600 feet upstream of Mill Street.	*709
Maps available for inspection at the City Hall, 201 South Main Street, Plymouth, Michigan.	
NEW YORK	
Potsdam (village), St. Lawrence County (FEMA Docket No. 7136)	
Raquette River:	
Approximately 240 feet upstream of downstream corporate limits.	*399
Approximately 320 feet downstream of upstream corporate limits.	*411
Maps available for inspection at the Code Enforcement Office, Park and Elm Streets, Potsdam, New York.	

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
OHIO	
Oakwood (village), Paulding County (FEMA Docket No. 7130)	
Auglaize River:	
Approximately 0.5 mile downstream of Norfolk and Southern Railroad.	*711
Approximately 0.6 mile upstream of State Route 613.	*712
Maps available for inspection at the Village Hall, 228 North First Street, Oakwood, Ohio.	
Paulding County, (unincorporated areas) (FEMA Docket No. 7130)	
Maumee River:	
Approximately 0.6 mile downstream of downstream county boundary.	*695
Approximately 0.2 mile upstream of upstream county boundary.	*724
Auglaize River:	
Approximately 880 feet upstream of confluence of Flatrock Creek.	*704
At upstream county boundary.	*715
Flatrock Creek/Auglaize River Overflow Channel:	
At upstream of County Route 171.	*704
At diversion from Auglaize River.	*706
Maps available for inspection at the Paulding County Commissioners Office, 115 North William Street, Paulding, Ohio.	
PENNSYLVANIA	
Fayette City (borough), Fayette County (FEMA Docket No. 7128)	
Monongahela River:	
At the downstream corporate limits (Approximately 675 feet downstream of Downers Run).	*766
At the upstream corporate limits (Approximately 1,050 feet upstream of Lamb Lick Run).	*767
Maps available for inspection at the Borough Hall, 238 Main Street, Fayette City, Pennsylvania.	
Dickinson (township), Cumberland County (FEMA Docket No. 7128)	
Yellow Breeches Creek:	
Approximately 1,050 feet downstream of Burnthouse Road (T–474).	*533
At upstream corporate limits	*597
Yellow Breeches Creek Northern Split:	
At confluence with Yellow Breeches Creek.	*558
At divergence from Yellow Breeches Creek.	*569
Maps available for inspection at the Township Building, 219 Mountain View Road, Mount Holly Springs, Pennsylvania.	
Hampden (township), Cumberland County (FEMA Docket No. 7130)	
Navy Ship Parts Control Center Drainage Channel:	
At the confluence with Trindle Spring Run.	*378
Approximately 0.4 mile upstream of the second Gabion Dam.	*417
Maps available for inspection at the Hampden Township Building, 230 South Sporting Hill Road, Mechanicsburg, Pennsylvania.	
Mount Holly Springs (borough), Cumberland County (FEMA Docket No. 7130)	
Mountain Creek:	
Approximately 900 feet downstream of Conrail.	*538
Approximately 300 feet downstream of upstream corporate limits.	*601
Maps available for inspection at the Mount Holly Springs Municipal Building, 200 Harmon Street, Mount Holly Springs, Pennsylvania.	
North Charleroi (borough), Washington County (FEMA Docket No. 7128)	
Monongahela River:	
Downstream corporate limits (approximately 1,000 feet downstream of Monessen-North Charleroi bridge).	*761
Upstream corporate limits (approximately 1,600 feet upstream of Monessen-North Charleroi bridge).	*762
Maps available for inspection at the Borough Secretary's Office, 301 Isabelle Avenue, North Charleroi, Pennsylvania.	
Oneida (township), Huntingdon County (FEMA Docket No. 7130)	
Juniata River:	
At the Borough of Huntingdon northern corporate limits.	*638
Approximately 1,100 feet upstream of the northern corporate limits of the Borough of Huntingdon.	*639

BILLING CODE 6718–03–P

FEDERAL MARITIME COMMISSION

46 CFR Part 552

[Docket No. 94–07]

Financial Reporting Requirements and Rate of Return Methodology in the Domestic Offshore Trades

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Federal Maritime Commission is amending its regulations governing financial reporting requirements and rate of return methodology applicable to vessel-operating common carriers by water in the domestic offshore trades to discontinue use of the comparable earnings test in determining the reasonableness of a carrier's return on rate base. In its place, the Commission will use the weighted average cost of capital methodology. The Commission is modifying the calculation of the rate of return on rate base to a before-tax basis. In addition, the Commission is amending its rules pertaining to the computation of working capital. The rule addresses a number of shipper and carrier concerns regarding the Commission's current rate of return methodology and would align the Commission's ratemaking methodologies more closely with those used by numerous other regulatory agencies. The intent is to improve the Commission's methodology for evaluating the reasonableness of rates filed by carriers in the domestic offshore trades.

EFFECTIVE DATE: October 5, 1995.

FOR FURTHER INFORMATION CONTACT:

Richard R. Speigel or Anne M. McAloon, Bureau of Economics and Agreement Analysis, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001, 202–523–5845 or 523–5790

C. Douglass Miller, Office of the General Counsel, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001, 202–523–5740

SUPPLEMENTARY INFORMATION: On April 7, 1994, the Federal Maritime Commission ("FMC" or "Commission") published a Notice of Proposed Rulemaking ("NPR" or "proposed rule") (59 FR 16592) which proposed to amend the regulations governing financial reporting requirements and rate of return methodology applicable to vessel-operating common carriers by water in the domestic offshore trades. The Commission proposed to change the method of determining the reasonableness of a carrier's return on rate base from the comparable earnings test ("CET") to the weighted average cost of capital ("WACC") methodology. At the request of Matson Navigation Company ("Matson"), the Commission extended the comment period for interested parties to file until July 20, 1994 (59 FR 27002). The following seven parties filed comments on the NPR: American President Lines ("APL"), Crowley Maritime Corporation ("Crowley"), Matson, Puerto Rico Maritime Shipping Authority ("PRMSA"), the Department of Transportation ("DOT"), Marsoft Incorporated ("Marsoft"), and the State of Hawaii ("Hawaii").

By notice published November 4, 1994, 59 FR 55232 ("Request for Reply Comments"), the Commission invited reply comments on four specific issues—the calculation of the cost of capital, working capital, the selection of proxy groups, and the deletion of alternative methodologies. The Commission extended the time for reply comments until January 6, 1995, partially granting a request of NPR, Inc. (59 FR 62372). Reply comments were received from APL, Crowley, Matson, PRMSA, Hawaii, and Tobias E. Seaman ("Seaman"), president of the National Association of Shippers, Consignees, and Consumers for Maritime Affairs. With the exception of Seaman, all reply commenters had submitted initial comments on the proposed rule.

PRMSA and NPR filed a motion for an evidentiary hearing on December 2, 1994. The Commission does not believe that there is a need te hold an evidentiary hearing as suggested by PRMSA and NPR. There have been two rounds of comments which have given all interested parties, including PRMSA and NPR, adequate opportunity to comment on the proposed rule.

The commenters raised concerns with many provisions of the proposed rule. The Commission has addressed all relevant comments. Any comment not specifically addressed has nevertheless been considered.

The Weighted Average Cost of Capital Approach

Comments: The commenters generally support the adoption of the WACC methodology for determining the allowable rate of return on rate base. Crowley does not support, however, the change to the WACC methodology for the following reasons. Crowley argues that the WACC methodology contained in the NPR does not correct the alleged shortcomings of the CET, because the WACC methodology will also rely on a proxy group to determine the regulated carrier's cost of capital. Crowley further urges caution in the Commission's deliberations because of the uncertainty over the Interstate Commerce Commission's ("ICC") continued jurisdiction over intermodal services and the Government of Puerto Rico's continued attempts to sell PRMSA. Crowley also contends that the rule would raise the cost of regulatory compliance substantially. Crowley disputes, as being too low, the Commission's estimate of the additional regulatory burden of the proposed rule (*i.e.*, 1.5 weeks), because substantially more effort would be required in the first years as the carriers learn the new system. In his comments, Seaman echoes Crowley's opposition to the proposed rule.

In its initial comments, PRMSA urged the Commission to require carriers initially to provide parallel testimony and information which would permit analysis under both the CET and the WACC methodologies. In its reply comments, however, PRMSA states that no need exists for the parallel CET analysis should the FMC decide to be less restrictive in specifying the permissible evidence in rate-of-return proceedings, and instead, permit carriers to submit evidence as to their demonstrated risk and, hence, their required rate of return.

Both PRMSA and Matson argue that setting the maximum allowable rate of return on rate base equal to the carrier's weighted average cost of capital would not provide the regulated carriers with sufficient earnings to fund their operations and attract capital. PRMSA urges the Commission to adopt provisions which would allow an earnings "cushion" above the before-tax weighted average cost of capital ("BTWACC").[1] PRMSA states that its required rate of return was less than that of the CET reference group, because it is 100 percent debt-financed and tax-exempt. Thus, it is said that PRMSA gained a tax advantage over the CET reference group. The earnings which the reference group devoted to tax payments was allegedly the "cushion" for PRMSA. The result, PRMSA states, is that the CET allows earnings levels which, when achieved, provide PRMSA with the ability to remain in business.

However, PRMSA maintains that the proposed BTWACC yields an untenable result for PRMSA, because it would strip away the earnings cushion which provides the ability to service debt which was acquired to finance past losses. PRMSA argues that this lack of an earnings "cushion" would be potentially harmful to any company with substantial debt in its capital structure. PRMSA contends that the allowable rate of return must provide a sufficient cushion above the cost of overall debt to permit the carrier to weather a downturn in its business.

Matson states that the Commission's definition of the cost of capital is the minimum rate of return necessary to attract capital to an investment. Matson also notes that in the proposed rule the maximum allowable return on rate base is the weighted average cost of capital. Matson claims that using the cost of capital to determine the allowable return on rate base sets the Commission's BTWACC as both the minimum and the maximum rate of return for the regulated carrier. Matson claims that for this to be correct, capital markets must be perfectly efficient. Matson claims that since it is recognized that capital markets are not perfectly efficient, by itself the BTWACC is not an adequate measure of the return on capital necessary to attract capital to the regulated carrier.

Matson claims that since the cost of capital is a minimum rate of return necessary to attract capital to the regulated firm, the Commission should allow carriers to earn returns equal to their cost of capital plus a specified margin in excess. Matson states that the extra earnings above the cost of capital that carriers in the domestic trades would be given the opportunity to earn would not be "gouging" the public. Matson states that the carriers in the domestic offshore trades face competitive market conditions, and thus the carrier's ability to meet customer needs will determine what return the carrier will earn from its operations. Matson claims that modifying the proposed rule to allow for a cushion above the BTWACC would permit Matson to attract capital to finance the assets necessary to continue and to enhance its operations.

Discussion: Crowley is correct that both the CET and BTWACC methodologies generally need to use some form of proxy group. However, for the following reasons, the Commission is convinced that the types of information used to calculate the BTWACC provide a better estimate than the CET of the allowable rate of return for each individual carrier. First, the BTWACC uses information specific to the regulated carrier's capital structure to calculate the carrier's required rate of return. Second, the BTWACC uses either the regulated carrier's cost of common-stock equity or a related proxy group's cost of common-stock equity to determine the required rate of return on equity, rather than the averages derived from all manufacturing firms that are used under the CET. Similarly, the BTWACC calculates the actual coupon payments for debt paid by the regulated carrier, rather than a proxy derived from a rolling average of Baa-rated corporate bonds. Therefore, the specificity that the BTWACC gives in determining the cost of capital of the individual regulated carrier is a vast improvement over the CET.

Crowley's claims of additional regulatory burden appear to be overstated. Under the proposed rule, if a carrier filed a general rate increase, the extra regulatory burden is estimated to be 24 staff-hours. An additional 41 staff-hours would have been required for the annual filing of the proxy group. Thus, the proposed rule estimated the increase in regulatory burden to be 41 to 65 staff-hours. The additional regulatory burden under the proposed rule, then, was quite modest. The Commission believes these estimates to be accurate approximations of the additional time necessary to comply with the final rule. Some firms may take more time while other firms may take less time, but on average the Commission believes that the estimates are accurate for the typical firm.

However, the Commission is concerned that any additional regulatory burden required under the final rule be minimized. Therefore, as will be discussed later, the requirement that carriers annually file a proxy group has been dropped in the final rule and the procedure for estimating the cost of equity has been changed. Under the final rule, a carrier that does not file a general rate increase will incur no extra regulatory burden because it need not file a proxy group. In addition, one of the three methods used to estimate the cost of equity, the Capital Asset Pricing Model, will no longer be required. These modifications to the proposed rule will result in a significant lessening of the regulatory burden. If the carrier does file a general rate increase, the extra regulatory burden remains 65 staff-hours. The Commission believes that the improvement in rate-of-return regulation which will occur under the BTWACC methodology more than compensates for the extra staff-hours of regulatory burden which will be incurred by those carriers which file a general rate increase. Therefore, the Commission rejects the suggestion by Crowley and Seaman that the Commission abandon its proposal to implement a BTWACC approach to determine the allowable rate of return in the domestic trades.

As will be discussed in the following sections, the Commission is modifying its proposed rule to allow for greater flexibility in the determination of the cost of common-stock equity. This modification should eliminate the need perceived by PRMSA in its initial comments that both the BTWACC and CET be utilized initially to determine an appropriate rate of return.

The NPR explained the legal and economic rationale for setting the allowable rate of return equal to the regulated carrier's cost of capital. Two landmark Supreme Court cases[2] established that investors in companies subject to rate regulation must be allowed an opportunity to earn returns sufficient to attract capital comparable to investments in other firms having the same amount of risk, and that revenues must not only cover operating expenses, but capital costs as well. The economic rationale for setting the allowable rate of return of a regulated company equal to its cost of capital is that in the long run the regulated firm's customers will pay the lowest cost for service while at the same time the company's earnings will be sufficient to attract capital so that the company is able to provide the customers' desired level of service. Based on the legal decisions and economic rationale, the Commission considers the BTWACC an appropriate measure of the allowable rate of return for regulated carriers. The Commission believes that the BTWACC methodology will allow carriers to attract adequate capital, thereby negating the concerns expressed by Matson. However, as PRMSA noted, a carrier with only debt financing would be allowed only to earn the cost of its long-term debt under the BTWACC.[3] It appears that such a capital structure is highly unusual and unlikely to occur without substantial government backing of the carrier (as has been the case with PRMSA).

PRMSA is unique among ocean carriers in the domestic offshore trades in that, until its recent sale to NPR in January 1995, it was government owned and 100 percent debt-financed. PRMSA contends that it lost money year after year and part of its debt was used to finance past losses.[4] While a regulatory commission should minimize regulatory risk by ensuring that regulated firms are given the opportunity to earn a reasonable return on capital, it is the responsibility of the firm to achieve a viable capital structure and operate the business efficiently. The BTWACC is an appropriate measure of the cost of capital for carriers having a broad range of capital structures. The Commission cannot prevent a carrier from departing from the broad range of capital structures that are generally used. However, the Commission must assure that ratepayers do not pay a premium for such a decision by the carrier. Therefore, the Commission believes that ratepayers should not be required to pay for an additional "cushion" due to PRMSA's unique capital structure.

Lastly, as a further clarification the Commission will state in its rule that the BTWACC is the "allowable" rate of return rather than the "maximum allowable" rate of return.

Accessibility of Carrier Financial Data

Hawaii argues that the adoption of the BTWACC methodology will require that all parties have access to information regarding the carrier's financing and capitalization. Such information is company specific and can be obtained only through the carriers' annual financial reports filed with the Commission. Hawaii recommends that the Commission reverse its present policy of not requiring the carriers' annual reports to be made available to all parties.[5] However, the issue was not raised in the NPR and there has been no opportunity for the other parties to comment on Hawaii's recommendation. Accordingly, it would not be proper for the Commission to rule on the merits of Hawaii's recommendation here.

Hawaii also requests the right of discovery by all parties, so that any questions which may arise concerning the carrier's financial situation may be pursued. Rule 67 of the Commission's rules of practice and procedure (46 CFR 502.67) currently provides for discovery in proceedings under section 3(a) of the Intercoastal Shipping Act, 1933 ("1933 Act") 46 U.S.C. app. 845 (a). Hawaii's request fails to explain why Rule 67 is deficient. In any event, an amendment to Rule 67 is outside the scope of this proceeding and cannot be properly addressed here.

Deletion of Alternative Methodologies

The proposed rule revised paragraph (b) of § 552.1 by deleting the provision that the methodology employed in each case will depend on the nature of the relevant carrier's operations and financial structure. Also, the proposed rule added language to the paragraph that specifies the extent of possible alternative methodologies. Paragraph (b) reads:

> (b) In evaluating the reasonableness of a VOCC's overall level of rates, the Commission will use return on rate base as its primary standard. A carrier's allowable rate of return on rate base will be set equal to its before-tax weighted average cost of capital. However, the Commission may also employ the other financial methodologies set forth in § 552.6(f) in order to achieve a fair and reasonable result.

Paragraph (d) of the same section has been deleted. That paragraph provided that the Commission may use some other basis for allocation and calculation and may consider other operational factors in any instance where it is deemed necessary to achieve a fair and reasonable result.

APL advised, in its initial comments, that these provisions are at the heart of a major dispute in FMC Docket No. 89–26, The Government of the Territory of Guam, et al. v. Sea-Land Service, Inc. and American President Lines, Ltd. It pointed out that the NPR does not give any reasons for the proposed changes to § 552.1 and argued that the changes cannot be legally adopted unless and until the FMC identifies its reasons for such a change and allows opportunity for comment. Further, APL pointed out that the proposed changes could have no effect on a pending complaint docket focused on a prior time period.

In the Request for Reply Comments, the Commission explained that the Guam trade is unique in that the trade is a very small portion of the carriers' overall service. Whether the current method of allocation is appropriate in such a case need not be decided in this proceeding because the two carriers serving Guam, APL and Sea-Land Service, Inc., currently file most of their rates with the ICC. Neither carrier files full financial reports under 46 CFR part 552. If in the future a carrier serves Guam under FMC regulation, the Commission could address the need for any change in 46 CFR part 552 in a separate rulemaking proceeding. Paragraph (d) of § 552.1 was eliminated because the Commission did not want such determinations to be made on an ad hoc basis during a rate investigation. It is essential that significant issues relating to the underlying methodology to be employed in determining the reasonableness of rates be settled prior to any rate investigation. The 180-day limit specified by section 3 of the 1933 Act cannot be met if parties are permitted to change methodologies during the course of a rate investigation. Moreover, the Commission stated in its Request for Reply Comments that parties to a rate proceeding are entitled to rely on the Commission's rules. They should not have to respond to ever-changing methodologies proposed by other parties. The Commission also explained that any changes that may be made to part 552 as a result of this proceeding will only be applied prospectively and will have no application in pending cases such as Docket No. 89–26.

---

[1] The BTWACC is a before-tax version of the WACC.

[2] *Bluefield Water Works & Improvement Co. v. Public Service Commission of West Virginia, 262 U.S. 679 (1923) and Federal Power Commission v. Hope Natural Gas Company,* 320 U.S. 391 (1944).

[3] If a carrier is 100% debt-financed, the equity portion of the BTWACC equation equals 0.

[4] Similar to Crowley, PRMSA has filed many of its rates in ICC-regulated or exempt tariffs since 1981, the last year in which that carrier's rates were subject to an FMC investigation.

[5] Section 552.4(c) of the Commission's regulations protects the carrier's annual reports from public disclosure and treats them as confidential information in the files of the Commission.

Both APL and Matson support the proposed changes to § 552.1. APL urges the FMC, in discussing the reply comments in this proceeding, to "avoid overbroad statements that might be argued to have application to pre-existing complaint dockets as opposed to GRI proceedings." (APL Reply at 3.) Matson concurs with the Commission that it is essential that significant issues relating to the underlying methodology to be used in determining the reasonableness of rates be settled prior to any investigation.

Crowley argues that it is not clear that the Commission has adequately preserved its option of using other rate-of-return methodologies "in order to achieve a fair and reasonable result." The carrier suggests that, while certainty in predicting the Commission's reaction to a proposed rate increase is important, it should not be achieved at the expense of the Commission's flexibility to consider legitimate alternatives for measuring a carrier's rate of return.

Seaman does not comment on the merits of the proposed changes to this section, but rather repeats his opinion that the alternative methodologies should be applied to Matson's operations in the Hawaii trade. He further claims, as APL did in its initial comments, that because the NPR did not give any explanation for the proposed changes, the due process rights of those affected are violated.

Crowley's and Seaman's concerns that methodologies other than rate of return on rate base be available appear to be overstated. The Commission believes that the proposed methodology should be appropriate for almost any conceivable situation. Moreover, neither Crowley nor Seaman provide sufficient reasons for altering the proposed changes to § 552.1. The flexibility they appear to seek simply cannot be accommodated within the 180-day limit specified by section 3 of the 1933 Act. Further, neither Crowley nor Seaman have addressed the fact that it is not fair to require parties to respond to ever-changing methodologies proposed by other parties. Therefore, unless the Commission prescribes an alternative methodology in its order commencing a rate investigation, all parties will be limited to the use of rate of return on rate base throughout the proceeding. The changes to § 552.1 will be adopted as proposed.

Capital Structure

The Proposed Rule

The proposed rule provided that a regulated domestic offshore carrier's expected capital structure is to be used in calculating that carrier's BTWACC. In the case of a regulated carrier that is a subsidiary of a larger parent company, the proposed rule provided that a subsidiary carrier's capital structure be used in computing the BTWACC unless, after notice and opportunity for comment, the Commission determines that the carrier may use the capital structure of the parent company (i.e., the consolidated system). Such a determination would require that: (1) The subsidiary carrier's parent company issues publicly traded common stock equity; (2) no substantial minority interest in the subsidiary exists;[6] and (3) the risks are similar between the subsidiary carrier and the parent company.[7] The NPR also proposed that the capitalization ratios (i.e., the weights) used in calculating the BTWACC be based on the test-year average book value.

Comments: Hawaii agrees that the expected capital structure should be used when a company is an independent company. In the case of wholly owned subsidiaries,[8] however, Hawaii recommends that the FMC allow greater flexibility in adopting the appropriate capital structure. Hawaii suggests that the Commission not declare a preference for either the subsidiary or consolidated financial data but avail itself of the option to decide, on a case-by-case basis, whether to use the subsidiary, consolidated system,[9] or a hypothetical capital structure. By deciding on a case-by-case basis, Hawaii contends that the FMC will avoid prejudging which method will allow the most accurate estimation of the carrier's cost of capital.

Hawaii points out two potential drawbacks of using subsidiary data. The first drawback would be the need for a portfolio of comparable companies. Hawaii contends that finding a comparable group may be problematic or impossible within the framework of the proposed rule.

The second drawback would be the possible artificiality of the capital structure of a subsidiary. Hawaii points out a situation it has encountered in which the capital structure of a subsidiary is reported to consist of all equity. The parent company holds and sells all debt, but the proceeds of the debt are used by the subsidiary. Hawaii states that it has

> no *a priori* reason to believe that data from a portfolio of comparable companies is a better base from which to estimate a carrier's cost of capital than data from the consolidated system of which a carrier is a part. There are necessarily pros and cons in a choice between the characteristics of a consolidated company, within which the characteristics of the relevant company are hidden, and a portfolio of proxy companies which may bear little resemblance to the relevant company.

(Hawaii at 7). Hawaii suggests that the choice between two inappropriate capital structures could be avoided by using a hypothetical capital structure.

---

[6] Under the proposed rule, no substantial minority interest in a subsidiary carrier would exist when a parent company owns 90 percent or more of the subsidiary's voting shares of stock.

[7] In considering the similarity of both business and financial risks facing the parent and subsidiary, the following will be considered: Financial risk measures, such as total capitalization and debt/equity ratios, investment quality ratings on short and long term debt instruments; and coverage ratios, such as times interest earned and fixed charges coverage ratios, and the degree to which the regulated subsidiary comprises the parents' holding.

[8] Hawaii couched its comments on a wholly owned subsidiary in terms of Matson Navigation Co., Inc., which is a subsidiary of Alexander & Baldwin, Inc.

[9] Hawaii requested clarification on the issue of whether all parties have the option to apply for the use of the consolidated system. The Commission anticipates that only the regulated carrier will be able to apply for use of the consolidated system's capital structure. In addition, the Commission's staff may also recommend the use of the consolidated system. Such application or recommendation will be subject, however, to notice and comment prior to Commission approval. It appears that interested parties will be provided with ample opportunity to comment on this issue.

Hawaii also points out the interrelationship between the capital structure and the required rate of return on equity. As the share of equity increases in the capital structure, financial risk and total risk are lessened. Thus, the required rate of return on equity declines as the proportion of equity increases, all other things being equal.

With respect to the NPR's provision for basing the capitalization ratios and amounts on average book values, PRMSA asserts that the capital structure using historic book valuation may differ significantly from a capital structure computed using market valuation.[10] Depending on how the book value of equity deviates from its market value, the Commission may be allowing a rate of return that is either too high or too low.

Discussion: The Commission is not persuaded by Hawaii's argument to decide the capital structure on a case-by-case basis. The Commission believes the capital structure of the subsidiary will generally be the most direct measure of the regulated carrier's capital structure. However, where the regulated carrier can show that the business and financial risk of the parent company and the subsidiary are similar, the Commission may allow the use of the consolidated system's capital structure because its cost of capital will likely be the same as the subsidiary's cost of capital. Moreover, the calculation of the consolidated system's cost of capital will be more direct because there will be no need to select a proxy group to estimate the cost of common-stock equity. Thus, in some cases, the use of the consolidated system's capital structure will likely give the best measure of the regulated carrier's capital structure.

With respect to hypothetical capital structures, some regulatory commissions do use a hypothetical capital structure. However, the Commission believes that good reasons exist for using the actual capital structure rather than a hypothetical capital structure. First, capital structures are the products of decisions, which may be assumed to be logical and efficient at the time they are made, although a different capitalization might be consistent with a lower BTWACC at the time of investigation and hearing. Second, the hypothetical capital structure substitutes the judgment of the regulator for the judgment of those operating the business as to the best mix of debt and equity for the company. The initial decision as to the best debt/equity mix should be left to the company management, with regulatory oversight by the Commission.

A review of regulatory commission practice indicates that, in general, the actual capital structure is used, unless that structure is wasteful or not otherwise in the long-term public interest. In cases where the Commission might find evidence of wasteful or imprudent investment, it is permitted to deduct such investment from the carrier's rate base.[11] Therefore, the Commission believes that it has ample authority to deal with imprudent or wasteful investment without employing a hypothetical capital structure.

In situations in which the Commission determines that the capital structure of a subsidiary does not represent the true capitalization of a carrier (e.g., debt "hidden" in a parent company's capital structure), the Commission believes that it has adequate options for ensuring that the subsidiary's capital structure reflects its financing. First, the Commission can order that the capital structure of the consolidated system be used. If the consolidated system consists of a number of subsidiaries or its capital structure is very complex, the Commission can fashion an appropriate proceeding to determine the appropriate capital structure. At the conclusion of the proceeding, the Commission would weigh all the information it had collected to determine the most realistic and meaningful capital structure possible for the regulated carrier. The Commission does not believe, however, that such proceedings will be necessary in most cases.

The NPR recognized that valid theoretical reasons exist for measuring the capital structure on the basis of the market value of its components. However, the common practice of regulatory commissions is to compute capitalization ratios on the basis of book values for a number of practical considerations. First, a regulated firm is believed to raise capital in such a fashion that a target capitalization ratio expressed on the basis of book values is maintained by the company over time. Consequently, regulators must compute the firm's overall cost of capital on the same basis to ensure that the company's capital costs are adequately covered. Second, effective regulation is said to result in book and market values approaching equality. Last, and most importantly, book-value capitalization ratios are stable, removing the problems that volatile market prices can present when determining the appropriate capitalization ratio. The Commission remains convinced that the practical considerations outweigh the theoretical issues involved in using book-value capitalization ratios. Therefore, the process of determining the regulated carrier's capital structure is adopted without change from the proposed rule.

Calculation of the Before-Tax Weighted Average Cost of Capital

In its initial comments, PRMSA pointed out that the formula for the BTWACC[12] is inconsistent with the Commission's formula for the rate of return on rate base.[13] This inconsistency resulted from computing the cost of capital on a before-tax basis while the rate of return on rate base is computed on an after-tax basis. PRMSA further commented that the after-tax rate of return formula currently used by the Commission and retained in the proposed rule is technically deficient; because, in the numerator, it adds the full amount of interest expense to income. PRMSA noted that more modern financial analysis recognizes that only the after-tax cost of interest should be added back to the numerator in computing after-tax rate of return. PRMSA suggested either changing the cost of capital to an after-tax basis so it can be compared to the after-tax return on rate base, or retaining the BTWACC

---

[10] PRMSA's initial comments on this issue continued its characterization of the Commission's reasons for proposing a change from the CET to the BTWACC as resulting from a desire to eschew the use of accounting data in favor of the use of market data. PRMSA contends that because the proposed rule relies extensively on historic accounting data, the shortcomings of the CET are perpetuated in the proposed rule.

[11] Likewise, the Commission may disallow questionable expense items for a carrier's income statement.

[12] The proposed rule states the before-tax weighted average cost of capital will be calculated using the following equation.

$$BTWACC=(D/D+P+E)K_d+(P/D+P+E)K_p(1/1-T)+(E/D+P+E)K_e\ (1/1-T)$$

where:

K_d is the regulated firm's cost of long-term debt capital;

K_p is the regulated firm's cost of preferred stock capital;

K_e is the regulated firm's cost of common-stock equity capital;

D is the value of the regulated firm's long-term debt outstanding;

P is the value of the regulated firm's preferred stock outstanding;

E is the value of the regulated firm's common-stock equity outstanding;

T is the corporate income tax rate

[13] Current FMC regulations (46 CFR 552.6 (d)(2)) provide that return on rate base is computed by dividing Trade net income plus interest expense by Trade rate base.

and changing the rate of return on rate base to a before-tax basis.

In the Request for Reply Comments, the Commission proposed retaining the BTWACC contained in the NPR and changing the calculation of the rate of return on rate base to a before-tax basis. Comments were sought on the following change to § 552.6(d)(2):

> (2) Return on Rate Base. The return on rate base will be computed by dividing Trade net income plus interest expense plus provision for income taxes by Trade rate base.

In its reply comments, Hawaii recognizes the basis for PRMSA's concern that the proposed BTWACC and the rate of return on rate base are not directly comparable. However, Hawaii prefers that the proposed rule be changed so the weighted average cost of capital is computed on an after-tax basis and the rate of return on rate base remain as it is currently defined in the Commission's rule. According to Hawaii, the Commission's current definition of return on rate base embodies the conventional idea of payment (or return) to lenders and equity holders who have advanced the money for capital purchases. Payments to governments in taxes on revenue and earnings from the employment of the purchased capital are not strictly "returns" and it would distort the concept to include tax payments in the definition.

Crowley and Matson comment favorably on the proposed change to the rate of return on rate base. Although Seaman opposes the proposed methodology for calculating the allowable rate of return, he acknowledges the comparability problem.

All parties have recognized that a change must be made to either the calculation of the BTWACC or the calculation of the rate of return on rate base to make the two terms compatible. The Commission believes that putting the BTWACC and the rate of return on rate base on a before-tax basis will result in the appropriate determination of the allowable rate of return. The Commission's research indicates that most regulatory agencies determine the allowable rate of return on a before-tax basis. While Hawaii expresses a preference for using the after-tax calculation, it agreed that putting the weighted average cost of capital and the rate of return on rate base either on a before-tax basis or after-tax basis is correct as long as the two terms are compatible. Therefore, the Commission will adopt a BTWACC and modify the calculation of the return on rate base as indicated in the Request for Reply Comments.

Cost of Equity Estimation

The NPR specified that three methods of determining the cost of common-stock equity—the discounted cash flow ("DCF"), capital asset pricing model ("CAPM"), and risk premium ("RP") methods—would be used to produce separate estimates in arriving at a final estimate of a regulated carrier's cost of common-stock equity capital. The Commission would thereby avoid any inappropriate judgments that could be embodied in any one of the individual estimates.

Both Matson and PRMSA contend that the DCF is unsuitable for FMC-regulated carriers, because most of those carriers are either subsidiaries of larger entities or privately owned firms. PRMSA avers that choosing a proxy group for the regulated carriers is impossible, therefore, the DCF and also the CAPM methods are not valid methods for the FMC to use in estimating the cost of equity.

In both sets of comments, PRMSA criticizes the derivation of the expected annual growth in dividends per share, or "g", as specified in the NPR. The NPR provides that in the DCF model three methods of estimating "g" would be used: (a) The average of the historical growth rate of dividends per share, earnings per share, and book value per share; (b) the average of (1) the five-year dividend, earnings and book value forecasts published by Value Line Investment Survey ("Value Line"), and (2) the five-year earnings forecast published by the Institutional Brokers Estimation Service ("IBES"); and (c) the use of the sustainable growth rate method, which relies on forecasted values of the earnings retention rate. To derive a final estimate of "g" the separate estimates of "g" would be averaged.

PRMSA states that there is no certain method to ascertain "g" directly. To the extent that "g" is wrong, the cost of capital is incorrectly estimated. Further, PRMSA states that the proposed averaging of the estimates has no theoretical or practical basis and might be "contra-indicated" when the disparities between the estimates are large. In its comments, PRMSA used data from one carrier, Overseas Shipping Group, to derive an estimate of "g" based on the methodology prescribed in the proposed rule. PRMSA showed that the historic growth rate method resulted in an estimate for "g" of 20.4 percent, while the sustainable growth rate estimate of "g" was 11.2 percent. According to PRMSA, the results of its study demonstrate that the methodology used in the proposed rule will likely result in widely divergent results among the three estimation procedures. PRMSA asserts that averaging these numbers results in a meaningless estimate. It argues that since many of the numbers are derived from historical book value, the proposed methodology offers no advantage over the CET, which involves looking directly at history and basing judgments directly thereon. PRMSA contends that the frailties of the methodology cannot be remedied by averaging.

Several commenters point out deficiencies in the CAPM model. Hawaii does not oppose its use, but notes that many regulatory analysts are moving away from using the CAPM as a cost of equity model. Hawaii suggests that the use of the CAPM in a regulatory rate setting removes it from its intended purposes.[14] Hawaii also states that the most salient criticisms of CAPM lie with its central element, beta.[15] Hawaii states that these criticisms include the following: (1) Beta is a measure of variability not risk; (2) beta is not forward looking (in keeping with a future test year); (3) betas typically have very low correlation coefficients; and (4) recently it has been shown that there is no statistical relationship between beta and return. PRMSA also notes that the CAPM literature has begun to question the model's empirical underpinnings. Matson advises that it is widely acknowledged that the CAPM does not adequately account for firm size in determining expected return.

Matson concurs with the NPR which stated that the DCF, CAPM, and RP each have strengths and weaknesses. However, according to Matson, the RP has an advantage that compels its use. The RP can be adjusted to reflect the fact that the cost of common stock equity is a function of firm size. Matson argues that the NPR's use of the RP [16] is deficient because the risk of investment in a small company, such as Matson, is not the same as that of a Standard & Poor's 500 Stock Index ("S&P 500") firm.

---

[14] Hawaii states that the CAPM was developed for, and is widely used in, the estimation of the return probabilities of a diversified stock portfolio relative to the return of the theoretical market.

[15] Beta is the coefficient of regression of a stock's price variability relative to the variability of the whole stock market. It gauges the degree to which an individual stock price moves relative to the overall stock market.

[16] The NPR proposed that the RP method was to be used in its generic form without any adjustments for any possible differences in the risks of the firms contained in the Standard & Poor's 500 Stock Index and that of the regulated carrier.

In both its initial and reply comments, Matson advocates the Commission's adoption of one method to calculate the cost of common-stock equity and urges the adoption of the RP model adjusted for firm size. Matson comments that neither the explanatory text nor the rule language in the NPR indicates how the three estimation methods are to be "blended" to arrive at a final cost of common-stock equity estimate. It believes there is inefficiency and unfairness in any system that determines a regulated company's allowable earnings by taking the results of three separate calculations and then, using some unexplained process, arrives at a single result. According to Matson, this unexplained process cannot be understood by the regulated carriers and financial markets. Further, effective judicial review would be problematic.

The RP model advocated by Matson is the arithmetic average return differential between rates of return actually earned on investments in firms of the same size as the carrier, and the five-year Treasury Note. Matson states that the risk premium in such a model should be based on the historical data series "Decile Portfolios of the NYSE" published annually in Stocks, Bonds, Bills and Inflation ("Ibbotson Yearbook"), and should directly correspond to that decile that matches the carrier's own size.

Likewise, in its reply comments, PRMSA urges the Commission to use only the RP method to estimate the cost of common-stock equity. PRMSA recommends that the proposed RP method be modified to allow for several adjustments for risk. One such adjustment would be for firm size, similar to that suggested by Matson. It also recommends adjustments for illiquidity (in the case of privately-owned carriers), industry risk, and individual carrier risk (as compared to the industry average for publicly traded firms).

Marsoft comments that the RP model is designed to reflect the return on equity of the large, diverse range of companies included in the S&P 500. Marsoft, therefore, contends that the NPR puts a heavy weight on the assumption that all regulated companies are identical and are no more or less risky than companies included in the S&P 500. In contrast to the suggestions of Matson and PRMSA, Marsoft recommends that the Commission give lower weight to non-specific standards such as the RP model.

In addition to commenting on the specific provisions of the cost of equity estimation models, several commenters contend that the process of estimating the cost of equity is too rigidly prescribed in the NPR. Most commenters point out the importance of allowing judgment to enter into the estimation process.

Marsoft states that the proposed cost of equity methodology is excessively restrictive and is likely to result in biased estimates of the appropriate rate of return on equity. Under the BTWACC methodology, it believes that the Commission will need to exercise considerable judgment in determining the appropriate estimate for the cost of common-stock equity. Marsoft suggests the Commission use information from security analysts, management reports, and other industry-based sources in determining the appropriate rate of return on equity.

Hawaii points out that the NPR's specification of using a six-month average stock price as a base for calculating dividend yield may limit appropriate subjective judgments and preclude Commission consideration of valid information.[17] It suggests that in addition to prescribing that the average stock prices be used in the DCF (and interest rates in the CAPM and RP models), the Commission should also allow parties to use the most recent stock price in calculating the DCF model. Hawaii contends that some financial analysts argue that the use of average stock prices and interest rates may lead to greater forecast error in determining the test year stock price and interest rate than will occur when the most recent stock price and interest rate are used. According to Hawaii, allowing parties to calculate these models using both a six-month average stock price and interest rate, as well as the most recent stock price and interest rate, would add flexibility to the proposed rule and increase the information upon which the Commission could base its judgment.

Hawaii also states in its initial comments that access to several data sources is required to determine the cost of common-stock equity under the proposed rule. One of the required data sources used to compute the DCF model is published by IBES. In addition, data from Ibbotson Associates must be used to compute the CAPM and RP models. Hawaii requests that, depending on the cost of acquiring the necessary data, the Commission consider making both the IBES and Ibbotson Associates data available to non-subscribing parties.

In drafting the proposed rule, the Commission attempted to specify in detail the calculation of the cost of common-stock equity in order to prevent prolonged debate that would accompany more subjective and flexible methodologies. Under section 3 of the 1933 Act not only must the FMC rule within 180 days, but also carriers and protestants have similar time limits in that hearings must be completed within 60 days.

The commenters have taken issue with the NPR's specification of the estimation methods and have suggested that the proposed rule would unduly limit the amount of information that the Commission could consider in the course of a proceeding, to the detriment of obtaining a just and reasonable result. The Commission believes that these comments have merit. If a party to a proceeding follows a predetermined formula in preparing testimony, the resultant testimony may not contain the necessary judgment required in using these estimating techniques. There are many different applications of these methodologies, and an important part of the estimating procedure is the skill with which the practitioner implements the methodology. As a consequence, the Commission, as decision maker, would not be making the fullest use of the expertise that the testimony could provide in arriving at an appropriate determination of the cost of common-stock equity for the regulated carrier.

The Commission has decided, therefore, to modify the cost of equity estimation procedures contained in § 552.6 of the proposed rule. Carriers will still be required to use the DCF and RP methods to determine the cost of common-stock equity. However, they will not be required to follow the proposed rule's detailed specifications in implementing the techniques.

The Commission has decided to strike the requirement to use the CAPM method. As the NPR explained, the CAPM is actually the company-specific form of the general RP model. The central feature of the CAPM model, beta, has been commented upon disparagingly not only by the instant commenters, but also by an increasing number of academicians. The major criticisms of Beta are that: beta measures variability not risk; beta is not forward looking; and no statistical relationship exists between a firm's beta and its return. Given that the merits of beta and, therefore, the CAPM are increasingly suspect, the Commission does not believe that this deletion will negatively impact upon the FMC's responsibilities under the 1933 Act.

---

[17] Hawaii commented similarly on the CAPM and RP models. In those models, the NPR specified the use of a six-month average of five-year Treasury note yields.

The Commission is not persuaded that the selection of the proxy group is so problematic that the requirement to use the DCF model should be eliminated. The DCF method remains a standard tool used by regulatory agencies to determine cost of common-stock equity in rate cases. The Commission acknowledges that selecting a proxy group may be an extremely controversial matter, given that no two companies have exactly the same risk characteristics. Nevertheless, any alleged arbitrariness should be able to be overcome by a judicious determination of the business and financial risk factors of the regulated carrier. Further, with the requirement to use the CAPM being eliminated, the Commission does not believe that it should limit itself to only one method of estimating the cost of common-stock equity.

The proposed rule provided that the estimate produced by the RP method was to be used as a check on, and in combination with, the company-specific estimates produced using the DCF and CAPM models. With the CAPM being deleted, however, the RP will become more prominent in the determination of the cost of equity. In order to produce a more representative estimate of the risk premium required by investors for a particular carrier, the final rule will permit, but not require, carriers to argue for a risk adjustment for firm size. The final rule also allows for an RP model in its generic form.

In contrast to most commenters, Matson states that the Commission's process of determining the cost of capital is not spelled out clearly enough. The Commission does not agree with Matson on this point. The Commission requires the flexibility to consider all issues relevant to estimating the regulated carrier's cost of capital. The Commission recognizes that each of the methodologies are estimates only and that reasoned judgment is necessary in the process of determining the final estimate of the regulated company's cost of capital. Therefore, the process of combining the estimates of the cost of equity in the final rule will remain as it is in the proposed rule, though only the DCF and RP estimates of the cost of equity will be used to reach a final determination.

If a proceeding is initiated, the Commission will evaluate the testimony of the carrier, the FMC staff, and all protesters in arriving at its decision on the allowable rate of return. The Commission will then issue a ruling that spells out its reasoning so that the parties can see how the Commission arrived at its decision. Therefore, the Commission does not accept Matson's assertion that the process of combining the two estimates of common-stock equity is unfair. The combining process will be arrived at openly and will take into account the vagaries of cost of capital estimation.

With regard to the use of average prices, the Commission stated in the proposed rule that regulatory agencies often use average prices over time rather than a price on a particular day to remove aberrations in stock price movements. Such aberrations could be the result of events internal to the company (e.g., the stock may go ex-dividend) or due to factors external to the company (e.g., political events that affect the price of a firm's stock). The Commission continues to believe that the use of an average will be appropriate in most instances to filter out potential aberrations in stock prices and interest rates. However, to avoid the possibility that use of an average may serve to blind the Commission to significant changes or trends, the rule will permit, but not require, parties to calculate these models using both a six month average stock price and interest rate as well as the most recent stock price and interest rate as suggested by Hawaii.

With respect to the suggestion that the FMC consider providing access to the required data, the Commission has considered this, but has decided that the costs of such information are not prohibitive. Under the final rule no particular data source is required for the DCF analysis. IBES data can be obtained inexpensively from Compuserve, an on-line information provider. The Ibbotson Yearbook and Value Line are available at many libraries or through subscription at nominal cost.

Proxy Group

If a carrier is an independent company which issues no publicly-traded common-stock equity or is a subsidiary that obtains its common-stock equity capital through a parent company, a proxy group of companies must be selected to impute the carrier's cost of common-stock equity. Under the proposed rule, the proxy group is selected from companies listed in Value Line that operate and derive a major portion of their gross revenues primarily as common carriers in the business of freight transportation, and own and operate transportation vehicles or vessels. Further, under the proposed rule, carriers relying on proxy companies are to use the prescribed risk criteria in selecting proxy companies and are to submit their selection of proxy companies, along with their annual report of financial and operating data, as required in § 552.2.

In its initial comments, Hawaii was concerned that the companies in Value Line which satisfy the Commission's criteria for the proxy group do not have business risks similar to those of Matson. Hawaii claimed that these companies are generally consolidated companies; are not dominant in their markets; and do not operate in industries with statutory barriers to entry.

Marsoft stated that according to its research only three marine transportation companies and four trucking companies meet the proposed guidelines for the proxy group. Marsoft did not believe that airlines, railroads, or full-load trucking companies should be included in the proxy group, because they do not provide comparable services. Marsoft also stated that in many cases large, geographically and operationally diverse companies will be compared to small, highly specialized private carriers. Marsoft contends that the comparison may not be credible in some cases. Further, Marsoft urged the Commission to allow non-U.S. based firms to be included in the proxy group.

PRMSA commented that the proxy group should not be restricted to the freight transportation business. PRMSA asserted that equity capital in the regulated carrier competes against the broad spectrum of companies in the economy, not just against companies involved in freight transportation. PRMSA stated that the nature of a company's business is only one ingredient of business risk, not the sole determinant. PRMSA noted that as of June 1994, there were a total of 39 companies listed in Value Line involved in transport by air, truck, water, and railroad. Allegedly, not all of these companies were involved in freight transportation as required by the proposed rule. PRMSA concluded from this that the potential list of comparable companies is highly limited.

In its Request for Reply Comments, the Commission sought specific suggestions on industries other than freight transportation to be added to the current proxy group criteria. In its reply comments, Hawaii concurs with the parties who have suggested that dependence on data for proxy groups reported in Value Line and IBES imposes a limitation on finding appropriate proxy group members. Hawaii is unable to suggest other sources from which the required financial data would be available. However, Hawaii urges the Commission not to unduly limit the data that may be used to present evidence, especially with respect to the proxy group. Hawaii also points out that undue limitation of the companies that may be used as proxies might introduce the statistical problems inherent in small samples.

Hawaii states that the Commission should not expect to be able to apply the results of estimations based on proxy groups directly to the regulated carrier. It urges the Commission to allow the introduction of information which relates to the comparability of the proxy group and the applicant company. In addition, Hawaii states that if each expert witness is allowed to provide estimates based on different proxy groups, the Commission would gain valuable insight into the impact of various risk characteristics on the cost of common-stock equity.

Matson argues that the Commission should retain the proxy group identified in the NPR and not add other industries. According to Matson, business risk is dependent on the diversification of a business, the cyclicality of its operations, and the operating leverage employed in its business. It suggests that transportation companies generally have similar levels of cyclicality and degrees of operating leverage. Matson claims that it would be extremely difficult to identify companies outside of the transportation industry that have the same amount of cyclicality and degree of leverage as transportation companies.

In its reply comments, PRMSA notes that the most serious deficiency of the proposed rule is the use of the proxy groups to compensate for the lack of market data for non-publicly traded companies. PRMSA points out that most domestic offshore carriers are either privately owned or subsidiaries of larger consolidated systems for which no market data exists. PRMSA asserts that the Commission has embarked on an impossible task in attempting to enumerate specific companies and/or industries to serve as a proxy for the regulated company. PRMSA says that the selection of proxy companies will necessarily be arbitrary, negating the mathematical exactitude that can be achieved under the DCF model.

With respect to the annual submission of proxy groups, PRMSA contends that this proposal would actually require a greater use of agency resources than are currently devoted to rate-of-return analysis in the domestic offshore trades. PRMSA argues that the proposed selection process raises serious due process issues, because it attempts to bar members of the public from challenge at a time when their interests are at stake, because of their failure to have made a challenge when no injury could be alleged.

Crowley advocates opening up the proxy group to companies outside the freight transportation business because, it contends, the key comparison is not the line of business. Crowley notes that companies within the same industry may have different business characteristics, and different attractions to investors. Crowley would, however, restrict the selection to any company listed in Value Line. Crowley also states that other suitable industries would be those characterized by large initial capital investments, seasonal markets, and common carrier operations. Crowley proposes that passenger transportation and certain telecommunications industries might be possible sources of proxy groups.

In Seaman's comments, he notes that the commenting parties have given ample reason why the selection of a proxy group is flawed. Seaman contends that without a comparable portfolio of companies, estimates of the cost of common-stock equity are meaningless. He concludes, therefore, that the Commission will not be able to determine a fair rate of return under the BTWACC methodology.

The Commission does not agree with the contention that the proxy group selection is unworkable. The use of proxy groups is a common regulatory practice, especially in conjunction with the DCF model in estimating cost of common-stock equity. Selecting a proxy group will require, however, an assessment of the regulated carrier's operations and financial status in order to determine the appropriate business and financial risk. The results of this assessment will be used to select companies to be included in the proxy group. Because no two companies will be identical in all aspects of risk, the proposed rule specified a number of risk indicators that might be used in selecting a proxy group.

After carefully reviewing all of the comments on comparable risk companies, the Commission has determined to drop three proposals. First, the Commission has decided that requiring the annual submission of a proxy group of companies which would be subject to notice and approval would expend considerable resources. Little benefit would be gained from the exercise if the regulated carrier were not to file any rate increases during its fiscal year. Thus, the final rule allows for the submission of the proxy group of companies at the same time as the submission of direct testimony in support of a proposed general rate increase.

Second, the Commission has decided not to limit the selection of the proxy group only to companies followed by Value Line. The proposed rule required Value Line to be used because it contains all the data necessary to complete the cost of equity calculations specified in the proposed rule. Since the final rule will not be as specific as the proposed rule in delineating the methods and data sources to be used in estimating the cost of common-stock equity, the Commission believes the need to use only Value Line data is lessened. Therefore, in addition to Value Line, other data sources will be permitted for proxy group selection.

Nevertheless, the Commission believes that Value Line provides the best overall data available for determining a proxy group. It provides analysis of many factors necessary for the selection of comparable risk companies. While Value Line does not cover every company that issues stock, the Commission expects that most proxy group companies will be found in it. The Commission does not want to proscribe the use of companies not followed by Value Line that would make good proxy group members. However, if a party selects proxy group members based on data from sources other than Value Line, the burden is on that party to prove that the data source is reliable and the data are sufficiently detailed to calculate the BTWACC.

Finally, the Commission has decided not to limit the allowable proxy group members only to companies which operate in the transportation industry. The final rule will require that the majority of the proxy companies be companies which operate in the transportation industry. This will allow those giving testimony some latitude in selecting proxy group members from outside the transportation industry.

Crowley is the only commenter suggesting other industries that might be included as candidates for the proxy group. Crowley suggests that proxy group members could be selected from the passenger transportation and telecommunications industries. Crowley offered very little analysis as to why these industries should be included. A thorough analysis would be required to persuade the Commission that companies in these industries would make acceptable proxy group members.

The Commission is concerned that the difficulty commenters had in suggesting alternative industries from which proxy group members might be selected is illustrative of the difficulties that may be found in attempting to find proxy group members outside the transportation industry. Most commenters, however, were quite concerned that in some cases it may be difficult to select an adequate list of proxy group members within the confines of the transportation industry. To balance these two concerns, some of the proxy group members will be permitted to come from outside the transportation industry. However, a majority of the proxy group members will be required to come from the transportation industry. Those seeking to include companies outside the transportation industry in the proxy group shall have the burden of establishing that the firms selected have business risks comparable to the regulated carrier.

The final rule will continue to require that the proxy group be limited to U.S. companies. In many instances foreign accounting procedures are different from U.S. accounting practices. In order to ensure that accurate estimates of the cost of common-stock equity can be made from the proxy group, the exclusion of foreign companies will continue. Lastly, based on the prior discussion of the concerns regarding the use of beta, two of the risk indicators specified in the proposed rule to be used in selecting the proxy group will be eliminated, the volatility of a company's common-stock price changes as measured by both beta and standard deviation.

Deferred Taxes and the Capital Construction Fund

The proposed rule provided for two amendments to allow for the treatment of deferred taxes in the calculation of rate base. First, the cost of an asset included in the rate base would be reduced by the amount of funds withdrawn from the ordinary income and capital gains components of the Capital Construction Fund ("CCF").[18] Second, the rate base would be reduced by the amount of deferred taxes, except that portion resulting from the CCF or the expired Investment Tax Credit.

Capital Construction Fund

Matson, Crowley and DOT oppose the Commission's proposal to exclude CCF withdrawals from the rate base. Hawaii's comments appear to support the proposal, although most of its comments address deferred taxes.

The opposition to the proposed treatment of the CCF falls into two main areas. First, several commenters contend that the proposed changes are contrary to the Congressional intent behind the Merchant Marine Act, 1936, 46 U.S.C. app. section 1100, et seq., as amended, which governs the CCF. Matson points out that the Commission recognized the Congressional intent in Docket No. 78–46, Part 512. Financial Reports of Common Carriers by Water in the Domestic Offshore Trades. In that proceeding, Matson states that the Commission gave the reasons for its complete rejection of methodologies which penalized the carrier for using the financing benefits provided by the Merchant Marine Act, 1970. That legislation amended the 1936 Act and, inter alia, extended the CCF provisions to include the domestic offshore carriers. Matson points out that, in Docket No. 78–46, the Commission stated that:

> The Commission is persuaded that the Congress, in enacting the Merchant Marine Act, 1970 sought to provide carriers with tax incentives in order to encourage investment aimed at modernizing and expanding the fleet serving the domestic offshore trades. As MARAD indicated [in its comments], the adoption of the flow-through methodology would not be in accordance with the Congressional intent. Docket No. 78–46, 19 SRR at 1305. (Matson at 8).

Crowley adds that it "makes no sense for the FMC to take away the benefit of the CCF program, or to steer CCF funds away from the domestic trades, when the program is a part of the basic U.S. government policy to support the U.S. Merchant Marine." (Crowley at 8). DOT asserts that the proposed rule would frustrate Congress' intent in establishing the CCF program by directly penalizing companies that participate in the program, which would in turn impede DOT's efforts to maintain and expand the U.S.-flag fleet.

Second, the carriers and DOT contend that the proposed changes in the accounting treatment of the CCF and accumulated deferred taxes are based on a misunderstanding of the actual financial and tax consequences of the CCF and deferred taxes. Crowley argues that the Commission has misconstrued the character of the contributions to the three components of the CCF. In its comments, DOT explained that under the CCF program both deposits from taxable income and any subsequent investment earnings are temporarily sheltered from federal income taxes. These tax benefits are assured only if the deposits and earnings thereon are withdrawn to meet the company's CCF program objectives, principally vessel construction or reconstruction. Any unauthorized withdrawals are fully taxable. The recovery of the tax benefit of CCF deposits is accomplished by reducing the income tax basis of a vessel built with CCF monies. The reduction of the taxable basis of the CCF vessel reduces otherwise allowable depreciation over time which, in turn, increases taxable income, thereby recovering the initial benefits of the CCF deposit. DOT points out that this tax deferral has no connection to the cost of a vessel and therefore, should have no impact on the FMC's determination of a carrier's rate base for setting an allowable rate of return.

Matson contends that the Commission has grossly overstated the benefit of the CCF investment. According to Matson, the sole economic benefit which flows from the use of a CCF is the interest-free use of the deferred tax monies until the taxes are paid through the loss of tax-depreciation on the CCF investment. Matson points out that the tax repayment period is 10 years for vessels, and 5 years for containers. According to Matson, not only has the FMC overstated the benefit but also, the duration of the benefit because its proposal would "exclude forever 100% of the CCF investment."

Based on the comments received, the Commission is abandoning the proposed treatment of the CCF. The NPR indicated that of the three accounts comprising the CCF (capital account, capital gains account, and ordinary income account) the capital account is the only account containing carrier contributions to the CCF. The NPR likewise indicated that the capital gains and ordinary income accounts were comprised solely of the carriers' earnings on money contributed to the CCF. Several commenters clarified that the capital gains account consists of capital gains from the sale of CCF vessels as well as earnings from that account, and the ordinary income account consists of CCF vessel income plus earnings from that account. Only the capital gains and ordinary income accounts are tax deferred. Given the commenters' clarifications that the capital gains and ordinary income accounts are comprised of carrier contributions along with earnings, it appears that to require carriers to reduce the cost of the vessel by the amount of funds withdrawn from these two components of the CCF would indeed penalize CCF carriers and serve as a disincentive to carrier participation in the CCF. Such disincentive would appear to be contrary to the Congressional intent in establishing the CCF program.

Deferred Taxes

Hawaii supports the changes to the treatment of deferred taxes in the proposed rule. The State points out that the Commission appropriately decided in Docket No. 78–46 to require carriers to calculate their income tax expense at the applicable statutory rate. Before issuing the final rule in Docket No. 78–46, the Commission had ordered deferred income taxes deducted from rate base in two rate investigations.[19] However, in Docket No. 78–46, the Commission reversed its prior rulings and decided not to require carriers to deduct accumulated deferred income taxes from rate base. Hawaii also notes that the proposed treatment of deferred taxes conforms with the policy of a majority of state regulatory commissions, as well as the Federal Communications Commission and the Federal Energy Regulatory Commission.

In its initial comments, Matson asserts that the deferred taxes account arises only due to the different treatment of depreciation for tax purposes than for expense purposes. According to Matson, when an asset is allowed to depreciate faster for tax accounting purposes than for book accounting purposes, a timing difference occurs and is reflected in deferred taxes. The differences in taxes booked versus taxes paid is recorded as a "book" liability. Matson claims that this is not a real liability but only the recognition that more taxes have been expensed than have yet to be paid. If the generally accepted accounting principles ("GAAP") allowed for recording as an expense only the amount of taxes paid, no book liability for deferred taxes would occur. Matson argues that the value of deferred taxes is only in the time value of money, and this value reverses over a relatively few years. Matson claims that the benefit that the Commission refers to in the proposed rule does not exist. It is merely a philosophical difference between GAAP and the Internal Revenue Service code.

In its reply comments, Matson addresses Hawaii's statement that the majority of regulatory agencies surveyed by the National Association of Regulatory Utility Commissioners treat deferred taxes similarly to the Commission's proposed treatment. Matson argues that such treatment of deferred taxes by state regulatory agencies resulted from the requirements of the Tax Reform Act of 1969 that required utilities to deduct deferred taxes from the rate base, if the utilities planned to use accelerated depreciation.

PRMSA argues that the proposed rule would negate the stimulating effect on investment that was intended by public policy. It further argues that prohibiting returns on shipping assets financed by funds generated through the tax treatment of accelerated depreciation creates a disincentive to investment in the regulated shipping trades. PRMSA suggests that it is clear that a firm's decision to invest funds provided by deferred taxes is a decision that puts its investor-provided equity at risk. Therefore, PRMSA contends that the FMC should focus on providing a rate of return on deferred taxes more akin to that provided by equity. Nevertheless, PRMSA suggests that the return could be adjusted downward to recognize the fact that the initial funds are not investor provided, although once the firm uses those funds its own equity is at risk and some reward is required.

DOT avers that the proposed treatment of deferred taxes is unfair to CCF companies. DOT states that a consequence of participation in the CCF program is that companies tend to have large deferred tax liabilities. Therefore, the Commission's proposal would penalize CCF vessels, which are all U.S. flag, by reducing the rate base by the amount of the tax benefit, which would directly devalue the CCF incentive conferred by Congress. DOT takes issue with the statement in the NPR that accumulated deferred taxes should be eliminated from the rate base, because "unlike debt, preferred stock, and common-stock equity, deferred taxes cost the carrier nothing." (NPR at 52). In its discussion of the CCF, DOT argues that deferred taxes are not cost free to the carrier, because over the life of a vessel, CCF companies will tend to pay higher taxes in later years than those carriers not participating in the CCF program.

The Commission views the issue of deducting deferred taxes arising from accelerated depreciation from the rate base as being similar to that of deducting CCF withdrawals from the cost of a vessel or equipment. The Commission believes that carriers should not be penalized for using accelerated depreciation by deducting accumulated deferred taxes from the rate base and that such a deduction would likely serve to reduce the incentive of carriers to invest in the industry. Congress clearly intended companies to benefit from the use of accelerated depreciation and the Commission does not believe it should take any action which would minimize that benefit. Therefore, the Commission will not require carriers to deduct accumulated deferred taxes arising from accelerated depreciation from the rate base as was proposed. This is in conformance with current Commission policy determined in Docket 78–46, Financial Reports of Common Carriers by Water in the Domestic Offshore Trades.

Working Capital

In the NPR, the Commission proposed to amend its regulations governing the computation of working capital to remove the extraordinary treatment of insurance expense. Only Hawaii commented on the proposed change. In addition to supporting the proposed change, Hawaii proposed two additional changes. First, Hawaii suggested that, in determining the amount of working capital to be included in rate base, the Commission adopt what it termed a "modified lead-lag approach". Hawaii's second proposal is to exclude interest expense from the calculation of working capital.

In Docket No. 78–46, and Docket No. 91–51, Financial Reports of Common Carriers by Water in the Domestic Offshore Trades, Hawaii recommended the use of a "lead-lag study" in calculating the amount of working capital to be included in rate base. Taking into account the complexities inherent in adopting such an approach, the Commission declined to abandon average voyage expense as the basis for calculating working capital.[20]

Hawaii stated that "the modified lead-lag approach compares the lag in paying for major operating expenses (excluding depreciation and amortization, and interest expense) with the lag in receiving the revenues to pay for these expenses." (Hawaii at 19) Although Hawaii downplays the complexity of this method, its very description of the process belies this conclusion. The Commission can envision carriers spending inordinate amounts of time analyzing various accounts to develop the working capital component of rate base. On the other hand, the Commission believes that the average voyage expense calculation is straightforward and uniquely suited for the maritime industry.

Hawaii also proposed removing interest expense from the calculation of working capital. In its initial comments, Hawaii stated:

> Interest expenses should also be excluded from the working capital computation because they represent a *source* of working

---

[18] The Capital Construction Fund is comprised of three components: the capital account, the capital gains account, and the ordinary income account.

[19] See FMC Docket No. 75–57, *Matson Navigation Co.—Proposed Rate Increase in the United States Pacific Coast/Hawaii Domestic Offshore Trade* and FMC Docket No. 76–43, *Matson Navigation Company—Proposed Rate Increase in the United States Pacific Coast/Hawaii Domestic Offshore Trade.*

[20] In Docket No. 78–46, the Commission wrote, "There is no persuasive evidence in this proceeding or otherwise available which would indicate that average voyage expense incurred by a carrier utilizing self-propelled vessels is not a fair measure of that carrier's working capital requirements."

> capital funds. Interest is not paid to bondholders until after the related revenue is received by the carrier. Thus, interest expense does not create a need for working capital.

(Hawaii at 20).

Crowley and Seaman comment on this proposal. Crowley opposes Hawaii's suggested treatment of interest. Crowley argues that interest expense is a cost of doing business not unlike any other liability for which working capital is required, such as employee costs, equipment acquisition and maintenance and repair, and similarly accrues on the carrier's books. Seaman merely endorses Hawaii's position.

The Commission agrees with Crowley that interest expense is no different from a carrier's other liabilities for which working capital is required. The Commission believes that the working capital component of the rate base is intended to provide for a return on the cash required for the carrier's day-to-day operations and that interest expense meets this criteria. Therefore, the final rule eliminates only the extraordinary treatment of insurance expense from the calculation of the working capital component of rate base.

The Federal Maritime Commission certifies pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(n), that this rule will not have a significant economic impact on a substantial number of small entities; including small businesses, small organizational units and small government jurisdictions. The Commission grants a waiver of the detailed reporting requirements to carriers which earn gross revenues of $25 million or less in a particular trade in accordance with 46 CFR 552.2(e).

The collection of information requirements contained in this rule have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980, as amended, and have been assigned OMB control number 3072–0008. Under the proposed rule the incremental public reporting burden for this collection of information was estimated to range from an average of 41 hours to 65 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The annual filing of a proxy group was estimated to require 41 man-hours while Schedule F was estimated to require 24 man-hours to complete. Since the final rule no longer requires that a proxy group of companies be filed annually, carriers which do not file a general rate increase as described in 46 CFR 552.2(f) will incur no additional regulatory burden. To be conservative, the estimated regulatory burden for carriers which file a general rate increase is still estimated to be 65 man-hours. However, the cost of equity estimation has been simplified by eliminating the requirement that a capital asset pricing model be used in deriving the final estimate of the cost of equity. Thus, an extra cushion of time within the 65 man-hours has been created for carriers which file a general rate increase. Send comments regarding this burden estimate, including suggestions for reducing this burden, to Bruce Dombrowski, Deputy Managing Director, Federal Maritime Commission, Washington, DC 20573 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

List of Subjects in 46 CFR Part 552

Maritime carriers, Reporting and recordkeeping requirements, Uniform system of accounts.

Therefore, pursuant to 5 U.S.C. 553, sections 18 and 43 of the Shipping Act, 1916, 46 U.S.C. app. 817 and 841a, and sections 2 and 3 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 844 and 845, part 552 of Title 46, Code of Federal Regulations, is to be amended as follows:

PART 552—FINANCIAL REPORTS OF VESSEL OPERATING COMMON CARRIERS BY WATER IN THE DOMESTIC OFFSHORE TRADES

1. The authority citation for part 552 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 817(a), 820, 841a, 843, 844, 845, 845a and 847.

2. In § 552.1, paragraph (b) is revised to read as follows and paragraph (d) is removed:

§ 552.1 Purpose.

* * * * *

(b) In evaluating the reasonableness of a VOCC's overall level of rates, the Commission will use return on rate base as its primary standard. A carrier's allowable rate of return on rate base will be set equal to its before-tax weighted average cost of capital. However, the Commission may also employ the other financial methodologies set forth in § 552.6(f) in order to achieve a fair and reasonable result.

* * * * *

3. In § 552.2, paragraph (a) is amended by revising the filing address contained therein, paragraph (b) is revised, paragraph (f)(1)(iv) is amended by removing "and," from the end thereof, paragraph (f)(1)(v) is amended by changing the period at the end thereof to a semicolon and adding "and," to the end of the paragraph, and a new paragraph (f)(1)(vi) is added reading as follows:

§ 552.2 General requirements.

(a) * * *

Federal Maritime Commission, Bureau of Economics and Agreement Analysis, 800 North Capitol Street, NW, Washington, DC 20573–0001

(b) Annual statements under this part shall consist of Exhibits A, B, and C, as described in § 552.6, and shall be filed within 150 days after the close of the carrier's fiscal year and be accompanied by a company-wide balance sheet and income statement having a time period coinciding with that of the annual statements. A specific format is not prescribed for the company-wide statements.

* * * * *

(f) * * *

(1) * * *

(vi) Projected schedules for capitalization amounts and ratios (Schedule F–I); cost of long-term debt capital calculation (Schedules F–II and F–III); cost of preferred (and preference) stock capital calculation (Schedules F–IV and F–V); corporate income tax rate (Schedule F–VI); and flotation costs (Schedule F–VII) for the 12-month period used to compute projected midyear rate base in paragraph (f)(1)(ii) of this section.

* * * * *

4. In § 552.5, paragraphs (b) and (c) are revised, and paragraphs (v), (w), (x), (y), (z), (aa), and (bb) are added to read as follows:

§ 552.5 Definitions.

* * * * *

(b) *The service* means those voyages and/or terminal facilities in which cargo subject to the Commission's regulation under 46 CFR 514.1(c)(2) is either carried or handled.

(c) *The trade* means that part of the Service subject to the Commission's regulation under 46 CFR 514.1(c)(2), more extensively defined below under Domestic Offshore Trade.

* * * * *

(v) *Book value* means the value at which an asset is carried on a balance sheet.

(w) *Capital structure* means a company's financial framework, which is composed of long-term debt, preferred (and preference) stock, and common-stock equity capital (par value plus earned and capital surplus).

(x) *Capitalization ratio* means the percentage of a company's capital structure that is long-term debt, preferred (and preference) stock, and common stock-equity capital.

(y) *Consolidated system* means a parent company and all of its subsidiaries.

(z) *Subsidiary company* means a company of which more than 50 percent of the voting shares of stock are owned by another corporation, called the parent company.

(aa) *Long-term debt* means a liability due in a year or more.

(bb) *Times-interest-earned ratio* means the measure of the extent to which operating income can decline before a firm is unable to meet its annual interest costs. It is computed by dividing a firm's earnings before interest and taxes by the firm's annual interest expense.

5. In § 552.6, paragraph (a)(1), the first sentence of paragraph (a)(2), (b)(5), and the heading of paragraph (b)(9) are revised; paragraphs (c)(5) and (c)(10) are revised; paragraphs (d)(1) and (d)(2) are revised; paragraphs (e) and (f) are redesignated (g) and (h); a new paragraph (e) is added and paragraphs (d)(3) and (d)(4) are redesignated (f)(1) and (f)(2) and the paragraph headings thereof revised reading as follows:

§ 552.6 Forms

(a) *General.* (1) The submission required by this part shall be submitted in the prescribed format and shall include General Information regarding the carrier, as well as the following schedules as applicable:

Exhibit A—Rate Base and supporting schedules;
Exhibit B—Income Account and supporting schedules;
Exhibit C—Rate of Return and supporting schedules;
Exhibit D—Application for Waiver;
Exhibit E—Initial Tariff Filing Supporting Data; and
Exhibit F—Allowable Rate of Return schedules.

(2) Statements containing the required exhibits and schedules are described in paragraphs (b), (c), (d), (e), (g), and (h) of this section and are available upon request from the Commission. * * *

(b) * * *

(5) *Working Capital (Schedule A–V).* Working capital for vessel operators shall be determined as average voyage expense. Average voyage expense shall be calculated on the basis of the actual expenses of operating and maintaining the vessel(s) employed in the Service (excluding lay-up expenses) for a period represented by the average length of time of all voyages (excluding lay-up periods) during the period in which any cargo was carried in the Trade. Expenses for operating and maintaining vessels employed in the Trade shall include: Vessel Operating Expense, Vessel Port Call Expense, Cargo Handling Expense, Administrative and General Expense, and Interest Expense allocated to the Trade as provided in paragraphs (c) (2), (4) and (5) of this section.

* * * * *

(9) *Capitalization of leases (Schedules A–VII and A–VII(A)).* * * *

(c) * * *

* * * * *

(5) *Interest expense and debt payments (Schedules B–IV and B–IV(A)).* This schedule shall set forth the total interest and debt payments, apportioned between principal and interest, short and long-term, on debt and lease obligations. Payments on long-term debt are to be calculated consistent with the method set forth in § 552.6(e)(7) for computing the cost of long-term debt capital. Principal and interest shall be allocated to the Trade in the ratio that Trade rate base less working capital bears to company-wide assets less current assets. Where related company assets are employed by the filing company, the balance sheet figures on the related company's books for such assets shall be added to the company-wide total in computing the ratio. In those instances where interest expenses are capitalized in accordance with paragraph (b)(9) of this section, a deduction shall be made for the amount so capitalized.

* * * * *

(10) *Provision for income tax.* Federal, State, and other income taxes shall be listed separately. If the company is organized outside the United States, it shall indicate the entity to which it pays income taxes and the rate of tax applicable to its taxable income for the subject year. Federal, State and other income taxes shall be calculated at the statutory rate. Such tax rates are to be identical to those set forth in Schedules F–VI or F–VI(A) used in determining the carrier's allowable rate of return.

* * * * *

(d) *Rate of Return (Exhibits C and C(A))*—(1) *General.* All carriers are required to calculate rate of return on rate base. However, the Commission or individual carriers, at the Commission's discretion, may also employ fixed charges coverage and/or operating ratios as provided for in paragraph (f) of this section.

(2) *Return on rate base.* The return on rate base will be computed by dividing Trade net income plus interest expense plus provision for income taxes by Trade rate base.

(e) *Allowable rate of return on rate base (Exhibits F and F(A))*—(1) *General.* A carrier's allowable rate of return on rate base shall be set equal to the carrier's weighted average cost of capital calculated on a before-tax basis ("BTWACC"). The BTWACC is defined mathematically by the following expression:

$$\mathrm{BTWACC} = \left(\frac{D}{D+P+E}\right)K_d + \left(\frac{P}{D+P+E}\right)K_P\left(\frac{1}{1-T}\right) + \left(\frac{E}{D+P+E}\right)K_e\left(\frac{1}{1-T}\right)$$

where:

K_d is the carrier's cost of long-term debt capital;
K_p is the carrier's cost of preferred (and preference) stock capital;
K_e is the carrier's cost of common-stock equity capital;
D is the average book value of the carrier's long-term debt capital outstanding;
P is the average book value of the carrier's preferred (and preference) stock capital outstanding;
E is the average book value of the carrier's common-stock equity capital (par value plus earned and capital surplus) outstanding; and
T is the carrier's composite statutory corporate income tax rate.

A carrier's BTWACC shall be calculated in precise accordance with the rules set forth in this section.

(2) *Subsidiary carrier's capital structure.* Where a carrier is a subsidiary that obtains its common-stock equity capital through a parent company, the capital structure of the subsidiary shall be used in computing the BTWACC unless the carrier has received prior approval by the Commission to use the consolidated capital structure. The subsidiary carrier's cost of common-stock equity capital, the subsidiary carrier's cost of long-term debt capital, the subsidiary carrier's cost of preferred stock capital, and the subsidiary carrier's composite statutory corporate

income tax rate shall also be used in computing the BTWACC. The subsidiary carrier's cost of common-stock equity capital shall be inferred as the cost of common-stock equity capital estimated for a sample of firms having business and financial risk comparable to the subsidiary carrier when the subsidiary carrier's capital structure is used in calculating the BTWACC.

(3) *Comparable risk companies.* (i) A proxy group of companies shall be selected to impute the carrier's cost of common-stock equity capital where:

(A) The carrier is an independent company (i.e., it has no corporate parent) which issues no publicly-traded common-stock equity, or

(B) The carrier is a subsidiary that obtains its common-stock equity capital through a parent company.

(ii) The selection of the proxy group of companies shall be based on the following criteria:

(A) The proxy companies shall be based in the United States.

(B) The proxy companies shall be listed in The Value Line Investment Survey or equivalent data source. If a party uses data from sources other than The Value Line Investment Survey, the burden is on that party to prove that the data source is reliable and the data are sufficiently detailed to calculate the BTWACC.

(C) A majority of the proxy companies shall operate and derive a major portion of their gross revenues primarily as common carriers in the business of freight transportation, and shall own or operate transportation vehicles or vessels. Companies with gross annual revenues equal to or less than $25,000,000 shall be excluded from the proxy group. Proxy group companies whose businesses are not in the transportation industry must clearly be demonstrated to have business risk equivalent to the regulated carrier's business risk.

(D) In addition, comparable risk companies shall be selected by examining some, but not necessarily all, of the following risk indicators:

(1) A company's total capitalization ratio and/or debt-to-equity ratio;

(2) The investment quality ratings of a company's long-term debt instruments;

(3) The investment safety ranking of a company's common-stock equity;

(4) The rating of a company's financial strength;

(5) Other such valid indicators deemed appropriate by the Commission.

(4) *Consolidated capital structure.* (i) Upon application, after notice and opportunity for comment, the Commission may authorize use of the capital structure of the consolidated system (i.e., the parent company and all of its subsidiaries) in computing the BTWACC. The application must show that:

(A) The subsidiary carrier's parent company issues publicly traded common-stock equity;

(B) The subsidiary carrier's parent company owns 90 percent or more of the subsidiary's voting shares of stock; and

(C) The business and the financial risks of the subsidiary carrier and the parent company are similar.

(ii) The similarity of the parent company's and subsidiary carrier's business risk shall be evaluated by examining the degree to which the consolidated system's profits, revenues, and expenses are composed of those of the subsidiary carrier, and the extent to which the parent's holdings are diversified into lines of business unrelated to those of the subsidiary carrier, and/or other indicators of business risk deemed appropriate by the Commission. The similarity of the parent company's and subsidiary carrier's financial risk shall be evaluated by examining the consolidated system's and the subsidiary's total capitalization ratios, debt-to-equity ratios, investment quality rankings on short- and long-term debt instruments, times-interest-earned ratios, fixed charges coverage ratios (calculated to include both FMC and non-FMC regulated operations), and/or other measures of financial risk deemed appropriate by the Commission.

(iii) When the consolidated capital structure is used, the consolidated system's cost of common-stock equity capital (issued by the parent company), the consolidated system's cost of long-term debt capital, the consolidated system's cost of preferred (and preference) stock capital, and the consolidated system's composite statutory corporate income tax rate shall also be used in estimating the subsidiary's BTWACC.

(iv) Where the Commission has approved the use of a consolidated capital structure, such use will not be subject to challenge in a subsequent rate investigation brought under section (3) of the Intercoastal Shipping Act, 1933.

(5) *Book-value, average capitalization ratios.* Capitalization ratios representing the capital structure used in deriving a carrier's BTWACC shall be computed on the basis of average projected book value outstanding over the 12-month period used to calculate projected midyear rate base in § 552.2(b)(1)(ii). The average amount of any class of capital outstanding used in determining the capitalization ratios is computed by adding the amount of a particular type of capital expected to be outstanding as of the beginning of the 12-month period to the amount of that same type of capital expected to be outstanding as of the end of the 12-month period, and dividing the sum by two.

(6) *Capitalization amounts and ratios (Schedules F–I and F–I(A)).* A carrier shall show its long-term debt, preferred stock, and common-stock equity capitalization amounts outstanding, stated in book value terms, as of the beginning and as of the end of the 12-month period used to calculate projected midyear rate base, and the average amounts and average ratios for that 12-month period. Where a carrier is a subsidiary of a parent company, the carrier shall show its own capitalization amounts and ratios unless the carrier has applied for and has been granted permission from the Commission to use a consolidated capital structure in computing the BTWACC. Where such permission has been granted, the carrier shall show instead the consolidated system's capitalization amounts and ratios.

(7) *Cost of long-term debt capital (Schedules F–II, F–II(A), F–III, and F–III(A)).* (i) The cost of long-term debt capital [1] shall be calculated by the carrier for the 12-month period used to compute projected mid-year rate base on the basis of:

(A) Embedded cost for existing long-term debt; and

(B) Current cost for any new long-term debt expected to be issued on or before the final day of the 12-month period.

(ii) The arithmetic average annual percentage rate cost of long-term debt capital calculated on the basis of all issues of long-term debt expected to be outstanding as of the beginning and as of the end of the 12-month period used to compute projected mid-year rate base shall be the cost of long-term debt capital used in computing the BTWACC.

(iii) The annual percentage rate cost of long-term debt capital for all issues of long-term debt expected to be outstanding as of the beginning and as of the end of the 12-month period used to compute projected mid-year rate base shall be calculated separately for the two dates by:

(A) Multiplying the cost of money for each issue under paragraph (e)(7)(v)(A)(*10*) of this section by the principal amount outstanding for each issue, which yields the annual dollar cost for each issue; and

---

[1] The cost of sinking fund preferred stock shall be computed in accordance with the regulations for calculating the cost of long-term debt.

(B) Adding the annual dollar cost of each issue to obtain the total dollar cost for all issues, which is divided by the total principal amount outstanding for all issues to obtain the annual percentage rate cost of long-term debt capital for all issues.

(iv) The arithmetic average annual percentage rate cost of long-term debt capital for all issues to be used as the cost of long-term debt capital in computing the BTWACC shall be calculated by:

(A) Adding the total annual dollar cost for all issues of long-term debt capital expected to be outstanding as of the beginning of the 12-month period used to compute projected mid-year rate base to the total annual dollar cost for all issues of long-term debt capital expected to be outstanding as of the end of the 12-month period, and dividing the resulting sum by two, which yields the average total annual dollar cost of long-term debt for all issues for the 12-month period;

(B) Adding the total principal amount outstanding for all long-term debt issues expected to be outstanding as of the beginning of the 12-month period used to compute projected mid-year rate base to the total principal amount outstanding for all long-term debt issues expected to be outstanding as of the end of the 12-month period, and dividing the resulting sum by two, which yields the average total principal amount expected to be outstanding for all issues for the 12-month period; and

(C) Dividing the average total annual dollar cost of long term debt for all issues for the 12-month period by the average total principal amount expected to be outstanding for all issues for the 12-month period, which yields the average annual percentage rate cost of long-term debt capital for all issues to be used in computing the BTWACC.

(v)(A) *Cost of long-term debt capital calculation (Schedules F–II, F–II(A), F–III and F–III(A)).* The carrier shall calculate the annual percentage rate cost of long-term debt capital for all issues of long-term debt expected to be outstanding as of the beginning and as of the end of the 12-month period used to compute projected mid-year rate base separately for the two dates, and shall also calculate the average annual percentage rate cost of long-term debt for all issues for the 12-month period. The carrier shall support these calculations by showing in tabular form the following for each class and series of long-term debt expected to be outstanding as of the beginning and as of the end of the 12-month period separately for the two dates:

(*1*) Title;

(*2*) Date of issuance;

(*3*) Date of maturity;

(*4*) Coupon rate (%);

(*5*) Principal amount issued ($);

(*6*) Discount or premium ($);

(*7*) Issuance expense ($);

(*8*) Net proceeds to the carrier ($);

(*9*) Net proceeds ratio (%), which is the net proceeds to the carrier divided by the principal amount issued;

(*10*) Cost of money (%), which, for existing long-term debt issues, shall be the yield-to-maturity at issuance based on the coupon rate, term of issue, and net proceeds ratio determined by reference to any generally accepted table of bond yields; and, for long-term debt issues to be newly issued on or before the final day of the 12-month period, shall be based on the average current yield (published in such a publication as Moody's Bond Survey) on long-term debt instruments similar in maturity and investment quality as the long-term debt security that is to be issued;

(*11*) Principal amount outstanding (%);

(*12*) Annual cost ($); and

(*13*) Name and relationship of issuer to carrier.

(B) Where a carrier is a subsidiary of a parent company, the carrier shall show the cost of long-term debt calculations and information required in this paragraph for its own cost of long-term debt unless the carrier has applied for and received prior permission from the Commission to use a consolidated capital structure in computing the BTWACC. Where such permission has been granted, the subsidiary carrier shall show the required cost of long-term debt calculations and information for the consolidated system's long-term debt.

(vi) In the event that new long-term debt is to be issued on or before the final day of the 12-month period used to compute projected mid-year rate base, the carrier shall submit a statement explaining the methods used to estimate information required under paragraph (e)(7)(v)(A) (*1*) through (*13*) of this section.

(8) *Cost of preferred (and preference) stock capital (Schedules F–IV, F–IV(A), F–V, and F–V(A)).* (i) The cost of preferred (and preference) stock capital shall be calculated by the carrier for the 12-month period used to compute projected mid-year rate base on the basis of:

(A) Embedded cost for existing preferred (and preference stock); and

(B) Current cost for any new preferred (and preference) stock to be issued on or before the final day of the 12-month period.

(ii) The arithmetic average annual percentage rate cost of preferred (and preference) stock capital calculated on the basis of all issues of preferred (and preference) stock expected to be outstanding as of the beginning and as of the end of the 12-month period used to calculate projected mid-year rate base shall be the cost of preferred (and preference) stock capital used in computing the BTWACC.

(iii) The annual percentage rate cost of preferred (and preference) stock capital for all issues of preferred (and preference) stock expected to be outstanding as of the beginning and as of the end of the 12-month period used to compute projected mid-year rate base shall be calculated separately for the two dates by:

(A) Multiplying the cost of money for each issue under paragraph (e)(8)(v)(A)(*9*) of this section by the par or stated amount outstanding for each issue, which yields the annual dollar cost for each issue; and

(B) Adding the annual dollar cost of each issue to obtain the total for all issues, which is divided by the total par or stated amount outstanding for all issues to obtain the annual percentage rate cost of preferred (and preference) stock capital for all issues.

(iv) The arithmetic average annual percentage rate cost of preferred (and preference) stock capital for all issues to be used as the cost of preferred (and preference) stock capital in computing the BTWACC shall be calculated by:

(A) Adding the total annual dollar cost for all issues of preferred (and preference) stock capital expected to be outstanding as of the beginning of the 12-month period used to compute projected mid-year rate base to the total annual dollar cost for all issues of preferred (and preference) stock capital expected to be outstanding as of the end of the 12-month period, and dividing the resulting sum by two, which yields the average total annual dollar cost of preferred (and preference) stock for all issues for the 12-month period;

(B) Adding the total par or stated amount outstanding for all preferred (and preference) stock issues expected to be outstanding as of the beginning of the 12-month period used to compute projected mid-year rate base to the total par or stated amount outstanding for all issues expected to be outstanding as of the end of the 12-month period, and dividing the resulting sum by two, which yields the average total par or stated amount expected to be outstanding for all issues for the 12-month period;

(C) Dividing the average total annual dollar cost of preferred (and preference) stock for all issues for the 12-month period by the average total par or stated amount expected to be outstanding for all issues for the 12-month period, which yields the average annual percentage rate cost of preferred (and preference) stock capital for all issues to be used in computing the BTWACC.

(v)(A) *Cost of preferred (and preference) stock capital calculation (Schedules F–IV, F–IV(A), F–V and F–V(A)).* The carrier shall calculate the annual percentage rate cost of preferred (and preference) stock capital for all issues of preferred (and preference) stock expected to be outstanding as of the beginning and as of the end of the 12-month period used to compute projected mid-year rate base separately for the two dates, and shall also calculate the average annual percentage rate cost of preferred (and preference) stock for all issues for the 12-month period. The carrier shall support these calculations by showing in tabular form the following for each issue of preferred (and preference) stock as of the beginning and as of the end of the 12-month period separately for the two dates:

(*1*) Title;
(*2*) Date of issuance;
(*3*) Dividend rate (%);
(*4*) Par or stated amount of issue ($);
(*5*) Discount or premium ($);
(*6*) Issuance expense ($);
(*7*) Net proceeds to the carrier ($);
(*8*) Net proceeds ratio (%), which is the net proceeds to the carrier divided by the par or stated amount issued;
(*9*) Cost of money (%), which, for existing preferred (and preference) stock issues, shall be the dividend rate divided by the net proceeds ratio; and, for preferred (and preference) stock issues to be newly issued on or before the final day of the 12-month period, shall be the estimated dividend rate divided by the estimated net proceeds ratio;
(*10*) Par or stated amount outstanding ($);
(*11*) Annual cost ($); and
(*12*) If issue is owned by an affiliate, name and relationship of owner.

(B) Where a carrier is a subsidiary of a parent company, the carrier shall show the cost of preferred (and preference) stock calculations and information required in this paragraph for its own preferred (and preference) stock unless the carrier has applied for and been granted permission from the Commission to use a consolidated capital structure in computing the BTWACC. Where such permission has been granted, the subsidiary carrier shall show the required cost of preferred (and preference) stock calculations and information for the consolidated system's preferred (and preference) stock.

(vi) In the event that new preferred (and preference) stock is to be issued on or before the final day of the 12-month period used to compute projected mid-year rate base, the carrier shall submit a statement explaining the methods used to estimate information required under paragraph (e)(8)(v)(A) (*1*) through (*12*) of this section.

(9) *Cost of common-stock equity capital.* A carrier's cost of common-stock equity capital shall be calculated using the Discounted Cash Flow ("DCF") and the Risk Premium ("RP") methods. A final estimate of that cost shall be derived from the separate estimates obtained using each of the methods.

(10) *DCF method.* (i) The DCF model that shall be used in calculating a carrier's cost of common-stock equity is defined algebraically as follows:

$$K_e = \frac{D_o}{P_o}(1+.5g)+g$$

where:

K_e is the carrier's cost of common-stock equity capital;
D_o is the carrier's current annualized dividend (defined as four times the current quarterly installment) per share;
P_o is the current market price per share of the carrier's common stock; and
g is the constant expected annual rate of growth in the carrier's dividends per share.

(ii) *Current market price per share of common stock.* A DCF analysis in which the current market price per share of the carrier's common stock is an average of the monthly high and low market prices during a six-month period commencing not more than nine months prior to the date on which the proposed rates are filed is required. Supplemental DCF analysis using the most recent stock price as a basis for the current market price per share of common stock may also be used.

(iii) *Additional Studies.* Other analysis or forms of the DCF model may be included in the computation and determination of the DCF estimate of the cost of common-stock equity.

(11) *RP method.* (i) The RP model that shall be used in calculating a carrier's cost of common-stock equity is defined mathematically as follows:

$$K_e=K_d+RP$$

where:

K_e is the regulated carrier's cost of common-stock equity capital;
K_d is the incremental cost of debt; and
RP is the risk premium.

(ii) *Risk Premium.* The risk premium used in the RP model shall be the historical arithmetic average return differential between rates of return actually earned on investments in the Standard and Poor's 500 Stock Index and the five-year Treasury note. A risk adjustment specific to the carrier for firm size may be included in the computation and determination of the risk premium. The risk premium shall be based on the complete historical data series published annually in the Stocks, Bonds, Bills and Inflation Yearbook, for the period 1926 through the most recent date for which the specified data are available.

(iii) *Incremental cost of debt.* A six-month average of five-year Treasury Note yields computed over a period commencing not more than nine months prior to the date on which the proposed rates are filed shall be the estimate of the incremental cost of debt in the RP model. Supplemental RP analysis using the most recent five-year Treasury Note yield as a basis for the incremental cost of debt may also be used.

(12) *Corporate income tax rate (Schedules F–VI and F–VI(A)).* The corporate income tax rate used in computing the BTWACC shall be the carrier's composite statutory corporate income tax rate for the 12-month period used to compute projected midyear rate base. Such rate shall be a composite of the carrier's Federal and State income tax rates, and of any other income tax rate to be applied to the carrier's income by any other entity to which the carrier is to pay income taxes. The carrier shall calculate and show its composite statutory corporate income tax rate as well as its Federal, State, and any other applicable statutory income tax rates separately for the 12-month period used to compute projected midyear rate base. The carrier shall also state the name of any entity other than the Federal and State governments to which it is to pay taxes. Where a carrier is a subsidiary of a parent company, the carrier shall show its own statutory corporate income tax rates unless the carrier has applied for and been granted permission from the Commission to use a consolidated capital structure in computing the BTWACC. Where such permission has been granted, the carrier shall show instead the consolidated system's statutory corporate income tax rates.

(13) *Flotation costs (Schedules F–VII and F–VII(A)).* (i) A carrier's cost of common-stock equity capital shall be adjusted to reflect those costs of floating new issues that are actually incurred, but only in the event that new common stock is to be issued to the general

public during the 12-month period used to compute projected midyear rate base. Those flotation costs for which an allowance shall be made must be identifiable, and must be directly attributable to underwriting fees, and printing, legal, accounting, and/or other administrative expenses. No allowance shall be made for any hypothetical costs such as those associated with market pressure and market break effects. The allowance shall be applied solely to the new common-stock equity and shall not be applied to the existing common-stock equity balance. The formula that shall be used to compute such an allowance is as follows:

$$k = Fs/(1+s)$$

where:

k is the required increment to the cost of the carrier's common stock equity capital that will allow the company to recover its flotation costs;
F is the flotation costs expressed as a decimal fraction of the dollar value of new common-stock equity sales; and
s is the new common-stock equity sales expressed as a decimal fraction of the dollar value of existing common-stock equity capital.

(ii) *Flotation costs data (Schedules F–VII and F–VII(A)).* (A) In the event that new common-stock equity is to be issued during the 12-month period used to compute projected midyear rate base, the carrier shall show separately by category the estimated costs of floating the new issues to the extent that such costs are identifiable and are directly attributable to actual underwriting fees, and to printing, legal, accounting, and/or other administrative expenses that must be paid by the carrier. The carrier shall submit a statement explaining the method used in estimating the flotation costs. The carrier shall also show estimates of the date of issuance; number of shares to be issued; gross proceeds at issuance price; and net proceeds to the carrier.

(B) Where a carrier is a subsidiary that obtains its common-stock equity capital through a parent company, and the parent company intends to issue new common-stock equity during the 12-month period, the carrier shall show separately by category the estimated costs to the parent company of floating the new issues, and estimates of the above items relative to the parent company's issuance of new common-stock equity, provided that such carrier has applied for and been granted permission from the Commission to use a consolidated capital structure in computing the BTWACC.

(f) *Financial ratio methods*—(1) *Fixed charges coverage ratio.* * * *

(2) *Operating ratio.* * * *

* * * * *

By the Commission.

Joseph C. Polking,
Secretary.

BILLING CODE 6730–01–W

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 95–66; RM–8625]

Radio Broadcasting Services; Dayton, WA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Steven C. Hoffman, allots Channel 272A at Dayton, Washington, as the community's second local FM transmission service. *See* 60 FR 26712, May 18, 1995. Channel 272A can be allotted at Dayton in compliance with the Commission's minimum distance separation requirements with a site restriction of 3.0 kilometers (1.9 miles) southwest to avoid short-spacings to the construction permit site for Station KRAO(FM), Channel 273C3, Colfax, Washington, and the licensed site for Station KORD(FM), Channel 274C, Richland, Washington. The coordinates for Channel 272A at Dayton are North Latitude 46–17–57 and West Longitude 117–59–52. Since Dayton is located within 320 kilometers (200 miles) of the U.S.-Canadian border, concurrence of the Canadian government has been received.

DATES: Effective October 16, 1995. The window period for filing applications will open on October 16, 1995 and close on November 16, 1995.

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order*, MM Docket No. 95–66, adopted August 24, 1995, and released August 30, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, Inc., (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Radio broadcasting.

Part 73 of title 47 of the Code of Federal Regulations is amended as follows:

PART 73—[AMENDED]

1. The authority citation for part 73 continues to read as follows:

Authority: Sections 303, 48 Stat., as amended, 1082; 47 U.S.C. 154, as amended.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments under Washington, is amended by adding Channel 272A at Dayton.

Federal Communications Commission.

John A. Karousos,
Chief, Allocations Branch, Policy and Rules Division, Mass Media Bureau.

47 CFR Part 73

[MM Docket No. 95–48; RM–8590]

Television Broadcasting Services; Weaverville, CA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots UHF television Channel 32 to Weaverville, California, as that community's first local television broadcast service, in response to a petition for rule making filed by Mark C. Allen. *See* 60 FR 20950, April 28, 1995. Coordinates used for Channel 32 at Weaverville are 40–54–45 and 122–52–15. *See* Supplementary Information, *infra*. With this action the proceeding is terminated.

EFFECTIVE DATE: October 16, 1995.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order*, MM Docket No. 95–48, adopted August 23, 1995, and released August 30, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, Inc., (202) 857–3800, located at 1919 M Street, NW., Room 246, or 2100 M Street, NW., Suite 140, Washington, DC 20037.

Weaverville is located within the prohibited co-channel minimum distance separation of 280.8 kilometers (174.5 miles) to the Sacramento-Stockton television market, one of the designated television markets affected by the Commission's current freeze on allotments and applications pending the outcome of an inquiry into the use of advanced television systems in broadcasting. (*See Order, Advanced Television Systems and Their Impact on Existing Television Broadcasting Service*, 52 Fed. Reg. 28346, July 29, 1987). However, Channel 32 is allotted to Weaverville in compliance with the terms of the freeze *Order* at a restricted site. Interested parties should note that any application submitted for Channel 32 at Weaverville which does not specify a site beyond the "freeze zone" governing the allotment will not be accepted for filing.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 94–37; Notice 2]

RIN 2127–AF 22

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: This notice adopts amendments to the Federal Motor Vehicle Safety Standard on lighting to replace the currently incorporated SAE J576c with the more recent SAE J576 JUL91 as the referenced standard on plastics materials, to replace ASTM D 1003–61 with the more recent ASTM D 1003–92 in the test procedures, and to allow alternative processing techniques, sample sizes and thickness tolerances to those presently specified. These amendments represent the choice of Option 1 from the notice of proposed rulemaking published in November 1994.

DATES: The effective date of the final rule is March 1, 1996.

FOR FURTHER INFORMATION CONTACT: Kenneth O. Hardie, Office of Rulemaking, NHTSA (202–366–6987).

SUPPLEMENTARY INFORMATION: Heraeus DSET Laboratories, Inc. ("DSET"), of Phoenix, Arizona, petitioned NHTSA for rulemaking to amend Federal Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*. Specifically, DSET asked that paragraph S5.1.2 be amended "to update the test specimen processing requirements of plastic material used for optical parts such as lenses and reflectors." Currently, these materials are required to conform to Society of Automotive Engineers (SAE) Recommended Practice J576c, May 1970. DSET wants NHTSA

> to allow alternative processing techniques besides injection molding to produce test specimens, to allow test specimen sizes other than a 3 inch diameter disc and to change the specimen thickness tolerances from ±0.005 inch to ±.010 inch.

Those requirements for injection molding and for the diameter and thickness of the test specimen are set forth in J576c, May 1970.

NHTSA granted the petition and published a notice of proposed rulemaking in response to it on November 2, 1994 (59 FR 54881). The notice proposed two alternative amendments of S5.1.2 as a means of implementing its grant of DSET's petition. The agency asked commenters for their views on each of the alternatives.

Option 1. This option would substitute SAE J576 JUL91 for SAE J576c, May 1970, and make conforming amendments in the text of S5.1.2. Option 1 would also replace American Society for Testing and Materials (ASTM) D 1003–61 with ASTM D 1003–92 with respect to measurement of haze (which, as currently specified, would not exceed 7 percent). A specimen thickness tolerance of ±0.25 mm (0.010 in.) would also be allowed as there is no technical reason to limit the test specimen thickness tolerance to ±0.005 in., and the value proposed by NHTSA as recommended by DSET appears to be a more reasonable tolerance for test specimens.

Option 2. This option would retain the current SAE and ASTM specifications but would allow processing techniques other than injection molding to produce equivalent test specimens, test specimens other than a disc of 3-inch diameter, and a test specimen thickness tolerance of ±0.010 inch.

Seven comments were received, five of which supported Option 1. These were from Flxible Corporation ("Flxible"), Transportation Safety Equipment Institute ("TSEI"), Robert Bosch, GmbH ("Bosch"), American Automobile Manufacturers Association ("AAMA"), and Ford Motor Company ("Ford"). Miles, Inc. opposed Option 1 and supported Option 2. The Plastics Division of General Electric Corporation ("GE") did not express a preference for either alternative.

Each of the commenters supporting Option 1 had a different concern. Flxible suggested that NHTSA adopt the base number of each SAE and ASTM standard/recommended practice, with the suffix notation "Latest Revision." In the company's view, this would eliminate the need to revise older materials and ensure that the safety standards reflect contemporary industry practice.

While this is an attractive notion, there are legal constraints against it. The SAE and ASTM materials per se are only guidelines and advisory in nature. Once they are incorporated into the Federal motor vehicle safety standards, they become "the law of the land", and a manufacturer must comply with them or face civil sanctions. Under the Administrative Procedure Act, a regulation imposing a substantive burden cannot be adopted in the absence of adequate public notice and an opportunity to comment. Under the approach suggested by Flxible, automatic updating of the safety standards to incorporate the latest SAE and ASTM revisions would occur with no prior public notice or opportunity to comment, and hence violate the Administrative Procedure Act. Further, NHTSA has found that many updated and revised materials change the previous materials in substantive ways. Some changes may not be in the interests of safety; the elimination of the heat test from SAE J576 JUL91 is one example of this. Other changes may increase, rather than reduce, a substantive burden upon industry. Regulated persons and the public must

be apprised of these changes before they are adopted.

NHTSA may, however, adopt an updated version without prior notice where there appears to be no substantive change since such an adoption is in the nature of a technical amendment. The agency is adopting an updated version in this final rule on the basis of a comment from TSEI. Under proposed paragraph S5.1.2(e), after exposure to the heat test, the samples shall conform to the color requirements of SAE J578a October 1966. TSEI pointed out that current paragraph S5.1.5 references SAE J578c February 1977. It recommended that NHTSA change both references to the specification of J578 MAY88.

NHTSA has compared the 1988 and 1977 versions of J578 with that of 1966. It finds no substantive difference between the 1966 and 1977 versions. The 1988 version, however, contains a third method of color measurement to be used "as a referee approach when the commonly used methods produce questionable results." In addition, the Appendix in the latter has added a section of "Color Measurements of Gaseous Discharge Lighting Devices." NHTSA ought to have comment on these changes before adopting SAE J578 MAY88, and, for this reason, has not followed TSEI's suggestion. On the other hand, because of the lack of substantive change between the other two versions, paragraph S5.1.2(e) is added with an update of the J578 reference to 1977 from the 1966 version which was proposed.

The wording of present paragraph S5.2.1 concerned Ford and AAMA. Under this paragraph, phrases such as "It is recommended that" and "should be," which appear in materials incorporated by reference, are to be read as setting forth mandatory requirements. Ford and AAMA commented that these phrases should not be interpreted as applying to SAE J576 JUL91. In NHTSA's view, the result of adopting Ford's and AAMA's comments would be to make compliance of plastic materials used for optical parts a voluntary affair. This would defeat the purpose of the rulemaking.

Proposed paragraph S5.1.2(e) would require test samples, after the heat test, to "show no discernable change in shape and general appearance when compared with an unexposed specimen." This language comes from J576 itself, with the exception that the SAE uses "significant" rather than "discernable." Ford and AAMA objected to this substitution, arguing that it would establish a higher standard to be met by plastics, and that there is no need to change language that has been a requirement for years. They recommended use of the word "significant." In their view, a change that is "discernable" is not necessarily one that is "significant."

In its proposal, NHTSA had no intention of increasing the burden on any regulated party. The agency proposed the word "discernable" with care, because it is objective, while "significant" is not. Motor vehicle safety standards are required by law to be "objective", 49 U.S.C. 30111(a). The agency has concluded that "discernable" is more appropriate for a requirement specifically expressed in the text of Standard No. 108 (as compared with one incorporated by reference). However, NHTSA wishes to make clear that it views the words as essentially synonymous in this context. If a post-test change in shape or general appearance is discernable, NHTSA considers that to be significant. Such a change indicates the potential for degradation of a lens in use, with a corresponding effect upon color and photometrics of the lamp on which it is installed. To add even greater objectivity, the final rule expresses the requirement as "discernable to the naked eye." Should a change be discernable to the naked eye after testing, and a manufacturer believe that such a change is not "significant," the manufacturer may file a Part 573 Noncompliance Notification Report simultaneously with an application to NHTSA for a determination that the change resulting from that testing is inconsequential to motor vehicle safety.

GE did not choose between the alternatives in its comment. It did, however, recommend the adoption of SAE J576 JUL91 in its entirety, and that NHTSA not carry over the heat test from the previous version of J576. In its view, the heat tests of SAE J575 are adequate until further work is done on thermal issues suitable for incorporation into J576.

Having considered the comments in response to the NPRM, NHTSA is amending Standard No. 108 to add the two new paragraphs proposed, maintaining the performance requirements required of plastic materials by SAE J576c for the heat test and specifying positioning of test samples during the test. These have been omitted by the SAE from J576 JUL91. NHTSA has chosen to retain the existing heat test as one that is familiar to industry and one which meets the need for motor vehicle safety. It is a minimum requirement, intended to establish a margin of safety between the temperatures at which plastic reflectors and lenses may fail from internal heat, and temperatures on the exterior surface induced by exposure to sunlight. Lamp manufacturers use J575 or similar tests to determine whether the particular design characteristics of their lamps require use of premium materials in the lenses. It is a test of the finished lens as installed on the lamp, rather than a test of the materials used in finished products. Use of material with insufficient high temperature performance can result in reflectors that lose color and reflectivity.

The positioning of test samples will allow the sample to droop if its strength is adversely affected by the test.

In order to retain the current 3-year outdoor exposure time test requirements for plastic lenses used or covered by another material and not exposed directly to sunlight, NHTSA is adding a new paragraph S5.1.2(g) to specify that paragraph 3.3.3.1 of SAE J576 JUL91 does not apply as regards protected materials. For the same reason, NHTSA is not adopting paragraph 3.3.3.2. of SAE J576 JUL91 which allows an accelerated 6-month outdoor exposure test time. New paragraph S5.1.2(g) will not change the stringency or flexibility of the standard as it exists, but will ensure that the integrity of plastic materials is maintained by not permitting a lesser exposure time for materials which may be protected when in use.

Miles, Inc., a manufacturer of polycarbonate resin used as a material in lenses and reflectors, objected to Option 1. In its view, this alternative places an additional testing burden on the resin manufacturer, as compared with the present requirements. For this reason, it supported Option 2. Specifically, Miles opposes SAE J576 JUL91 because of Section 3.1 *Materials to be Tested*. This section reads:

> Outdoor exposure tests shall be made on each material * * * offered for use in optical parts * * *. Concentrations of polymer components and additives such as plasticizer, lubricants, colorants, weathering stabilizers, and antioxidants in plastic materials and/or coatings may be changed without outdoor exposure testing if: the changes are within the limits of composition represented by higher and lower concentrations of these polymer components and additives have been tested in accordance with 3.3 and found to meet the requirements of Section 4.

Miles interprets this language to mean that changes in dye concentrations would only be permissible if samples containing lower and higher concentrations of dye had been exposure tested. Miles believes that this, in effect, would double the samples to be tested when compared with the present requirements.

The present requirements are those of section 3.1 of SAE J576c, May 1970. These state, in pertinent part, that "[a] test of one color and formulation shall cover variations in dye concentration, but shall not cover changes in dye materials or changes in polymers." Miles interprets this as meaning that a new exposure test need not be conducted under the 1970 version if the only change in the product is a variation in dye concentration. Its present practice is to test for exposure materials incorporating new dyes only at the expected concentration level of the dye. One exposure test covers each new dye, but Miles will accept the test results as valid when there are small variations in dye concentration.

Miles is correct that SAE J576c allows a single test to cover variations in dye concentration. SAE J576 JUL91 may be interpreted as calling for the testing of two samples by specifying that dye concentrations in material to be used in motor vehicle optical parts must fall within the upper and lower limits of dye concentrations tested if there are variations in dye concentration. Miles believes the newer requirement will double its testing burden.

NHTSA does not agree that this is the inevitable result of the adoption of this portion of SAE J576 JUL 91. What paragraph S5.1.2 is intended to ensure is that lenses and reflectors, as manufactured for use on motor vehicles, are fabricated from plastic materials that meet SAE J576. The key issue is whether the equipment satisfies the performance requirements of the standard, not the number of tests conducted on the materials used in the equipment. Ultimately, the manufacturer of the vehicle in certifying compliance with all applicable Federal motor vehicle safety standards, is certifying that the lenses and reflectors on the vehicle are made from plastics materials that meet J576. If the lens or reflector is manufactured as replacement equipment, the certification responsibility is that of the manufacturer of the equipment. Thus, it is incumbent upon the vehicle or equipment manufacturer to assure itself that the materials it obtains from the plastics manufacturer comply with SAE J576 (and, furthermore, not to change the composition of the plastics materials so obtained in a manner that would cause it to be noncomplying). The documentation needed for such assurance, including the quantum of testing performed by the plastics manufacturer and by the vehicle or equipment manufacturer, is a decision that each equipment or vehicle manufacturer must make under the particular circumstances. NHTSA, of course, expects manufacturers to exercise reasonable care in certifying their products, and, in the event of a noncompliance, the manufacturer may claim that it had no reason to know, despite exercising reasonable care, that the vehicle or equipment failed to comply. However, the allocation of that responsibility is a matter of contract between the manufacturer with the Federal certification responsibility and its plastic materials supplier. Plastic materials are not completed items of motor vehicle equipment subject to Standard No. 108 so the Federal certification responsibility does not fall upon Miles. If Miles or other materials manufacturers are satisfied, based on their extensive experience with dyes, that changes in dye concentration would not cause the plastic material to fail the specified performance requirements, they may be able to persuade their purchasers that additional testing is not needed.

Effective Date

The effective date of the final rule is March 1, 1996.

Rulemaking Analyses and Notices

Executive Order 12866 and DOT Regulatory Policies and Procedures. This final rule was not reviewed under Executive Order 12866. It has been determined that the rulemaking action is not significant under Department of Transportation regulatory policies and procedures. The purpose of the rulemaking action is to update testing procedures. Since the final rule will have no significant cost or other impacts, preparation of a full regulatory evaluation is not warranted.

National Environmental Policy Act. NHTSA has analyzed this rulemaking action for the purposes of the National Environmental Policy Act. The final rule will not have a significant effect upon the environment. The composition of plastic materials used in optical parts will not change from those presently in production.

Regulatory Flexibility Act. The agency has also considered the impacts of this rulemaking action in relation to the Regulatory Flexibility Act. I certify that this rulemaking action does not have a significant economic impact upon a substantial number of small entities. Accordingly, no regulatory flexibility analysis has been prepared. Manufacturers of motor vehicles and motor vehicle equipment, those affected by the rulemaking action, are generally not small businesses within the meaning of the Regulatory Flexibility Act. Further, small organizations and governmental jurisdictions will not be significantly affected because the price of new vehicles and vehicle equipment will not be impacted.

Executive Order 12612 (Federalism). This rulemaking action has also been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and NHTSA has determined that this rulemaking action does not have sufficient Federalism implications to warrant the preparation of a federalism Assessment.

Civil Justice. The final rule will not have any retroactive effect. Under 49 U.S.C. 30103, whenever a Federal motor vehicle safety standard is in effect, a state may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard. 49 U.S.C. 30161 sets forth a procedure for judicial review of final rules establishing, amending or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

In consideration of the foregoing, 49 CFR part 571 is amended as follows:

1. The authority citation for part 571 continues to read as follows:

Authority: 49 U.S.C. 322, 30111, 30115, 30117 and 30166; delegation of authority at 49 CFR 1.50.

2. Section 571.108 is amended by revising paragraph S5.1.2, to read as follows:

§ 571.108 Motor Vehicle Safety Standard No. 108; Lamps, reflective devices, and associated equipment.

* * * * *

S5.1.2 Plastic materials used for optical parts such as lenses and reflectors shall conform to SAE Recommended Practice J576 JUL91, except that:

(a) Plastic lenses (other than those incorporating reflex reflectors) used for inner lenses or those covered by another material and not exposed directly to sunlight shall meet the requirements of paragraphs 3.3 and 4.2 of SAE J576 JULY91 when covered by the outer lens or other material;

(b) After the outdoor exposure test, the haze and loss of surface luster of

plastic materials (other than those incorporating reflex reflectors) used for outer lenses shall not be greater than 30 percent haze as measured by ASTM D 1003–92, *Haze and Luminous Transmittance of Transparent Plastic;*

(c) After the outdoor exposure test, plastic materials used for reflex reflectors and for lenses used in front of reflex reflectors shall not show surface deterioration, crazing, dimensional changes, color bleeding, delamination, loss of surface luster, or haze that exceeds 7 percent as measured under ASTM D 1003–92.

(d) The thickness of the test specimens specified in paragraph 3.2.2 of SAE J576 JUL91 may vary by as much as ±0.25 mm.

(e) After exposure to the heat test as specified in subparagraph (f) of this paragraph, and after cooling to room ambient temperature, a test specimen shall show no change in shape and general appearance discernable to the naked eye when compared with an unexposed specimen. The trichromatic coefficients of the samples shall conform to the requirements of SAE J578c, "Color Specification for Electric Signal Lighting Devices", February 1977.

(f) Two samples of each thickness of each plastic material are used in the heat test. Each sample is supported at the bottom, with at least 51 mm. of the sample above the support, in the vertical position in such a manner that, on each side, the minimum uninterrupted area of exposed surface is not less than 3225 sq. mm. The samples are placed for two hours in a circulating air oven at 79 ± 3 degrees C.

(g) All outdoor exposure tests shall be 3 years in duration, whether the material is exposed or protected. Accelerated weathering procedures are not permitted.

* * * * *

Issued on August 29, 1995.

Ricardo Martinez,

Administrator.

[FR Doc. 95–21865 Filed 9–1–95; 8:45 am]

BILLING CODE 4910–59–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 672

[Docket No. 950206041–5041–01; I.D. 082895A]

Groundfish of the Gulf of Alaska; Pacific Cod with Jig and Pot Gear for Processing by the Inshore Component in the Central Regulatory Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Modification of a closure.

SUMMARY: NMFS is opening directed fishing for Pacific cod by vessels catching Pacific cod with jig and pot gear for processing by the inshore component in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to use the total allowable catch (TAC) for Pacific cod in this area.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), September 1, 1995, until 12 midnight, A.l.t., December 31, 1995.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, 907–586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the GOA exclusive economic zone is managed by NMFS according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

In accordance with § 672.20(c)(1)(ii)(B), the allocation of Pacific cod for the inshore component in the Central Regulatory Area of the GOA was established by the Final 1995 Harvest Specifications of Groundfish (60 FR 8470, February 14, 1995) as 41,085 metric tons (mt). The directed fishery for Pacific cod by vessels catching Pacific cod for processing by the inshore component in the Central Regulatory Area of the GOA was closed under § 672.20(c)(2)(ii) on March 22, 1995, in order to reserve amounts anticipated to be needed for incidental catch in other fisheries (60 FR 15521, March 24, 1995). NMFS has determined that as of August 8, 1995, 4,313 mt remain unharvested.

The Director, Alaska Region, NMFS, has determined that the 1995 TAC for Pacific cod for processing by the inshore component in the Central Regulatory Area of the GOA has not been reached. Therefore, NMFS is terminating the previous closure and is opening directed fishing for Pacific cod by vessels catching Pacific cod for processing by the inshore component in the Central Regulatory Area of the GOA. All other closures remain in full force and effect.

This action opens the directed fishery for Pacific cod by vessels catching Pacific cod with jig and pot gear for processing by the inshore component in the Central Regulatory Area of the GOA. Directed fishing for groundfish with hook-and-line and trawl gear is currently prohibited (60 FR 26694, May 18, 1995; 60 FR 37600, July 21, 1995; 60 FR 37601, July 21, 1995).

Classification

This action is taken under 50 CFR 672.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 29, 1995.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 95–21948 Filed 8–30–95; 3:43 pm]

BILLING CODE 3510–22–F

---

50 CFR Part 672

[Docket No. 950206041–5041–01; I.D. 082995A]

Groundfish of the Gulf of Alaska; Trawling in the Western Regulatory Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Inseason adjustment; request for comments.

SUMMARY: NMFS issues an inseason adjustment closing the season for all groundfish by vessels using trawl gear, except fishing for pollock by vessels using pelagic trawl gear, in the Western Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent overfishing of Pacific ocean perch (POP).

DATES: Effective 12 noon, Alaska local time (A.l.t.), September 1, 1995, until 12 midnight, A.l.t., December 31, 1995. Comments must be received no later than 4:30 p.m., A.l.t., September 18, 1995.

ADDRESSES: Comments may be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802, Attn. Lori Gravel, or be delivered to the fourth floor of the Federal Building, 709 West 9th Street, Juneau, AK.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, 907–586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the GOA exclusive economic zone is managed by NMFS according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

The Magnuson Act requires that conservation and management measures prevent overfishing. The 1995 overfishing level for POP in the Western Regulatory Area of the GOA is established by the final 1995 harvest specifications of groundfish (60 FR 8470, February 14, 1995) as 1,482 metric tons (mt). The directed fishery for POP closed in the Western Regulatory Area on July 20, 1995 (60 FR 37601, July 21, 1995). As of July 29, 1995, 1,420 mt of POP have been caught.

Substantial trawl fishing effort will be directed at remaining amounts of groundfish in the GOA during 1995. These fisheries can have significant catches of POP.

The Director, Alaska Region, NMFS, has determined, in accordance with § 672.22(a)(1)(i) and (a)(4), that closing the season by prohibiting directed fishing for all groundfish by vessels using trawl gear, except fishing for pollock by vessels using pelagic trawl gear, in the Western Regulatory Area of the GOA is necessary to prevent overfishing of POP and is the least restrictive measure to achieve that purpose. Without this prohibition of directed fishing, significant incidental catch of POP would occur by trawl vessels.

Therefore, NMFS is closing the season for all groundfish by vessels using trawl gear, except fishing for pollock by vessels using pelagic trawl gear, in the Western Regulatory Area of the GOA.

The Assistant Administrator for Fisheries, NOAA, finds for good cause that providing prior notice and public comment or delaying the effective date of this action is impracticable and contrary to the public interest. Without this inseason adjustment, POP in the Western Regulatory Area of the GOA will be overfished, jeopardizing the long-term capacity of that stock. Under § 672.22(c)(2), interested persons are invited to submit written comments on this action until September 18, 1995 (see **ADDRESSES**).

Classification

This action is taken under § 672.22 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 29, 1995.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 60, No. 171
Tuesday, September 5, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD08–95–017]

RIN 2115–AE47

Drawbridge Operation Regulation; Sabine River, LA

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of the Kansas City Southern Railway Company, the Coast Guard is proposing a change to the regulation governing the operation of the swing span railroad bridge over the Sabine River, mile 36.2 near Ruliff, Texas, by permitting the draw to remain closed to navigation at all times. The draw presently opens on call with 24 hours advance notice, however, there is no significant navigation on the waterway and there have been no requests to open the bridge for passage of marine traffic for over 44 years with the exception of a single request made in 1995.

DATES: Comments must be received on or before November 6, 1995.

ADDRESSES: Comments should be mailed to Commander(ob), Eighth Coast Guard District, 501 Magazine Street, New Orleans, Louisiana 70130–3396 or may be delivered to Room 1313 at the same address between 8 a.m. and 3:30 p.m., Monday through Friday except Federal holidays. The comments and other materials referenced in this notice will be available for inspection and copying in room 1313 at this address. Normal office hours are between 8 a.m. and 3:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. John Wachter, Bridge Administration Branch, (504) 589–2965.

SUPPLEMENTARY INFORMATION:

Request for Comments: Interested parties are invited to participate in the rulemaking by submitting written views, comments, or arguments. Persons submitting comments should include their names and addresses, identify the bridge and give the reason for concurrence with or any recommended change in this proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to Mr. John Wachter at the address under "**ADDRESSES**." The request should include reasons why a hearing would be beneficial. If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

The Commander, Eighth Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulation may be changed in the light of comments received.

Drafting Information. The drafters of this regulation are Mr. John Wachter, Project Officer and Lieutenant Elisa Holland, Project Attorney.

Background and Purpose: Upon request by the bridge owner, the Coast Guard is proposing to permit the draw of the swing span railroad bridge over the Sabine River, mil. 36.2, near Ruliff, TX to remain permanently closed. Navigation requiring openings is nonexistent and the bridge has not been opened for passage of navigation for 44 years.

Discussion of Proposed Rules

There is no commercial navigation on the waterway in the vicinity of the bridge crossing. Vertical clearance of the bridge in the closed position is 4 feet above mean high water and 18 feet above low water. The occasional small recreational boat which uses the waterway can transit the bridge without requiring an opening. The single request in 1995 was made for a boat that was constructed upstream of the bridge over a period of several years. The private individual that constructed the vessel needed to move it to the mouth of the river for sale to a prospective buyer. The bridges were opened to pass this vessel. There are no known similar projects planned. This bridge is on the KCS Main Line from Kansas City, Missouri to Beaumont and Houston, Texas and also forms an integral part of Union Pacific Railroad's transcontinental line from Los Angeles to New Orleans. This line carries over 30 million gross tons of freight each year. There is also a fiber optic cable mounted to the bridge which serves as part of a nationwide communications link. Permitting the permanent closure of the draw would result in a significant savings in maintenance costs and avoidance of an exorbitant cost of removing the cable with no adverse effect on navigational traffic.

Regulatory Evaluation

This proposal is not a significant regulatory action under Section 3(f) of Executive Order 12866 and does not require an assessment of potential cost and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040); February 26, 1979).

The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal, if adopted, will have a significant economic impact on a substantial number of small entities. "Small entities" may include (1) small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields and (2) government jurisdictions with populations of less than 50,000.

Since the proposed rule also considers the need of local commercial fishing vessels, the economic impact is expected to be minimal. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information: This rule contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism Implications: This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment: The Coast Guard considered the environmental impact of this proposal and concluded that, under section 2.B.2 of Commandant Instruction M16475.1B, this proposal is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons set out in the preamble, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g); section 117.255 also issued under the authority of Pub. L. 102–587, 106 Stat. 5039.

2. Section 117.493 is revised to read as follows:

§ 117.493 Sabine River.

(a) The draw of the Southern Pacific railroad bridge, mile 19.3 near Echo, shall open on signal if at least 24 hours notice is given.

(b) The draw of the Kansas City Southern Railway bridge, mile 36.2 near Ruliff and the draw of the S12 bridge, mile 40.8, at Starks, need not be opened for the passage of vessels.

Dated: August 16, 1995.

R.C. North,

Read Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[NC–71–1–6960b; FRL–5269–6]

Approval and Promulgation of Implementation Plans North Carolina: Approval of Revisions to the North Carolina State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On October 14, 1994, the State of North Carolina, through the North Carolina Department of Environment, Health and Natural Resources, submitted revisions to the North Carolina State Implementation Plan (SIP). This revision is the adoption of an amendment to an existing air quality rule that was the subject of public hearings held on March 28 and 30, 1994. In the final rules section of this **Federal Register**, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the EPA views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

DATES: To be considered, comments must be received by October 5, 1995.

ADDRESSES: Written comments on this action should be addressed to Mr. Randy Terry at the EPA Regional Office listed below.

Copies of the documents relative to this action are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the visiting day.

40 CFR Part 52

[AK–8–1–6733b; FRL–5286–9]

Approval and Promulgation of State Implementation Plans: Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the State of Oregon for the purpose of establishing a Small Business Stationary Source Technical and Environmental Compliance Assistance Program. The SIP revision was submitted by the State to satisfy the Federal mandate of the Clean Air Act (CAA), to ensure that small businesses have access to the technical assistance and regulatory information necessary to comply with the CAA. In the Final Rules Section of this **Federal Register**, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If the EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document.

DATES: Comments on this proposed rule must be received in writing by October 5, 1995.

ADDRESSES: Written comments should be addressed to Montel Livingston, Environmental Protection Specialist (AT–082), Air Programs Section, at the EPA Regional Office listed below.

Copies of the documents relevant to this proposed rule are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the visiting day.

40 CFR Part 52

[OR–31–1–5932b; FRL–5283–5]

Approval and Promulgation of State Implementation Plans: Oregon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the State of Oregon for the purpose of establishing a Small Business Stationary Source Technical and Environmental Compliance Assistance Program. The SIP revision was submitted by the State to satisfy the Federal mandate, found in Section 507 of the Clean Air Act. In the Final Rules Section of this **Federal Register**, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If the EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document.

DATES: Comments on this proposed rule must be received in writing by October 5, 1995.

ADDRESSES: Written comments should be addressed to Montel Livingston, Environmental Protection Specialist (AT–082), Air Programs Section, at the EPA Regional Office listed below. Copies of the documents relevant to this proposed rule are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the visiting day.

U.S. Environmental Protection Agency, Region 10, Air Programs Section, 1200 6th Avenue, Seattle, WA 98101.

Oregon Department of Environmental Quality, Air Quality Division, 811 SW Sixth Avenue, Portland, Oregon, 97204.

FOR FURTHER INFORMATION CONTACT: David Dellarco, Air Programs Branch (AT–082), EPA, 1200 6th Avenue, Seattle, WA 98101, (206) 553–4978.

SUPPLEMENTARY INFORMATION: See the information provided in the Direct Final action which is located in the Rules Section of this **Federal Register**.

Dated: August 8, 1995.

Charles Findley,

Acting Regional Administrator.

Approval and Promulgation of Air Quality Implementation Plans; West Virginia: Requirements for Determining Conformity of General Federal Actions to Applicable Air Quality Implementation Plans (General Conformity)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the State of West Virginia for the purpose of establishing the requirements for determining conformity of general federal actions to applicable air quality implementation plans (General Conformity). In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial SIP revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by October 5, 1995.

ADDRESSES: Comments may be mailed to Marcia L. Spink, Associate Director, Air Programs, Mail Code [illegible], U.S. Environmental Protection Agency, Region III, 841 C[illegible] Building, Philadelphia, Pennsylvania 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the EPA office listed above; and West Virginia Department of Environmental Protection, Office of Air Quality, 1558 Washington Street, East, Charleston, West Virginia, 25311.

FOR FURTHER INFORMATION CONTACT: Rose Quinto, (215) 597–3164, at the EPA Region III address above.

SUPPLEMENTARY INFORMATION: See the information provided in the Direct Final action of the same title (West Virginia General Conformity Rule) which is located in the Rules and Regulations Section of this **Federal Register**.

Clean Air Act Proposed Interim Approval of Operating Permits Program; Kentucky Natural Resources and Environmental Protection Cabinet

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed interim approval.

SUMMARY: The EPA proposes source category-limited interim approval of the operating permits program submitted by the Kentucky Natural Resources and Environmental Protection Cabinet (NREPC) for the purpose of complying with Federal requirements which mandate that states develop, and submit to EPA, programs for issuing operating permits to all major stationary sources, and to certain other sources.

DATES: Comments on this proposed action must be received in writing by October 5, 1995.

ADDRESSES: Written comments on this action should be addressed to Carla E. Pierce, Chief, Air Toxics Unit/Title V Program Development Team, Air Programs Branch, at the EPA Region 4 office listed below. Copies of Kentucky's submittal and other supporting information used in developing the proposed interim approval are available for inspection during normal business hours at the following location:

Environmental Protection Agency, Region 4 Air Programs Branch, 345 Courtland Street, NE, Atlanta, Georgia 30365.

Division for Air Quality, Department for Environmental Protection, Natural Resources and Environmental Protection Cabinet, 803 Schenkel Lane, Frankfort, Kentucky 40601.

FOR FURTHER INFORMATION CONTACT: Yolanda Adams, Title V Program Development Team, Air Programs Branch, Air, Pesticides & Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 345 Courtland Street, NE, Atlanta, Georgia 30365, (404) 347–3555, Ext. 4149.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

A. Introduction

As required under title V of the Clean Air Act Amendments (sections 501–507 of the Clean Air Act ("the Act")), EPA has promulgated rules which define the minimum elements of an approvable state operating permits program and the corresponding standards and procedures by which the EPA will approve, oversee, and withdraw approval of state operating permits programs (see 57 FR 32250 (July 21, 1992)). These rules are codified at 40 Code of Federal Regulations (CFR) part 70. Title V requires states to develop, and submit to EPA, programs for issuing these operating permits to all major stationary sources and to certain other sources.

The Act requires that states develop and submit these programs to EPA by November 15, 1993, and that EPA act to approve or disapprove each program within one year after receiving the submittal. If the state's submission is materially changed during the one-year review period, 40 CFR 70.4(e)(2) allows EPA to extend the review period for no more than one year following receipt of the additional material. EPA received Kentucky's title V operating permit program submittal on January 18, 1994. The Commonwealth provided EPA with additional material in supplemental submittals dated November 15, 1994, April 14, 1995, May 3, 1995, and May 22, 1995. Because these supplements materially changed the Commonwealth's title V program submittal, EPA has extended the review period and will work expeditiously to promulgate a final decision on Kentucky's program.

The EPA's program review occurs pursuant to section 502 of the Act and the part 70 regulations, which together outline criteria for approval or disapproval. Where a program substantially, but not fully, meets the requirements of Part 70, EPA may grant the program interim approval for a period of up to two years. Where a state requests source category-limited interim approval and demonstrates compelling reasons in support thereof, the EPA may also grant such an interim approval. If EPA has not fully approved a program by two years after the November 15, 1993 date, or by the end of an interim program, it must establish and implement a Federal program.

B. Federal Oversight and Sanctions

If EPA were to finalize this proposed source category-limited interim approval, it would extend for two years following the effective date of final interim approval, and could not be renewed. During the interim approval period, the Commonwealth of Kentucky would be protected from sanctions, and EPA would not be obligated to promulgate, administer and enforce a Federal permits program for the Commonwealth of Kentucky. Permits issued under a program with interim approval have full standing with respect to part 70, and the 1-year time period for submittal of permit applications by subject sources begins upon the effective date of interim approval, as does the 3-year time period for processing the initial permit applications.

Following final interim approval, if the Commonwealth of Kentucky failed to submit a complete corrective program for full approval by the date 6 months before expiration of the interim approval, EPA would start an 18-month clock for mandatory sanctions. If the Commonwealth of Kentucky then failed to submit a corrective program that EPA found complete before the expiration of that 18-month period, EPA would be required to apply one of the sanctions in section 179(b) of the Act, which would remain in effect until EPA determined that the Commonwealth of Kentucky had corrected the deficiency by submitting a complete corrective program. Moreover, if the Administrator found a lack of good faith on the part of the Commonwealth of Kentucky, both sanctions under section 179(b) would apply after the expiration of the 18-month period until the Administrator determined that the Commonwealth of Kentucky had come into compliance. In any case, if, six months after application of the first sanction, Kentucky still had not submitted a corrective program that EPA found complete, a second sanction would be required.

If, following final interim approval, EPA were to disapprove Kentucky's complete corrective program, EPA would be required to apply one of the section 179(b) sanctions on the date 18 months after the effective date of the disapproval, unless prior to that date Kentucky had submitted a revised program and EPA had determined that it corrected the deficiencies that prompted the disapproval. Moreover, if the Administrator found a lack of good faith on the part of the Commonwealth of Kentucky, both sanctions under section 179(b) would apply after the expiration of the 18-month period until the Administrator determined that the Commonwealth of Kentucky had come into compliance. In all cases, if, six months after EPA applied the first sanction, Kentucky had not submitted a revised program that EPA had determined corrected the deficiencies that prompted disapproval, a second sanction would be required.

In addition, discretionary sanctions may be applied where warranted any time after the end of an interim approval period if Kentucky has not timely submitted a complete corrective program or EPA has disapproved a submitted corrective program. Moreover, if EPA has not granted full approval to Kentucky's program by the expiration of an interim approval and that expiration occurs after November 15, 1995, EPA must promulgate, administer and enforce a Federal permits program for the Commonwealth of Kentucky upon interim approval expiration.

II. Proposed Action and Implications

A. Analysis of State Submission

The Commonwealth of Kentucky has requested source category-limited interim approval of its part 70 operating permits program. EPA has concluded that the operating permit program submitted by Kentucky substantially meets the requirements of title V and part 70, and proposes to grant source category-limited interim approval to the program. For detailed information on the analysis of Kentucky's submission, please refer to the Technical Support Document (TSD) contained in the docket at the address noted above.

1. Support Materials

Pursuant to section 502(d) of the Clean Air Act as amended (1990 Amendments), the Governor of each state must develop and submit to the Administrator an operating permits program under state or local law or under an interstate compact meeting the requirements of title V of the Act. Kentucky submitted, under the signature of Governor Brereton C. Jones, the operating permits program, prepared by the NREPC, to be implemented in all areas of the Commonwealth of Kentucky, except Jefferson County. Kentucky has requested that the EPA approve its operating permit program as a source category-limited interim program for a period of two years.

The Kentucky Federal Operating Permits program description, Section II of the submittal, addresses 40 CFR 70.4(b)(1) by describing how the NREPC intends to carry out its responsibilities under the part 70 regulations. This program description has been deemed to be appropriate for meeting the requirement of 40 CFR 70.4(b)(1).

Pursuant to 40 CFR 70.4(b)(3), the Governor is required to submit a legal opinion from the attorney general (or the attorney for the state air pollution control agency that has independent legal counsel) demonstrating adequate authority to carry out all aspects of a title V operating permits program. The Commissioner of the Department of Law, who qualifies as independent legal counsel for the Kentucky Natural Resources and Environmental Protection Cabinet, submitted such an opinion in Section IV of the submittal, demonstrating adequate legal authority as required by Federal law and regulation for interim approval.

Section 70.4(b)(4) requires the submission of relevant permitting program documentation not contained in the regulations, such as permit application forms, permit forms and relevant guidance to assist in the implementation of the permit program. Section V of the NREPC submittal includes the permit application form with instructions, and Section 4 of the Title V Addendum includes a model permit. It has been determined that the application forms and model permit substantially meet the requirements of 40 CFR 70.5(c).

2. Regulations and Program Implementation

The Commonwealth of Kentucky has submitted Rule 401 KAR 50:034, "Permit Application Form", Rule 401 KAR 50:035, "Permits," and Rule 401 KAR 50:038, "Air Emissions Fee," for implementing the Kentucky part 70 program as required by 40 CFR 70.4(b)(2). Sufficient evidence of their procedurally correct adoption is included in Sections 1 and 4 of Kentucky's Title V Plan Addendum. Copies of all applicable Commonwealth statutes and regulations which authorize the part 70 program, including those governing Commonwealth administrative procedures, were submitted with Kentucky's program.

The Kentucky program, in Rule 401 KAR 50:035 Section 2, substantially meets the requirements of 40 CFR 70.2 and 70.3 with regard to applicability. However, Kentucky's definitions of "emissions unit", and "stationary source" do not include emissions of any pollutant listed under section 112(b) of the Act. Therefore, Kentucky's program does not require emissions of all hazardous air pollutants (HAP) listed pursuant to section 112(b) to be counted for major source applicability. The pollutants listed in section 112(b) are not considered regulated air pollutants until addressed by an applicable requirement, such as a maximum achievable control technology (MACT) standard; therefore, this omission in Kentucky's definitions prevents issuance of permits to sources that emit section 112(b) pollutants which are not yet covered by an applicable requirement. In addition, Kentucky's definition of "regulated air pollutant" found in 401 KAR 50:035, Section 1(28)(a)4., omits the phrase in the part 70 definition of regulated air pollutant "* * * or other requirements established under Section 112 of the Act,* * *"; therefore, Kentucky's program does not require permits for all major sources. Since these omissions in Kentucky's definitions could cause certain part 70 major sources to be exempted from the permit process, Kentucky's program is eligible for receiving source category-limited interim approval (SCL).

Section 503(c) of the Act requires that permitting authorities, including those implementing an interim program, establish a schedule for issuing the permits subject to the program such that "at least one-third of such permits will be acted on by such authority annually over a period not to exceed 3 years after such effective date." By rulemaking, the EPA spelled out an option by which it can make SCL interim approval. Thus, although the State is required to issue permits within 3 years to all sources subject to the interim approval, some sources will not be subject to the requirement to obtain a permit until full approval is granted. Because those part 70 sources not addressed until the full approval are also subject to the 3-year phase-in required by section 503(c), completion of the initial permitting of all part 70 sources might not be completed until as late as 5 years after the granting of interim approval.

Kentucky submitted a request dated May 22, 1995, for the EPA to grant SCL interim approval of its part 70 operating permit program. The EPA policy memo from John Seitz, Director of the Office of Air Quality Planning and Standards dated August 2, 1993, entitled "Interim Title V Program Approvals" establishes the criteria for granting interim approvals. EPA can grant SCL interim approval to states whose programs do not provide for permitting all required sources if the state makes a showing that two criteria were met: (1) That there were "compelling reasons" for the exclusions and (2) that all required sources will be permitted on a schedule that "substantially meets" the requirements of part 70.

EPA considers the omissions in Kentucky's definitions of "emissions unit", "stationary source", and "regulated air pollutant", as compelling reasons for granting SCL interim approval. Kentucky's SCL interim approval request included a revised transition schedule that demonstrates the Commonwealth will permit at least 60% of its sources and at least 80% of its emissions during the first three years. The revised transition plan demonstrates that all part 70 sources will be permitted on a schedule that substantially meets the requirements of part 70.

The EPA is therefore proposing to grant Kentucky SCL interim approval.

SCL interim approval will allow Kentucky to implement the revised transition schedule to permit all part 70 sources during the transition period after the permit regulations have been revised. Revision of the aforementioned definitions is a condition of full program approval.

Kentucky's program meets the following requirements set out in EPA's part 70 operating permits program review. These requirements are addressed in Kentucky's Rule 401 KAR 50:035 as follows: (A) Permit applications (40 CFR 70.5), Section 3; (B) Provisions for permit content (40 CFR 70.6), Section 4; (C) Operational flexibility provisions (40 CFR 70.4(b)(12)), Sections 4 and 6; (D) Provisions for permit renewals, reopenings, and public participation (40 CFR 70.7), Sections 5, 6, and 7; (E) Permit review by EPA and affected states (40 CFR 70.8), Sections 8 and 9. The Kentucky Revised Statutes, Chapter 224, satisfy the requirements of 40 CFR 70.11 for enforcement authority. The Kentucky program substantially meets the requirements of 40 CFR 70.7 with regard to permit issuance and revisions. Rule 401 KAR 50:035 Section 5(2)(a) allows for the incorporation of a preconstruction permit into the title V permit as an administrative amendment. Section 1(3)(e) defines administrative amendment as a revision to a permit that incorporates into the part 70 permit requirements from preconstruction review permits, if the preconstruction review meets procedural requirements substantially equivalent to those that would be applicable to the change if it were subject to review as a permit revision (i.e., requirements of 40 CFR 70.7 and 70.8). Even though Section 5(2)(a) details the actual procedural requirements necessary to incorporate preconstruction permits into part 70 permits, it does not provide for EPA review consistent with 40 CFR 70.8. For full approval of the Commonwealth's program, Kentucky would need to revise Rule 401 KAR 50:035 Section 5(2)(a) to provide for EPA review consistent with 40 CFR 70.8.

Section 70.4(b)(2) requires states to include in their part 70 programs any criteria used to determine insignificant activities or emission levels for the purposes of determining complete applications. Section 70.5(c) states that an application for a part 70 permit may not omit information needed to determine the applicability of, or to impose, any applicable requirement, or to evaluate appropriate fee amounts. Section 70.5(c) also states that EPA may approve, as part of a state program, a list of insignificant activities and emissions levels which need not be included in permit applications. Under part 70, a state must request and EPA may approve as part of that state's program any activity or emission level that the state wishes to consider insignificant.

Kentucky establishes criteria for insignificant activities in Rule 401 KAR 50:035, Subsection 2(3); however, these criteria require that all activities be included in the application. By requiring description in the application, Kentucky's rule nullifies the effect of allowing for insignificant activities as contemplated by the part 70 rule, which would allow no or minimal description in the application. Since part 70 does not require a State to establish provisions for insignificant activities, this does not create a program approval issue. However, Kentucky has indicated to EPA that it plans to revise these provisions to take advantage of the flexibility allowed by Part 70. EPA will evaluate such revisions when they are submitted.

Part 70 of the operating permits regulations requires prompt reporting of deviations from the permit requirements. Section 70.6(a)(3)(iii)(B) requires the permitting authority to define prompt in relation to the degree and type of deviation likely to occur and the applicable requirements. Although the permit program regulations should define prompt for purposes of administrative efficiency and clarity, an acceptable alternative is to define prompt in each individual permit. EPA believes that prompt should generally be defined as requiring reporting within two to ten days of the deviation. Two to ten days is sufficient time in most cases to protect public health and safety as well as to provide a forewarning of potential problems. For sources with a low level of excess emissions, a longer time period may be acceptable. However, prompt reporting must be more frequent than the semiannual reporting requirement, given that this is a distinct reporting obligation under 40 CFR 70.6(a)(3)(iii)(A). Where "prompt" is defined in the individual permit but not in the program regulations, EPA may veto permits that do not require sufficiently prompt reporting of deviations. Rule 401 KAR 50:035, Subsection 4(1)(c)3.b. states that Kentucky will define prompt reporting in the permit in relation to the degree and type of deviation likely to occur and the applicable requirements.

Subsection 2(6) of Kentucky's general compliance requirements regulation, Rule 401 KAR 50:055, provides the Commonwealth the authority to grant individual variances for opacity standards for emissions from a stack or a control device. The Commonwealth provides that it will grant this variance upon a demonstration by the owner or operator that the affected facility and associated air pollution control equipment were operated and maintained in a manner to minimize the opacity of emissions during the performance tests. The EPA regards this provision as wholly external to the program submitted for approval under Part 70, and consequently proposes to take no action on these provisions of Commonwealth law in this rulemaking. The EPA does not recognize the ability of a permitting authority to grant relief from the duty to comply with a Federally enforceable part 70 permit, except where such relief is granted through procedures allowed by part 70. In other words, a variance does not affect the title V source until the title V permit is modified pursuant to the procedures in part 70. EPA reserves the right to enforce the terms of the part 70 permit where the permitting authority purports to grant relief from the duty to comply with a Part 70 permit in a manner inconsistent with Part 70 procedures. A part 70 permit may also incorporate, via part 70 permit issuance or modification procedures, the schedule of compliance set forth in a variance. However, EPA reserves the right to pursue enforcement of applicable requirements notwithstanding the existence of a compliance schedule in a permit to operate. This is consistent with 40 CFR 70.5(c)(8)(iii)(C), which states that a schedule of compliance "shall be supplemental to, and shall not sanction noncompliance with. the applicable requirements on which it is based."

The complete Kentucky operating permits program submittal and the TSD are available for review for more detailed information. The TSD contains the detailed analysis of Kentucky's program and describes the manner in which Kentucky's program meets all of the operating permit program requirements of 40 CFR part 70.

3. Permit Fee Demonstration

Section 502(b)(3) of the Act requires that each permitting authority collect fees sufficient to cover all reasonable direct and indirect costs required to develop and administer its title V operating permits program. Each title V program submittal must contain either a detailed demonstration of fee adequacy or a demonstration that aggregate fees collected from title V sources meet or exceed $25 per ton per year (Consumer Price Index (CPI) adjusted from 1989). The $25 per ton amount is presumed, for program approval, to be sufficient to cover all reasonable program costs and is thus referred to as the "presumptive minimum."

Kentucky has opted to adopt an approach similar to the "presumptive minimum" of $25/ton (annually adjusted by the CPI) approach. Emission fees will be collected from all sources subject to title V for actual emissions of each regulated pollutant, except carbon monoxide. Also, fees will be assessed on the first 4,000 tons per regulated pollutant per facility. A minimum fee of $150 is assessed for sources emitting less than 25 tons per year.

A unique feature of the Kentucky emission fee is that the amount of fee to be collected is established in regulation. Kentucky Rule 401 KAR 50:038 provides for the collection of $6,594,700 during state fiscal year 1995–96. It further provides the authority to collect an amount during each subsequent fiscal year, increased in direct proportion to the CPI if needed to fund the program. While this guarantees that Kentucky will continue to have the funds necessary to operate the title V program at a level at least equal to the 1995–96 level, it does not guarantee that the cost per ton of emissions will increase at a rate equal to the CPI.

For 1995–96, Kentucky estimates the total billable emissions to be 211,919 tons. Based upon that estimate, the average cost per ton for all sources, including any non-major sources subject to the title V program, in 1995–96 will be $31.19 per ton. If the fee was collected only from major sources, the estimated cost per ton would be $34.32 per ton. Kentucky has demonstrated that the fees collected will be sufficient to administer the program.

4. Provisions Implementing the Requirements of Other Titles of the Act

a. Authority and/or Commitments for Section 112 Implementation. Kentucky has demonstrated in its title V program submittal broad legal authority to incorporate into permits and enforce all applicable requirements. This legal authority is contained in Kentucky's enabling legislation and in regulatory provisions defining "applicable requirements" and stating that the permit must incorporate all applicable requirements. Kentucky has further supplemented its broad legal authority with a commitment to "take action, following promulgation by EPA of regulations implementing section 112 of Title III of the Clean Air Act to either incorporate such new or revised provisions by reference into Kentucky rules or submit Kentucky-drafted rules, for EPA approval, to implement these provisions." EPA has determined that this commitment, in conjunction with Kentucky's broad statutory and regulatory authority, adequately assures compliance with all section 112 requirements. EPA regards this commitment as an acknowledgement by Kentucky of its obligation to obtain further regulatory authority as needed to issue permits that assure compliance with section 112 applicable requirements. This commitment does not substitute for compliance with part 70 requirements that must be met at the time of program approval.

EPA is interpreting the above legal authority and commitment to mean that Kentucky is able to carry out all section 112 activities. For further rationale on this interpretation, please refer to the Technical Support Document accompanying this proposed interim approval.

b. Implementation of Section 112(g) Upon Program Approval. EPA issued an interpretive notice on February 14, 1995 (60 FR 8333), which outlines EPA's revised interpretation of section 112(g) applicability. The notice postpones the effective date of section 112(g) until after EPA has promulgated a rule addressing that provision. The notice sets forth in detail the rationale for the revised interpretation.

The section 112(g) interpretative notice explains that EPA is considering whether the effective date of section 112(g) should be delayed beyond the date of promulgation of the Federal rule so as to allow states time to adopt rules implementing the Federal rule, and that EPA will provide for any such additional delay in the final section 112(g) rulemaking. Unless and until EPA provides for such an additional postponement of section 112(g), Kentucky must have a Federally enforceable mechanism for implementing section 112(g) during the period between promulgation of the Federal section 112(g) rule and adoption of implementing Commonwealth regulations.

EPA is aware that Kentucky lacks a program designed specifically to implement section 112(g). However, Kentucky does have a preconstruction review program within its permits rule that can serve as an adequate implementation vehicle during the defined transition period because it would allow the Commonwealth to select control measures that would meet MACT, as defined in section 112, and incorporate these measures into a Federally enforceable preconstruction permit.

For this reason, EPA proposes to approve the use of Kentucky's preconstruction review program found in Rule 401 KAR 50:035, under the authority of title V and part 70, solely for the purpose of implementing section 112(g) to the extent necessary during the transition period between section 112(g) promulgation and adoption of a Commonwealth rule implementing EPA's section 112(g) regulations. Although section 112(l) generally provides authority for approval of state air programs to implement section 112(g), title V and section 112(g) provide for this limited approval because of the direct linkage between the implementation of section 112(g) and title V. The scope of this approval is narrowly limited to section 112(g) and does not confer or imply approval for purpose of any other provision under the Act (e.g., section 110). This approval will be without effect if EPA decides in the final section 112(g) rule that sources are not subject to the requirements of the rule until Commonwealth regulations are adopted. The duration of this approval is limited to 18 months following promulgation by EPA of the section 112(g) rule to provide adequate time for the Commonwealth to adopt regulations consistent with the Federal requirements.

c. Program for Delegation of Section 112 Standards as Promulgated. Requirements for approval, specified in 40 CFR 70.4(b), encompass section 112(l)(5) requirements for approval of a program for delegation of section 112 standards as promulgated by EPA as they apply to part 70 sources. Section 112(l)(5) requires that the Commonwealth's program contain adequate authorities, adequate resources for implementation, and an expeditious compliance schedule, which are also requirements under part 70. Therefore, EPA is also proposing to grant approval under section 112(l)(5) and 40 CFR 63.91 of the Commonwealth's program for receiving delegation of future section 112 standards that are unchanged from the Federal standards as promulgated. In addition, EPA proposes delegation of all existing standards and programs under 40 CFR parts 61 and 63 for part 70 sources and non-part 70 sources.[1]

---

[1] The radionuclide National Emission Standards for Hazardous Air Pollutant (NESHAP) is a section 112 regulation and therefore, also an applicable requirement under the State operating permits program for part 70 sources. There is not yet a Federal definition of "major" for radionuclide sources. Therefore, until a major source definition for radionuclide is promulgated, no source would be a major section 112 source solely due to its radionuclide emissions. However, a radionuclide source may, in the interim, be a major source under part 70 for another reason, thus requiring a part 70 permit. The EPA will work with the State in the development of its radionuclide program to ensure that permits are issued in a timely manner.

Kentucky has informed EPA that it intends to accept delegation of section 112 standards through adoption by reference. The details of the Commonwealth's use of these delegation mechanisms are set forth in a letter dated April 14, 1995, submitted by Kentucky as a title V program addendum.

d. Commitment to implement Title IV of the Act. The Commonwealth of Kentucky developed acid rain permit regulations as Rule 401 KAR 50:072, which was submitted to EPA on April 19, 1995, as part of the operating permits program. The Commonwealth also submitted standard acid rain permit application forms which will be revised as updated forms are provided by the EPA. These rules and permit application forms meet the requirements of the acid rain program.

B. Proposed Actions

1. Source Category-Limited Interim Approval

The EPA is proposing to grant SCL interim approval to the operating permit program submitted by Kentucky on December 27, 1993, and as supplemented on November 15, 1994, April 14, 1995, May 3, 1995, and May 22, 1995. If this approval is promulgated, the State must make the following changes to receive full approval: (1) Revise the definitions of "emissions unit" and "stationary source" to include emissions of any pollutant listed under section 112(b) of the Act; (2) revise the definition of "regulated air pollutant" to include any pollutant subject to any requirements established under section 112 of the Act; and (3) revise Rule 401 KAR 50:035 section 5(2)(a) to provide for EPA review consistent with 40 CFR 70.8. in order to allow for requirements from preconstruction review permits to be incorporated into part 70 permits via administrative amendments.

This interim approval, which may not be renewed, extends for a period of up to 2 years. During the interim approval period, the Commonwealth is protected from sanctions for failure to have a program, and EPA is not obligated to promulgate a Federal permits program in the Commonwealth. Permits issued under a program with interim approval have full standing with respect to Part 70, and the 1-year time period for submittal of permit applications by subject sources begins upon interim approval, as does the 3-year time period for processing the initial permit applications.

2. Program for Straight Delegation of Section 112 Standards

As discussed above in section II.A.4.c, EPA is proposing to grant approval under section 112(l)(5) and 40 CFR 63.91 of the Commonwealth's program for receiving delegation of future section 112 standards that are unchanged from Federal standards as promulgated. Additionally, EPA is proposing to delegate existing standards and programs under 40 CFR parts 61 and 63 for part 70 sources and non-part 70 sources.

III. Administrative Requirements

A. Request for Public Comments

The EPA is requesting comments on all aspects of this proposed interim approval. Copies of the Commonwealth's submittal and other information relied upon for the proposed interim approval are contained in docket number KY–95–01 maintained at the EPA Regional Office. The docket is an organized and complete file of all the information submitted to, or otherwise considered by, EPA in the development of this proposed interim approval. The principal purposes of the docket are:

(1) To allow interested parties a means to identify and locate documents so that they can effectively participate in the approval process, and

(2) To serve as the record in case of judicial review. The EPA will consider any comments received by October 5, 1995.

B. Executive Order 12866

The Office of Management and Budget has exempted this action from Executive Order 12866 review.

C. Regulatory Flexibility Act

The EPA's actions under section 502 of the Act do not create any new requirements, but simply address operating permits programs submitted to satisfy the requirements of 40 CFR part 70. Because this action does not impose any new requirements, it does not have a significant impact on a substantial number of small entities.

D. Unfunded Mandates

Under section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated costs to state, local, or tribal governments in the aggregate; or to the private sector, of $100 million or more. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the proposed approval action promulgated today does not include a Federal mandate that may result in estimated costs of $100 million or more to either state, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new Federal requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401–7671q.

Dated: August 22, 1995.

Patrick M. Tobin,
Acting Regional Administrator.

40 CFR Part 372

[OPPTS–400096; FRL–4970–5]

Diethyl Phthalate; Toxic Chemical Release Reporting; Community Right-to-Know

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is granting a petition by proposing to delete diethyl phthalate (DEP) from the list of chemicals subject to reporting requirements under section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) and section 6607 of the Pollution Prevention Act of 1990 (PPA). Specifically, EPA is proposing to delete DEP because the Agency has preliminarily concluded that it meets the deletion criteria of EPCRA section 313(d)(3).

DATES: Written comments on this proposed rule must be received by EPA on or before November 6, 1995.

ADDRESSES: Written comments should be submitted in triplicate to: OPPT Docket Clerk, TSCA Nonconfidential Information Center (NCIC), (7407), Environmental Protection Agency, Rm. NE–B607, 401 M St., SW., Washington, DC 20460. Comments should include the docket control number for this proposal, OPPTS–400096.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: ncic@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number OPPTS–400096. No CBI should be submitted through e-mail. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in Unit VI. of this document.

FOR FURTHER INFORMATION CONTACT: Maria J. Doa, Petitions Coordinator, 202–260–9592, e-mail: doa.maria@epamail.epa.gov, for specific information on this proposed rule, or for more information on EPCRA section 313, the Emergency Planning and Community Right-to-Know Hotline, Environmental Protection Agency, Mail Code 5101, 401 M St., SW., Washington, DC 20460, Toll free: 1–800–535–0202, in Virginia and Alaska: 703–412–9877 or Toll free TDD: 1–800–553–7672.

SUPPLEMENTARY INFORMATION:

I. Introduction

A. Statutory Authority

This action is taken under sections 313(d) and (e)(1) of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), 42 U.S.C. 11023. EPCRA is also referred to as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA) (Pub. L. 99–499).

B. Background

Section 313 of EPCRA requires certain facilities manufacturing, processing, or otherwise using listed toxic chemicals to report their environmental releases of such chemicals annually. Beginning with the 1991 reporting year, such facilities must also report pollution prevention and recycling data for such chemicals, pursuant to section 6607 of the Pollution Prevention Act (42 U.S.C. 13106). Section 313 established an initial list of toxic chemicals that was comprised of more than 300 chemicals and 20 chemical categories. DEP was included in the initial list of chemicals and chemical categories. Section 313(d) authorizes EPA to add chemicals to or delete chemicals from the list, and sets forth criteria for these actions. Under section 313(e)(1), any person may petition EPA to add chemicals to or delete chemicals from the list. EPA has added and deleted chemicals from the original statutory list. Pursuant to EPCRA section 313(e)(1), EPA must respond to petitions within 180 days either by initiating a rulemaking or by publishing an explanation of why the petition has been denied.

EPA issued a statement of petition policy and guidance in the **Federal Register** of February 4, 1987 (52 FR 3479), to provide guidance regarding the recommended content and format for petitions. On May 23, 1991 (56 FR 23703), EPA issued a statement of policy and guidance regarding the recommended content of petitions to delete individual members of the section 313 metal compound categories. EPA has published a statement clarifying its interpretation of the section 313(d)(2) and (3) criteria for adding and deleting chemicals from the section 313 toxic chemical list (November 30, 1994; 59 FR 61439).

II. Description of Petition and General Information

On February 7, 1995, the Fragrance Materials Association petitioned the Agency to delete DEP (Chemical Abstract Service (CAS) No. 84–66–2) from the EPCRA section 313 list of toxic chemicals. The petitioner contends that DEP, which is mainly used as a plasticizer, should be deleted from the EPCRA section 313 list because it does not meet any of the EPCRA section 313(d)(2) criteria.

DEP is listed on several environmental statutory lists other than EPCRA. It is on the list of hazardous substances (40 CFR 302.4) under section 102(a) of the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9601–9675) with a reportable quantity of 1,000 pounds and is listed under section 3001 of the Resource Conservation and Recovery Act (42 U.S.C. 6921). In addition, DEP is a priority water pollutant under section 307(a) of the Clean Water Act (33 U.S.C. 1317).

III. EPA's Technical Review of DEP

The technical review of the petition to delete DEP includes an analysis of production, release, health and environmental effects, and exposure and fate (Refs. 1, 2, 3, 4, and 5).

A. Chemistry.

DEP has low volatility (boiling point: 295 °C; vapor pressure: 0.00165 torr), and high water solubility (1 gram/liter (g/L)).

B. Toxicological Evaluation

1. *Absorption and metabolism.* There is evidence from a toxicity study that DEP is absorbed from the gastrointestinal tract. There are no data on lung absorption of DEP following inhalation. A dermal absorption study using rats indicated that 50 percent of the dermal dose was absorbed in 7 days. *In vitro* studies indicate that the major metabolite of DEP is the monoester.

2. *Acute toxicity.* DEP has low acute toxicity. The oral median lethal dose (LD_{50}) in rabbits is 1 gram/kilogram (g/kg); intraperitoneal LD_{50} values in rats and mice are greater than 5.6 and 2.8 g/kg, respectively.

3. *Carcinogenicity.* There is insufficient evidence to reasonably anticipate that DEP would cause cancer in humans. In a National Toxicology Program dermal bioassay, there was no evidence of carcinogenicity in male and female rats. However, there were increased incidences of hepatocellular adenomas (benign tumors) in male and female mice. These findings were considered equivocal because: (1) The incidence of hepatocellular neoplasms in control and dosed males was within the historical range; and (2) in the females, there was no clear dose-response relationship. In an initiation-promotion study, there was no evidence of initiating activity of DEP in male mice.

4. *Mutagenicity.* The overall weight of evidence from several mutagenicity assays indicates that DEP is not of concern for mutagenicity. DEP did not induce gene mutations in prokaryotes or chromosome mutations in mammalian cells in culture. The only positive mutagenicity data are for DNA effects (sister chromatid exchanges) in mammalian cells in culture.

5. *Systemic toxicity.* Based on subchronic and chronic feeding studies in rats, DEP has low systemic toxicity. Body weight loss was the primary effect in all available studies and it was seen only at the highest dose, 5 percent of the diet or approximately 3,160 milligrams/kilogram/day (mg/kg/day). The no-observed-adverse-effect-level (NOAEL) was 750 mg/kg/day.

6. *Developmental/reproductive toxicity.* The available animal data indicate that DEP does cause developmental effects, but only at high doses (greater than 3,000 mg/kg/day). The reproductive effects seen in

animals, also at high doses, were not biologically significant.

Supernumerary ribs were noted in the offspring of rats fed DEP in the diet at 5 percent concentration (about 3,210 mg/kg/day). The NOAEL for developmental toxicity was 2.5 percent of the diet (about 1,910 mg/kg/day), and the NOAEL for maternal toxicity was about 0.25 percent of the diet (about 200 mg/kg/day). In another study, supernumerary ribs and other skeletal abnormalities were noted in rats administered 568, 1,136, and 1,793 mg/kg of DEP intraperitoneally on gestation days 5, 10, and 15. This study is limited, however, because the animals were not dosed throughout gestation.

In a reproduction study in mice, dietary administration of DEP at 2.5 percent of the diet (approximately 3,750 mg/kg/day) produced decreases in sperm concentration and body weight, and increases in prostate weight in the F$_1$ generation. There was no biologically significant impairment of fertility or development after fertilization. Therefore, the highest dose tested, 2.5 percent of the diet, was considered as the NOAEL for reproductive effects.

7. *Neurotoxicity*. There are no data to support a concern for neurotoxicity.

8. *Environmental effects*. DEP does not pose a significant environmental hazard. It exhibits low toxicity to aquatic organisms and it is not likely to bioconcentrate. The fish 96–hr median lethal concentration (LC$_{50}$) values range from 12 to 110 milligrams/liter (mg/l). Daphnid 48-hr LC$_{50}$ values range from 50 to 90 mg/l, and algae 96–hr median effective concentration (EC$_{50}$) values range from 30 to 86 mg/l. The bioconcentration factor (BCF) in fish is 117, which indicates low bioconcentration potential. In the environment, DEP will undergo hydrolysis to the monoester, which is less toxic than DEP to aquatic organisms.

C. Production, Use and Release

DEP is produced by refluxing one equivalent of phthalic anhydride with a greater than two-fold excess of ethanol in the presence of one percent of concentrated sulfuric acid. The U. S. production volume in 1989 was 11 million kilograms (24.2 million pounds) with an estimated annual import volume of 100,000 kilograms (220,000 pounds). The primary use of DEP (90 percent consumption) is as a plasticizer for cellulose-based products used in making recording tapes, photographic films, food wrap, and molded and extruded plastic articles. It is also used as a carrier or fixative in cosmetics in concentrations ranging from 0.1 percent to 50 percent. In addition, DEP is also used in solvents, varnishes, dyes, coating agents for foodstuffs, and insect repellents.

The Toxic Release Inventory (TRI) data indicate that during 1993 a total of 159,386 pounds of DEP were released to the environment. Of that total, 93,471 pounds were released to air, 260 pounds were released to water, and 505 pounds were released to land. In addition, a total of 851,894 pounds of DEP were transferred to various off-site locations. Of that total, 302,115 pounds were transferred to public owned treatment works (POTWs) prior to being discharged to surface waters.

D. Exposure and Fate Analysis

The two principal and relevant fate processes for DEP in the environment are reaction with photochemically-generated hydroxyl radicals in the atmosphere and aerobic biodegradation in soil and water. A half-life of 22.2 hours at 25 °C was estimated from reaction of DEP vapor with photochemically-generated hydroxyl radicals. When DEP is aerobically biodegraded in a semicontinuous activated sludge system (SCAS), greater than 95 percent was degraded in 24 hours. In a screening test, a half-life of 2.2 days was measured when DEP is incubated with a mixed microbial population. Removal of DEP by anaerobic biodegradation, oxidation, chemical hydrolysis, and direct photolysis, as well as, from volatilization and bioaccumulation in aquatic organisms should not be significant.

Because DEP has low chronic mammalian toxicity, the Agency conducted an exposure assessment for chronic human exposure. Nationwide releases to air and surface water retrieved from the TRI data base were modeled using TRIAIR and TRIWATER models.

Based on 1992 TRI data, the highest estimated DEP air concentration to which people are expected to be exposed is 3.5 micrograms/cubic meter (ug/m^3); about 129 people live in the area in which this concentration is expected to occur. The Lifetime Average Daily Potential Dose (LADD$_{pot}$) calculated based on the estimated atmospheric concentrations is 0.001 mg/kg/day. Based on 1992 data, the highest estimated DEP acute concentration at five drinking water utility intakes under low flow conditions is about 2 parts per billion (ppb); this results in a LADD$_{pot}$ of about 4.5-6.5 x 10^{-5} mg/kg/day; about 40,160 people are potentially exposed at this level. The highest estimated DEP chronic concentration at five drinking water utility intakes under medium flow conditions is about 0.3 ppb; this results in a LADD$_{pot}$ of about 1 x 10^{-5} mg/kg/day; about 40,160 people are potentially exposed at this level.

The above estimated doses are well below the Agency's reference dose (RfD) of 0.8 mg/kg/day that is considered significantly protective of human health. This observation further suggests that the exposure estimates are not likely to result in adverse health risks in humans from acute or chronic exposure to DEP from the atmosphere or from drinking water as a result of continuous or frequently, recurring releases from facility sites.

E. Summary of EPA's Assessment

EPA's toxicological evaluation of the current data on DEP indicates that it exhibits acute, systemic, and developmental and reproductive toxicities only at relatively high doses. Furthermore, DEP exhibits low toxicity to aquatic organisms, and is not likely to bioconcentrate. Releases of DEP will not result in exposures of concern for adverse human health risks. Based on the total weight of available data, DEP cannot reasonably be anticipated to cause a significant adverse effect on human health or the environment.

F. Rationale for Granting

EPA is granting the petition by proposing to delete DEP from the EPCRA section 313 list. Based on current data, EPA preliminarily concludes that DEP does not meet the toxicity criteria of EPCRA section 313(d)(2)(A) because DEP exhibits acute oral toxicity only at levels that greatly exceed estimated resultant exposures. Specifically, DEP cannot reasonably be anticipated to cause "... significant adverse acute human health effects at concentration levels that are reasonably likely to exist beyond facility site boundaries as a result of continuous, or frequently recurring releases."

EPA has preliminarily concluded that there is not sufficient evidence to establish that DEP meets the criterion of EPCRA section 313(d)(2)(B), because it cannot reasonably be anticipated to cause teratogenic effects, immunotoxicity, neurotoxicity, or liver or kidney toxicity, and it cannot be anticipated to cause reproductive or developmental toxicity except at relatively high dose levels. EPA believes that DEP has low chronic toxicity and accordingly has considered exposure factors. As stated above, EPA believes that anticipated exposure concentrations of DEP are not expected to result in significant adverse effects. Therefore, EPA has preliminarily

concluded that DEP does not meet the EPCRA section 313(d)(2)(B) listing criterion.

EPA has also preliminarily determined that DEP does not meet the toxicity criterion of EPCRA section 313(d)(2)(C) because it cannot reasonably be anticipated to cause adverse effects on the environment of sufficient seriousness to warrant continued reporting.

Thus, in accordance with EPCRA section 313(d)(3), EPA is proposing to delete DEP from the section 313 list of toxic chemicals.

IV. Request for Public Comment

EPA requests public comment on this proposal to delete DEP from the list of chemicals subject to EPCRA section 313. Comments should be submitted to the address listed under the ADDRESSES unit. All comments must be received by EPA on or before [Insert date 60 days after date of publication in the **Federal Register**].

V. Rulemaking Record

A record has been established for this proposal under docket number "OPPTS–400096" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as confidential business information (CBI), is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in the TSCA Nonconfidential Information Center, Rm. NE–B607, 401 M St., SW., Washington, DC 20460.

Electronic comments can be sent directly to EPA at:

ncic@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this proposal, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulmaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

VII. Regulatory Assessment Requirements

A. Executive Order 12866

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Order. Pursuant to the terms of this Executive Order, it has been determined that this proposed rule is not "significant" and therefore not subject to OMB review.

EPA estimated that the delisting of DEP from the EPCRA section 313 toxic chemical list would result in a total annual cost savings to industry of $124,200. The cost savings to EPA are estimated at $3,000.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act of 1980, the Agency must conduct a small business analysis to determine whether a substantial number of small entities would be significantly affected by the proposed rule. Because this proposed rule eliminates an existing requirement, it would result in cost savings to facilities, including small entities.

C. Paperwork Reduction Act

This proposed rule does not have any information collection requirements under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

D. Unfunded Mandates Reform Act

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995, which the President signed into law on March 22, 1995, EPA has assessed the effects of this regulatory action on State, local, or tribal governments, and the private sector. This action does not result in the expenditure of $100 million or more by any State, local, or tribal governments, or by anyone in the private sector. The costs associated with this action are described in the Executive Order 12866 unit above.

List of Subjects in 40 CFR Part 372

Environmental protection, Chemicals, Community right-to-know, Reporting and recordkeeping requirements, and Toxic chemicals.

Dated: August 27, 1995.

Lynn R. Goldman,

Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR part 372 be amended to read as follows:

1. The authority citation for part 372 would continue to read as follows:

Authority: 42 U.S.C. 11013 and 11028.

§ 372.65 [Amended]

2. Sections 372.65(a) and (b) are amended by removing the entire entry for diethyl phthalate under paragraph (a) and removing the entire CAS No. entry for 86–66–2 under paragraph (b).

[FR Doc. 95–21943 Filed 9–1–95; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA–7149]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are requested on the proposed base (1% annual chance) flood elevations and proposed base flood elevation modifications for the communities listed below. The base flood elevations are the basis for the

floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The comment period is ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: The proposed base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street, SW., Washington, DC 20472, (202) 646–2756.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA or Agency) proposes to make determinations of base flood elevations and modified base flood elevations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed base flood and modified base flood elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

National Environmental Policy Act

This proposed rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this proposed rule is exempt from the requirements of the Regulatory Flexibility Act because proposed or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the National Flood Insurance Program. As a result, a regulatory flexibility analysis has not been prepared.

Regulatory Classification

This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This proposed rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This proposed rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is proposed to be amended as follows:

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.4 [Amended]

3. The tables published under the authority of § 67.4 are proposed to be amended as follows:

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)	
				Existing	Modified
Illinois	Aurora (City) Kane and DuPage Counties.	Blackberry Creek	At Jericho Road	*665	*666
			Approximately 0.8 mile upstream of confluence of Blackberry Creek Tributary A.	None	*676
		Blackberry Creek Tributary A.	At confluence with Blackberry Creek	None	*674
			Approximately 0.4 mile upstream of Indian Trail Road.	None	*674
		Blackberry Creek Tributary H.	Approximately 0.7 mile downstream of Prairie Street.	None	*666
			At Galena Boulevard	None	*673

Maps available for inspection at the Planning Department, City Hall, 44 East Downer Place, Aurora, Illinois.

Send comments to The Honorable David Pierce, Mayor of the City of Aurora, 44 East Downer Place, Aurora, Illinois 60507–2067.

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)	
				Existing	Modified
Illinois	Kane County (Unincorporated Areas).	Blackberry Creek	At State Route 30	*659	*661
			At downstream side of State Route 38	None	*846
		Blackberry Creek Tributary A.	Approximately 2,450 feet downstream of Indian Trail Road.	*673	*674
			At East-West Tollway	*678	*679

(Catalog of Federal Domestic Assistance No. 83.100, "Flood Insurance")

Dated: August 28, 1995.

Richard T. Moore,

Associate Director for Mitigation.

[FR Doc. 95–21921 Filed 9–1–95; 8:45 am]

BILLING CODE 6718–03–P

---

44 CFR Part 67

[Docket No. FEMA–7153]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Proposed rule.

SUMMARY: Technical information or comments are requested on the proposed base (1% annual chance) flood elevations and proposed base flood elevation modifications for the communities listed below. The base flood elevations and modified base flood elevations are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The comment period is ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: The proposed base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street, SW, Washington, DC 20472, (202) 646–2756.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency proposes to make determinations of base flood elevations and modified base flood elevations for each community listed below, in accordance with Section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed base flood and modified base flood elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

National Environmental Policy Act

This proposed rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this proposed rule is exempt from the requirements of the Regulatory Flexibility Act because proposed or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the NFIP. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This proposed rule is not a significant regulatory action under the criteria of Section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This proposed rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This proposed rule meets the applicable standards of Section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR Part 67 is proposed to be amended as follows:

PART 67—[AMENDED]

1. The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

BILLING CODE 6718–03–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 40 and 154

[CGD 82–058]

Safety Standards for Self-Propelled Vessels Carrying Bulk Liquefied Gases

AGENCY: Coast Guard, DOT.

ACTION: Notice of termination.

SUMMARY: This rulemaking was initiated to amend the Coast Guard's regulations concerning safety standards for self-propelled vessels carrying bulk liquefied gases. The proposed rules would have aligned the regulations with the amendments to the International Maritime Organization (IMO) Code on which the regulations were based. At this time, the Coast Guard wishes to focus its available resources on actions of higher priority. Therefore, the Coast Guard is terminating further rulemaking under docket number 82–058.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas J. Felleisen, Hazardous Materials Branch, Office of Marine Safety, Security and Environmental Protection, (202) 267–1217.

SUPPLEMENTARY INFORMATION: On June 6, 1994, a Notice of Proposed Rulemaking (NPRM) was published in the **Federal Register** (59 FR 29259). The Coast Guard received one letter commenting on the NPRM. No public hearing was requested, and none was held.

After a comprehensive review of its active regulatory program, the Coast Guard has determined that this rulemaking is of relatively low priority at this time. International rules for gas carriers are sufficient, and no new gas carrier building in this country is anticipated in the near future. The Coast Guard wishes to focus its available resources on actions of the highest priority and has determined that the best course of action is to terminate further rulemaking under docket number 82–058. In keeping with the President's direction to Federal agencies to review their regulations, the Coast Guard will reexamine this issue at some point in the future to determine if further rulemaking is necessary. Based on these considerations, the Coast Guard is terminating further rulemaking under docket number 82–058.

Dated: August 18, 1995.

J.C. Card,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910–14–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 10, 13 and 17

RIN 1018–AC57

Fish and Wildlife Service, General Provisions and General Permit Procedures

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule amends the Fish and Wildlife Service (Service) general permit procedures providing uniform rules, conditions, and procedures relating to the application, issuance, denial, suspension, revocation, and general administration of the Service permit program. This revision of the Service's general permit procedures is intended to more clearly explain the procedures for permit application and the criteria used by the Service in making issuance determinations. This revision provides regulations that establish qualitative eligibility factors and provides standards for the fair disqualification of inappropriate applicants. This revision also effects the Service criteria for suspension and revocation of permits and the procedures for appealing the denial, suspension, or revocation of permits. The processing fee rate for a permit application is also amended to provide for increased rates to recover a larger percentage of the costs of processing the permits and to provide for fee exemptions for several permit categories.

The Service is also revising its regulations prescribing its general procedures and its regulations implementing the Endangered Species Act of 1973 in order to revise certain Service addresses provided therein.

DATES: Comments must be submitted on November 6, 1995.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Director, Fish and Wildlife Service, P.O. Box 3247, Arlington, Virginia 22203–3247. Comments and materials may be hand-delivered to the Fish and Wildlife Service, Division of Law Enforcement, 4401 N. Fairfax Drive, Room 500, Arlington, Virginia, between the hours of 8 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Thomas Striegler, Special Agent in Charge, Branch of Investigations, Division of Law Enforcement, Fish and Wildlife Service, Department of Interior, Washington, D.C. 20240, Telephone Number (703) 358–1949 or Maggie Tieger, Chief, Branch of Permits, Office of the Management Authority, Telephone Number (703) 358–2104.

SUPPLEMENTARY INFORMATION: The Fish and Wildlife Service (Service) has oversight responsibilities under Federal wildlife conservation statutory and regulatory authorities to provide uniform rules, conditions, and procedures for the application, issuance, denial, suspension, revocation, and general administration of the Service wildlife permit program. The Service in accordance with this responsibility is proposing the following changes to the general permit procedures of Part 13. Section 13.1, a general introductory section to the regulations of Part 13, describes in initial terms the requirements for making a permit application. This section has been revised, for it has been the source of some confusion to applicants, to explain when the Service will accept a single permit application to satisfy the separate permit requirements of activities requiring more than one permit.

Several administrative changes have been made to § 13.3, entitled "scope of regulations." This section outlines the general scope of Part 13 and provides an explanation of the term "permit" for regulatory purposes. This section has been revised to more clearly state the scope of its requirements. Specifically, the titles of several parts of the Code of Federal Regulations (CFR) in Title 50, that are referenced within this section, have been brought up to date. In addition the explanation provided for the term "permit" has been restated. The term "permit," as the term is applied in Part 13, will not refer to "a license, permit, or certificate as the context may require and to all such documents issued by the Service or other authorized United States or foreign government agencies." This change in § 13.3 was needed to correctly reference within this section the requirements of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). The requirements of CITES are applicable, in this particular instance, because CITES requirements necessitate that all permits issued pursuant to Part 23 will automatically become void upon the expiration of their stated duration.

The permit application procedures of Part 13 are found in § § 13.11. Several changes have been made in these application procedures. The last sentence of the introductory paragraph of this section, which states that "applicants do not have to submit a separate application for each permit unless otherwise required by this Subchapter," has been deleted, for it is redundant and has caused unnecessary confusion among applicants. The Service's provisions for the acceptance of a single permit application for multiple-permitted activities is now to be addressed within the revised § 13.1.

In § 13.11(b) the Service provides forwarding instructions for permit applications. The instructions in § 13.11(b)(2) and § 13.11(b)(3) are being revised, and a new forwarding instruction in § 13.11(b)(4) is added for endangered and threatened species incidental take permits and native endangered and threatened species take and interstate commerce permits. This change is being made in order to update the mailing addresses for permit applications. An equivalent change has been made to § 17.22(a)(1), § 17.22(b)(1), § 17.32(a)(1), § 17.32(b)(1), and § 17.72(a)(1) that sets forth the specific submission requirements for endangered and threatened species permits.

The time notice requirements for making an application are set forth in § 13.11(c). This section advises applicants of the time necessary for the processing of a permit. This section is being revised to advise applicants that the time required for the processing of endangered and threatened species incidental take permits will vary according to the project scope and significance of effects and may require more than 90 calendar days. Permit applicants are also now informed that the time required for the processing of their permits may be increased by the procedural requirements of the National Environmental Policy Act (NEPA).

In implementing its responsibilities under the Endangered Species Act (ESA), CITES, Marine Mammal Protection Act (MMPA), Lacey Act, and Wild Bird Conservation Act (WBCA), the Service charges a user fee for the processing of permits and certificates. These permits and certificates authorize the holders to engage in certain wildlife-related activities, such as the import or export of fish, wildlife, or plants whose trade is regulated by treaty or by other laws of the United States. The general statutory authority to charge fees for permits and certificates is found in 31 U.S.C. 483(a), that provides that any Federal agency may charge fees for services including permits and certificates to make these services "self-sustaining to the full extent possible." The authority to charge fees is also found under wildlife laws. Specifically, the ESA 16 U.S.C. § 1540(f), authorizes the Secretary to "charge reasonable fees for expenses to the government connected with permits or certificates authorized by the Act including processing applications and reasonable inspection * * *." The MMPA, 16 U.S.C. § 1374(g), also provides that the "Secretary shall establish, and charge a reasonable fee for permits" issued pursuant to the Act.

The current schedule of fees was published in the **Federal Register** on July 15, 1982 (47 FR 30785). In accordance with fee policies in effect at the time of the publication of the notice, the total cost of processing each application was not expected to be fully borne by the applicant. The Service, therefore, set what was believed to be a reasonable fee for most permit applications to help defray processing costs.

A recent internal analysis of user fees revealed a need to increase import/export license and permit fees. This determination is supported by the fact that the Service has not increased fees since 1982 despite a 48.2 percent increase in the cost of living between August 1982 to August 1993, according to the index published by the Bureau of Labor Statistics. In Fiscal Year 1992 the cost to the Service for issuing 3,066 permits in the Office of Management Authority was approximately $1 million, excluding the costs associated with ESA Section 7 consultations, NEPA compliance activities, or regional review of permit applications. Revenues generated in user fees for the same year amounted to approximately $61,000, or 6 percent of expenditures.

The Service is therefore proposing to implement a new fee schedule, given the shortfall between program costs and fee collection and the fact that there has been no increase in fees for over 12 years. The Service proposes to increase the standard permit processing fee as set forth in a new table to be designated at § 13.11(d)(4)(i) from the $25 per application level to $50 per application. The Service also proposes to itemize nonstandard fees in a redesignated and revised table at § 13.11(d)(4)(ii) as follows: To increase the marine mammal permit fee to $250 for public display and scientific research permits; to increase the marine mammal registered tanner/agent permit fee to $75; to increase the ESA captive-bred wildlife registration fees to $175 for a 3-year period for new requests, and to $75 for a 3-year period for ESA captive-bred wildlife registration renewal and pheasant registrations; to increase the ESA import, take, and interstate commerce permit fee to $175; to increase the ESA export and foreign commerce permit fee to $100; to increase the CITES import permit fee to $150; to increase the CITES trophy import permit fee to $50; to increase CITES reissuance, pre-Convention certificate, captive-bred certificate, certificate for artificially propagated plants, and certificate of origin fees to $75; to increase the permit fee for CITES pet export/re-export to $35; to increase CITES export permit fee to $125; to increase the CITES Appendix II export permit fee for native American furbearers and alligators (excluding live) to $75; to increase CITES Appendix II and III re-export certificate fees to $125; to revise the import/export license fee from its current level to $55; to increase the injurious wildlife permit fee to $75; to increase the WBCA personal pets (import) permit fee to $50; to increase the WBCA permit fee to $150 for scientific research, zoological breeding or display, and cooperative breeding; to set the fee for approval of cooperative breeding programs to $200; to set the fee for approval of Foreign breeding facilities to $250/species; to waive the Migratory Bird Treaty Act (MBTA), bird-banding/marking permit fee; to waive the MBTA special purpose-rehabilitation/educational permit fee; to set the fee for MBTA special purpose-depredation permits for private citizens (non-commercial) at $25; to waive the permit fee for bald and golden eagles; and to waive the permit fee for bald and golden eagle, Indian religious or ceremonial use. The ceremonial use. The Service is providing for these several permit fee exemptions or reductions in order to facilitate activities either regarded as beneficial to wildlife resources or to facilitate the exercise of religious freedom.

The difference in the rates in the above user fees reflects the level of complexity that the Service encounters in processing the various types of permits, based on the estimated costs to the Federal Government of providing these special services. The proposed fees are to be established at 30 percent of the calculated actual processing cost of each permit type. Fees for marine mammal permits, for example, are set at the rate of $250 since they are the most burdensome to process. These permit applications are often complex and require Service coordination with the National Marine Fisheries Service and the Marine Mammal Commission as well as publication of notices in the **Federal Register**. Permits to import marine mammals generally require a greater allocation of Service administrative and professional resources to process than a comparable CITES Appendix I permit and are significantly more complex to process than a pet permit application. These proposed fee increases are intended to proportionately reflect a percentage of the level of Service personnel resources and working hours required to process them rather than the entire actual cost for processing.

The Service's proposed new fee schedule is intended to recover a greater portion of the direct and indirect costs to the Federal Government of providing special services than is currently being recovered. The proposed fee schedule will also serve to more fully implement the Federal user fee policy that calls for cost recovery where special services provided by the Service impart a special benefit to an identifiable recipient.

In § 13.11(d)(3) the Service provides for a waiver of permit fees for certain governmental entities. This section provides that a fee will not be charged to any Federal, State, or local government agency, nor to any individual or institution under contract to such agency for the proposed activity. Fees have traditionally been waived or reduced for public institutions provided that proof of their status as a "public institution" accompanied the permit application. The Service is now proposing to limit the fee waiver provided for public institutions to only qualifying Federal and State governmental agencies and to individuals or institutions under contract to such agencies. The Service finds it necessary to limit this exemption at this time in order to more equitably recover a fair share of permit costs within a substantial sector of the Service's processing workload. The Service believes this change is reasonable since the affected institutions receive significant benefits from Service permits beyond those that accrue to the general public or to Federal or State governments.

Several other changes are made in the existing table of nonstandard fees in § 13.11(d)(4). These changes are intended to correct administrative errors in reference and to update this table in accordance with the previously proposed changes to the Service's import/export license fee rates (59 FR 47212). In addition, changes are also made in the table to indicate the exemption to the standard fee requirement to be provided for migratory bird special purpose rehabilitation and educational permits authorized under § 21.27; for American Indian religious or ceremonial use permits authorized under Part 21 and § 22.22; and for special purpose depredation permits for private individual non-commercial purposes that are authorized under § 21.27.

The Service's requirements for abandoned or incomplete applications are stated in § 13.11(e). This section has been revised to notify applicants that the Service may return substantially incomplete or improperly executed applications, and to further instruct applicants of the importance of providing complete and accurate information.

Applications for permits are required under § 13.12 to contain certain general information. Several changes are being made to the requirements of this section. Section 13.12(a)(4) is being revised to include the word "export." This change is intended to inform applicants of the required documentation necessary for the exportation of wildlife. In addition to the general information requirements required on permit applications, certain additional applicant information is also required on permit applications in accordance with § 13.12(b). These additional requirements may be found by making reference to the specific type of permit within the table provided in § 13.12(b). Within this section several obsolete or redundant references to discontinued wildlife permit types are being deleted, and missing references to permit types are being added. These changes include: the deletion of the heading "Marking of package or container;" the deletion of references under the heading "Marking of package or container" that were made to "Symbol marking" permits; a correction in the position of a reference to the "Import/export license" from its present position under the heading "Marking of package or container" to its proper position under "Importation at Nondesignated Ports;" the addition of the heading "Wild Bird Conservation Act Permits" with a listing of the four types of available permits; the deletion of a reference made under the heading "Threatened wildlife and plant permits" that was made to "American alligator-buyer or tanner" permits; the addition of a reference under the heading "Marine mammal permits" of "Registered agent or tanner;" and the deletion of a reference under the heading "Migratory bird permits" that was made to "Special aviculturist" permits.

The terms and conditions under that the Service issues or refuses to issue a permit are indicated in § 13.21. This section is being updated to correct obsolete references to the "Bureau" and by inserting the abbreviated name the "Service," to refer to the Fish and Wildlife Service.

Several additional changes are being made to the text of § 13.21. One important change is the addition of certain "factors," to a new section to be designated § 13.21(a)(2), that will be considered by the Service when making a determination whether an individual applicant and/or permittee has failed to exercise responsibility. Such evaluations are to include consideration of one or more of the following factors: the competence, ability, skill, knowledge, training, and experience of the applicant and the suitability of facilities; whether there have been prior wildlife violations; whether there has been a failure to qualify or to fulfill any criteria or condition in law or regulation applicable to the permit; and whether there have been prior violations involving misrepresentation of material facts, falsified documents, false labeling or invoicing, failure to present documents or wildlife for examination or inspection, or other circumstances involving concealing, evading or circumventing detection of wildlife violations.

In certain instances a permit will not be issued, despite the proper execution of a wildlife permit application. This may arise when an applicant has failed to meet the applicable issuance conditions stipulated in § 13.21(b). Specifically, the issuance requirements stipulated in § 13.21(b)(3) are being revised to properly distinguish two distinct prerequisite conditions as independent and separate operative requirements. These stipulated requirements, as they presently read, are that the applicant has demonstrated a valid justification for a permit and that the applicant has made a showing of responsibility. A change is being made to separate these two requirements by amending § 13.21(b)(3) to allow non-issuance of a permit for failure to demonstrate a valid justification for a permit and by creating a new § 13.21(b)(8) to allow non-issuance of a permit for failing to demonstrate a showing of responsibility. The Service notes in making this change that there should be no automatic linkage: Where the satisfaction of one requirement or element could be interpreted to automatically meet the requirements of the second element; or between an applicant's showing of responsibility and the separate and logically independent requirement of an applicant being able to demonstrate a justification for a permit.

In addition to the above-mentioned changes, three new "issuance criteria" requirements have been added at § 13.21(b)(6), § 13.21(b)(7), and § 13.21(b)(9) respectively, to require the applicant to fulfill all applicable requirements necessary for the filing of a complete application prior to the Director's or Regional Director's issuance of the appropriate permit, to require the applicant to have complied with the conditions of previously held permits, and to provide for non-issuance where the applicant has conducted the activity prior to the issuance of the permit required by Subchapter B. This correction was considered necessary in order to further explain the criteria that the Director or Regional Director must consider before reviewing and issuing a permit.

The requirements of § 13.21(b) list certain factors that will disqualify a person from obtaining a permit. A disqualification, under this section, is to be instituted when an applicant has been determined, under certain specified criteria, to have been in violation of certain listed wildlife laws.

A change to the scope of the factors is being made in § 13.21(c) by the inclusion of additional "disqualifying factors." This section has been reorganized as follows. First, the existing disqualification factor in § 13.21(c)(1) for a conviction or entry of a plea of guilty or nolo contendere for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act that disqualifies a person from receiving or exercising the privileges of a permit is being amended to encompass all criminal violations of these Acts, to establish a 5-year duration of disqualification, and to include within this regulation equivalent violations of the ESA, CITES, Airborne Hunting Act, the MMPA, the WBCA, and the African Elephant Conservation Act. This disqualification factor is being redesignated to appear as § 13.21(c)(1)(i). Second, an additional factor is being added at a newly designated § 13.21(c)(1)(ii) to include as a basis for disqualification an assessment of one or more civil penalties for a violation(s) of the Lacey Act, the Eagle Act, the ESA, CITES, Airborne Hunting Act, MMPA, the WBCA, or the African Elephant Conservation Act, where such assessment(s) evidence a lack of responsibility in accordance with § 13.21(a)(2). Third, changes are being made within § 13.21(c)(2) to disqualify an applicant from receiving or exercising the privilege of a permit for a period of 5 years where an individual has had a similar permit previously revoked for reasons found in §§ 13.28 (a)(1), (a)(2), or (a)(3). The effect of this change is to include as a basis for a permit disqualification any prior revocation received pursuant to these three sections. These changes are intended to include as a basis for disqualification other kinds of wildlife violation(s) and to fairly equate comparable levels of violation(s) to allow disqualification in certain instances where violation(s) clearly evidence a lack of responsibility. Changes to the scope of revocation actions encompassed under these three sections will be covered later in the preamble discussion of changes to permit revocations in § 13.28.

The conditions of issuance and acceptance of a permit are set forth in § 13.21(e). The provisions of § 13.21(e)(2) are intended to inform applicants of their responsibilities as holders of Fish and Wildlife Service permits, and that by accepting or holding a permit the applicant acknowledges the necessity for close regulation and monitoring of the activity permitted. It is further explained within this provision that by the act of acceptance of a permit the permittee consents to and will allow the entry by agents or employees of the Service, or other authorized State Government official upon the premises where the permitted activity is conducted at any "reasonable hour". This paragraph is being revised by the addition of the words "as established or evidenced by actual operation or by the normal hours of operation for similar types of business, trade or operations." This change is made to clearly delineate what is meant by the use of the operative term "reasonable hour". In addition, this section is also being revised to allow Service agents or employees or other authorized State governmental officials to audit or copy any books, records, or permits required to be kept in accordance with Subchapter B.

The requirements for a denial of a permit application are set out in § 13.21(g). Under the terms of § 13.21(g), "Denial", an issuing/reviewing office may deny a permit to any applicant who fails to meet the applicable Service issuance criteria. This section is being revised to provide that the issuing/reviewing office will provide the applicant with a written explanation stating the basis for a permit denial. Although the Service has generally provided such explanations as a matter of policy in the past, this change is being made to require such notification by regulation.

Section 13.21(g) is also amended by the inclusion of the requirement that, "except where otherwise provided, a permit denial will be presumed to remain in effect for a period of 1 year after the date of denial, unless granted the permit during the review process." This change is intended to establish a fair and effective duration for a Service permit denial and to place the burden upon the previously denied applicant to correct conditions prior to any resubmission of their application.

The Service's requirements for renewal of permits are established in § 13.22. Section 13.22 sets forth in detail the procedure to be used by applicants for the renewal of existing permits. Changes made within this section include the addition of a new introductory text to the section stating that "generally a permit issued under this Subchapter B may be renewed, provided the activity authorized thereunder has not been completed." This change is being made to explain to applicants the permits are issued for a particular or discrete permitted activity or act and that such permits will only be renewed when the particular permitted individual activity or act has not been completed. This section was intended to enable the permittee to fully

complete a single permitted activity and was never intended to authorize an additional or successive activity or act of the same kind.

Other changes made in this section were made to remind the applicant of the basic requirement that all applications must be completely filled out prior to the initiation of processing of a renewal. An additional change made in this section was the inclusion of a provision to read "Any renewal application information remaining unchanged for a period of more than 4 years may be regarded as outdated, and the applicant required to provide new and complete application information upon request." This change was necessary to ensure that all information contained within permit application files is current and updated on a regular basis.

Section 13.22 has also caused some confusion among applicants concerning the special requirements of CITES. Section 13.22(c) is being amended to clarify the provision allowing continuation of a permitted activity while a permit renewal is pending. As currently written, the permit must be valid and renewable to continue the activity; as proposed, the permit also must not have been suspended or revoked. In addition, the proposal reflects that continuation does not apply to permits issued under CITES, as CITES permits are void upon expiration. Another change made was in § 13.22(d) to require a written explanation for any denial of a permit renewal. The Service has routinely provided such explanations and is amending the regulations to provide such notice by regulation.

The Service's provisions for the amendment of permits are established in § 13.23. This section sets forth the procedures to be used by applicants in modifying the conditions of a permit. This section is being revised to replace the word "his" with the words "his/her" in § 13.23(a) to make this reference gender neutral.

The procedures for the change of name or address of a permittee are set forth in § 13.23(c). Under the requirements of this section, a permittee is required to notify the issuing office within 10 calendar days of a change of name or address. This section is being revised by the addition of a provision informing the permittee that a failure to notify the office that issued the permit of a change of address may result in the cancellation of a permit. This situation arises in cases where reasonable efforts to contact the permittee by certified or registered mail have failed. A canceled permit may be reinstated if the permittee subsequently contacts the issuing office within 90 calendar days of the date of cancellation.

A new section has been established at § 13.23(d) to explain that the issuing/reviewing office may deny amendments of a permit to any applicant who fails to meet the issuance criteria set forth in § 13.21, or in the sections specifically governing the activities for that the amendment has been requested.

The Service's criteria and procedures for suspension, revocation, and review are established in § 13.27, § 13.28, and § 13.29, respectively. Sections § 13.27 and § 13.28 are being corrected to conform with the provisions of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*). In accordance with the requirements of the APA these sections will not be prefaced by a sentence stating "the following criteria will apply, except: pursuant to a court order; or in cases of willfulness; or in cases in which the public health, interest, or safety requires otherwise . . . ." This change is intended to inform applicants that permits issued by the Service may be immediately suspended or revoked pursuant to: a sentence or order of a court; or in cases where the permittee has intended by act or omission to willfully, intentionally, knowingly, or voluntarily violate applicable law; or where the public health, interest, or safety requires.

The Service's criteria and procedures for permit suspension are stated in § 13.27. These procedures are applicable when the Service has determined it necessary and proper to take the appropriate action of suspending a permit. The procedural steps within the Service's administrative remedies, in cases of permit suspension, have been amended to conform with those now made available in cases of permit revocations pursuant to § 13.28(b). This change is intended to equate the administrative remedies available in cases of permit suspensions with those of permit revocations and to eliminate repetitive procedures.

In addition to these changes, the last sentence of § 13.27(a) is being deleted for it has resulted in a permit suspension remaining in effect for an indefinite period of time or in the existing language of the regulation "until the permittee had corrected deficiencies." This change was necessary because the terms of this provision are not in agreement with the provisions of § 13.28(a)(2), that allow a permittee 60 days to correct any deficiencies that resulted in a suspension or face possible revocation of the permit.

Several small changes are being made in the procedures for suspension in § 13.27(b). Pursuant to § 13.27(b)(2) a permittee, upon receipt of a notice of proposed suspension, may file a written objection to the proposed suspension action. The procedural specifications for this objection have been amended. This change is accomplished by the insertion of the word "postmarked" to replace the deleted word "filed." A provision regarding the requirements for making a written objection is also added to read as follows: "Such objection must be in writing, must be postmarked within 45 calendar days of the date of the notice of proposal, must state the reason why the permittee objects to the proposed suspension, and may include supporting documentation and any new information."

An additional change to the permit suspension procedures was made in § 13.27(b)(3) to read: "A decision on the suspension will be made within 45 calendar days after the receipt of the objection, or the end of the objection period if the permittee does not respond within the objection period, unless extended for good cause and the permittee is notified of the extension. In the event of an adverse decision, the issuing/reviewing office will notify the permittee in writing of the Service's decision and the reasons thereof. The issuing/reviewing office will also provide the applicant with information concerning the right to appeal and the procedures thereof. The Service is making this change to standardize available administrative remedies within Part 13 in an effort to minimize the delays caused by overly repetitious procedures.

Changes have been made to the procedures for permit revocation in § 13.28. The Service's procedures for revocation will not be divided, according to applicability, into two procedurally distinct and independent categories of revocation action. These actions can be categorized as: first, revocation procedures that will apply in ordinary or usual "revocation" actions; and second, special revocation procedures that will apply only to revocation of a suspended permit when the permittee fails to correct deficiencies that were the cause of the permit suspension within the required period of time.

The first type of revocation action is established in the present § 13.28(b). This section has been otherwise revised with changes being made to several procedural steps and by the substitution of the word "appeal" for the word "reconsideration." This change will replace the redundant step of having a permittee make a request for reconsideration upon receiving notice of a Service decision on the revocation. A step that in sequence followed the permittees prior right to make a written objection upon receipt of a notice of proposed revocation. This change is intended to eliminate the overly repetitious re-review of the permit revocation by the initial revoking office. The regulations will now replace this administrative step with the more consequential administrative step of providing the permittee with the right of immediately appealing an adverse decision to the appropriate Director or Regional Director in accordance with § 13.29(e). These changes were also necessary to provide comparable procedural uniformity between the permit revocation procedures of this section and the procedures to be established for suspension as stated in § 13.27.

In the newly proposed second type of revocation action, the Service will seek revocation in instances where there are valid grounds for revocation of a suspended permit for failure to correct deficiencies in accordance with § 13.28(a)(3). The procedures for this type of revocation action are to be set forth in § 13.28(c). These new procedures are intended to provide finality or closure to the availability of administrative procedures in instances where a suspended permittee has failed within the required period of time to correct deficiencies that resulted in the suspension of their permit. In such cases the suspended permittee who is effectively in violation of their suspension for failing to act in good faith, will be barred from availing themselves of further Service procedures and will therefore, be compelled to seek any redress through non-administrative means. This change is intended to demonstrate the importance of full compliance with all suspension orders and the necessary consequences for failing to exercise good faith. The Service believes that this change is necessary, fair, and equitable in light of the seriousness of a failure to abide by the terms of a suspension order.

The Service is also amending and reorganizing § 13.28(a), which provides the applicable criteria for permit revocations. The existing criteria in § 13.28(a)(1) provides that a permit may be revoked when "the permittee willfully violates any Federal or State statute or regulation, or any Indian tribal law or regulation, or any law or regulation of any foreign country, that involves a violation of the conditions of the permit or of the laws or regulations governing the permitted activity." The Service is amending the scope of § 13.28(a)(1) to provide for revocation for violation of any Federal or State statute or regulation, or any Indian tribal law or regulation, or any law or regulation of any foreign country that involves a violation of the conditions of the permit or the laws or regulations governing the permitted activity and which results in a felony conviction, or entry of a plea of guilty or nolo contendre.

In order to present all applicable revocation criteria in logical sequence the Service proposes to redesignate the existing §§ 13.28 (a)(2), (a)(3), (a)(4), and (a)(5) to become §§ 13.28 (a)(3), (a)(4), (a)(5), and (a)(6) respectively, and to insert additional criteria for permit revocation in new § 13.28(a)(2) and § 13.28(a)(7). The new permit revocation criteria at § 13.28(a)(2) will provide that a permit may be revoked when "the permittee has violated any Federal or State statute or regulation, or any Indian tribal law or regulation, or any law or regulation of any foreign country, that involves a violation of the condition(s) of the permit or of the laws or regulations governing the permitted activity resulting in a conviction, entry of a plea of guilty or nolo contendere for any misdemeanor violation, or the assessment of a penalty for a civil violation if such assessment(s) or conviction(s) evidences a lack of responsibility."

In Sections 13.28 (a)(7), (a)(8), (a)(9), and (a)(10) the Service would add four additional criteria for permit revocation. The new criteria at § 13.28(a)(7) would read as follows: "It is determined that the permittee failed to disclose material information required or made false statements as to any material fact in connection with his application or the conduct of activities under his or her permit." This change is intended to inform the applicant of the necessity of making a full and accurate permit application and the consequences of their failing to do so. The new criteria at § 13.28(a)(8) would read as follows: "Evidence showing failure to exercise responsibility in accordance with § 13.21(a)(2)." This change is intended to provide for revocations in situations where the permittee has clearly evidenced a failure to exercise responsibility. The new criteria to be set forth at § 13.28(a)(9) would read as follows: "The Director or Regional Director finds through further inquiry or investigation, or otherwise, that the applicant is not qualified." This change will allow the Service to revoke permits when conditions, that would have disqualified the permittee at the time of application, are discovered after a permit has been issued. The new criteria to be set forth at § 13.28(a)(10) would read as follows: "the applicant has failed to fulfill the applicable requirements of Subchapter B." This change would allow the Service to revoke permits upon a finding that the permittee is not in compliance with the required conditions for holding a permit.

An additional change to the permit revocation procedures in § 13.28(b)(3) would read: "A decision on the suspension will be made within 45 calendar days after the receipt of the objection or the end of the objection period, whichever is applicable, unless extended for good cause and the permittee is notified of the extension. In the event of an adverse decision on the permittee's written objection, revoking the permit, the issuing/reviewing office will notify the permittee in writing of the Service's decision and the reasons therefore, together with the information concerning the right to appeal the decision under § 13.29(e) of this part, and the procedures for appeal." The Service proposes this change to standardize available administrative remedies within Part 13 in an effort to minimize the delays caused by overly repetitious procedures.

An important change proposed to § 13.28(d) is the addition of a special reference table to be entitled "Time allocated for administrative procedures." The Service is proposing this section to assist permittees in complying with the time restrictions provided for the availability of suspension, revocation and other review procedures.

In revising the review procedures in section 13.29, the Service has attempted to eliminate certain redundancy with the suspension, revocation, and the procedures for the appeal of a permit denial. To accomplish this change, the Service is proposing to make two procedural changes: first, to provide the permittee whose permit has been revoked or suspended with the immediate right to directly appeal to the Director or Regional Director in lieu of a repetitious request for reconsideration before the same issuing/reviewing office who initiated the revocation or suspension action; and second, to allow the Service to proceed in an orderly fashion from permit suspension to permit revocation in situations where a permittee has failed within the required period of time to remedy the deficiencies that caused the suspension. These changes are necessary because the procedures as currently written are overly repetitious and delaying to

permittees seeking redress. The review procedures as written have also inappropriately allowed applicants falling under § 13.29(a) (1), (2), and (3) to request a reconsideration of proposed suspension or revocation actions, even when there was no lawful authority to issue a permit. The Service believes that a request for reconsideration of suspensions or revocations is unnecessarily repetitive in such instances, especially in light of the applicant's existing available procedural remedies of objecting to any suspension or revocation action in accordance with § 13.27(b)(2) and § 13.28(b)(2), respectively, and challenging any adverse answer to such action with a timely appeal.

Other changes have been proposed in the text of § 13.29. These include: the clarification of the requirements for the submission of certification in § 13.29(b)(4); administrative changes in § 13.29(d); and the inclusion of certain exceptions to this section in § 13.29(a) and § 13.29(e). Several additional changes are being made to the provisions of § 13.29(f), which would be re-numbered and administratively revised. Section 13.29(f)(1) would be amended to read "the Director or the Regional Director may designate any staff member(s) to assist in analyzing the issues and may include the recommendations of the issuing/reviewing office." This change is intended to clarify the respective role of the issuing/reviewing office in providing assistance and recommendations to the Director or Regional Director considering an appeal.

The Service, in an effort to simplify its regulations, is adding a reference section in a new section to be designated § 13.30. The intent of this section is to provide the user with a reference to clearly illustrate: the exercise of responsibility determinations; the effects of disqualification; procedures for denial; the procedures for permit amendment(s) initiated by the Service; the procedures for suspension of a permit; the general procedures for revocation of a permit; the special procedures for revocation of a suspended permit, where the applicant has failed to correct deficiencies that were the cause of a suspension; and the effects of a prior revocation on subsequent permits.

Section 13.41 sets forth the requirement that wildlife possessed in accordance with permit conditions must be maintained under humane and healthful conditions. This section would be revised to read "any live wildlife or plants possessed, held, transported, and/or imported under a permit must be maintained under humane and healthful conditions." This change is intended to insure that all wildlife and plants under a Service permit are adequately maintained under applicable regulations.

The Service requirements regarding the maintenance of records is stated in § 13.46. This section would be revised to require that such records now include information on the specifics of any death or escape of permitted wildlife. In addition such records will now be required "to include names and addresses of persons by or with whom any plant (to include seeds) or wildlife has been purchased, sold, bartered, or otherwise transferred . . . ." This change is intended to include the seeds of plants that are regulated by permit with applicable record keeping requirements.

In § 13.47 the Service sets out the inspection requirements applicable to any person holding a permit pursuant to Part 13. This section would be revised by the addition of the words "as established or evidenced by actual operation, or normal or expected hours of operation for the type of similar type of business, trade, operation or activity." This change is made in order to more clearly delineate what is meant by the use of the operative term "reasonable hour." The equivalent provision in Section § 13.21(e)(2) would also be similarly revised.

In addition to the changes being made in Part 13, the Service would revise Part 10 to add a necessary reference to the appropriate Regional Office addresses and to also update the existing list of Division of Law Enforcement, Regional Office addresses provided in § 10.22. The Service would also update the mailing address in § 17.22, 17.32, 17.62, and 17.72 as noted earlier, for the submission of applications for permits for Native Endangered and Threatened Species Take, Interstate Commerce, and Incidental Taking permits. Finally, the Service is considering additional regulatory provisions for the identification of trade secrets or confidential business information (CBI) contained in permit applications. The Service invites additional comments on how it may consider the views of applicants as to the protection and identification of such information, when requested under the Freedom of Information Act.

Background

On Thursday, November 14, 1991, the Service published in the **Federal Register** (56 FR 57873) a Notice of Intent to Review 50 CFR Part 13. The Service, in this notice, requested that all interested parties submit written comments. In response to this request, the Service received comments from a total of 66 individuals and organizations.

Specifically, written comments were received from 36 individuals, 11 government agencies, 8 sportsman associations, 1 American Indian tribe, 3 scientific associations, and 7 wildlife management and conservation associations. Only 10 of the comments received pertained to Part 13. The Service has carefully considered all comments received in response to the Notice in proposing these changes to Part 10, 13, and 14.

Summary of Comments and Information Received

Comments Pertaining to 50 CFR Section 13.3

Scope of Regulations

Several commenters noted that the term "permit" should also include foreign documents such as export permits, commodity clearances, Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) permits, and certificates of origin. One commenter noted that currently the Service has no real regulations that pertain to the specific requirements of foreign permits. The Service finds considerable merit in these comments and is proposing to amend this section accordingly to encompass such permits.

Comments Pertaining to 50 CFR Section 13.11 and 13.12

Application Procedures, General Information Requirements on Permits

A few comments were received on 50 CFR § 13.11. One commenter representing a scientific association suggested, in regards to § 13.11(a), that a letter describing a researcher's activities be allowed instead of the present requirement of filling out a Service permit application form. In issuing/reviewing permits and applications, the Service needs to quickly ascertain a permittee's or applicant's status or eligibility. To best accomplish this task, a uniform permit application has been routinely used. The Service believes that a continuation of the use of this standard form is the best and most efficacious method of processing applications and ensuring all required information has been provided.

Several comments from scientific and wildlife associations requested a review of 50 CFR § 13.11(b)(2). This section references the designated port of entry requirement of Part 14. One commenter suggested that the Service's regulations should include an exception to designated port of entry requirements for scientific specimens and raptors used in the practice of falconry. The Service finds insufficient merit in the suggested exemptions for scientific specimens and of falconry birds from the designated port requirements. The Service has strived in its administration of permits under Part 13 to treat all permit applicants fairly and uniformly without regard to the status of the permittee. Procedurally, the requirements of § 13.11(b)(2) are intended to identify the appropriate issuing/reviewing office for a permit. This section was not intended as a list of exceptions to other regulations.

One commenter noted that delays in the issuance of permits caused by the time notice requirements in 50 CFR § 13.11(c) has imposed a hardship upon permit applicants. Other commenters also expressed similar concerns about perceived delays in the permit review process. The Service is concerned about any delays encountered in its permit programs. The permit process, however, is a deliberative process and therefore, requires careful, individual analysis and review by the Service. Importers of scientific specimens, captive-bred raptors, and wildlife importers in general should take this consideration into account and plan ahead for their importation and or exportation needs.

One comment on § 13.12, the general information requirements of permit applications, requested that a timely notification be given to all applicants with incomplete permit applications. The commenter further noted that such notice would serve to prevent the penalization of the applicant for relatively inconsequential or unintended omissions. It is the considered opinion of the Service that such additional "formal" procedures are not warranted at this time. The Service is not convinced that such additional procedures would result in any consequential saving in time. The Service, however, will continue to notify the applicant informally in all such cases.

Comments Pertaining to 50 CFR Section 13.21

Issuance of Permits, Denials

One commenter suggested that under certain limited circumstances, verbal authorization to undertake a permitted scientific project should be allowed. The commenter further qualified this suggestion, however, by noting that applicants should not have to bear legal liability when misleading oral representations are given within such verbal authorizations. The Service believes that such verbal authorizations would be ill advised for the same vagueness and accountability problems noted by the commenter.

One commenter questioned the qualifications of persons making a determination as to the relative validity of a permit justification under § 13.21(b)(3). This section generally conditions the issuance of a permit by the Director or Regional Director to the applicant's demonstration of a valid justification for a permit and an independent showing of responsibility. Service permit applications are reviewed in an ordered and sequential process whereby permits are examined by qualified Service staff working under direct guidance and supervision of Service managers. Permit issuance decisions are reviewed for consistency with established permit policy. Applicants who are dissatisfied with the justifications given for any Service permit decision may readily seek recourse and remedy through available Service administrative procedures.

One commenter suggested deleting the first sentence of § 13.21(e)(2) for, as the commenter stated, "the first sentence implies a mistrust * * * of the permittee." In response to this comment, the Service can only state that no such implication of mistrust is intended. The intent of this requirement is to clearly set forth the responsibility of the permittee to allow for compliance inspections of permitted activities by the Service. Such inspection requirements are essential for the exercise of due diligence in the preservation of fish and wildlife resources.

One commenter noted that the officer should be required to provide applicants with a written indication of the reasons for any denial of a permit or the non-renewal of a permit under §§ 13.21(g) and 13.22(d) respectively. The Service appreciates the concerns of the commenter and is proposing to change the regulations to include a provision in § 13.21(g) and § 13.22(d), to be similar to those provided in § 13.27(b)(3) and § 13.28(b)(3), to read as follows: "the issuing/reviewing office will notify the permittee in writing of the Service's decision for denial or non-renewal of the permit." Generally, the Service has provided the basis of its decisions to applicants in the past as a matter of policy. This notice would now be required by regulation.

Comments pertaining to 50 CFR Section 13.28

Permit Revocation

One commenter noted that the criteria for permit revocation should also include the complete civil and criminal prior violation history of the permittee. The commenter further noted that whether a felony violation is willful, as stated in § 13.28(a)(1), should not be the only consideration in permit revocations. The commenter noted that many repeat offenders assert their violations are a result of ignorance of the regulations although, as the commenter elaborated, these are the same regulations to which the violators have affirmed knowledge when they sign their permit application. The Service finds considerable merit in the commenter's suggestion. The Service in its revocation procedures has attempted to strike a balance in favor of fairness. The revocation of an individual's permit is a punitive measure of final resort that rightfully demands that the Service provide sufficient justification for its permit revocation determinations and provides the applicant with a fair process. The present criterion in § 13.28(a)(1) require the proof of the causal element of "willfulness" in the commission of certain listed felonies. This element has presented the Service with an extremely difficult legal burden of proof in permit revocation actions. This burden of proof has tended to limit the effectiveness of revocation as a deterrent. The Service, in an effort to construct a greater deterrent, is proposing to amend the regulations to allow for additional criteria for permit revocation. These additional criteria would be set forth in a new § 13.28(a)(2) that would provide that a permit may be revoked when "the permittee has violated any Federal or State statute or regulation, or any Indian tribal law or regulation, or any law or regulation of any foreign country, that involves a violation of the condition(s) of the permit or of the laws or regulations governing the permitted activity resulting in a conviction, or entry of a plea of guilty or nolo contendere for any misdemeanor violation, or the assessment of a penalty for a civil violation if such assessment or conviction evidences a lack of responsibility."

Comments pertaining to 50 CFR Section 13.29

Review Procedures

One commenter recommended the amendment of 50 CFR § 13.29(f) by the addition of the following suggested

language "The applicant will be provided in writing all presentations, whether oral or written, made by the issuing/reviewing office, or other Service divisions or employees, to higher authority regarding the merits of the appeal, which presentations shall be included in the appeal record. The deciding officer will state in the decision the date and contents of any discretionary policy adopted by the Service and applied in that matter, and state the facts justifying why that policy applies and should be adopted or applied in that appeal." The Service finds this proposal to be impractical and undesirable. The term "discretionary policy" is ambiguous and an inaccurate representation. Where an appeal is successful, the applicant will receive their permit and the record will substantiate why the issuing/reviewing office's decision has been reversed. Where an appeal is rejected, the applicant will receive notice providing the basis for that determination.

Comments pertaining to 50 CFR § 13.42

Permits are Specific

One commenter noted that scientific collecting permits should be written in such a way as to allow for scientific opportunism. The rationale for this suggestion, as noted by the commenter, is that scientists cannot always predict the particular species they will find or what species they will find useful for research purposes. The commenter further noted that this problem is of special concern when invertebrate and plant species are involved. The Service is sympathetic to the concerns expressed herein and otherwise by the scientific community. The Service continues to recognize the essential need to facilitate the study of science. The Service, however, must carefully weigh these concerns pursuant to its mandate to carefully monitor the collection of scientific wildlife specimens. The Service is hesitant to issue scientific collecting permits without sufficient species specificity. Therefore, the Service does not anticipate making any changes in the regulations pertaining to scientific collecting permits at the present time. The applicant should always have an idea of what their intended target species will be. Where the collection of additional species is anticipated, the applicant is simply required to add them to the list of those species in the application justification.

One representative of an association of scientists suggested several changes to the regulation involving special permit provisions for scientists. One request was for the Service to provide for "temporary verbal authorization" to be given while a research application is being processed. Another commenter suggested that permit application information be only required for what was termed "a randomly sampled subset of applicants, with clearly defined research objectives." The commenter also suggested that application fees should be waived for scientific or educational institutions and, that under certain limited circumstances, verbal permit authorization to undertake a permitted scientific project or the modification thereof be provided. The Service is cognizant of the special requirements of scientist and researchers; however, the Service is hesitant at this time to provide for such special permit procedures in the absence of adequate safeguards. In regard to the issue of fees, the cost incurred by the Service in processing permits is substantial and should not be dependent upon the status, purpose, or funding source of the recipient.

Other comments to Part 13 included the recommendation that there be greater national uniformity in the Service's interpretation and enforcement of regulations. Specific recommendations addressed: the need for uniformity in the issuance of permits; the need to establish uniform renewal, non-renewal, and revocation criteria; and the recommendation that the permit process be simplified, expedited, and administered through a centralized permit process rather than the current regional system.

In this review of Part 13, the Service is attempting to update the regulatory provisions that provide uniform procedures applicable to the permit process. The Service in its general permit procedures has attempted to achieve a desirable level of specificity in its regulations and uniformity in the issuance of permits throughout the seven Regional Offices. There is, however, a limit to the degree of specificity and centralization that can be achieved by the Service without making the regulations and the permit issuance process more complex and extensive than necessary. The Service has made an effort in the past to decentralize the permit process to make it more responsive to users and efficient in operation. The process was once centralized in the Washington office of the Division of Law Enforcement. This was found to be unsatisfactory as the Service was unable to make accurate judgments about applications that were specific to diverse regional conditions. In addition the Service's ability to take an adverse action when necessary was also limited, depending on the type of permit involved, by its ability to ascertain the specific facts and circumstances involved in each case. The variables relating to the issuance of the permit are often unique to the locale and situation. The Service's responsibilities for the permit process require its careful evaluation of all the facts, circumstances and local conditions related to a permit's issuance. In order for the Service to be fair to everyone, it can only provide the basic procedural guidelines for taking those adverse actions. It is not in the best interest of the permittees or the Service to impose the unique variables of one situation to every case.

Several additional comments were received on Part 13; these include a recommendation that changes be made to permit procedures that affect museum and scientific specimens. One commenter suggested that permit requirements are too complicated, especially in such instances where scientific specimens or materials on loan to parties outside the United States are returned. The Service is concerned about any delays encountered by applicants and permittees in its permit functions. The Service, however, must process the requests of all members of the public fairly and equitably without regard to their individual status on a first in, first out basis.

One commenter noted that the Service should determine whether the provisions of § 13.41 regarding the humane conditions for wildlife possessed under a permit are adequate to cover conditions of falconry birds. This, in the commenter's opinion, would be particularly true in the event the facilities standards of § 21.21 are removed or changed. The Service in § 21.29 and § 21.30 has established standard criteria for falconers and raptor propagators. These include the requirements for falconry facilities. Any requirements beyond these are imposed by the respective individual states.

Another commenter suggested that the Service's requirements for alteration of a permit in § 13.43 should allow the "reasonable" copying of permits for use as records and for other limited purposes. The Service, in reply to the above comment, is justifiably concerned about the integrity of its permit system. Any proliferation of copies would tend to undermine the system and lead to increased doubt as to the authenticity of permits. Therefore, to continue to safeguard the permit system the ban on the copying of permits, except where specifically permitted on the face of the permit, will remain in effect.

One commenter noted that the requirements for the maintenance of records in § 13.46 were too burdensome on permittees. The Service fully realizes that there is some burden imposed upon the permittee by the requirement of § 13.46 to maintain records. The Service, however, believes that this burden is at a minimum level and reasonably necessary for the maintenance of a sound permit program and to preserve wildlife resources. Finally, a few commenters requested the Service define the terms "reasonable hour" and "sale." The term, "reasonable hour" as it is used in § 13.47 invokes a reasonable standard of interpretation and is given its common meaning in light of the facts and circumstances of each case. The Service has carefully considered the suggestion to provide greater clarification to this term and proposes making changes in the language of this and the equivalent section in § 13.21(e)(2) accordingly. The term "sale" includes offers, or possess for sale, barter, exchange, or trade. The Service invites further comment on the merits of the addition of such a definition.

Need for Proposed Rulemaking

The Fish and Wildlife Service (Service) is updating the general permit procedures. In addition the Service is correcting errors in the amended uniform rules and procedures for the application, issuance, denial, suspension, revocation, and general administration of permits issued pursuant to 50 CFR Part 13. Definitions have been added and several errors and missing references have been corrected. Changes were necessary in several sections for the purposes of eliminating ambiguities and to more clearly articulate procedural requirements, to circumscribe applicable exceptions to requirements, and to provide for greater clarity.

Changes in the Service permit user fee policies and rates were made in order to more fully recover the cost of maintaining the permit system. The Service is revising its overall user fee policies and rates and is attempting in general to recover a fair or more reasonable proportion of the cost of special services provided to individuals and businesses. The demands of providing such special services have required a proportionately greater allocation of Service resources than the services provided to the public at large. Federal guidelines indicate that the entire cost of providing such special services should be realized by the recipient, the Service at this time is simply attempting to recover a larger portion of permit issuance costs through more realistic user fees.

The Service is also amending 50 CFR Part 10 and 50 CFR Part 17. The Service is making limited changes to these parts to correct addresses provided therein.

Required Determinations

This rule was not subject to review by the Office of Management and Budget (OMB) review under Executive Order 12866. The Department of the Interior (Department) has determined that this proposed rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* Small entities are presently required to comply with the current regulations. This revision will have a beneficial effect upon small entities by simplifying general permit procedures. This action is not expected to have significant "taking" implications, as per Executive Order 12630. This proposed rule does not contain any additional information collection requirements that require approval by the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* The Department has certified to OMB that these proposed regulations meet the applicable standards provided in Section 2(a) and 2(b)(2) of Executive Order 12778. This action does not contain any federalism impacts as described in Executive Order 12612. These proposed changes in the regulations in Parts 10, 13, and 17 are regulatory and enforcement actions that are covered by a categorical exclusion from National Environmental Policy Act procedures under Section 516 of the Department Manual and an Environmental Action Memorandum is on file at the Service's office in Arlington, Virginia. A determination has been made pursuant to Section 7 of the Endangered Species Act that the revision of Part 14 will not affect federally listed species.

Author

The originator of this proposed rule is Law Enforcement Specialist Paul McGowan working in cooperation with the staff of the Division of Law Enforcement and the Office of Management Authority, Fish and Wildlife Service, Washington, D.C.

List of Subjects

50 CFR Part 10

Exports, Fish, Imports, Law enforcement, Plants, Transportation, Wildlife.

50 CFR Part 13

Administrative practice and procedure, Exports, Fish, Imports, Plants, Reporting and recordkeeping requirements, Transportation, Wildlife.

50 CFR Part 17

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

Regulation Promulgation

For the reasons set out in the preamble, Title 50, Chapter I, Subchapter B of the Code of Federal Regulations, is proposed to be amended as set forth below:

1. The authority citation for Part 10 is revised to read as follows:

Authority: 16 U.S.C. 668a–d, 703–712, 742a–742j–1, 1361–1384, 1401–1407, 1531–1543, 3371–3378; 18 U.S.C. 42; 19 U.S.C. 1202.

Subpart C—Addresses [Amended]

2. Section 10.22 is revised to read as follows:

§ 10.22 Regional and law enforcement offices.

Service Regional and Law Enforcement offices and their areas of responsibility follow:

(a) Mail forwarded for the attention of the Regional Director for the U.S. Fish and Wildlife Service should be addressed: Regional Director, Attention: Endangered/Threatened Species Permits (see appropriate address in the table in paragraph (b) of this section);

(b) Mail forwarded for the attention of the Division of Law Enforcement should be addressed: Assistant Regional Director, Division of Law Enforcement, (see appropriate address in the following table):

TABLE—AREAS OF RESPONSIBILITY AND OFFICE ADDRESSES

Jurisdiction	Regional directors	Assistant regional directors for law enforcement
Region 1: California, Hawaii, Idaho, Nevada, Oregon, Washington, American Samoa, Guam, the Marshall Islands, Northern Mariana Islands, and the Trust Territory of the Pacific Islands.	U.S. Fish and Wildlife Service 911 N.E. 11th Avenue, Portland, OR 97232–4181, Telephone: (503) 231–6241.	U.S. Fish and Wildlife Service, Law Enforcement, 911 N.E. 11th Avenue, Portland, OR 97232–4181, Telephone: (503) 231–6125.
Region 2: Arizona, New Mexico, Oklahoma, and Texas.	U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, NM 87103, Telephone: (505) 766–3972.	U.S. Fish and Wildlife Service, Law Enforcement, P.O. Box 329, Albuquerque, NM 87102, Telephone: (505) 766–2091.

Region 9: Any foreign country (Washington Office).	U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 420C, Arlington, VA 22203, Telephone: (703) 358–2104 or 1–(800) 358–2104.	U.S. Fish and Wildlife Service, Law Enforcement, P.O. Box 3247, Arlington, VA 22203–3247, Telephone: (703) 358–1949.

50 CFR Part 13 [Amended].

3. The authority citation for Part 13 is revised to read as follows:

Authority: 16 U.S.C. 668a; 704, 712; 742j–1; 1374(g); 1382; 1538(d); 1539, 1540(f); 3374; 4901–1916; 18 U.S.C. 42; 19 U.S.C. 1202; 31 U.S.C. 483(a), 9701; E.O. 11911, 41 FR 15683.

4. Section 13.1 is revised to read as follows:

§ 13.1 General.

Each person intending to engage in an activity for which a permit is required by this subchapter B will, before commencing such activity, obtain a valid permit authorizing such activity. Each person who desires to obtain the permit privileges authorized by this subchapter must make application for such permit in accordance with the requirements of this part 13 and the other regulations in this subchapter that set forth the additional requirements for the specific permits desired. If the activity for which a permit is sought is covered by the requirements of more than one part of this subchapter, the requirements of each part must be met. A single permit authorizing an activity under several parts of this subchapter B may be issued. A single application for such a permit will be accepted if it includes all of the information required to justify each specific permitted activity to be authorized.

5. Section 13.3 is revised to read as follows:

§ 13.3 Scope of regulations.

The provisions in this part are in addition to, and are not in lieu of, other permit regulations of this subchapter and apply to all permits issued thereunder, including "Importation, Exportation and Transportation of Wildlife" (Part 14), "Wild Bird Conservation Act" (Part 15), "Injurious Wildlife" (Part 16), "Endangered Wildlife and Plants" (Part 17), "Marine Mammals" (Part 18), "Migratory Bird Permits" (Part 21), "Eagle Permits" (Part 22), and "Endangered Species Convention" (the Convention on International Trade in Endangered Species of Wild Fauna and Flora) (Part 23)—except as provided in § 13.22(c). As used in this part 13 the term "permit" will refer to a license, permit, or certificate as the context may require and to all such documents issued by the Service or other authorized United States or foreign government agencies.

6. Section 13.11 is amended by revising the introductory text to the section, by revising paragraphs (b)(2) and (b)(3), by adding paragraph (b)(4), by revising paragraphs (c), (d)(2), (d)(3), (d)(4) and (e) to read as follows:

§ 13.11 Application procedures.

The Service may not issue a permit for any activity authorized by this subchapter B unless the applicant has filed an application in accordance with the following procedures:

* * * * *

(b) * * *

(2) Exception to designated port (50 CFR part 14), import/export license (50 CFR 14.93), migratory bird permit other than banding (50 CFR part 21), and bald or golden eagle permits (50 CFR part 22) may be obtained by writing to the Assistant Regional Director for Law Enforcement of the Region in which the applicant resides (see 50 CFR 10.22 for addresses and boundaries of the Regions).

(3) Wild Bird Conservation Act (50 CFR part 15); injurious wildlife (50 CFR part 16); endangered and threatened species, except incidental take, and native species take and interstate commerce (50 CFR part 17); marine mammals (50 CFR part 18); and permits and certificates for the Convention on International Trade in Endangered Species of Wild Fauna and Flora

(CITES), (50 CFR part 23) may be obtained by writing to: Fish and Wildlife Service, Office of Management Authority, 4401 N. Fairfax Drive, Room 420C, Arlington, Virginia 22203.

(4) Endangered and threatened species incidental take permits (50 CFR 17.22(b)), and native endangered and threatened species take and interstate commerce permits may be obtained by writing to: Regional Director (Attention: *Endangered/Threatened Species Permits*) of the Region where the activity is to take place (see 50 CFR 10.22 for addresses and boundaries of the Regions).

(c) *Time notice.* The Service will process all applications as quickly as possible. However, it cannot guarantee final action within the time limits the applicant requests. Applications for permits for marine mammals and/or endangered and threatened species should be postmarked at least 90 calendar days prior to the requested effective date. Time required for the processing of endangered and threatened species incidental take permits will vary according to the project scope and significance of effects. Applications for all other permits should be submitted to the issuing/reviewing office and be postmarked at least 60 calendar days prior to the requested effective date. The processing time of permits may be increased by the procedural requirements of the National Environmental Policy Act (NEPA). When applicable, the Service may require permit applicants to provide additional information on the proposal and on its environmental effects as may be necessary to satisfy the Service's requirements to comply with the procedural requirements of NEPA.

(d) * * *

(2) If regulations in this subchapter require more than one type of permit for an activity and the permits are issued by the same office, the issuing office may issue one consolidated permit authorizing the activity pursuant to § 13.1. The issuing office in such instance may charge only the highest single fee for the activity permitted.

(3) A fee will not be charged to any Federal or State government agency nor to any individual or institution under contract to such agency for the proposed activities. The fee may be waived or reduced for public institutions (see 50 CFR 10.12). Proof of status as a Federal or State government agency must accompany the application. Except as otherwise authorized or waived, the failure to submit evidence of such status with the application will require the submission of all processing fees prior to the acceptance of the application for processing.

(4) *User fees.*

(i) Standard user fee.

Type of permit	Fee
Except as provided in paragraph (d)(4)(ii) of this section, the standard fee for processing any application	$50

(ii) Nonstandard user fees.

Marine Mammals	
Public Display and Scientific Research (18.31)	$250
Registered Tanners/Agents (18.23(d))	75
Endangered Species Act (ESA)	
Captive-bred Wildlife:	
New Requests	175/3 years
Renewals and Pheasants	75/3 years
ESA Import, Take, and Interstate Commerce	175
ESA Export and Foreign Commerce	100
CITES Import	150
CITES Trophy Import	50
CITES Reissuance, Pre-Convention, Captive-bred, Artificially Propagated Plants, and Certificate of Origin	75
CITES Pet Export/Re-Export	35
CITES Export	125
CITES Appendix II Export of native furbearers and alligators (excluding live)	75
CITES Appendix II, III Re-Export	125
Import/Export License (14.93)	55
Injurious Wildlife (Part 16)	75
Wild Bird Conservation Act (Part 15)	
Personal Pet Import (15.25)	50
Scientific Research, Zoological Breeding or Display, and Cooperative Breeding (15.22, 15.23, 15.24)	150
Approval of Cooperative Breeding Programs	200
Approval of Foreign Breeding Facilities	250/species
Migratory Bird (Part 21)	
Bird-Banding/Marking (21.22)	None
Special Purpose—Rehabilitation/Educational (21.27)	None
Special Purpose—Depredation, Private Individuals (Non-Commercial) (21.27)	25
Bald and Golden Eagles (Part 22)	None
Indian Religious or Ceremonial Use (Part 21, 22.22)	None

(e) *Abandoned or incomplete applications.* Substantially incomplete or improperly executed applications may be returned to the applicant. If the application is only lacking minor information or the proper fees, the issuing/reviewing office will accept the application for processing and notify the applicant of the deficiency. If the applicant fails to supply the correct information to complete the application or to pay the required fees within 45 calendar days of the date of notification, the Service will consider the application abandoned. The Service will not refund fees for an abandoned application.

7. Section 13.12 is amended by revising paragraphs (a)(4) and (b) to read as follows:

§ 13.12 General information requirements on applications for permits.

(a) * * *

(4) If the requested permit activity involves the import, export, or re-export

of wildlife or plants from or to any foreign country, and the country of origin or the country of export or re-export restricts the taking, possession, transportation, exportation, or sale of wildlife or plants, documentation as indicated in § 14.52(c) of this subchapter B;

* * * * *

(b) *Additional information required on permit applications.* As stated in paragraph (a)(3) of this section certain additional information is required on all applications. These additional requirements may be found by referring to the section of this subchapter B cited after the type of permit for which application is being made:

Type of permit	Section
Importation at Nondesignated Ports:	
Scientific	14.31
Deterioration Prevention	14.32
Economic Hardship	14.33
Import/Export License	14.93
Wild Bird Conservation Act Permits:	
Scientific Research	15.22
Zoological Breeding or Display	15.23
Cooperative Breeding	15.24
Personal Pets	15.25
Injurious Wildlife: Importation or Shipment	16.22
Endangered Wildlife and Plant Permits:	
Similarity of Appearance	17.52
Scientific, Enhancement of Propagation or Survival, Incidental Taking of Wildlife	17.22
Scientific, Enhancement of Propagation or Survival for Plants	17.62
Economic Hardship for Wildlife	17.23
Economic Hardship for Plants	17.63
Threatened Wildlife and Plant Permits:	
Similarity of Appearance	17.52
General for Wildlife	17.32
General for Plants	17.72
Marine Mammals Permits:	
Scientific Research	18.31
Public Display	18.31
Registered Agent or Tanner	18.23(d)
Migratory Bird Permits:	
Banding or Marking	21.22
Scientific Collecting	21.23
Taxidermist	21.24
Waterfowl Sale and Disposal	21.25
Special Purpose	21.27
Falconry	21.28
Raptor Propagation Permit	21.30
Depredation Control	21.41
Eagle Permits:	
Scientific or Exhibition	22.21
Indian Religious Use	22.22
Depredation Control	22.23
Falconry Purposes	22.24
Take of Golden Eagle Nests	22.25
Endangered Species Convention Permits (CITES)	23.15

8. Section 13.21 is amended by revising paragraphs (a), (b), (c)(1), (c)(2), (e)(2), and (g) as follows:

§ 13.21 Issuance of permits.

(a)(1) No permit may be issued prior to the receipt of a written application unless a written variation from the requirements, as authorized by § 13.4, is inserted into the official file of the Service. An oral or written representation of an employee or agent of the United States Government or an action of such employee or agent will not be construed as a permit unless it meets the requirements of a permit as defined in 50 CFR 10.12.

(2) For the purpose of this part, a determination as to an applicant's exercise of responsibility is to include consideration of such factors as:

(i) Level of competence, ability, skill, knowledge, training, and/or the suitability of facilities, particularly for live animals and plants;

(ii) Prior wildlife or plant violations;

(iii) Failure to qualify or fulfill any criteria or conditions applicable to the permit; or

(iv) Prior violations involving misrepresentation of material facts; falsified documents; false labeling or invoicing; failure to present documents, wildlife, or plants for examination or inspection; or other circumstances involving concealing, evading, or circumventing detection of wildlife or plant violations.

(b) *Issuance criteria.* Upon receipt of a properly executed application for a permit, the Director or Regional Director will issue the appropriate permit unless:

(1) The applicant has been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed, if such assessment or conviction evidences a lack of responsibility in accordance with paragraph (a)(2) of this section.

(2) The applicant has failed to disclose material information required or has made false statements as to any material fact in connection with his/her application.

(3) The applicant has failed to demonstrate a valid justification for the permit;

(4) The authorization requested potentially threatens a wildlife or plant population;

(5) The Director or Regional Director finds through further inquiry or investigation, or otherwise, that the applicant is not qualified;

(6) The applicant has failed to fulfill the applicable requirements of this subchapter B;

(7) The applicant has failed to comply with the conditions of previously held permits;

(8) The applicant has failed to exercise responsibility in accordance with § 13.21(a)(2); or

(9) The applicant has conducted the activity prior to the issuance of the permit required by subchapter B.

(c) * * *

(1)(i) A conviction or entry of a plea of guilty or nolo contendere for a criminal violation of the Lacey Act, the Migratory Bird Treaty Act, the Bald and Golden Eagle Protection Act, Endangered Species Act, Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), Airborne Hunting Act, Marine Mammal Protection Act, Wild Bird Conservation Act, or African Elephant Conservation Act will disqualify such person from receiving or exercising the privileges of a permit for a period of 5 years from the date of most recent conviction or entry of judgment, unless such disqualification has been expressly waived by the Director or Regional Director in response to a written petition.

(ii) The assessment of one or more civil penalties for violation(s) of the Lacey Act, Bald and Golden Eagle Protection Act, Endangered Species Act, CITES, Airborne Hunting Act, Marine Mammal Protection Act, Wild Bird Conservation Act, or African Elephant Conservation Act will disqualify such person from receiving or exercising the privileges of a permit for a period of 5 years, from the date of most recent assessment, where such assessment(s) evidences a lack of responsibility in accordance with paragraph (a)(2) of this section, unless such disqualification has been expressly waived by the Director or Regional Director in response to a written petition.

(2) The revocation of a permit for reasons found in § 13.28 (a)(1), (a)(2), or (a)(3) disqualifies any such person from receiving or exercising the privileges of a similar permit for a period of 5 years from the date of the final agency decision on such revocation, unless such disqualification has been expressly waived by the Director or Regional Director in response to a written petition.

* * * * *

(e) * * *

(2) Any person accepting and holding a permit under this subchapter B acknowledges the necessity for close regulation and monitoring of the permitted activity by the Government. By accepting such permit, the permittee consents to and will allow entry by agents or employees of the Service, or authorized State official upon premises where the permitted activity is conducted at any reasonable hour, as established or evidenced by actual operation, or normal or expected hours of operation for the type or similar type of business, trade, operation, or activity. Service agents or employees may enter such premises to inspect the location; and inspect, audit or copy any books, records, or permits required to be kept by this subchapter B; and inspect any wildlife or plants kept under authority of the permit.

(f) * * *

(g) *Denial*. The issuing/reviewing office may deny a permit to any applicant who fails to meet the issuance criteria set forth in this section or in the part(s) or section(s) specifically governing the activity for which the permit is requested. The applicant will be provided with a written explanation stating the basis for the denial and of the right to request reconsideration. Except where otherwise provided, a permit denial will be presumed to remain in effect for a period of 1 year after the date of denial, unless granted the permit during the review process.

9. Section 13.22 is amended by adding introductory text to the section and by revising paragraphs (a), (c), and (d) to read as follows:

§ 13.22 Renewal of permits.

Generally, a permit under this subchapter B may be renewed provided the specified permit activity authorized thereunder has not been completed.

(a) *Application for renewal*. Applicants to renewal of a permit must submit a written application, complete in all regards, at least 30 calendar days prior to the expiration date of the current permit. Applicants for renewal must certify in the form required by § 13.12(a)(5) that all statements and information in the original application remain current and correct, unless previously changed or corrected. If such information is no longer current or correct, the applicant must provide corrected information. Except where otherwise provided by written authorization, any renewal of application information remaining unchanged for a period of more than 4 years may be regarded as outdated, and the applicant required to provide a new and complete application information upon request.

* * * * *

(c) *Continuation of permitted activity*. Any person holding a valid and renewable permit, currently in force and not suspended or revoked, who has complied with this section may continue the activities authorized by the expired permit until the Service has acted on such person's application for renewal. The terms of this provision do not apply to permits or certificates issued under CITES in accordance with part 23, which are void upon expiration.

(d) *Denial*. The issuing/reviewing office may deny renewal of a permit to any applicant who fails to meet the issuance criteria set forth in § 13.21 of this part or in the part(s) or section(s) specifically governing the activity for which the renewal is requested. The applicant will be provided a written explanation of the basis for the denial and of the right to request reconsideration. Upon receipt of a denial the applicant will be required to cease all activities authorized by the permit. Except where otherwise provided, a permit denial will be presumed to remain in effect for a period of 1 year after the date of denial, unless granted the permit during the review process.

10. Section 13.23 is amended by revising paragraph (a), by revising paragraph (c), and by adding paragraph (d) to read as follows:

§ 13.23 Amendment of permits.

(a) *Permittee's request*. Where circumstances have changed so that a permittee desires to have any condition of his/her permit modified, such permittee must submit a full written justification and supporting information in conformance with this part and the part under which the permit was issued.

* * * * *

(c) *Change of name or address*. A permittee is not required to obtain a new permit if there is a change in the legal individual or business name or in the mailing address of the permittee. A permittee is required to notify the issuing office within 10 calendar days of any such change. Where the issuing office is not so notified and reasonable efforts to contact the permittee by certified and/or registered mail have failed, the permit will be canceled. The canceled permit may be reinstated if the permittee subsequently contacts the issuing office within 90 calendar days. This provision does not authorize any change in location of the conduct of the permit activity when approval of the location is a qualifying condition of the permit.

(d) *Denial*. The issuing/reviewing office may deny amendments of a permit to any applicant who fails to meet the issuance criteria set forth in § 13.21 of this part or in the part(s) or section(s) specifically governing the activity for which the amendment is requested. The applicant will be provided a written explanation of the basis for the denial and of the right to request reconsideration. Except where otherwise provided, a permit denial will be presumed to remain in effect for a period of 1 year after the date of denial, unless granted the permit during the review process.

11. Section 13.27 is amended by revising paragraph (a), by revising paragraph (b)(2), and by revising paragraph (b)(3) and by adding paragraph (b)(4) to read as follows:

§ 13.27 Permit suspension.

(a) *Criteria for suspension*. The following criteria will apply except: pursuant to a court order; in cases of willfulness; or in cases where the public health, interest, or safety requires otherwise. In general the privileges of exercising some or all of the permit authority may be suspended at any time if the permittee is not in compliance with the conditions of the permit or with any applicable laws or regulations governing the conduct of the permitted activity. The issuing/reviewing office may also suspend all or part of the privileges authorized by a permit if the permittee fails to pay any fees, penalties, or costs owed to the Government.

(b) * * *

(2) Upon receipt of a notice of proposed suspension the permittee may file a written objection to the proposed action. Such objection must be in writing, must be postmarked within 45 calendar days of the date of the notice of proposal, must state the reasons why the permittee objects to the proposed suspension, and may include supporting documentation and any new information.

(3) A decision on the proposed suspension will be made within 45 calendar days after receipt of the objection, or the end of the objection period if the permittee does not respond within the objection period, unless extended for good cause and the permittee is notified of the extension. In the event of an adverse decision on the permittee's written objection, the issuing/reviewing office will notify the permittee in writing of the Service's decision and the reasons thereof together with the information concerning the right to appeal the decision under § 13.29(e) of this part, and the procedures thereof.

(4) A permit suspended under paragraph (b)(3) of this section will be subject to revocation in accordance with § 13.28(c) when the permittee fails to correct the deficiencies that were the cause of the permit suspension within 45 calendar days of the following: (i)(A) Receipt of the suspension action under paragraph (b) of this section; or (B) the date of adverse decision under the appeal process set forth in § 13.29(e). (ii) Where the permittee has provided written notification to clearly show the deficiencies that were the cause of permit suspension have been corrected within the 45 days of this subparagraph, a decision on the revocation will be made within 45 calendar days after receipt of the notice of correction.

12. Section 13.28 is amended by revising paragraph (a) and the heading of paragraph (b); adding paragraph (b) introductory text revising paragraphs (b)(2), (b)(3), and (b)(4); by adding paragraphs (c) and (d) to read as follows:

§ 13.28 Permit revocation.

(a) *Criteria for revocation*. The following criteria will apply, except: pursuant to a court order; or in cases of willfulness; or in cases where the public health, interest, or safety require otherwise. A permit may be revoked for any of the following reasons:

(1) The permittee has violated any Federal or State statute or regulation, or any Indian tribal law or regulation, or any law or regulation of any foreign country, that involves a violation of the condition(s) of the permit or of the law(s) or regulation(s) governing the permitted activity, that results in a felony conviction, or entry of a plea of guilty or nolo contendere. The revocation will disqualify any such person in accordance with § 13.21(c)(2) from receiving or exercising the privileges of a similar permit for a period of 5 years; or

(2) The permittee has violated any Federal or State statute or regulation, or any Indian tribal law or regulation, or any law or regulation of any foreign country, that involves a violation of the condition(s) of the permit or of the laws or regulations governing the permitted activity resulting in a conviction, or entry of a plea of guilty or nolo contendere for any misdemeanor violation, or the assessment of a penalty for a civil violation if such assessment or conviction evidences a lack of responsibility. The revocation will disqualify any such person in accordance with § 13.21(c)(2) from receiving or exercising the privileges of a similar permit for a period of 5 years; or

(3) The permittee fails to correct deficiencies that were the cause of a permit suspension, within 45 calendar days of receipt of the suspension action in accordance with § 13.27(b) or, if appealed, within 45 calendar days of the date of an adverse decision under the appeal process set forth in § 13.29(e). The revocation will disqualify any such person, in accordance with § 13.21(c)(2), from receiving or exercising the privileges of a similar permit for a period of 5 years; or

(4) The permittee becomes disqualified under § 13.21(c) of this part; or

(5) A change occurs in the statute or regulation authorizing the permit that prohibits the continuation of a permit issued by the Service; or

(6) The population(s) of the wildlife or plant that is the subject of the permit declines to the extent that continuation of the permitted activity would be detrimental to maintenance or recovery of the affected population;

(7) The permittee failed to disclose material information required or made false statements as to any material fact in connection with his or her permit application or as to the conduct of activities under his or her permit;

(8) The permittee has failed to exercise responsibility in accordance with § 13.21(a)(2);

(9) The Director or Regional Director finds through further inquiry or investigation, or otherwise, that the applicant is not qualified; or

(10) The permittee has failed to fulfill the applicable requirements of this subchapter B.

(b) *General procedures for revocation*. Except as provided in paragraph (c) of this section, the following procedures will apply.

* * * * *

(2) Upon receipt of a notice of proposed revocation the permittee may file a written objection to the proposed action. Such objection must be in writing, must be postmarked within 45 calendar days of the date of the notice of proposal, must state the reasons why the permittee objects to the proposed revocation, and may include supporting documentation and any new information.

(3) A decision on the proposed revocation will be made within 45 calendar days after receipt of the objection or the end of the objection period if the permittee does not respond within the objection period, unless

extended for good cause and the permittee is notified of the extension. In the event of an adverse decision on the permittee's written objection the issuing/reviewing office will notify the permittee in writing of the Service's decision and the reasons therefor, together with the information concerning the right to appeal the decision under § 13.29(e) of this part, and the procedures for appeal.

(4) Unless a permittee files a timely appeal as set forth in § 13.29(e), any wildlife or plants held under authority of a permit that is revoked must be disposed of in accordance with instructions of the issuing/reviewing office. If a permittee files a timely appeal of a permit revocation, such permittee may retain possession of any wildlife or plants held under authority of the permit until final disposition of the appeal process.

(c) *Special procedures for revocation.* A suspension permit will be subject to revocation when a permittee fails to correct deficiencies that were the cause of the permit suspension, in accordance with § 13.28(a)(3) and the procedures of this section:

(1) When the issuing/reviewing office believes there are valid grounds for the revocation of a permit suspended under the criteria of § 13.27(a) for reasons found in § 13.28(a)(3), the permittee will be notified in writing of the revocation by certified or registered mail. This notice will identify: the permit that has been revoked; the reason(s) for such revocation; the effective date of revocation; the proposed disposition of the wildlife or plants, if any; and inform the permittee that such revocation is without recourse to further administrative procedures and of the permittee disqualification for 5 years in accordance with § 13.21(c)(2). The issuing/reviewing office may amend any notice of revocation at any time.

(2) Any wildlife or plants held under authority of a permit that has been subjected to permit suspension in accordance with § 13.27, where the permittee has failed to correct deficiencies that were the cause of the permit suspension in accordance with § 13.28(a)(3) must be disposed of in accordance with instructions of the issuing/reviewing office.

(d) *Time allocated for administrative procedures.*

(1) *Suspension (§ 13.27(b)).*

(i) Written objection postmarked within 45 calendar days of the date of proposed suspension (§ 13.27(b)(2)).

(ii) Service decision within 45 calendar days after receipt of the objection or end of the objection period (§ 13.27(b)(3)).

(iii) Correct deficiencies within 45 calendar days of the date of the suspension (§ 13.27(b)(4)).

(iv) Appeal of adverse decision postmarked within 45 calendar days of the date of the notification (§ 13.27(b)(3)).

(v) Correct deficiencies within 45 calendar days of the date of the denial of the appeal (§ 13.27(b)(4)).

(2) *Revocation (§ 13.28(b)).*

(i) Written objection postmarked within 45 calendar days of the date of proposed revocation (§ 13.28(b)(2)).

(ii) Service decision within 45 calendar days after receipt of the objection or end of the objection period (§ 13.28(b)(3)).

(iii) Appeal of adverse decision postmarked within 45 calendar days of the date of the notification (§ 13.28(b)(3)).

(iv) The decision of the Director or the Regional Director will constitute the final administrative decision of the Department of the Interior (§ 13.29(f)(e)).

(3) *Revocation of suspended permit (§ 13.28(c)).*

(i) Occurs if permittee has failed to correct deficiencies that resulted in suspension under § 13.27(b)(3) within 45 calendar days of either: the receipt of the suspension action in accordance with § 13.28(a)(3) or, if the suspension is appealed, the date of a final adverse decision under the appeal process set forth in § 13.29(e).

(ii) The permittee will be notified in writing of the permit revocation by certified or registered mail. Revocation under 13.28(c) is without recourse to further administrative procedures (§ 13.28(c)(1)).

(4) *Other review procedures.* Denial under § 13.29(a)(1), or denial of renewal § 13.29(a)(2), amendment § 13.29(c) or required amendment § 13.29(a)(3), and partial denial of permit issued, renewed, or amended § 13.29(a)(4).

(i) Written reconsideration (include certification) postmarked within 45 calendar days of notification of the decision (§ 13.29(b)(2), § 13.29(b)(4)).

(ii) Service decision within 45 calendar days after receipt of the request for reconsideration (§ 13.29(d)).

(iii) Appeal of an adverse decision postmarked within 45 calendar days of the date of notification (§ 13.29(e)).

(iv) The decision of the Director or the Regional Director will constitute the final administrative decision of the Department of the Interior (§ 13.29(f)(e)).

13. Section 13.29 is amended by revising (a) introductory text, (a)(3), (a)(4), (b)(2), (b)(4), (d) and (e), by redesignating the existing paragraphs (f) (1), (2) and (3) as (f) (2), (3), and (4), by adding a new paragraph (f)(1) and by revising newly designated paragraphs (f) (2), (3) and (4) to read as follows:

§ 13.29 Review procedures.

(a) *Request for reconsideration.* Except when the activity requested is one for which there is no lawful authority to issue a permit and in actions revoking a suspended permit in accordance with § 13.28(a)(3) for failure to correct the deficiencies that were the cause of permit suspension, any person may request reconsideration of an action under this part if that person is one of the following:

* * * * *

(3) A permittee who has a permit amended, except for those actions that are required by changes in statutes or regulations or are emergency changes of limited applicability for which an expiration date is set within 90 calendar days of the permit change; or

(4) A permittee who has a permit issued, renewed, or amended, but has not been granted authority by the permit to perform all activities requested in the application.

(b) * * *

(2) The request for reconsideration must be postmarked within 45 calendar days of the date of notification of the decision for which reconsideration is being requested.

* * * * *

(4) The request for reconsideration will contain a certification in substantially the same form as that provided by § 13.12(a)(5). If a request for reconsideration does not contain such certification, but is otherwise timely and appropriate, it will be held, and the person submitting the request will be given written notice of the need to submit the certification within 15 calendar days of the date of the notice. Failure to submit certification will result in the request being rejected as insufficient in form and content.

* * * * *

(d) *Determination of grant or denial of a request for reconsideration.* The issuing/reviewing office will notify the applicant or permittee of the Service's decision within 45 calendar days of the receipt of the request for reconsideration or the certification, if submitted separately, unless extended for good cause and the applicant or permittee is notified of the extension. This notification will be in writing, will state the reasons for the decision, and will contain a description of the evidence that was relied upon by the issuing/reviewing office. If the decision is adverse, the notification will also provide information concerning the right to appeal, the official to whom an appeal may be addressed, and the procedures for making an appeal.

(e) *Appeal.* Except for actions revoking a suspended permit in accordance with § 13.27(a), § 13.28(a)(3), and § 13.28(c), a person who has received an adverse decision following submission of either a written objection to a suspension or revocation or a request for reconsideration may submit a written appeal to the Regional Director for the region in which the issuing/reviewing office is located or to the Director, for offices that report directly to the Director. An appeal when submitted must be postmarked within 45 calendar days of the date of the notification of the decision on the objection to a suspension or revocation, or the request for reconsideration. The appeal will state the reason(s) and issue(s) upon which the appeal is based and may contain any additional evidence or arguments to support the appeal.

(f) * * * (1) The Director or the Regional Director may designate any staff member(s) to assist in analyzing the issues and may include the recommendations of the issuing/reviewing office.

(2) Before a decision is made concerning the appeal, the appellant may present oral arguments before the Director or the Regional Director, as appropriate, if such official judges oral arguments are necessary to clarify issues raised in the written record.

(3) The Service will notify the appellant in writing of its decision within 45 calendar days of receipt of the appeal, unless extended for good cause and the appellant is notified of the extension.

(4) The decision of the Director or the Regional Director will constitute the final administrative decision of the Department of the Interior.

14. Section 13.30 is added to subpart C to read as follows:

§ 13.30 Table of references.

(a) Exercise of Responsibility Determinations: A determination as to whether an applicant or permittee has exercised responsibility under the considerations of § 13.21(a)(2).	Will be made for the reasons specified in § 13.21(b)(1), § 13.21(b)(3), § 13.21(b)(8), § 13.21(c)(1)(ii), or § 13.28(a)(2).1
(b) The Effects of Disqualification: A disqualification for reasons specified in § 13.21(c).	Will result in denial of a new permit [§ 13.21(g)], renewal of a permit [§ 13.22(b)], and amendment of a permit [§ 13.23(c)], or revocation of any existing permit [§ 13.28(a)(4)].
(c) Procedures for Denial: Permit under § 13.21(g), Renewal under § 13.22(d), Amendment under § 13.23(c), or Partial Denial under § 13.29(a)(4). An applicant for a permit who has received a written notice of denial.	May file a request for reconsideration under the procedures specified in § 13.29(b) and may then file a timely appeal when appropriate under § 13.29(e).
(d) Procedures for Permit Amendment(s) Initiated by the Service: A permittee [see § 13.29(a)(3)] who has a permit amended under § 13.23(b).	May file a request for reconsideration under the procedures specified in § 13.29(b) and may then file a timely appeal when appropriate under § 13.29(e).
(e) Procedures for Suspension of a Permit: A permittee who has a permit suspended in accordance with § 13.27.	May file a written objection as specified in § 13.27(b)(2) and may then file a timely appeal in accordance with § 13.27(b)(3) when appropriate under § 13.29(e).
(f) General Procedures for Revocation of a Permit: A permittee who has received a proposed revocation for reasons specified in § 13.28(a)(1), § 13.28(a)(2), § 13.28(a)(4), § 13.28(a)(5), § 13.28(a)(6), § 13.28(a)(7), § 13.28(a)(8), § 13.28(a)(9), or § 13.28(a)(10).	May file a written objection as specified in § 13.28(b)(2) and may then file a timely appeal in accordance with 13.28(b)(3) when appropriate under § 13.29(e).
(g) Special Procedures for Revocation of a Suspended Permit, Where Applicant Has Failed to Correct Deficiencies That Were the Cause of a Suspension: A suspended permit revoked for reasons specified in § 13.28(a)(3).	Will follow the revocation procedures specified in § 13.28(c).
(h) The Effects of a Prior Revocation on Subsequent Permits:	Will result in disqualification for a permit under § 13.21(c)(2).
A prior revocation for reason specified in § 13.28(a)(1), § 13.28(a)(2), or § 13.28(a)(3).	

15. Section 13.41 is revised to read as follows:

§ 13.41 Humane conditions.

Any live wildlife or plants possessed, held, transported and/or imported under a permit must be maintained under humane and healthful conditions to include 9 CFR subchapter A, 50 CFR part 14, subpart J, and other conditions of a permit that may apply.

16. Section 13.46 is revised to read as follows:

§ 13.46 Maintenance of records.

From the date of issuance of the permit, the permittee will maintain complete and accurate records of any taking, possession, transportation, sale, purchase, barter, exportation, or importation of plants or wildlife pursuant to such permit. Such records will be kept current and will include names and addresses of persons from or with whom any plant or wildlife has been purchased, sold, bartered, or otherwise transferred, and the date of such transaction; date of death or escape; and such other information as may be required or appropriate. Such records will be legibly written or reproducible in English and will be maintained for 5 years from the date of expiration of the permit.

17. Section 13.47 is revised to read as follows:

§ 13.47 Inspection requirement.

Any person holding a permit under this subchapter B will allow the Director's or Regional Director's agent to enter his premises at any reasonable hour, as established or evidenced by actual operation, or normal or expected hours of operation for the type or similar type of business, trade, operation, or activity, to inspect any wildlife or plant held or to inspect, audit, or copy any permits, books, or records required to be kept by regulations of this subchapter B.

18. The authority citation for Part 17 is revised to read as follows:

Authority: 16 U.S.C. 1361–1407, 1531–1544, 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

Subpart C—Endangered Wildlife [Amended]

19. Section 17.22 is amended by revising paragraphs (a)(1) introductory text and (b)(1) introductory text to read as follows:

§ 17.22 Permits for scientific purposes, enhancement of propagation or survival, or for incidental taking.

* * * * *

(a)(1) *Application requirements for permits for scientific purposes or for the enhancement of propagation or survival.* Applications for permits under this paragraph for native endangered species take and interstate commerce must be submitted to the Regional Director, U.S. Fish and Wildlife Service, Attention: Endangered/Threatened Species Permits, for the Region where the applicant resides or where the take is to occur (for appropriate address see 50 CFR 10.22), by the person wishing to engage in the activity prohibited by § 17.21 (c) and (e). Applications for permits under this paragraph for prohibited activities with foreign species and import, export, and foreign commerce with native endangered species must be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 N. Fairfax Drive, Room 420c, Arlington, Virginia 22203, by the person wishing to engage in the activity prohibited by § 17.21. Each application must be submitted on an official application (Form 3–200) provided by the Service and must include as an attachment, all of the following information:

* * * * *

(b)(1) *Application requirements for permits for incidental taking.* Applications for permits under this paragraph must be submitted to the Regional Director, U.S. Fish and Wildlife Service, Attention: Endangered/Threatened Species Permits, for the Region where the activity is to take place (for appropriate address see 50 CFR 10.22), by the person wishing to engage in the activity prohibited by § 17.21(c). Each application must be submitted on an official application (Form 3–200) provided by the Service and must include as an attachment all of the following information:

* * * * *

Subpart D—Threatened Wildlife [Amended]

20. Section 17.32 is amended by revising paragraphs (a)(1) introductory text and (b)(1)(i) to read as follows:

§ 17.32 Permits—general.

* * * * *

(a)(1) *Application requirements for scientific purposes, or the enhancement of propagation or survival, or economic hardship, or zoological exhibition, or educational purposes, or special purposes consistent with the purposes of the Act.* Applications for permits under this paragraph for native threatened species take and interstate commerce must be submitted to the Regional Director, U.S. Fish and Wildlife Service, Attention: Endangered/Threatened Species Permits, for the Region where the applicant resides or where the take is to occur (for appropriate address see 50 CFR 10.22), by the person wishing to engage in the prohibited activity. Applications for permits under this paragraph for prohibited activities with foreign species and import, export, and foreign commerce with native threatened species must be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management and Authority, 4401 N. Fairfax Drive, Room 420c, Arlington, Virginia 22203, by the person wishing to engage in the prohibited activity. Each application must be submitted on an official application (Form 3–200) provided by the Service and must include as an attachment, as much of the following information that relates to the purpose for which the applicant is requesting a permit:

* * * * *

(b)(1) *Application requirements for permits for incidental taking.* (i) Applications for permits under this paragraph must be submitted to the Regional Director, U.S. Fish and Wildlife Service, Attention: Endangered/Threatened Species Permits, for the Region where the activity is to take place (for appropriate address see 50 CFR 10.22), by the person wishing to engage in the activity prohibited by § 17.31.

* * * * *

Subpart F—Endangered Plants [Amended]

21. Section 17.62 is amended by revising paragraph (a) introductory text to read as follows:

§ 17.62 Permits for scientific purposes or for the enhancement of propagation or survival.

* * * * *

(a) *Application requirements.* An application for a permit under this section for native endangered species take and interstate commerce must be submitted to the Regional Director, U.S. Fish and Wildlife Service, Attention: Endangered/Threatened Species Permits, for the Region where the applicant resides or where the take is to occur (for appropriate address see 50 CFR 10.22), by the person wishing to engage in the prohibited activity. Applications for permits under this paragraph for prohibited activities with foreign species and import, export, and foreign commerce with native endangered species must be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 N. Fairfax Drive, Room 420c, Arlington, Virginia 22203, by the person wishing to engage in the prohibited activity. The permit for activities involving interstate commerce must be obtained by the seller if the plants are derived from cultivated stock, and by the buyer if the plants are taken from the wild. The application must be submitted on an official application form (Form 3–200) provided by the Service, or must contain the general information and certification required by § 13.12(a) of this subchapter. Requirements differ for the issuance of a permit for activities dealing with plants obtained from the wild (excluding seeds), seeds and cultivated plants, or herbarium specimens. The applicant must provide in an attachment the following required information and any other information that is requested by the Director or Regional Director.

* * * * *

Subpart G—Threatened Plants [Amended]

22. Section 17.72 is amended by revising paragraph (a) introductory text to read as follows:

§ 17.72 Permits—general.

* * * * *

(a) *Application requirements.* An application for a permit under this section for native threatened species take and interstate commerce must be submitted to the Regional Director, U.S. Fish and Wildlife Service, Attention: Endangered/Threatened Species Permits, for the Region where the applicant resides or where the take is to occur (for appropriate address see 50 CFR 10.22), by the person wishing to engage in the prohibited activity. Applications for permits under this paragraph for prohibited activities with foreign species and import, export, and foreign commerce with native threatened species must be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 N. Fairfax Drive, Room 420c, Arlington, Virginia 22203, by the person wishing to engage in the prohibited activity. The permit for activities involving interstate commerce must be obtained by the seller if the plants are derived from cultivated stock, and by the buyer if the plants are taken from the wild. The application must be submitted on an official application form (Form 3–200) provided by the Service, or must contain the general information and certification required by § 13.12(a) of this subchapter. Requirements differ for the issuance of a permit for activities dealing with plants obtained from the wild (excluding seeds), seeds and cultivated plants, or herbarium specimens. The applicant must provide in an attachment the following required information and any other information that is requested by the Director or Regional Director.

National Oceanic and Atmospheric Administration

50 CFR Part 625

[Docket No. 950822210–5210–01; I.D. 081195A]

RIN 0648–AH94

Summer Flounder Fishery; Amendment 7

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS issues this proposed rule to implement measures proposed in Amendment 7 to the Summer Flounder Fishery Management Plan (FMP). This amendment would revise the fishing mortality rate reduction schedule for summer flounder, with the intended effect of still rebuilding summer flounder stock abundance, while reducing short-term economic losses for participants in the fishery.

DATES: Comments on the proposed rule must be received on or before October 16, 1995.

ADDRESSES: Comments on the proposed rule should be sent to Dr. Andrew A. Rosenberg, Regional Director, National Marine Fisheries Service, Northeast Regional Office, 1 Blackburn Drive, Gloucester, MA 01930-2298. Mark the outside of the envelope "Comments on Summer Flounder Plan."

Copies of Amendment 7, the environmental assessment, and the regulatory impact review are available from David R. Keifer, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, 300 S. New Street, Dover, DE 19901-6790.

FOR FURTHER INFORMATION CONTACT: Regina L. Spallone, Fishery Policy Analyst, 508-281-9221.

SUPPLEMENTARY INFORMATION:

Background

Amendment 7 was prepared by the Mid-Atlantic Fishery Management Council (Council) in consultation with the Atlantic States Marine Fisheries Commission (ASMFC) and the New England and South Atlantic Fishery Management Councils. A notice of availability for the proposed amendment was published in the **Federal Register** on August 17, 1995 (60 FR 42830). Copies of the amendment are available from the Council upon request (see **ADDRESSES**). The amendment revises management of the summer flounder (*Paralichthys dentatus*) fishery pursuant to the Magnuson Fishery Conservation and Management Act, as amended (Magnuson Act).

The management unit continues to be summer flounder in U.S. waters in the western Atlantic Ocean from North Carolina northward. The objectives of the FMP are unchanged by this amendment: (1) Reduce fishing mortality in the summer flounder fishery to assure that overfishing does not occur; (2) reduce fishing mortality of immature summer flounder to increase spawning stock biomass; (3) improve the yield from the fishery; (4) promote compatible management regulations between state and Federal jurisdictions; (5) promote uniform and effective enforcement of regulations; and (6) minimize regulations to achieve the management objectives stated above.

The regulations implementing the FMP, and its amendments, enact a broad spectrum of measures to stop overfishing and allow the stock to rebuild. These measures include a fishing mortality rate (F) reduction schedule. The reduction schedule was set at F of 0.53 for 1993–95, and F_{max} (0.23) in 1996 and thereafter. F_{max} is the biological reference point that corresponds to the level of fishing mortality that produces the maximum yield per recruit. The schedule was developed and adopted by the Council and ASMFC after lengthy deliberations. It was deemed an appropriate balance between effective reduction in fishing mortality and short-term economic burdens placed on participants in the fishery.

The Council and ASMFC conducted analyses of the fishing mortality rate reduction schedules during the development of Amendment 2. This reduction in fishing mortality was to be accomplished through a combination of minimum mesh size and minimum fish size restrictions and a coastwide annual quota divided between the recreational and commercial fisheries. Based on these analyses, the Council believed that by the fourth year of the rebuilding schedule (1996), the level of rebuilding in the stock would offset any significant reductions in quota. That is, it was assumed that the stock growth from years 1 to 3 would be large enough, so that by 1996 the quota would not be significantly different from the 1995 level.

However, although the stock has rebuilt from its 1989 low level, it has not recovered to the extent projected. Lower than expected recruitment levels in 1993 and redirected exploitation patterns on more ages–0 and –1 fish produced a higher F than expected. Thus, in order to reach the target F of 0.23 in 1996, given our current knowledge of stock abundance and age distribution, the resulting quota would be approximately 11 million lb (4,990 mt), or about a 50 percent reduction from the 1995 quota. Because of the magnitude of this reduction, and the resulting short-term losses to the industry, the Council and ASMFC initiated a re-examination of the fishing mortality rate reduction schedule for summer flounder.

This examination included analyses of the impacts of proposed changes on future spawning stock biomass (SSB) and recruitment success. Based on virtual population analysis (VPA) results, there is a near linear relationship between summer flounder SSB and recruitment. Thus, as SSB increases, recruitment should also increase. Lower levels of recruitment from 1983 to 1993 were associated with SSB estimates ranging from 11 to 33 million lb (4,990 to 14,969 mt). The SSB estimates above 33 million lb (14,969 mt) were associated with higher recruitment levels. With the proposed amendment, the SSB for 1996 is estimated at 46 million lb (20,865 mt). Thus, the chance of recruitment failure associated with this proposed regulation is minimal.

Amendment 7, if approved, would revise the fishing mortality rate by deferring attainment of F_{max} until 1998. This revision would allow for more stable landings from one year to the next. The change would alleviate short-term economic burdens on the industry, yet slow the rate of stock rebuilding only slightly. The Council and ASMFC have adopted the following strategy: The fishing mortality rate would be reduced from the 1995 target (0.53) to 0.41 in 1996, 0.3 in 1997, and F_{max} in 1998 and beyond. In addition, the amendment specifies that the quota for 1996 and 1997 could not exceed 18.51 million lb (8,396 mt). This cap on the quota could result in an F in 1996 and 1997 lower than 0.41 and 0.3, respectively, but would not exceed these values. A quota level above the cap could be set in 1996 or 1997, but only if the resulting quota had an associated F of 0.23.

Classification

Section 304(a)(1)(D)(ii) of the Magnuson Act, as amended, requires NMFS to publish regulations proposed by a Council within 15 days of receipt of the amendment and proposed regulations. At this time, NMFS has not determined that the amendment these rules would implement is consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. NMFS, in making that determination, will take into account the information, views, and comments received during the comment period.

This proposed rule has been determined to be not significant for purposes of E.O. 12866.

NMFS prepared an initial regulatory flexibility analysis (IRFA) as a supplement to the regulatory impact review prepared by the Council, which describes the economic impacts this proposed rule would have on small entities, if adopted. Compared to the projected ex-vessel revenues for the 1995 summer flounder commercial fishery, estimated ex-vessel revenues would be only 20.1% less in 1996 if Amendment 7 is implemented, whereas under the existing regulations, estimated 1996 ex-vessel revenues would be 48.5% less than those in 1995. Anticipated ex-vessel revenues for the commercial fishery would thus decrease less under Amendment 7 than they would under existing regulations, resulting in an economic benefit to the fishery. Under Amendment 7, it is estimated that in 1996, an additional $6.7 million in ex-vessel revenues will be available, compared to the status quo, for distribution among as many as 1,098 permitted vessels. Copies of the IRFA are available from NMFS (see **ADDRESSES**).

List of Subjects in 50 CFR Part 625

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: August 30, 1995.

Richard H. Schaefer,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 625 is proposed to be amended as follows:

PART 625—SUMMER FLOUNDER FISHERY

1. The authority citation for part 625 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 625.20, paragraph (a) introductory text is revised to read as follows:

§ 625.20 Catch quotas and other restrictions.

(a) *Annual review.* The Summer Flounder Monitoring Committee will review the following data on or before August 15 of each year to determine the allowable levels of fishing and other restrictions necessary to achieve a fishing mortality rate (F) of 0.53 in 1993 through 1995, 0.41 in 1996, 0.30 in 1997, and 0.23 in 1998 and thereafter, provided the allowable levels of fishing in 1996 and 1997 may not exceed 18.51 million lb (8,396 mt), unless such fishing levels have an associated F of 0.23:

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 95–041–2]

Availability of Determination of Nonregulated Status for Genetically Engineered Corn

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of our determination that the Monsanto Company's corn line designated as MON 80100 that has been genetically engineered for insect resistance is no longer considered a regulated article under our regulations governing the introduction of certain genetically engineered organisms. Our determination is based on our evaluation of data submitted by the Monsanto Company in its petition for a determination of nonregulated status, an analysis of other scientific data, and our review of comments received from the public in response to a previous notice announcing our receipt of the Monsanto Company petition. This notice also announces the availability of our written determination document and its associated environmental assessment and finding of no significant impact.

EFFECTIVE DATE: August 22, 1995.

ADDRESSES: The determination, an environmental assessment and finding of no significant impact, the petition, and all written comments received regarding the petition may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect those documents are asked to call in advance of visiting at (202) 690–2817.

FOR FURTHER INFORMATION CONTACT: Dr. Ved Malik, Biotechnologist, Biotechnology Permits, BBEP, APHIS, 4700 River Road Unit 147, Riverdale, MD 20737–1237; (301) 734–7612. To obtain a copy of the determination or the environmental assessment and finding of no significant impact, contact Ms. Kay Peterson at (301) 734–7612.

SUPPLEMENTARY INFORMATION:

Background

On April 3, 1995, the Animal and Plant Health Inspection Service (APHIS) received a petition (APHIS Petition No. 95–093–01p) from the Monsanto Company (Monsanto) of St. Louis, MO, seeking a determination that corn designated as MON 80100 that has been genetically engineered for insect resistance does not present a plant pest risk and, therefore, is not a regulated article under APHIS' regulations in 7 CFR part 340.

On June 7, 1995, APHIS published a notice in the **Federal Register** (60 FR 30061–30062, Docket No. 95–041–1) announcing that the Monsanto petition had been received and was available for public review. The notice also discussed the role of APHIS, the Environmental Protection Agency (EPA), and the Food and Drug Administration in regulating the subject corn line and food products derived from it. In the notice, APHIS solicited written comments from the public as to whether corn line MON 80100 posed a plant pest risk. The comments were to have been received by APHIS on or before August 7, 1995.

APHIS received nine comments on the Monsanto petition, from farmers, industry, universities, a growers association, and a State department of agriculture. All the commenters expressed support for the subject petition.

Analysis

Monsanto's corn line MON 80100 has been genetically engineered to express a CryCIA(b) insect control protein derived from the common soil bacterium *Bacillus thuringiensis* subsp. *kurstaki* (*Btk*). *Btk* proteins are effective against certain lepidopteran insects, including European corn borer (ECB), a major corn pest. Results of field tests conducted by Monsanto under permits and notifications granted by APHIS and under an experimental use permit obtained from EPA indicate that corn plants producing the CryCIA(b) protein were protected throughout the growing season from leaf and stalk feeding damage caused by ECB. In addition to expressing the CryCIA(b) protein, the plants also express the selectable marker enzyme 5-enolpyruvylshikimate-3-phosphate synthase (CP4 EPSPS). The *cryIA(b)* gene and the CP4 EPSPS marker gene were introduced into the subject corn line by a particle acceleration method and their expression is under the control of the enhanced 35S promoter derived from the plant pathogen cauliflower mosaic virus.

The subject corn line has been considered a regulated article under APHIS' regulations in 7 CFR part 340 because it contains certain gene sequences derived from plant-pathogenic sources. However, evaluation of field data reports from field tests of corn line MON 80100 conducted since 1992 indicates that there were no deleterious effects on plants, nontarget organisms, or the environment as a result of the subject corn plants' release into the environment.

Determination

Based on its analysis of the data submitted by Monsanto and a review of other scientific data, comments received from the public, and field tests of the subject corn, APHIS has determined that corn line MON 80100: (1) Exhibits no plant pathogenic properties; (2) is no more likely to become a weed than lepidopteran-insect-resistant corn developed through traditional breeding techniques; (3) is unlikely to increase the weediness potential of any other cultivated plant or native wild species with which it can interbreed; (4) should not cause damage to raw or processed agricultural commodities; (5) is unlikely to harm organisms beneficial to the agricultural ecosystem; and (6) when cultivated, should not reduce the ability to control insects in corn and other crops. APHIS has also concluded that there is a reasonable certainty that new varieties developed from corn line MON 80100 will not exhibit new plant pest properties, i.e., properties substantially different from any observed in the field tested corn line MON 80100, or those observed in corn in traditional breeding programs.

The effect of this determination is that an insect-resistant corn line designated as MON 80100 is no longer considered a regulated article under APHIS' regulations in 7 CFR part 340. Therefore, the notification requirements pertaining to regulated articles under those regulations no longer apply to the field testing, importation, or interstate movement of corn line MON 80100 or its progeny. However, the importation of the subject corn line or seed capable of propagation is still subject to the restrictions found in APHIS' foreign quarantine notices in 7 CFR part 319.

National Environmental Policy Act

An environmental assessment (EA) has been prepared to examine the potential environmental impacts associated with this determination. The EA was prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372; 60 FR 6000–6005). Based on that EA, APHIS has reached a finding of no significant impact (FONSI) with regard to its determination that the subject corn line and lines developed from it are no longer regulated articles under its regulations in 7 CFR part 340. Copies of the EA and the FONSI are available upon request from the individual listed under **FOR FURTHER INFORMATION CONTACT.**

Done in Washington, DC, this 28th day of August 1995.

Terry L. Medley,

Acting Administrator, Animal and Plant Health Inspection Service.

Cooperative State Research, Education, and Extension Service

National Sustainable Agriculture Advisory Council; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the Cooperative State Research, Education, and Extension Service announces the following meeting:

Name: National Sustainable Agriculture Advisory Council.

Date: September 25–26, 1995.

Time: 8:30 am to 4:30 pm, Sept. 25, 8:30 am to 2 pm Sept. 26.

Place: Governor's House Hotel, Rhode Island Ave., 17th St., NW., Washington, DC.

Type of Meeting: Open to public.

Comments: The public may file written comments before or after the meeting with the contact person listed below. A specific time for public comments will be scheduled for the afternoon of September 25, 1995.

Purpose: To serve as an annual meeting for the National Sustainable Agriculture Advisory Council, and to advise the Secretary of Agriculture with respect to initiatives and priorities related to sustainable agriculture.

Contact Person for Agenda and More Information: Dr. Robert Myers, Director, Office of Sustainable Agriculture Programs, Cooperative State Research, Education, and Extension Service, U.S. Department of Agriculture, South Building, Room 3863, 14th & Independence Ave., SW., Washington, DC 20250, Telephone 202–720–5623.

Done at Washington, DC this 25th day of August, 1995.

Alma Hobbs,

Acting Administrator, Cooperative State Research, Education, and Extension Service.

[FR Doc. 95–21850 Filed 9–1–95; 8:45 am]

BILLING CODE 3410–22–M

Grain Inspection, Packers and Stockyards Administration

Designation for the Louisiana and North Carolina Areas

AGENCY: Grain Inspection, Packers and Stockyards Administration (GIPSA).

ACTION: Notice.

SUMMARY: GIPSA announces the designation of Louisiana Department of Agriculture and Forestry (Louisiana) and North Carolina Department of Agriculture (North Carolina) to provide official services under the United States Grain Standards Act, as amended (Act).

EFFECTIVE DATE: October 1, 1995.

ADDRESSES: Janet M. Hart, Chief, Review Branch, Compliance Division, GIPSA, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454.

FOR FURTHER INFORMATION CONTACT: Janet M. Hart, telephone 202–720–8525.

SUPPLEMENTARY INFORMATION:

This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12866 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

In the March 31, 1995, **Federal Register** (60 FR 16602), GIPSA asked persons interested in providing official services in the geographic areas assigned to Louisiana and North Carolina to submit an application for designation. Applications were due by May 1, 1995. There were three applicants: Louisiana and North Carolina each applied for designation to provide official services in the entire areas currently assigned to them; Saybolt-South Texas Inspection Service, Inc., main office located in Galena Park, Texas, applied for the entire Louisiana area.

GIPSA requested comments on the applicants in the June 1, 1995, **Federal Register** (60 FR 28571). Comments were due by June 30, 1995. GIPSA received no comments by the deadline.

GIPSA evaluated all available information regarding the designation criteria in Section 7(f)(l)(A) of the Act; and according to Section 7(f)(l)(B), determined that Louisiana is better able to provide official services in the geographic area for which they applied, and North Carolina is able to provide official services in the geographic area for which they applied. Effective October 1, 1995, and ending September 30, 1998, Louisiana is designated to provide official inspection and Class X and Class Y weighing services, and North Carolina is designated to provide official inspection services in the geographic areas specified in the March 31, 1995, **Federal Register**.

Interested persons may obtain official services by contacting Louisiana at 318–487–5088 and North Carolina at 919–733–4491.

Authority: Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: August 25, 1995

BILLING CODE 3410–EN–F

Opportunity for Designation in the Grand Forks (ND) Area

AGENCY: Grain Inspection, Packers and Stockyards Administration (GIPSA).

ACTION: Notice.

SUMMARY: Grand Forks Grain Inspection, Inc. (Grand Forks), asked that their designation be terminated on December 31, 1995, due to a change in ownership and the dissolution of the company. GIPSA is asking persons interested in providing official services in the specified geographic area to submit an application for designation.

DATES: Applications must be postmarked or sent by telecopier (FAX) on or before September 11, 1995.

ADDRESSES: Applications must be submitted to Janet M. Hart, Chief, Review Branch, Compliance Division, GIPSA, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454. Telecopier (FAX) users may send applications to the automatic telecopier machine at 202–690–2755, attention: Janet M. Hart. If an application is submitted by telecopier, GIPSA reserves the right to request an original application. All applications will be made available for public inspection at this address located at 1400 Independence Avenue, SW., during regular business hours.

FOR FURTHER INFORMATION CONTACT: Janet M. Hart, telephone 202–720–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12866 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

Section 7(f)(1) of the Act authorizes the GIPSA Administrator to designate a qualified applicant to provide official services in a specified area after determining that the applicant is better able than any other applicant to provide such official services.

GIPSA designated Grand Forks, main office located in Grand Forks, North Dakota, to provide official inspection services, under the Act on February 1, 1995.

Section 7(g)(1) of the Act provides that designations of official agencies shall end not later than triennially and may be renewed according to the criteria and procedures prescribed in Section 7(f) of the Act. The designation of Grand Forks is scheduled to end on January 31, 1998. However, Grand Forks asked GIPSA to end its designation effective December 31, 1995, as a result of a change in ownership and dissolution of the corporation. Accordingly, GIPSA is announcing the end of the Grand Forks designation on December 31, 1995, and is asking for applications from interested parties.

The geographic area presently assigned to Grand Forks, pursuant to Section 7(f)(2) of the Act, which will be assigned to the applicant selected for designation is as follows:

Bounded on the North by the North Dakota State line;

Bounded on the East by the North Dakota State line south to State Route 200;

Bounded on the South by State Route 200 west-northwest to the western Traill County Line; the western Traill County line; the southern Grand Forks and Nelson County lines; the southern Eddy County line west to U.S. Route 281; U.S. Route 281 north to State Route 15; State Route 15 west to U.S. Route 52; U.S. Route 52 northeast to State Route 3; and

Bounded on the West by State Route 3 north to State Route 60; State Route 60 west-northwest to State Route 5; State Route 5 west to State Route 14; State Route 14 north to the North Dakota State line.

Exceptions to Grand Forks' assigned geographic area are the following locations inside Grand Forks' area which have been and will continue to be serviced by the following official agencies:

1. Grain Inspection, Inc.: Farmers Coop Elevator, Fessenden; Farmers Union Elevator, and Manfred Grain, both in Manfred; all in Wells County; and
2. Minot Grain Inspection, Inc.: Harvey Farmers Elevator, Harvey, Wells County.

Interested persons are hereby given the opportunity to apply for designation to provide official services in the geographic area specified above under the provisions of Section 7(f) of the Act and section 800.196(d) of the regulations issued thereunder. Designation in the specified geographic areas is for the period beginning January 1, 1996, and ending October 31, 1998. Persons wishing to apply for designation should contact the Compliance Division at the address listed above for forms and information.

Applications and other available information will be considered in determining which applicant will be designated.

Authority: Pub. L. 94–582, 90 Stat. 2867, as amended, (7 U.S.C. 71 *et seq.*)

Dated: August 25, 1995.

Neil E. Porter,

Director, Compliance Division.

BILLING CODE 3410–EN–M

ARMS CONTROL AND DISARMAMENT AGENCY

Announcement of the Hubert H. Humphrey Fellowship Competition for the 1996–97 Academic Year

The United States Arms Control and Disarmament Agency will conduct a competition in 1996 for one-year Hubert H. Humphrey Fellowships in support of unclassified doctoral dissertation research in arms control, nonproliferation and disarmament studies. Law candidates for the Juris Doctor are also eligible if they are writing a substantial paper in partial fulfillment of degree requirements. The fellowship stipends for the Ph.D. candidates will be $8,000 plus reimbursement for tuition and fees up to a maximum of $6,000. Stipends and tuition for law candidates will be prorated according to the number of credits given for the research paper.

Qualified applicants must be citizens of the United States and degree candidates at a U.S. college or university. Candidates are asked to submit an application, a five-page thesis abstract with bibliography, three letters of reference, transcripts of all graduate course work, and university approval of the dissertation topic. The application deadline for the 1996 competition is March 15, 1996. Awards will be for a twelve month period beginning in September 1996 or January 1997.

For information and application materials please write to: Hubert H. Humphrey Doctoral Fellowship Program, U.S. Arms Control and Disarmament Agency, 320 21st Street, NW., Washington, DC 20451; or call (703) 302–7714.

Dated: August 18, 1995.

Ambassador James Sweeney,

Chief Science Advisor.

BILLING CODE 6820–32–M

Announcement of the William C. Foster Fellows Visiting Scholars Program for the 1996–97 Academic Year

The U.S. Arms Control and Disarmament Agency (ACDA) will conduct a competition to select visiting scholars to serve at the Agency during the 1996–97 academic year. University faculty from a variety of fields are sought, including those in the physical sciences, international relations, economics, engineering, chemistry, biology, mathematics and computer science.

Section 28 of the Arms Control and Disarmament Act (22 U.S.C. 2568), as amended, provides that "a program for visiting scholars in the field of arms control, nonproliferation, and disarmament shall be established by the Director in order to obtain the services of scholars from the faculties of recognized institutions of higher learning." The law states that "the purpose of the program will be to give specialists in the physical sciences and other disciplines relevant to the Agency's activities an opportunity for active participation in the arms control, nonproliferation, and disarmament activities of the Agency and to gain for the Agency the perspective and expertise such persons can offer * * *" Scholars are known as William C. Foster

Fellows, in honor of the first Director of ACDA, who served from 1961 to 1969.

Up to six fellows will be selected in 1996. Assignments are available in the Bureaus of Strategic and Eurasian Affairs (SEA); Multilateral Affairs (MA); Intelligence, Verification and Information Management (IVI); and Nonproliferation Policy and Regional Arms Control (NP). Visiting scholars participate in a wide range of Agency activities, such as performing arms control research and analyses, evaluating data relating to compliance with treaties in force, supporting interagency development of arms control policy, and taking part in international arms control and disarmament negotiations.

Visiting scholars will be detailed to ACDA by their universities for one full year. The institutions will be compensated for the scholars' salaries and benefits in accordance with the Intergovernmental Personnel Act of 1970 and within Agency budgetary limitations. Each Fellow will receive reimbursement for travel to and from the Washington, DC area for his/her one year assignment and either a per diem allowance during the one year detail or relocation costs.

Qualified candidates must be citizens of the United States, on the faculty of a recognized U.S. institution of higher learning, and tenured or on a tenure track. ACDA is an equal opportunity employer. Selections will be made without regard to race, color, religion, sex, national origin, age, or physical handicap that does not interfere with performance of duties. Prior to appointment, all candidates will be subject to a full-field background investigation for a Top Secret security clearance, as required by Section 45 of the Arms Control and Disarmament Act, as amended. Visiting scholars will be subject to applicable Federal conflict of interest laws and standards of conduct.

To apply, candidates must submit a letter outlining their interests and qualifications, a curriculum vitae, copies of two publications, and optional supporting material such as letters of reference. Applicants will be evaluated based on their potential to provide expertise or to perform services critical to ACDA's mission. The application deadline for assignments for the 1996–97 academic year is January 31, 1996, subject to extension at the Agency's discretion. ACDA expects to announce tentative selections in June 1996.

For an information brochure, please write to: Foster Fellows Program, U.S. Arms Control and Disarmament Agency, 320 21st Street, NW., Washington, DC 20451; or call (703) 302–7714.

Dated: August 18, 1995.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Indiana Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Indiana Advisory Committee to the Commission will convene at 1 p.m. and adjourn at 5 p.m. on Thursday, September 28, 1995, at the Embassy Suites, 110 W. Washington, Indianapolis, Indiana 46204. The purpose of the meeting is to review the draft report, "The Enforcement of Affirmative Action Compliance in Indiana under Executive Order 11246," and discuss current issues and plan future activities.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Paul Chase, 317–920–3190, or Constance M. Davis, Director of the Midwestern Regional Office, 312–353–8311 (TDD 312–353–8326). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, August 29, 1995.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Institute of Standards and Technology.

Title: National Voluntary Laboratory Accreditation Program (NVLAP)-NVLAP Information Collection System.

Form Number(s): None.

Agency Approval Number: 0693–0003.

Type of Request: Extension of a currently approved collection.

Burden: 2,400 hours.

Number of Respondents: 200.

Avg Hours Per Response: 2 hours.

Needs and Uses: The National Voluntary Laboratory Accreditation Program (NVLAP)-NVLAP Information Collection System collects information that is required from all laboratories applying for NVLAP accreditation. Applicants provide the minimum information, required by published accreditation criteria, to achieve effective on-site assessments and informed evaluations leading to sound accreditation decisions.

Affected Public: Business of other for–profit organizations, Not–for–profit institutions, Federal Government and State, Local or Tribal Government.

Frequency: Annual.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Virginia Huth, (202) 395–3785.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Virginia Huth, OMB Desk Officer, Room 10236 New Executive Office Building, Washington, DC 20503.

Dated: August 30, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–BS–M

National Institute of Standards and Technology

Visiting Committee on Advanced Technology; Meeting

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of partially closed meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. app. 2, notice is hereby given that the National Institute of Standards and Technology's Visiting Committee on Advanced Technology (NIST) will meet on Tuesday, September 12, 1995, from 8:30 a.m. to 5 p.m. The Visiting Committee on Advanced Technology is composed of nine members appointed by the Director of the National Institute of Standards and Technology who are eminent in such fields as business, research, new product development, engineering, labor, education, management consulting, environment, and international relations. The purpose of this meeting is to review and make recommendations regarding general policy for the Institute, its organization, its budget, and its programs within the framework of applicable national policies as set forth by the President and the Congress. The agenda will include presentations on NIST programs, the Advanced Technology Program: progress report and program definition, the Manufacturing Extension Partnerships, laboratory tours, and a discussion of the Institute budget.

Discussions on the NIST budget, including funding of the Applied Technology Program and the Manufacturing Extension Partnership and the staffing of management positions at NIST scheduled to begin at 8:30 a.m. and to end at 9:30 a.m. on September 12, 1995, will be closed.

DATES: The meeting will convene September 12, 1995, at 8:30 a.m. and will adjourn at 5 p.m. on September 12, 1995.

ADDRESSES: The meeting will be held in Lecture Room A, Administration Building, at the National Institute of Standards and Technology, Gaithersburg, Maryland.

FOR FURTHER INFORMATION CONTACT: Chris E. Kuyatt, Visiting Committee Executive Director, National Institute of Standards and Technology, Gaithersburg, Maryland 20899, telephone number (301) 975–6090.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on August 25, 1995, that portions of the meeting of the Visiting Committee on Advanced Technology which involve discussion of proposed funding of the ATP and the MEP Programs may be closed in accordance with 5 U.S.C. 552b(c)(9)(B), because those portions of the meetings will divulge matters the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency actions; and that portions of meetings which involve discussion of the staffing issues of management and other positions at NIST may be closed in accordance with 5 U.S.C. 552b(c)(6), because divulging information discussed in those portions of the meetings is likely to reveal information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Dated: August 27, 1995.

Samuel Kramer,

Associate Director.

BILLING CODE 3510–13–M

National Oceanic and Atmospheric Administration

[Docket No. 950616159–5216–02; I.D. 081695E]

The Fishing Capacity Reduction Demonstration Program Funding Availability; Revisions

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of program revision.

SUMMARY: A prior notice in the **Federal Register** announced the Fishing Capacity Reduction Demonstration Program (FCRDP) that provides $2 million for a pilot test approach for permanently reducing the fishing capacity in the Northeast multispecies groundfish fishery. NMFS adds sinking as a method of disposal for fishing vessels under the FCRDP. NMFS also extends the closing date by 2 weeks for submission or resubmission of applications to give applicants time to consider this alternative.

DATES: Effective August 30, 1995. Applications must be postmarked by September 19, 1995.

ADDRESSES: Applications should be sent to the Northeast Financial Services Branch, National Marine Fisheries Service, One Blackburn Drive, Gloucester, MA 01930–2298.

FOR FURTHER INFORMATION CONTACT: Bruce Morehead, (301) 713–2358 or Leo Erwin, (508) 281–9203.

SUPPLEMENTARY INFORMATION:

Background

The FCRDP was described in an earlier notice: Notice of program for financial assistance (60 FR 32504, June 22, 1995).

Changes to the Program

In the previous notice, successful applicants were required to scrap their vessels as a condition of receiving funding under the FCRDP. Supervised sinking will be considered as an acceptable method of vessel disposal. The closing date for submission or resubmission of applications is extended for 2 weeks to allow applicants time to consider this alternative method of vessel disposition.

Alternative to Scrapping

The previous notice described scrapping of vessels as a required part of the consideration from vessel owners to qualify to receive payment under the FCRDP. Scrapping is one way to remove the vessel from the fishery. A second alternative, voluntary sinking, also exists and is an acceptable alternative under this notice. Voluntary sinking must be conducted within the confines and in compliance with all applicable Federal, state, and local environmental laws and regulations. Approval from Federal, state, and local authorities, as applicable, is required.

Classification

Applications under this program are subject to E.O. 12372, "Intergovernmental Review of Federal Programs."

This notice involves a collection of information requirement subject to the Paperwork Reduction Act. The collection of this information has been approved by the Office of Management and Budget (OMB control number 0648–0289).

This action has been determined to be not significant for purposes of E.O. 12866.

Authority: 15 U.S.C. 713c–3(d).

Dated: August 28, 1995.

Richard H. Schaefer,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

[I.D. 082995C]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of two applications for scientific research permits P596 and P521B.

SUMMARY: Notice is hereby given that the New Jersey Division of Fish, Game and Wildlife (P596), and Dr. James Spotila (P521B) have applied in due form for permits to take listed sea turtles for the purpose of scientific research.

DATES: Written comments or requests for a public hearing on these application must be received on or before October 5, 1995.

ADDRESSES: The applications and related documents are available for review by appointment in the following offices:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Hwy., Room 13307, Silver Spring, MD 20910–3226 (301–713–1401); and

Director, Northeast Region, NMFS, NOAA, One Blackburn Drive, Gloucester, MA 01930–2298 (508–281–9250).

Written comments, or requests for a public hearing on this application should be submitted to the Chief, Endangered Species Division, Office of Protected Resources.

SUPPLEMENTARY INFORMATION: Applications P596 and P521B request permits under the authority of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217–227).

The New Jersey Division of Fish, Game and Wildlife (P596) requests authorization to capture five listed loggerhead sea turtles (*Caretta caretta*) per year by trawling, to be measured, weighed, tagged, and released. Dr. James Spotila (P521B) requests authorization to capture six listed leatherback sea turtles (*Dermochelys coriacea*) in the North Atlantic, for metabolic rate measurement.

Those individuals requesting a hearing (see **ADDRESSES**) should set out the specific reasons why a hearing on that particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in this application summary are those of the applicants and do not necessarily reflect the views of NMFS.

Dated: August 30, 1995.

Russell J. Bellmer,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Notice of Partially Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92–463), announcement is made of the following Committee Meeting:

Name of Committee: Army Science Board (ASB).

Date of Meeting: 12–13 September 1995.

Time of Meeting: 0800–1700, 12 September 1995; 0800–1300, 13 September 1995.

Place: USASSDC Headquarters—Arlington, VA.

Agenda: The Army Science Board Independent Assessment on "Hit-To-Kill Interceptor Lethality" will meet to receive an intelligence threat capabilities update and warhead lethality briefing from representatives of various national intelligence sources (CIA, DIA, NRO). This will be followed by a review of study group direction, identification of future briefings, outlining action items and defining a future schedule. The last major topic of this meeting will be to define special study group activities. The open portions of these meetings are open to the public. Any person may attend, appear before or file statements with the committee. The closed portions of these meetings will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., Appendix 2, subsection 10(d). For further information, please contact Michelle Diaz at (703) 695–0781.

Michelle P. Diaz,

Acting Administrative Officer, Army Science Board.

BILLING CODE 3710–08–M

Defense Logistics Agency

Proposed DoD/NASA Initiative: Use of Common Processes at Contractor Facilities

AGENCY: Defense Logistics Agency (DLA), Department of Defense (DoD).

ACTION: Notice.

SUMMARY: The Department of Defense (DoD) and National Aeronautics and Space Administration (NASA) desire to achieve cost and schedule benefits, and improve quality, from maximum use of common processes for all programs in a contractor facility. Mutual recognition and acceptance of common processes will require concerted effort by interested contractors, their principal customers, and contract administration personnel. NASA, as well as other agencies, have committed to join with DoD in using common quality processes at shared contractor facilities.

The quality process is an ideal starting point for implementation because of its potential to apply commercial standards (e.g., ISO–9000/ ANSI–ASQC Q9000) and advanced quality practices. Other common process opportunities also exist which may offer significant potential as well.

Initial contractor response to this announcement should be in the form of a brief concept paper outlining the transition approach and process that is proposed. The proposed process(es) should result in significant cost, schedule, or performance benefits. The concept paper should be submitted to the DPRO, the cognizant Defense Contract Management Area Office (DCMAO), or other Contract Administration Service (CAS) activity. The DPRO, DCMAO or cognizant CAS activity will work with the principal plant customers and contractor to achieve concurrence on the concept paper.

Once the approach for transitioning to common process has been established contractors may develop preliminary proposals. Contractor preliminary proposals for a common process should include the following information: Specify those processes that would be candidates for facility-wide application, describe the impact on your present system (contracts, programs and buying offices affected) any associated risks and/or anticipated benefits to you and the Government.

Submit your preliminary proposal to affected principal Government buying activities and the cognizant Contract Administration Services office. Proposals will be evaluated in order of receipt.

Should a common process be defined and accepted, individual contracts will be modified as appropriate. The Defense Contract Management Command (DCMC) office (or cognizant CAS activity) will facilitate the formulation of interface teams at the facility level to coordinate customer review and approval.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Zell, HQ Defense Contract Management Command, Product and Manufacturing Team, (703) 767–3395.

SUPPLEMENTARY INFORMATION:

A. Background

DoD is committed to improving the efficiency and effectiveness of our suppliers. The proposed initiative will facilitate the elimination of military unique process reviews.

B. Regulatory Flexibility Act

The proposed guidance will not have a significant economic impact on small businesses within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., because it does not require any additional time or cost on the part of the contractor. Any contractor effort is voluntary.

C. The proposed notice does not impose any reporting or record keeping requirements which require the approval of OMB under 44 U.S.C. 3501 et seq. and as such, the Paperwork Reduction Act does not apply.

John A. Merkwan,

LTC, USA, Executive Officer.

BILLING CODE 3620–01–M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Director, Information Resources Group, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before November 6, 1995.

ADDRESSES: Written comments and requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue, SW., Room 5624, Regional Office Building 3, Washington, DC 20202–4651, or should be electronic mailed to the internet address *FIRB@ed.gov, or should be faxed to 202–708–9346.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Department of Education (ED) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Director of the Information Resources Group, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department, (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate, (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: August 28, 1995.

Gloria Parker,

Director, Information Resources Group.

Office of Postsecondary Education

Type of Review: Reinstatement.
Title: Performance Report for the Student Services Program.
Frequency: One time.
Affected Public: Not for profit institutions.
Reporting Burden:
  Responses: 1.
  Burden Hours: 3,181.
Recordkeeping Burden:
  Recordkeepers: 0.
  Burden Hours: 0.
Abstract: Data assures that grantees have conducted the project for which funded, signals problems of implementation, and indicates extent and quality of performance. The Department uses reports in evaluating projects for continuation, assessing technical assistance needs, determining future funding levels and in assigning scores to projects in competition for new grants.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP95–410–001]

Alabama-Tennessee Natural Gas Company; Notice of Proposed Change in FERC Gas Tariff

August 29, 1995.

Take notice that Alabama-Tennessee Natural Gas Company (Alabama-Tennessee) on August 23, 1995, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1:

Sub. 3rd Revised Sheet No. 4A

Alabama-Tennessee proposes that this tariff sheet be made effective September 1, 1995.

According to Alabama-Tennessee, the purpose of this submission is to correct the filing made by Alabama-Tennessee on August 1, 1995 in the above-referenced docket. In particular, Alabama-Tennessee determined that it had not properly reflected the crediting of take-or-pay costs with respect to one of its customers, the Packaging Corporation of America ("PCA"). Alabama-Tennessee states that the instant filing properly accounts for the increase in take-or-pay charges billed Alabama-Tennessee by its upstream pipeline supplier, Tennessee Gas Pipeline Company, and allocated to PCA, as the same is affected by the discount Alabama-Tennessee is providing PCA and the limitations imposed by the settlement in Docket No. RP91–103 which the Commission approved on October 17, 1991.

Alabama-Tennessee requests that the Commission grant such waivers as may be required to accept and approve its filing as submitted.

Alabama-Tennessee states that copies of its filing were served upon the Company's jurisdictional customers and interested public bodies as well as all the parties shown on the Commission's official service list established in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 or Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before September 6, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. EG95–82–000]

Barranquilla Lease Holding, Inc.; Notice of Application for Commission Determination of Exempt Wholesale Generator Status

August 29, 1995.

Take notice that on August 21, 1995, Barranquilla Lease Holding, Inc. (Barranquilla), c/o Energy Initiatives, Inc., One Upper Pond Road, Parsippany, New Jersey 07054, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's Regulations.

According to its application, Barranquilla is a Delaware corporation formed to acquire all of the voting shares of Los Amigos Leasing Company Ltd. (Leaseco), a Bermuda corporation which has been formed to purchase and lease certain equipment, including combustion and steam turbines, to Termobarranquilla S.A., Empresa de Servicios Publicos, a Colombian corporation, for use in an eligible facility being developed in Soledad, near Barranquilla, Colombia. Barranquilla further states that Corporacion Electrica de la Costa Atlantica, a Colombian utility, will purchase all of the electrical output from the facility.

Any person desiring to be heard concerning the application for exempt wholesale generator status should file a motion to intervene or comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application. All such motions and comments should be filed on or before September 15, 1995 and must be served on the applicant. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. EG95–83–000]

El Power, Inc.; Notice of Application for Determination of Exempt Wholesale Generator Status

August 29, 1995.

On August 21, 1995, El Power, Inc. ("El Power"), c/o Energy Initiatives, Inc., One Upper Pond Road, Parsippany, New Jersey 07054, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator ("EWG") status pursuant to Part 365 of the Commission's Regulations.

According to its application, El Power is a Delaware corporation formed to engage in project development activities associated with the direct or indirect acquisition of ownership interests in one or more eligible facilities and/or EWGs. El Power further states that it has previously been determined to be an EWG. 68 FERC ¶ 61,023 (1994). El Power states that this filing is occasioned because El Power intends to acquire all of the voting capital stock of (i) El Barranquilla, Inc., a Delaware corporation, (ii) Guaracachi America, Inc., a Delaware corporation, (iii) Barranquilla Lease Holding, Inc., a Delaware corporation and (iv) International Power Advisors, Inc., a Delaware corporation.

Any person desiring to be heard concerning the application for exempt wholesale generator status should file a motion to intervene or comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application. All such motions and comments should be filed on or before September 15, 1995 and must be served on Applicant. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. EG95–84–000]

International Power Advisors, Inc.; Notice of Application for Commission Determination of Exempt Wholesale Generator Status

August 29, 1995.

Take notice that on August 21, 1995, International Power Advisors, Inc. (International Power), c/o Energy Initiatives, Inc, One Upper Pond Road, Parsippany, New Jersey 07054, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's Regulations.

According to its application, International Power, a Delaware corporation, was formed to operate and maintain, together with El Services Colombia, Ltd., a gas fired electric generating facility with a capacity of up to 980 MW to be located in Soledad near Barranquilla, Colombia (the Facility). The Applicant intends to operate the Facility together with El Services Colombia pursuant to an operation and maintenance agreement with the Facility's owner, Termobarranquilla S.A., Empresa de Servicios Publicos ("TEBSA"), a Colombia corporation. All of the Facility's electricity will be sold at wholesale to Corporacion Electrica de la Costa Atlantica, a Colombian entity.

Any person desiring to be heard concerning the application for exempt wholesale generator status should file a motion to intervene or comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application. All such motions and comments should be filed on or before September 15, 1995 and must be served on the applicant. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. EG95–75–000]

Kva Resources, Inc.; Errata to Notice of Application for Commission Determination of Exempt Wholesale Generator Status

August 22, 1995.

Take notice that the Notice issued in the above-referenced docket on August 17, 1995 (60 FR 44332, August 25, 1995), should be disregarded and the following language should be replaced for the Notice in that docket:

On August 11, 1995, Kva Resources, Inc. (Applicant), 11100 Northeast 8th Street, Suite 550, Bellevue, Washington 98004, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's Regulations.

Applicant is a Delaware corporation engaged in the business of independent power development, intends to own and operate all or part of eligible facilities including an 838 MW electric generating facility located in the vicinity of Creston, Washington.

Any person desiring to be heard concerning the application for exempt wholesale generator status should file motion to intervene or comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application. All such motions and comments should be filed on or before September 12, 1995 and must be served on the Applicant. Any person wishing to become a party must file a motion to intervene. Copies of this filing are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM96–1–86–000]

Pacific Gas Transmission Company; Notice of Annual Charge Adjustment

August 29, 1995.

Take notice that on August 23, 1995, Pacific Gas Transmission Company (PGT), tendered for filing and acceptance Eighth Revised Sheet Nos. 4 and 5, and Second Revised Sheet No. 6C to be included in its FERC Gas Tariff, First Revised Volume No. 1–A and Seventh Revised Sheet No. 7 to be included in its FERC Gas Tariff, Second Revised Volume No. 1.

The above tariff sheets have been revised to reflect a modification to the Annual Charge Adjustment fee, in accordance with the Commission's most recent Annual Charge billing to PGT.

PGT requests that the proposed tariff sheets become effective October 1, 1995.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 6, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket No. CP95–705–000]

Shell Offshore Inc.; Notice of Petition for Declaratory Order

August 29, 1995.

Take notice that on August 23, 1995, Shell Offshore Inc. (Shell), P.O. Box 576, Houston, Texas 77001, filed a petition for declaratory order in Docket No. CP95–705–000 requesting that the Commission declare that, following Shell's purchase of certain offshore facilities from Natural Gas Pipeline Company of America (Natural), that those facilities are gathering facilities exempt from the Commission's Regulations pursuant to Section 1(b) of the Natural Gas Act (NGA), all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Shell states that the facilities consist of currently-certificated interstate transmission facilities owned by Natural along with associated metering facilities. It is indicated that the facilities consist of (1) 2.8 miles of 8-inch pipeline that extends between Shell's "A" and "B" platforms in Eugene Island Block 331, offshore Louisiana, (2) a dual 8-inch meter and appurtenant facilities located on Shell's "A" platform in Eugene Island Block 331, offshore Louisiana, (3) a 10-inch dual meter and appurtenant facilities located on Shell's platform in Vermilion Block 321, offshore Louisiana, (4) a dual 6-inch meter and appurtenant facilities located on Shell's platform in Vermilion Block 340, offshore Louisiana, and (5) a dual 8-inch meter and appurtenant facilities located on Shell's platform in West Cameron Block 565, offshore Louisiana.

Shell asserts that once it acquires the facilities their primary function will be gathering as set forth in *Farmland Industries, Inc.*, 23 FERC ¶ 61,063 (1983), as later modified by *Amerada Hess Corp., et al.*, 52 FERC ¶ 61,268 (1990), (*Amerada Hess*). It is indicated that under that test the Commission applies six criteria to determine the jurisdictional status of a facility: (1) the diameter and length of a facility; (2) the extension of facilities beyond a central point in the field; (3) the geographic configuration of the system; (4) the location of compressors and processing plants; (5) the location of wells along all or part of the facility; and (6) the operating pressure of the line. In *Amerada Hess*, the Commission indicated that it would consider other factors, in addition to the *Farmland* criteria, especially for offshore facilities, including the changing technical and geographic nature of exploration and production, the purpose, location and operation of the facility, the general business activity of the facility, and whether the jurisdictional determination is consistent with the objectives of the Natural Gas Act and the Natural Gas Policy Act of 1978. Shell also points out that an application of the non-physical factors set out in *Amerada Hess* demonstrates that the facilities should be classified as gathering facilities.

Shell asserts that the acquired facilities will perform gathering functions. Lateral line 331 is relatively short length and small diameter, as is characteristic of traditional offshore gathering lines. It is stated that, the geographic configuration of Lateral 331 is "intrafield" a gathering line feeding production from one platform in one portion of the offshore block to another platform in another portion of the same offshore block, where the production can be measured and delivered to an interstate pipeline for transportation to shore. It is further stated that, Lateral 331 is located entirely behind the onshore processing plants, in federal offshore waters. Shell indicates that, Lateral 331 will be owned by a producer and will be used by the producer to gather production from one of its production platforms to another. Shell avers that, the proposed new owner of Lateral 331 is primarily engaged in exploration and production activities and will use the facilities in furtherance of its exploration and production activities to gather production. It is indicated that, the measurement facilities to be acquired are located on four of Shell's production platforms, and will be used by Shell to measure the volume of gas produced and collected at each of the four platforms prior to delivery to the pipeline company for transportation, thus performing a production related function.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 19, 1995, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717–01–M

[Project No. 2444–002 Wisconsin]

Northern States Power Company-Wisconsin; Notice of Availability of Final Environmental Assessment

August 29, 1995.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) Regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for a new license for the White River Hydroelectric Project, located in Ashland County, Wisconsin, and has prepared a Final Environmental Assessment (FEA) for the project. In the FEA, the Commission's staff has analyzed the potential environmental impacts of the existing project and has concluded that approval of the project, with appropriate environmental protection or enhancement measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the FEA are available for review in the Public Reference Branch, Room 3104, of the Commission's offices at 941 North Capitol Street NE., Washington, D.C. 20426.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5291–7]

Underground Injection Control Program; Hazardous Waste Land Disposal Restrictions; Petition for Exemption—Class I Hazardous Waste Injection Well, Monsanto Chemical Company

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on exemption reissuance.

SUMMARY: Notice is hereby given that a Petition for reissuance of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to Monsanto Chemical Company, for the Class I injection wells located at the Alvin, Texas facility. As required by 40 CFR Part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by Monsanto Chemical Company of the specific restricted hazardous waste identified in the petition for reissuance, into the Class I hazardous waste injection wells at the Alvin, Texas facility specifically identified in the petition for as long as the basis for granting an approval of this petition remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued on June 14, 1995. The public comment period ended on July 31, 1995. EPA received no comments. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of August 17, 1995.

ADDRESSES: Copies of the petition for reissuance and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Quality Protection Division, Source Water Protection Branch (6WQ–S), 1445 Ross Avenue, Dallas, Texas 75202–2733.

BILLING CODE 6560-50-P

[FRL–5291–6]

Underground Injection Control Program; Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection—BASF Corporation (BASF)

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on petition.

SUMMARY: Notice is hereby given that an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to BASF, for the Class I injection wells located at Freeport, Texas. As required by 40 CFR Part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows BASF, to inject specific restricted hazardous wastes identified in the exemption, into the Class I hazardous waste injection wells at the Freeport, Texas facility, for as long as the basis for granting an approval of this exemption remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued June 22, 1995. The public comment period ended on August 7, 1995. No comments were received. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of August 17, 1995.

ADDRESSES: Copies of the petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Quality Protection Division, Source Water Protection Branch (6WQ–S), 1445 Ross Avenue, Dallas, Texas 75202–2733.

FOR FURTHER INFORMATION CONTACT: Phil Dellinger, Unit Leader Ground Water/UIC, EPA—Region 6, telephone (214) 665–7142.

William B. Hathaway,

Director, Water Quality Protection Division (6WQ).

Common Sense Initiative Council (CSIC)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification of Public Advisory CSIC Computers and Electronics Section Subcommittee—Open Meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, Public Law 92–463, notice is hereby given that the Computers and Electronics Subcommittee of the Common Sense Initiative Council will meet on the dates and times described below. All times noted are Eastern Time. The meeting is open to the public. Seating at the meeting will be on a first-come basis.

Computers and Electronics Subcommittee—September 27–28, 1995

The Common Sense Initiative Council, Computers and Electronics Subcommittee (CSIC–CES) is convening an open meeting on Wednesday, September 27, from 8:30 a.m. to 5 p.m., and Thursday, September 28, from 8:30 a.m. to 3 p.m., at the Radisson Barcelo Hotel, 2121 P Street, NW., Washington, DC 20037. The phone number of the hotel is (202) 293–3100.

The first day of the meeting will consist primarily of breakout sessions for subcommittee workgroups (Reporting and Information Access; Barriers to Pollution Prevention, Recycling and Product Stewardship; and Integrated and Sustainable Alternative Strategies for Electronics), reports to the full subcommittee from those workgroups, and discussion of administrative and procedural issues of interest to the full subcommittee. Opportunity for public comment on major issues under discussion will be provided at intervals throughout the meeting.

FURTHER INFORMATION: For further information concerning this meeting of the Computer and Electronics Subcommittee, please contact Gina Bushong, (202) 260–3797, FAX (202) 260–1096, or by mail at US EPA (7405), 401 M Street SW., Washington, DC 20460; Mark Mahoney, Region 1, US EPA (617) 565–1155; or David Jones, Region 9, US EPA, (415) 744–2266.

INSPECTION OF CSIC DOCUMENTS: Documents relating to the above Sector Subcommittee announcement will be publicly available at the meeting. Thereafter, these documents, together with the CSIC–CES meeting minutes, will be available for public inspection in room 2417 Mall of EPA Headquarters, Common Sense Initiative Program Staff, 401 M Street SW., Washington, DC 20460, phone (202) 260–7417. CSIC information can be accessed electronically through contacting Katherine Brown at: brown.katherine@epamail.epa.gov.

Dated: August 22, 1995.

Gina Bushong,

Designated Federal Official.

[FRL–5289–8]

Proposed Settlement Pursuant to Section 122(h) of the Comprehensive Environmental Response, Compensation, and Liability Act

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed administrative settlement and opportunity for public comment.

SUMMARY: In accordance with Section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. 9622(i), the U.S. Environmental Protection Agency ("EPA"), Region II, announces a proposed administrative settlement pursuant to Section 122(h) of CERCLA, 42 U.S.C. 9622(h), relating to the Muratti Environmental Superfund Site ("Site"). The Site is located in the town of Penuelas, Tallaboa Ward, Commonwealth of Puerto Rico. This notice is being published pursuant to Section 122(i) of CERCLA to inform the public of the proposed settlement and of the opportunity to comment. EPA will consider any comments received during the comment period and may withdraw or withhold consent to the proposed settlement if comments disclose facts or considerations which indicate that the proposed settlement is inappropriate, improper, or inadequate. The proposed administrative settlement has been memorialized in an Administrative Order on Consent ("Order") between EPA and twelve settling parties ("Respondents"). This Order will become effective after the close of the public comment period, unless comments received disclose facts or considerations which indicate that this Agreement is inappropriate, improper or inadequate, and EPA, in accordance with Section 122(i)(3) of CERCLA, modifies or withdraws its consent to this Agreement. Under the Order, the Respondents will be obligated to pay an aggregate of $525,000 to the Hazardous Substance Superfund in reimbursement of EPA's response costs relating to the Site.

Pursuant to CERCLA Section 122(h)(1), the Order may not be issued without the prior written approval of the Attorney General or her designee. In accordance with that requirement, the Attorney General or her designee has approved the proposed administrative order in writing.

EPA intends to settle with other potentially responsible parties concerning reimbursement of EPA's remaining response costs.

DATE: Comments must be provided on or before October 5, 1995.

ADDRESS: Comments should be addressed to the U.S. Environmental Protection Agency, Office of Regional Counsel, New York/Caribbean Superfund Branch, 17th Floor, 290 Broadway, New York, New York 10007 and should refer to: "Muratti Environmental Superfund Site, U.S. EPA Index No. II CERCLA–94–0301". For a copy of the settlement document, contact the individual listed below.

FOR FURTHER INFORMATION CONTACT: Jean H. Regna, Assistant Regional Counsel, New York/Caribbean Superfund Branch, Office of Regional Counsel, U.S. Environmental Protection Agency, 17th Floor, 290 Broadway, New York, New York 10007. Telephone: (212) 637–3164.

Dated: August 10, 1995.

Conrad Simon,

Acting Regional Administrator.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Approved by Office of Management and Budget

August 28, 1995.

The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collections pursuant to the Paperwork Reduction Act of 1980, Pub. L. 96–511. You are not required to respond to a collection of information unless it displays a currently valid control number. For further information contact Shoko B. Hair, Federal Communications Commission, (202) 418–1379.

Federal Communications Commission

OMB Control No.: 3060–0169.

Expiration Date: 08/31/98.

Title: Sections 43.51 and 43.53 - Reports and Records of Communications Common Carriers and Certain Affiliates.

Estimated Annual Burden: 6,029 total annual hours; 16.12 hours per response; 71 respondents.

Description: Sections 211 and 215 of the Communications Act of 1934, as amended, 47 U.S.C. Sections 211 and 215 require that the FCC examine transactions of any common carriers relating to the activities of that carrier which may affect the charges and/or services rendered under the Act. The reports required by Sections 43.51 and 43.53 are the means by which the FCC gathers information concerning the activities of carriers which it examines. The information is used by the FCC to determine whether the activities reported have affected or are likely to affect adversely the carrier's service to the public or whether these activities result in undue or unreasonable increases in changes.

OMB Control No.: 3060–0643.

Expiration Date: 08/31/98.

Title: Amendment of Parts 65 and 69 of the Commission's Rules to Reform the Interstate Rate of Return Represcription and Enforcement Processes.

Estimated Annual Burden: 50,000 total annual hours; 5000 hours per response; 10 respondents.

Description: Section 151, 154, 201–205, 218–220 and 403 of the Communications Act of 1934, as amended, provide the Commission with authority to prescribe an interstate rate of return. The prescribed rate of return must reflect a proper balance of regulatory goals by allowing a carrier "to maintain its credit and to attract capital" and by ensuring that ratepayers are charged reasonable rates for interstate access services. Part 65 of the Commission's rules set forth the procedures and methodologies for prescribing and enforcing the rate of return certain local exchange carriers (LECs) may earn on interstate access service. In the Report and Order issued in CC Docket No. 92–133, the Commission reformed its rules. Specifically, the Order replaces the existing rule, which initiates represcription proceedings biennially, with a semiautomatic trigger activated by changes in capital costs; modifies the paper hearing rules set out in Part 65; streamlines the methodologies used to estimate the cost of capital; and removes the automatic refund rule.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

BILLING CODE 6712–01–F

FEDERAL HOUSING FINANCE BOARD

[No. 95–9]

Privacy Act of 1974; Systems of Records

AGENCY: Federal Housing Finance Board.

ACTION: Notice.

SUMMARY: In accordance with the Privacy Act, the Federal Housing Finance Board (Finance Board) is publishing a notice of its systems of records.

DATES: The Finance Board invites interested parties to submit comments on the proposed routine uses of the systems of records described in this notice on or before October 5, 1995. The systems of records described in this notice will be effective 30 days from the date of publication unless the Finance Board receives comments on the routine uses that would result in a contrary determination.

ADDRESSES: Please submit comments to: Executive Secretariat, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: David A. Guy, Associate General Counsel, Office of General Counsel, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006.

SUPPLEMENTARY INFORMATION: Pursuant to the requirements of the Privacy Act of 1974 (5 U.S.C. 552a(e)(4)), the Finance Board is publishing a notice of the existence and character of its systems of records maintained on individuals. As further described below, the Finance Board maintains the following systems of records:

FHFB–1 Employee Attendance Records
FHFB–2 General Travel and Transportation Files
FHFB–3 Administrative Grievance Files
FHFB–4 Federal Home Loan Bank Directors Financial Disclosure Records
FHFB–5 Finance Board Director Financial Disclosure Records
FHFB–6 Board of Directors
FHFB–7 Agency Personnel Investigative Records

In addition, the Finance Board intends to adopt the previously published **Federal Register** notices of the existence and character of the following governmentwide systems of records established by the Office of Personnel Management (OPM), the Office of Government Ethics (OGE), and the Equal Employment Opportunity Commission (EEOC):

OPM/GOVT–1 General Personnel Records
OPM/GOVT–2 Employee Performance File System Records
OPM/GOVT–3 Records of Adverse Actions, Performance-Based Reduction in Grade and Removal Actions, and Termination of Probationers
OPM/GOVT–5 Recruiting, Examining, and Placement Records
OGE/GOVT–1 Executive Branch Public Financial Disclosure Reports and Other Ethics Program Records
OGE/GOVT–2 Confidential Statements of Employment and Financial Interests
EEOC/GOVT–1 Equal Employment Opportunity in the Federal Government Complaint and Appeals Records

These governmentwide systems of records include records that are in the temporary custody of the Finance Board, but which are owned by the OPM, the EEOC, or the OGE, respectively. Since the OPM, the OGE, and the EEOC have published notices in the **Federal Register** of the existence and character of these systems of records, it is unnecessarily duplicative for the Finance Board to include a description of these systems of records in its **Federal Register** notice.

Individuals are referred to the OPM's **Federal Register** notice of the existence and character of OPM/GOVT–1, OPM/GOVT–2, OPM/GOVT–3, and OPM/GOVT–5. The citation is 57 FR 35705–35716, August 10, 1992, as amended from time to time.

Individuals are referred to the OGE's **Federal Register** notice of the existence and character of OGE/GOVT–1 and OGE/GOVT–2. The citation is 55 FR 6328–6331, February 22, 1990, as amended from time to time.

Individuals are referred to the EEOC's **Federal Register** notice on the existence and character of EEOC/GOVT–1. The citation is 59 FR 11068, March 9, 1994, as amended from time to time.

FHFB–1

SYSTEM NAME:

Employee Attendance Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Finance Board employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records consist of: (1) Time and attendance sheets showing employee attendance for two-week pay periods and the amount of leave used; and (2) employee applications for leave.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1422b(b)(1).

PURPOSES:

Records are used for management and payroll purposes for approval and documentation of employees' attendance and use of leave.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

These records, or information therefrom, may be disclosed as a routine use to:

1. Finance Board personnel having a need for access to perform their official functions.
2. Another federal agency for payroll purposes.
3. The Department of Labor when processing a claim for compensation regarding a job connected injury or illness.
4. A state unemployment compensation office regarding a claim.
5. The appropriate agency, whether federal, state, or local, where there is an indication of a violation, or potential violation of law, whether civil, criminal, or regulatory in nature, charged with the responsibility of investigating or prosecuting such violation or implementing the statute, rule, regulation, or order issued pursuant thereto.
6. The appropriate person in the event that information in the record system is needed in the course of presenting evidence to a court, magistrate, or administrative tribunal.
7. The OPM or the General Accounting Office (GAO) when the information is required for evaluation of leave administration.
8. The General Services Administration in connection with its responsibilities for records management.
9. A congressional office in response to an inquiry from the congressional office made at the request of the subject individual.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICE FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders.

RETRIEVABILITY:

Records are filed alphabetically by name.

SAFEGUARDS:

Files are kept in areas that are locked after business hours. Access is limited to Finance Board personnel having a need for access to perform their official functions.

RETENTION AND DISPOSAL:

Records are retained indefinitely.

SYSTEM MANAGER AND ADDRESS:

Associate Director, Office of Human Resources, Federal Housing Finance Board, 1777 F Street, NW, Washington, DC 20006.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether this system contains a record pertaining to him or her by directing a request to Executive Secretary, Federal Housing Finance Board, 1777 F Street, NW, Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD ACCESS PROCEDURES:

Requests for access to a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street, NW, Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

CONTESTING RECORD PROCEDURES:

Requests for amendment of a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street, NW, Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD SOURCE CATEGORIES:

The subject individual and Finance Board employees who approve leave applications.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

FHFB–2

SYSTEM NAME:

General Travel and Transportation Files.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Federal Housing Finance Board, 1777 F Street NW, Washington, DC 20006.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Finance Board employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records consist of travel vouchers, petty cash forms, and supporting documentation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1422b(a)(3), 41 CFR part 101–41.

PURPOSES:

Records document payment for travel expenses of Finance Board employees incurred in the performance of their official functions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

These records, or information therefrom, may be disclosed as a routine use to:

1. Finance Board personnel having a need for access to perform their official functions.
2. Internal agency auditors and auditors of the GAO.
3. The appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting a violation or potential violation of law or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto, in the event that information in this record system indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto.
4. The appropriate person in the event that information in this record system is needed in the course of presenting evidence to a court, magistrate, or administrative tribunal.
5. A federal, state, or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a decision concerning the hiring or retention of an employee, the letting of a contract, or the issuance of a grant or other benefit.
6. A federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.
7. A congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICE FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are contained in file folders.

RETRIEVABILITY:

Records are filed alphabetically by name.

SAFEGUARDS:

Files are kept in areas that are locked after business hours. Access is limited to Finance Board personnel having a need for access to perform their official functions.

RETENTION AND DISPOSAL:

Records are retained for two years and then destroyed.

SYSTEM MANAGER AND ADDRESS:

Associate Director, Office of Human Resources, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether this system contains a record pertaining to him or her by directing a request to Executive Secretary, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD ACCESS PROCEDURES:

Requests for access to a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

CONTESTING RECORD PROCEDURES:

Requests for amendments of a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD SOURCE CATEGORIES:

The subject individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

FHFB–3

SYSTEM NAME:

Administrative Grievance Files.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Finance Board employees who have filed a grievance pursuant to the agency's administrative grievance procedures.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records contain documents related to the grievances, including the written grievance filed by the employee, statements of witnesses, records, the report of a hearing if one is held, the report of a fact finder when fact-finding is used, statements made by the parties to the grievance, and the agency's decision.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR part 771.

PURPOSES:

Records document grievance proceedings brought pursuant to the Finance Board's administrative grievance procedures.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

These records, or information therefrom, may be disclosed as a routine use:

1. To Finance Board personnel having a need for access to perform their official functions.
2. In litigation to respond to process issued under authority of a court of competent jurisdiction and to parties or complainants, their representatives, and impartial referees, examiners, administrative judges, or other decisionmakers in proceedings under the Finance Board's administrative grievance procedures, Equal Employment Opportunity procedures, Merit Systems Protection Board, or similar procedures.
3. To request information from a federal, state, or local agency or private individual if necessary to obtain information relevant to a Finance Board decision within the purposes of this system of records.
4. To the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting a violation or potential violation of law or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto, in the event that information in this record system indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto.
5. A federal, state, or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a decision concerning the hiring or retention of an employee, the letting of a contract, or the issuance of a grant or other benefit.
6. A congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICE FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are contained in file folders.

RETRIEVABILITY:

Records are filed alphabetically by name.

SAFEGUARDS:

Files are kept in areas that are locked after business hours. Access is limited to Finance Board personnel having a need for access to perform their official functions.

RETENTION AND DISPOSAL:

Records are destroyed five years after closure of a case.

SYSTEM MANAGER AND ADDRESS:

Personnel Security Officer, Office of Human Resources, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether this system contains a record pertaining to him or her by directing a request to Executive Secretary, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD ACCESS PROCEDURES:

Requests for access to a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

CONTESTING RECORD PROCEDURES:

Requests for amendments of a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD SOURCE CATEGORIES:

The subject individual, Finance Board personnel records, and statements and testimony of witnesses and related correspondence.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

FHFB–4

SYSTEM NAME:

Federal Home Loan Bank Directors Financial Disclosure Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former members of the boards of directors of the 12 Federal Home Loan Banks (Banks).

CATEGORIES OF RECORDS IN THE SYSTEM:

Records contain: (1) Information describing the financial relationships, as defined in 12 CFR 931.30, of current and former members of the boards of directors of the Banks; and (2) certifications of eligibility by current and former members of the boards of directors of the Banks.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1427(a), (b), (d).

PURPOSES:

Records are collected to determine whether Bank directors are in compliance with applicable statutory and regulatory eligibility requirements.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records, or information therefrom, may be disclosed as a routine use to Finance Board personnel having a need for access to perform their official functions.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICE FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

Director, Office of Public Affairs, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether this system contains a record pertaining to him or her by directing a request to Executive Secretary, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD ACCESS PROCEDURES:

Requests for access to a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

CONTESTING RECORD PROCEDURES:

Requests for amendment of a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD SOURCE CATEGORIES:

The subject individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

FHFB–7

SYSTEM NAME:

Agency Personnel Investigative Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Finance Board employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records contain information relating to the subject individual, including name, address, date and place of birth, Social Security number, citizenship, residence, foreign travel and contacts, education, personal references, organizational membership and security clearance history, reports from commercial credit agencies, and personal security investigative reports from either the OPM or the Federal Bureau of Investigation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 3301, 5 CFR parts 5, 731, 736, E.O. 10577.

PURPOSE:

Records are collected in order to make a determination as to the suitability of the subject individual for federal employment. The records are maintained in order to provide documentation, if necessary, to OPM in order to support the Finance Board's determination of the suitability of the subject individual for federal employment.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records, or information therefrom, may be disclosed as a routine use to:

1. Designated officers and employees of agencies, offices, and other establishments in the executive, legislative, and judicial branches of the federal government, having a need to evaluate qualifications, suitability, and loyalty to the United States government and/or a security clearance or access determination.

2. Designated officers and employees of agencies, offices, and other establishments in the executive, legislative, and judicial branches of the federal government, and the District of Columbia government, when such agency, office, or establishment conducts an investigation of the individual for purposes of granting a security clearance, or for the purpose of making a determination of qualifications, suitability, or loyalty to the United States government, or access to classified information or restricted areas.

3. Designated officers and employees of agencies, offices, and other establishments in the executive, judicial, or legislative branches of the federal government, having the responsibility to grant clearances, to make determination regarding access to classified information or restricted areas, or to evaluated qualifications, suitability, or loyalty to the United States government, in connection with performance of a service to the federal government under a contract or other agreement.

4. Intelligence agencies for use in intelligence activities;

5. Any source from which information is requested in the course of an investigation, to the extent necessary to identify the individual, inform the source of the nature and purpose of the investigation, and to identify the type of information requested.

6. The federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order where there is an indication of a violation or potential violation of civil or criminal law or regulation.

7. An agency, office or other establishment in the executive, legislative, or judicial branches of the federal government, or the District of Columbia government, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency.

8. Federal agencies as a data source for management information through the production of summary descriptive statistics and analytical studies in support of the functions for which the records are maintained or for related studies.

9. A congressional office in response to an inquiry made at the request of that individual.

10. In litigation before a court or in an administrative proceeding being conducted by a federal agency.

11. The National Archives and Records Administration for records management inspections.

12. The Office of Management and Budget in connection with private relief legislation.

13. Respond to a request for discovery or for appearance of a witness.

14. The Merit Systems Protection Board, the Office of Special Counsel, the Equal Employment Opportunity Commission, or the Federal Labor Relations Authority, in connection with functions vested in those agencies.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICE FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The records are contained in file jackets and stored in a safe secured by a combination lock.

RETRIEVABILITY:

Records are filed alphabetically by name.

SAFEGUARDS:

Records are in the custody of the Personnel Security Officer and are maintained in a safe secured by a combination lock. The room where the records are stored is locked when not in use.

RETENTION AND DISPOSAL:

Records are retained until the subject individual terminates employment at the Finance Board, at which time the records are sent to the OPM.

SYSTEM MANAGER AND ADDRESS:

Personnel Security Officer, Office of Human Resources, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether this system contains a record pertaining to him or her by directing a request to Executive Secretary, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD ACCESS PROCEDURES:

Requests for access to a record shall be directed to the Office of Personnel Management, Federal Investigations Processing Center, FOI/PA, Boyers, Pennsylvania 16018.

CONTESTING RECORD PROCEDURES:

Requests for amendment of a record shall be directed to Executive Secretary, Federal Housing Finance Board, 1777 F Street NW., Washington, DC 20006, in accordance with the procedures set forth in 12 CFR part 909.

RECORD SOURCE CATEGORIES:

Subject individual; police, military, or naval reports; former employees; and references supplied to the Personnel Security Officer by the subject individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Records contained in this system are exempt from disclosure, pursuant to the provisions 5 U.S.C. 552a(k)(5), to the extent that disclosure would reveal the identity of a source who furnished information to the government under an express promise that the identification of the source would be held in confidence, or, prior to September 1, 1975, under an implied promise that the identity of the source would be held in confidence.

Dated: August 28, 1995.

By the Federal Housing Finance Board.

Rita I. Fair,
Managing Director.

BILLING CODE 6725–01–P

FEDERAL RESERVE SYSTEM

Crestar Financial Corporation, et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than September 18, 1995.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Senior Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. Crestar Financial Corporation, Richmond, Virginia; to merge with Loyola Capital Corporation, Baltimore, Maryland, and thereby indirectly acquire Loyola Federal Savings Bank, Baltimore, Maryland, and thereby engage in mortgage origination, mortgage servicing, real estate appraisal, investment counseling and securities brokerage services, insurance brokerage services, and the traditional activities of a federal savings bank, pursuant to §§ 225.25(b)(1), (b)(13), (b)(4), (b)(15), (b)(8)(vii), and (b)(9) of the Board's Regulation Y.

B. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Carroll County Bancshares, Inc., Carroll, Iowa; to acquire Carroll Credit, Inc., Carroll, Iowa, and thereby engage in owning and operating a finance company, pursuant to § 225.25(b)(1)(i) of the Board's Regulation Y.

C. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Castle Rock Bank Holding Company, Castle Rock, Colorado; to acquire Colorado Imaging Company, Inc., Castle Rock, Colorado, and thereby engage in data processing activities, pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, August 29, 1995.

William W. Wiles,
Secretary of the Board.

[FR Doc. 95-21894 Filed 9-1-95; 8:45 am]

BILLING CODE 6210-01-F

First Bank System, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than September 20, 1995.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *First Bank System, Inc.*, Minneapolis, Minnesota; to merge with Midwestern Services, Inc., Omaha, Nebraska, and thereby indirectly acquire First Bank, Omaha, Nebraska.

2. *First Bank System, Inc.*, Minneapolis, Minnesota; to merge with Southwest Holdings, Inc., Omaha, Nebraska, and thereby indirectly acquire Southwest Bank and Trust Company of Omaha, Omaha, Nebraska.

In connection with this application, Applicant also has applied to acquire SWH & K Partnership, Omaha, Nebraska, and thereby engage in reinsurance of credit life and disability insurance, pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y. The geographic scope for these activities is Nebraska.

In connection with both applications described above, Applicant also has applied to acquire FBS Interim Bank, FSB, Omaha, Nebraska, and thereby engage in operating a thrift subsidiary, pursuant to § 225.25(b)(9) of the Board's Regulation Y. This interim thrift will be used to facilitate the purchase of First Bank, Omaha, Nebraska and Southwest Bank and Trust Company of Omaha, Omaha, Nebraska. After these acquisitions, the thrift will be merged into a newly chartered national bank and will cease to exist. The geographic scope for these activities is Nebraska.

Board of Governors of the Federal Reserve System, August 29, 1995.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–F

NBD Bancorp, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 29, 1995.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *NBD Bancorp, Inc.*, Detroit Michigan (NBD Bancorp); to acquire First Chicago Corporation, Chicago,

Illinois, and American National Corporation, Chicago, Illinois, and thereby indirectly acquire First National Bank of Chicago, Chicago, Illinois, FCC National Bank, Wilmington, Delaware, and American National Bank & Trust Company, Chicago, Illinois.

In connection with this application, NBD Bancorp also has applied to acquire ANB Mezzanine Corporation, Chicago, Illinois, and thereby engage in making, acquiring, and servicing loans or other extensions of credit, pursuant to § 225.25(b)(1) of the Board's Regulation Y; Cash Station, Inc., Chicago, Illinois, and thereby engage in data processing activities, pursuant to § 225.25(b)(7) of the Board's Regulation Y; First Capital Corporation of Chicago, Chicago, Illinois, and thereby engage in making, acquiring, and servicing loans or other extensions of credit, pursuant to § 225.25(b)(1) of the Board's Regulation Y; First Chicago Capital Markets, Inc., Chicago, Illinois, and thereby engage in providing financial and transaction advice, in providing full-service securities brokerage services, and in underwriting and dealing in securities that state member banks are permitted to underwrite and deal in, pursuant to § 225.25(b)(4), (15), and (16), as well as the following: underwriting and dealing, to a limited extent, in certain debt securities that a state member bank may not underwrite or deal in, purchasing and selling securities as a "riskless principal," and acting as an agent in the private placement of securities, all pursuant to *First Chicago Corporation*, 74 Federal Reserve Bulletin 706 (1988) and *First Chicago Corporation*, 80 Federal Reserve Bulletin 448 (1994); *First Chicago Investment Corporation*, Chicago, Illinois, and thereby engage in making, acquiring, and servicing loans or other extensions of credit, pursuant to § 225.25(b)(1) of the Board's Regulation Y; First Chicago Lease Holding, Inc., Chicago, Illinois, and thereby engage in commercial leasing activities, pursuant to § 225.25(b)(5) of the Board's Regulation Y; First Chicago Leasing Corporation, Chicago, Illinois, and thereby engage in making, acquiring, and servicing loans, or other extensions of credit, commercial leasing activities, and community development activities, pursuant to § 225.25(b)(1), (5), and (6) of the Board's Regulation Y; First Chicago Realty Corporation, Chicago, Illinois, and thereby engage in making, acquiring, and servicing loans or other extensions of credit, pursuant to § 225.25(b)(1) of the Board's Regulation Y; Palo Verde Lease Holdings, Inc., Chicago, Illinois, and thereby engage in commercial leasing activities, pursuant to § 225.25(b)(5) of the Board's Regulation Y; First Chicago Trust Company of New York, New York, New York, and thereby engage in performing functions and activities that may be performed by a trust company, pursuant to § 225.25(b)(3); and G-W Life Insurance Company, Phoenix, Arizona, and thereby engage in underwriting credit life, accident and health insurance related to certain extensions of credit, pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y.

NBD Bancorp, Inc., also has applied to exercise an option to acquire up to 19.9 percent of the voting shares of First Chicago Corporation, and American National Corporation, both of Chicago, Illinois.

In addition, First Chicago Corporation, Chicago, Illinois (First Chicago), has applied to exercise an option to acquire up to 19.9 percent of the voting shares of NBD Bancorp, Inc., Detroit, Michigan, NBD Indiana, Inc., Indianapolis, Indiana, and NBD Illinois, Inc., Park Ridge, Illinois, and thereby acquire NBD Bank, Detroit, Michigan, NBD Bank, N.A., Indianapolis, Indiana, NBD Bank, Elkhart, Indiana, NBD Bank, Wheaton, Illinois, NBD Bank, N.A., Skokie, Illinois, NBD Bank, Columbus, Ohio, and National Bank of Detroit-Dearborn, Dearborn, Michigan.

In connection with this application, First Chicago also has applied to acquire NBD Bank, FSB, Venice, Florida, and Deerfield Federal Savings & Loan Association, Deerfield, Illinois, and thereby engage in operating a savings association, pursuant to § 225.25(b)(9) of Regulation Y; ML Inc., Detroit, Michigan, and thereby engage in data processing activities, pursuant to § 225.25(b)(7) of the Board's Regulation Y; NBD Insurance Agency, Inc., Detroit, Michigan, and thereby engage in insurance agency activities related to extensions of credit, pursuant to § 225.25(b)(8)(i) of Regulation Y; NBD Insurance Company, Detroit, Michigan, and thereby engage in insurance agency activities related to extensions of credit, pursuant to § 225.25(b)(8)(i) of Regulation Y; BHC Financial, Inc., Philadelphia, Pennsylvania, and thereby engage in securities brokerage activities, pursuant to § 225.25(b)(15); NBD Mortgage Company, Detroit, Michigan, and thereby engage in making, acquiring, and servicing loans or other extensions of credit, pursuant to § 225.25(b)(1) of Regulation Y; NBD Service Corporation, Belleville, Michigan, and thereby engage in data processing activities, pursuant to § 225.25(b)(7) of the Board's Regulation Y; NBD Securities, Inc., Detroit, Michigan, and thereby engage in securities brokerage activities, pursuant to § 225.25(b)(15) of Regulation Y; FNW Capital, Inc., Mount Prospect, Illinois, and thereby engage in commercial leasing, pursuant to § 225.25(b)(5) of Regulation Y; NBD Community Development Corporation, Detroit, Michigan, and thereby engage in community development activities, pursuant to § 225.25(b)(6) of Regulation Y; NBD Financial Services of Michigan, Inc., Traverse City, Michigan, and thereby engage in providing investment or financial advice, pursuant to § 225.25(b)(4) of Regulation Y; NBD Brokerage Services, Inc., Indianapolis, Indiana, and thereby engage in securities brokerage activities, pursuant to § 225.25(b)(15) of Regulation Y; Charter Agency, Incorporated, Northfield, Illinois, and thereby engage in insurance agency activities, pursuant to § 225.25(b)(8) of Regulation Y; Corporate Funding Inc., Grand Rapids, Michigan, and thereby engage in commercial leasing, pursuant to § 225.25(b)(5) of Regulation Y; NBD Leasing, Inc., Indianapolis, Indiana, and thereby engage in commercial leasing, pursuant to § 225.25(b)(5) of Regulation Y; NBD Neighborhood Revitalization Corporation, Indianapolis, Indiana, and thereby engage in community development activities, pursuant to § 225.25(b)(6) of Regulation Y; and NBD Real Estate Services, Indianapolis, Indiana, and thereby engage in making, acquiring, and servicing loans or other extensions of credit, leasing real property, insurance agency activities related to extensions of credit, management consulting, and real estate appraising, pursuant to § 225.25(b)(1), (5), (8), (11), and (13) of Regulation Y.

Board of Governors of the Federal Reserve System, August 30, 1995.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-F

GENERAL ACCOUNTING OFFICE

Federal Accounting Standards Advisory Board; Public Hearing

AGENCY: General Accounting Office.

ACTION: Notice of public hearing.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. No. 92–463), as amended, notice is hereby given that a public hearing of the Federal Accounting Standards Advisory Board will be held on Wednesday, September 20, 1995 from 9 a.m. to 4 p.m. in room 7C13 of

the General Accounting Office, 441 G Street NW., Washington, DC.

The purpose of the hearing is to hear testimony from interested parties on the *Accounting for Revenue and Other Financing Sources* exposure draft, issued in July 1995.

Any interested person may attend the hearing as an observer. Board discussions and reviews are open to the public.

FOR FURTHER INFORMATION CONTACT: Ronald S. Young, Executive Staff Director, 750 First Street NE., Room 1001, Washington, DC 20002, or call (202) 512–7350.

Authority: Federal Advisory Committee Act. Pub. L. No. 92–463, sec. 10(a)(2), 86 Stat. 770, 774 (1972) (current version at 5 U.S.C. app. section 10(a)(2) (1988); 41 CFR 101–6.1015 (1990).

Dated: August 29, 1995.

Ronald S. Young,

Executive Director.

BILLING CODE 1610–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Agency Information Collection Under OMB Review; Proposed Information Collection Submitted for Public Comment and Recommendations

In compliance with the requirements of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Administration for Children and Families (ACF) is publishing the following summary(ies). To request copies of the proposed collection of information write to The Administration for Children and Families, Office of Information Systems, 370 L'Enfant Promenade SW, Washington, DC 20447, Attn: ACF Reports Clearance Officer.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Proposed Project(s):

Title: National Study of Outcomes for Children Placed in Foster Care with Relatives.

OMB No.: New Request.

Description: This is a series of interview forms for use with state administrators, case workers, and foster parents in seven states selected for the study. State administrators are the Chief Child Welfare Administrator, the fiscal administrator, and management information system specialist in each state. The National Study of outcomes for Children Placed in Foster Care with Relatives will be used to describe policies, practices and characteristics regarding placement of children in foster care with relatives; to describe outcomes of children placed in foster care with relatives compared to children placed in non-relative foster care; and to examine the associated costs of relative foster care compared to non-relative foster care.

Respondents: State governments.

Title	Number of respondents	Number of responses per respondent	Average burden per response	Burden
Administrator Interview	7	1	1	7
Casework Interview	140	1	1	140
Foster Parent Interview	280	1	.75	210
Demographic Information Report	7	1	.5	3.5
Fiscal Information Report	7	.5	3.5	3.5

Estimated Total Annual Burden Hours: 364.

Dated: August 29, 1995.

Roberta Katson,

Acting Director, Office of Information Resource Management.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. FR–3917–N–19]

Notice of Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments must be received within thirty (30) days from the date of this Notice. Comments should refer to the proposal by name and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number if applicable; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (7) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: August 18, 1995.

David S. Cristy,

Director, Information Resources Management Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Letter of Transmittal/Servicing Agreement/Resolution of Borad Director and Certificate of Authorized Signatures

Office: Government National Mortgage Association

Description of the Need for the Information and its Proposed Use: Form HUD–11700, Letter of Transmittal, is used by issuers to transmit to GNMA required materials to request approval of all applications to become a mortgage-backed securities issuer. Form HUD–11702, Resolution of Board of Directors and Certificate of Authorized Signatures, is used to provide GNMA with names and signatures of the Board of Directors of the issuer's organization. Form HUD–11707, Servicing Agreement, is used by the issuer to provide assurance to GNMA that servicing of the mortgages backing the securities will be performed at an acceptable standard.

Form Number: HUD–11700, 11702 and 17707

Respondents: Business or Other For-Profit

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
HUD–11700	900		6		.17		918
HUD–11702	900		1		.17		160
HUD–11707	900		34		.17		5,222

Total Estimated Burden Hours: 6,300

Status: Extension with changes

Contact: Brenda Countee, HUD, (202) 708–2234; Joseph F. Lackey, Jr., OMB (202) 395–7316.

Dated: August 18, 1995.

[FR Doc. 95–21859 Filed 9–1–95; 8:45 am]

BILLING CODE 4210–01–M

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. FR–3917–N–20]

Proposed Information Collection for Public Comment

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due: November 6, 1995.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Mildred M. Hamman, Reports Liaison Officer, Public and Indian Housing, Department of Housing and Urban Development, 451—7th Street, SW, Room 4240, Washington, DC 20410–5000.

FOR FURTHER INFORMATION CONTACT: Mildred M. Hamman, (202)–708–0846, (this is not a toll-free number) for copies of the proposed forms and other available documents.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

The Notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Statement of Voucher for Basic Annual Contribution—Leased Housing

OMB Control Number, if applicable: 2577–0061. Description of the need for the information and proposed use: This form is needed to provide essential financial information on the operations of PHAs, which is used for multiple purposes by HUD including identification of debts owed to the Department.

Agency form numbers, if applicable: HUD–52981.

Members of affected public: State, Local or Tribal Government Estimation of the total numbers of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response: 125 respondents, annually, .88 hours per response, 110 hours for a total reporting burden.

Status of the proposed information collection: Extension.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: August 29, 1995.

Michael B. Janis,

General Deputy.

Joseph Shuldiner,

Assistant Secretary for Public and Indian Housing.

[FR Doc. 95–21860 Filed 9–1–95; 8:45 am]

BILLING CODE 4210–33–M

DEPARTMENT OF THE INTERIOR

National Park Service

Record of Decision; Final Environmental Impact Statement/General Management Plan; Grand Canyon National Park; Coconino and Mohave Counties, AZ

Summary: Pursuant to § 102(2)(C) of the National Environmental Policy Act of 1969 and the regulations promulgated by the Council on Environmental Quality (40 CFR 1505.2), the Department of the Interior, National Park Service, has prepared a Record of Decision on the Final Environmental Impact Statement/General Management Plan for Grand Canyon National Park, Coconino and Mohave Counties, Arizona. This Record of Decision is a concise statement of what decisions were made, what alternatives were considered, the basis for the decision, and the mitigating measures developed to avoid or minimize environmental impacts.

Decision: The National Park Service will implement the proposed general management plan for Grand Canyon National Park, as detailed in Alternative 2 of the Final General Management Plan and Environmental Impact Statement issued in July 1995. The draft plan and environmental impact statement was issued in March 1995. The proposal is described below as the Selected Action.

Selected Action: The selected action is a comprehensive proposal for future management and use of the park, including a regional, ecosystem planning focus, park management zones, visitor experience, expanded provision of alternative visitor transportation services, interpretation planning, park operations, and park facilities development.

Summary of Actions: The regional context of Grand Canyon National Park will be emphasized, and proposals for resource preservation and visitor use will take into account environmental effects on the park as well as the region. Planning outside the park will be done cooperatively, with an emphasis on disseminating information, preserving regional and park resources, and providing a quality visitor experience. The National Park Service will work jointly with adjacent entities to provide for many park needs outside park boundaries. A gateway information center, some community services, and up to 500 employee housing units will be provided in Tusayan. The most appropriate locations for facilities will be considered in a regional context, taking into consideration principles of sustainable design and the need to preserve resources while providing for a quality visitor experience.

Alternative modes of transportation (public transit, hiking, and biking) will be emphasized within the park. A primary orientation center and public transit hub will be constructed near Mather Point. From there several shuttle routes will provide efficient and quiet visitor transportation to Grand Canyon Village and other points on the South Rim. Visitor parking and a shuttle system will also be established on the North Rim.

To minimize impacts on natural and cultural resources within the park, existing structures will be adaptively reused, and required new facilities will be built in previously disturbed areas wherever possible. The Kachina and Thunderbird lodges will be removed and the number and size of gift shops on the South Rim will be reduced. The RV campground and the existing helicopter base will be redesigned. Some disturbed areas will be revegetated.

To ensure a quality experience, the number of visitors admitted to certain areas will be limited during peak visitation periods based on recommendations derived from a carrying capacity monitoring program. The methodology for determining use limits will be the same throughout the developed areas of the park; however, visitor use limits for specific areas will vary considerably, and visitor use may be limited sooner in some areas than in others. Day use on the South Rim and the corridor trails will not need to be limited during the life of this plan, provided the recommended alternative visitor transportation services are fully funded and operational; day visitation on the North Rim will be limited by the year 2005 or 2010, depending on the effectiveness of management actions; and day use at Tuweep may be limited during peak times. In areas where reservations become necessary, visitors will be able to obtain reservations ahead of time (their reservations will be checked at park entrances). A monitoring system will be established to measure resource impacts, facility use, visitor satisfaction, and levels of visitor attendance in each park developed area. The reservation system will be adjusted as needed.

Summary of Impacts: A stable situation for the future will be provided for all the developed areas of the park, significantly improving management's ability to preserve and protect the natural and cultural resources, provide a high-quality visitor experience, and ensure quality living and operating conditions for park employees. Most development will in-fill on already disturbed areas. Historic structures will be adaptively reused, resource damage will be minimized, and local economies will be enhanced. Sustainable planning, design, and implementation will be encouraged within a regional context.

Alternatives Considered

No-Action Alternative—Existing Conditions / Ongoing Programs

Summary of Actions: Unlimited day visitation would continue in all park developed areas, with nearly every visitor facility in developed areas of the South Rim continuing to be

overcapacity during peak use periods. No major facilities would be built, and no major park functions would be relocated. Any required facility changes would be done in or adjacent to existing disturbed areas. The number of overnight accommodations, campsites, and all other visitor services remain the same in each developed area. Minor adjustments in management would be made to help reduce resource damage and to provide a safer visitor experience. Planning would be focused inside the park, primarily to solve existing problems. Issues related to planning and land management practices in areas immediately outside the park would be handled individually as the need arose, without an overall area vision or cooperative regional planning effort to guide the direction. Limited cooperative planning to distribute regional information to visitors would occur.

Summary of Impacts: Uncontrolled growth would continue within the park, with only limited improvements to visitor services. Damage to natural and cultural resources would continue to worsen, and the visitor experience would become degraded. Communication with visitors to help them plan their trip so they could have a quality experience in the park would continue to be minimal, resulting in negative experiences for park visitors. Extensive quantities of substandard housing would remain, along with an ever-increasing shortage of park housing, forcing more and more employees to find housing in adjacent areas, perhaps long distances from the workplace. The lack of operational space would become severe, reducing employee effectiveness. Over the long term the economy of the area could be damaged due to the worsening image of Grand Canyon National Park and the poor visitor experience.

Alternative 1—Minimum Requirements

Summary of Actions: Unlimited day visitation would continue in all developed areas of the park until visitor congestion, resource damage, and public safety warranted restricting access during peak visitation. This would be accomplished by implementing reservation systems based on the capacity of existing parking and eating facilities on the South and North Rims. Regional information programs would explain the park's reservation systems to visitors. Overnight accommodations would not be affected. Visitor use at Tuweep and on the corridor trails would not be limited under this alternative.

Existing land use patterns would be retained—no major facilities would be built, no major park functions would be relocated, and most park facilities would remain where they are now. A few minor facilities would be added. Any required facility changes would be done in or adjacent to existing disturbed areas. Planning would be focused inside the park, primarily to solve existing problems. Issues related to planning and land management practices in adjacent areas outside the park would be handled individually as the need arose, without an overall area vision or integrated regional planning effort to guide the direction.

Summary of Impacts: Park resource damage and a worsening visitor experience at Grand Canyon would be alleviated by limiting the number of people visiting developed areas on the North and South Rims at any one time. Tuweep would continue to experience uncontrolled use, possibly leading to deteriorated natural resources and a degraded visitor experience over the long term. Some impacted areas would be rehabilitated, helping to restore resources within the park. The visitor experience would improve compared to the no-action alternative because fewer people would be competing to use facilities. However, visitors would continue to be frustrated by not being able to easily find places they want to see. Information, orientation, and education about park themes would remain ineffective because of inadequate and poorly located facilities. Visitors would not be well distributed throughout the park, reducing the number of people who could enjoy the park at any one time, and more and more visitors would be turned away.

An increasing number of employees would not be able to live in the park, and many would have to find their own housing, often over an hour from the park. Housing in some developed areas would be improved, and the need for additional housing would be reduced by limiting visitation. Some improvements would occur outside the park due to NPS assistance to outside entities for regional visitor information. However, many park problems would fall to regional entities, for example, visitors parking outside the park and using private transit services to enter the park, disappointed visitors being turned away at the gate, and housing for park employees.

Alternative 3—Reduced Development Within the Park

Summary of Actions: Alternative 3 would emphasize the preservation of park resources by placing all new facilities and relocating many existing functions outside the park. Cooperative regional planning would ensure that NPS functions occurring outside park boundaries demonstrated environmentally sensitive planning and design. The National Park Service would expand its regional information services, as described for alternative 2. On the South Rim all day visitor vehicles would be removed, and a major public transit system would be provided. No new lands within the park would be disturbed, and historic uses of existing structures would be retained wherever possible. Overnight accommodations would be reduced on the South Rim but increased on the North Rim by adaptively reusing historic structures. Planning for the park would be done in a regional context to minimize negative impacts resulting from park uses being placed in areas outside the park. Communications would be expanded, as described for alternative 2. Wherever possible, facilities placed outside the park would be clustered in disturbed areas and linked to existing systems. Alternative modes of transportation would be emphasized regionally as well as in major high use areas of the park, the same as alternative 2.

Summary of Impacts: There would be an emphasis on preserving natural and cultural resources within the park, and many park disturbed areas would be rehabilitated. The visitor experience within the park would be highly controlled on the South Rim, and strict limitations of the number of visitors on the North Rim and at Tuweep would force many visitors to plan far in advance to experience those areas. Many more acres would be disturbed outside the park than any other alternative as a result of park-related facility development; services, housing, and operational facilities within the park would be limited. Many visitors would be inconvenienced since no private vehicles could be driven through the park.

Alternative 4—Increased Development Within the Park

Summary of Actions: Alternative 4 proposes actions to improve visitor convenience by placing major park visitor services inside the park wherever reasonable and by distributing visitors throughout the developed areas of the park. No day use limitations would be established unless the visitor experience was being significantly degraded. The type of vehicular use allowed in some areas would be restricted, and high use areas would be accessible only by transit vehicles or hiking or biking (the same as alternative 2); other developed areas would be accessible by private vehicles. Overnight accommodations would be increased in all developed areas on the North and South Rims by constructing some new facilities and adaptively reusing existing structures. New facilities would be placed either in or adjacent to disturbed areas. Planning outside the park would emphasize regional information, as described for alternative 2. Cooperative planning with outside entities would focus on disseminating information, providing trip planning assistance, and distributing visitor use.

Summary of Impacts: Allowing all visitors to enter the park and developing facilities to accommodate their needs would result in continuing resource damage. This alternative would produce more resource impacts inside the park than any alternative and would set a precedent for continued resource impacts in the future. The greatest resource impacts would be caused by widening roads and developing additional parking. Visitor convenience would be significantly enhanced. Park operations and development would continue to expand to meet visitor demand. After 2010 the visions and management objectives for the developed areas might not be attainable due to the increases in facilities and visitors. Impacts to regional resources would increase over the long term as a result of growth inside and outside the park to meet visitor needs. Due to ever-increasing needs for park construction, new employee housing, and larger visitor facilities, the regional economy would continue to increase.

Basis for Decision: The selected action was formulated to address problems and management concerns related to the protection and preservation of natural and cultural resources, the provision of appropriate visitor experiences, and the fulfillment of identified management objectives. The management objectives reflect the park purpose, significance, and park area vision statements. They provide a standard against which progress on the implementation of the plan can be measured. The management zoning concept set forth in the March 1995 draft plan (and refined in the July 1995 final plan) is adopted, which will enhance management's ability to direct future park actions in specific areas within the context of an overall management philosophy.

The selected action also adopts the ongoing implementation plans within the park (for example, the Resource Management Plan, Backcountry Management Plan, Colorado River Management Plan, Fire Management Plan, and Land Protection Plan), and provides direction, through the management objectives, for future revisions of those plans. The selected action provides for a monitoring program that will provide an appropriate park management presence and an adjustable, sustainable carrying capacity for people and vehicles in developed areas within the park with minimal disturbance to park resources.

No protests or other comments were received on the final plan and environmental impact statement during the 30-day no action period that the document was available to the public.

Environmentally Preferred Alternative: Alternative 2 is the environmentally preferred alternative. It balances the statutory mission of the National Park Service to provide long-term resource preservation while still allowing for appropriate levels of visitor use and appropriate means or forms for visitor enjoyment. Within the range of alternatives presented in the plan, alternative 2 corrects the existing infrastructure deficiencies in the park and provides for the projected growth in visitation through the year 2010 by adaptive use of existing historical structures and provision of visitor transportation services other than private automobiles. A long-term monitoring program to determine appropriate use levels and carrying capacities within the developed areas of the park will be established to ensure protection of the natural and cultural resources of the park and to maintain a quality visitor experience.

Alternative 2 also provides the best combination of long- and short-term regional economic and community proposals that will favorably affect the tourism industry and communities in northern Arizona and southern Utah. An emphasis in alternative 2 is to promote economic development in surrounding communities by not providing all tourist related facilities inside the park.

Measures to Minimize Harm: All practicable measures to avoid or minimize environmental impacts that could result from implementation of the selected action have been identified and incorporated into the selected action. These include, but are not limited to, protection of viewsheds and wilderness values, and natural resources including the protection of populations of threatened plant species in the developed zone. As specific aspects of the selected action are further developed or implemented, the National Park Service will consult with the Fish and Wildlife Service regarding threatened or endangered species. Also impacts to the integrity of historic properties, ethnographic resources, and archeological sites will be avoided or minimized. A programmatic agreement has been signed by the Arizona State Historic Preservation Office, the Advisory Council on Historic Preservation, and the National Park Service which provides a framework for further consultation and discussion when implementing the selected action.

Conclusion: The above factors and considerations warrant selecting Alternative 2, identified as the proposed action in the draft document (and as modified in the final general management plan and environmental impact statement). Additional copies of the approved Record of Decision may be obtained from the Superintendent, Grand Canyon National Park, P.O. Box 129, Grand Canyon, AZ 86023. The officials responsible for implementing the selected action are the Field Director, Intermountain Field Area, National Park Service and the Superintendent, Grand Canyon National Park.

Approved: August 21, 1995.

Stanley T. Albright,

Field Director, Pacific West Field Area.

BILLING CODE 4310–70–P

Interagency Desert Management Plan Northern and Eastern Mojave Desert Inyo and San Bernardino Counties, CA; Intent To Prepare an Environmental Impact Statement

SUMMARY: In accordance with 40 CFR 1501.7 and 1508.22, of the regulations of the President's Council on Environmental Quality for the National Environmental Policy Act (Pub. L. 91–190), the National Park Service (NPS), Bureau of Land Management (BLM) and U.S. Fish and Wildlife Service (FWS) are initiating the preparation of a management plan and environmental impact statement for the Northern and Eastern Mojave Desert.

Background

The purposes of this interagency desert management plan are to guide protection, public use, and development of a 7.7 million acre region in parts of Inyo and San Bernardino counties of southern California. Once approved, the plan will provide broad guidance over the next two decades for management of federally owned lands in the Northern and Eastern Mojave Desert. The plan also will contain more detailed plans for two major units of the National Park System and for BLM lands. Specifically, the existing Death Valley general

management plan of 1988 will be amended, the first general management plan for Mojave National Preserve will be prepared, and management decisions for BLM wilderness areas will amend the California Desert Conservation Area Plan of 1980.

The principal issues proposed to be resolved through this planning effort include the following topics: Access to public lands; infrastructure necessary for managing these areas; habitat management, including the habitat of the threatened desert tortoise and other sensitive species; wilderness management; management of wild horses, burros, and alien/exotic plant and animal species; proposed expansion of Fort Irwin; visitor information facilities; recreational opportunities; mining activities and utility corridors.

The project will be conducted by an interagency, multidisciplinary planning team with offices in Barstow, California. Federal and state government agencies, as well as county and city officials, will be invited to consult with the team throughout the project process. Interested individuals and organizations will be able to participate during the planning process through a series of public meetings and review periods. The expected three year planning effort will commence immediately.

The public will be invited to workshops and open houses at three different stages of the project—scoping/issues identification, development of alternatives, and review of the draft and final documents. The first set of workshops, intended to listen to and record public input on the planning issues, will be held in late September, 1995, in Las Vegas, Nevada and in Baker, Barstow, Furnace Creek, Independence, Lone Pine, Needles, Pasadena, Ridgecrest, and San Bernardino in California. The team will also welcome any written comments during this scoping phase.

SUPPLEMENTARY INFORMATION: Requests for a map of the Northern and Eastern Mojave planning area, as well as comments and inquires about this project, should be directed to: Mr. Dennis Schramm, Planning Team Leader, National Park Service, Mojave National Preserve, 222 East Main Street, Suite 202, Barstow, CA 92311 [(619)255–8840].

Dated: August 22, 1995.

Stephen G. Crabtree,

Acting Field Director, Pacific West Field Area.

BILLING CODE 4310–70–P

Bureau of Reclamation

[FES 95–30]

Josephine County Water Management Improvement, Fish Passage Improvements, Savage Rapids Dam, OR

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of planning report/final environmental statement.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969, as amended, and the Reclamation Act of 1902, as amended, the Bureau of Reclamation has prepared a planning report/final environmental statement (PR/FES) on a proposed project to improve fish passage at Savage Rapids Dam located on the Rogue River in southwest Oregon near the city of Grants Pass. The report presents an evaluation of two alternatives for improving fish passage and reducing loss of salmon and steelhead.

ADDRESSES: Copies of the PR/FES may be requested from the following:

- Regional Director, Bureau of Reclamation, Attention: PN–6309, Pacific Northwest Region, 1150 North Curtis Road, Boise, ID 83706–1234. Telephone (208) 378–5087.
- Secretary/Manager, Grants Pass Irrigation District, 200 Fruitdale Drive, Grants Pass OR 97527–5268. Telephone (503) 476–2582.
- Area Manager, Bureau of Reclamation, Lower Columbia Area Office, 1503 NE 78th, Suite 15, Vancouver, WA 98664. Telephone (206) 576–8858.

Copies of the PR/FES are available for inspection and review at the following locations:

- Josephine County Public Library, Grants Pass, Oregon.
- Medford Public Library, Medford, Oregon.
- Rogue River Public Library, Rogue River, Oregon.

SUPPLEMENTARY INFORMATION: The federally preferred plan proposes replacement of existing pumping and diversion facilities with two electrically-powered pumping plants, removal of the dam and appurtenant structures, and forgiveness of the remaining debt to the Federal Government. No significant changes have been made to the preferred plan as presented in the Bureau of Reclamation's planning report/draft environmental statement (DES 94–51).

The PR/FES presents the preferred plan, an alternative plan that retains the dam, and the no Federal action plan and describes the existing environment and environmental consequences of plan implementation. Comments received during the 90-day review of the PR/DES and Reclamation's responses are documented. It is Reclamation's intention to defer further action or recommendations until State of Oregon initiatives and recommendations regarding Savage Rapids Dam are completed. We anticipate that those questions will be resolved in mid-1996.

FOR FURTHER INFORMATION CONTACT: Bureau of Reclamation, Pacific Northwest Region, Attention: PN–6309, 1150 North Curtis Road, Boise, Idaho 83706–1234. Telephone (208) 378–5087.

Dated: August 18, 1995.

John W. Keys, III,

Regional Director, Pacific Northwest Region.

BILLING CODE 7035–01–P

[Finance Docket No. 32756]

Union Pacific Railroad Company and Burlington Northern Railroad Company—Joint Relocation Project Exemption—in Fort Collins, CO

On August 2, 1995, Union Pacific Railroad Company (UP) and Burlington Northern Railroad Company (BN) jointly filed a notice of exemption under 49 CFR 1180.2(d)(5) to relocate a line of railroad over the BN in Fort Collins, Larimer County, CO. The proposed transaction was expected to be consummated on, or soon after August 9, 1995.

UP and BN are class I rail carriers that own and operate separate lines of railroad in and near the City of Fort Collins, CO. UP's tracks are located on its line of railroad known as the Fort Collins Branch which extends from LaSalle, CO westward to Fort Collins. Also, LaSalle at milepost 47.2, is a station on UP's mainline known as the Greeley Branch, which is generally a north-south route.

The rail lines located at Fort Collins between Mulberry Street and Lemay Avenue, are the subject of this joint relocation project. Both BN and UP have rail lines that extend past Mulberry Street to other points in Fort Collins and past Lemay Avenue, the BN line extending to Greeley, CO and the UP line extending to LaSalle.

Under the joint relocation project, UP and BN propose the following transactions: (1) BN will grant UP overhead trackage rights over BN's track between BN mileposts 75.48, near Mulberry Street, and BN milepost 76.04, near Lemay Avenue, a distance of 0.56 mile at Fort Collins; (2) UP's incidental abandonment and discontinuance of operation over a segment of UP's Fort Collins branch line between milepost 31.23, near Mulberry Street, and milepost 30.66, near Lemay Avenue, at Fort Collins, a distance of approximately 0.57 mile; and (3) the incidental construction of connecting tracks between existing UP and BN rail lines. One of the connections is located near Mulberry Street and the other connection near Lemay Avenue. The portion of the track to be constructed is located on the respective parties' property. The notice states that construction of the connector tracks are an important part of the relocation in order for UP to operate the trackage rights over BN.

The line relocation project is to improve operational and maintenance practices for UP and BN, and will benefit the City of Fort Collins. UP's two road crossings at the major streets of Mulberry Street and Lemay Avenue will be eliminated.

UP and BN state that there are no UP rail stations on the segment of the line in the incidental abandonment, no new traffic will be generated by the proposed transaction and there will be no extension of rail service into new territory. The notice also states that there will be no adverse effect on shippers and no impact or change in the competitive situation of rail carriers in the area.

The Commission will exercise jurisdiction over the abandonment or construction components of a relocation project, and require separate approval or exemption, only where the removal of track affects service to shippers or the construction of new track involves expansion into new territory. *See City of Detroit* v. *Canadian National Ry. Co., et al.,* 9 I.C.C.2d 1208 (1993). The Commission has determined that line relocation projects may embrace trackage rights transactions such as the one involved here. *See D.T.&I.R.—Trackage Rights,* 363 I.C.C. 878 (1981). Under these standards, the embraced incidental abandonment, construction, and trackage rights components require no separate approval or exemption when the relocation project, as here, will not disrupt service to shippers and thus qualifies for the class exemption at 49 CFR 1180.2(d)(5).

As a condition to the use of this exemption, any employees affected by the trackage rights agreement will be protected by the conditions imposed in *Norfolk and Western Ry. Co.—Trackage Rights—BN,* 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate,* 360 I.C.C. 653 (1980).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Joseph D. Anthofer, 1416 Dodge Street, Room 830, Omaha, NE 68179.

Decided: August 28, 1995.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

NATIONAL COMMUNICATIONS SYSTEM

Industry Executive Subcommittee of the National Security Telecommunications Advisory Committee

AGENCY: National Communications Systems (NCS), Joint Secretariat.

ACTION: Notice of meeting.

SUMMARY: A meeting of the Industry Executive Subcommittee of the National Security Telecommunications Advisory Committee will be held on Friday, September 22, 1995, from 9 a.m. to 3 p.m. The meeting will be held at the Mitre-Hayes Building, 7525 Colshire Dr., McLean VA 27006. The agenda is as follows:.

A. Call to Order/Welcoming Remarks.

B. National Information Infrastructure Task Force.

C. Wireless Services Task Force.

D. Legislative & Regulatory Working Group.

E. Information Assurance Task Force.

F. Network Security Group.

Due to the requirement to discuss classified information, in conjunction with the issues listed above, the meeting will be closed to the public in the interest of National Defense.

FOR FURTHER INFORMATION CONTACT: Telephone (703) 607–6221 or write the Manager, National Communications System, 701 S. Court House Rd., Arlington, VA 22204–2198.

Dennis Bodson,

Assistant Manager, Technology and Standards.

NATIONAL SCIENCE FOUNDATION

Collection of Information Submitted for OMB Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, the National Science Foundation is posting an expedited notice of information collection that will affect the public. Interested persons are invited to submit comments by September 15, 1995. Copies of materials may be obtained at the NSF address or telephone number shown below.

(A) *Agency Clearance Officer.* Herman G. Fleming, Division of Contracts, Policy, and Oversight, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230, or by telephone (703) 306–1243. Comments may also be submitted to:

(B) *OMB Desk Officer.* Office of Information and Regulatory Affairs, ATTN: Jonathan Winer, Desk Officer, OMB, 722 Jackson Place, Room 3208, NEOB, Washington, DC 20503.

Title: Customer Service Satisfaction by Sponsored Research Offices at Academic Institutions.

Affected Public: Not-for-profit institutions.

Respondents/Reporting Burden: 150 respondents, 75 total burden hours.

Abstract: Purpose of the survey is to obtain views of officials in sponsored research offices at academic institutions about their satisfaction with critical aspects of the NSF proposal and award process, in particular, timeliness and clarity of information about programs and processes and responsiveness in processing proposals and awards. Method of obtaining is an e-mail survey questionnaire to individuals on the NSF electronic grants bulletin board and request responses from individuals in sponsored research offices. The bulletin board reaches the sponsored research offices of about 350 universities and colleges, with which NSF does the bulk of its proposal and award business.

Dated: August 30, 1995.

Herman G. Fleming,

Reports Clearance Officer.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–424]

Georgia Power Company, et al. (Vogtle Electric Generating Plant, Unit 1); Exemption

I

Georgia Power Company, et al. (the licensee) is the holder of Facility Operating License No. NPR–68, which authorizes operation of the Vogtle Electric Generating Plant (VEGP), Unit 1. The license provides, among other things, that the licensee is subject to all rules, regulations, and orders of the Commission now or hereafter in effect.

The facility consists of a pressurized water reactor, VEGP Unit 1, at the licensee's site located near Waynesboro, Georgia.

II

Section III.D.1.(a) of Appendix J to 10 CFR Part 50 requires the performance of three Type A containment integrated leakage rate tests (ILRTs), at approximately equal intervals during each 10-year service period of the primary containment. The third test of each set shall be conducted when the plant is shutdown for the 10-year inservice inspection of the primary containment.

III

By letter dated May 12, 1995, as supplemented by letter dated June 6, 1995, the licensee requested temporary relief from the requirement to perform a set of three Type A tests at approximately equal intervals during each 10-year service period of the primary containment. The requested exemption would permit a one-time interval extension of the third Type A test by approximately 18 months (from the March, 1996, refueling outage, to the September, 1997, refueling outage) and would permit the third Type A test of the second 10-year inservice inspection period to not correspond with the end of the current American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code) inservice inspection interval.

The licensee's request cites the special circumstances of 10 CFR 50.12, paragraph (a)(2) (ii), (iii) and (vi) as the basis for the exemption. They point out that the existing Type B and C testing programs are not being modified by this request and will continue to effectively detect containment leakage caused by the degradation of active containment isolation components as well as containment penetrations. It has been the experience at Vogtle Unit 1 during the three Type A tests (one preoperational and two during the first 10 year inservice inspection period) conducted from 1986 to date, that any significant containment leakage paths are detected by the Type B and C testing. The Type A test results have only been confirmatory of the results of the Type B and C test results. Therefore, application of the regulation in this particular circumstance is not necessary to achieve the underlying purpose of the rule.

Additionally, the licensee stated that their exemption request meets the requirements of 10 CFR 50.12 for the following reasons:

10 CFR 50.12 Requirements

In accordance with 10 CFR 50.12, the Commission may grant an exemption to the requirements of the regulations of 10 CFR 50 if the exemption is authorized by law, will not present an undue risk to the public health and safety, is consistent with the common defense and security, and special circumstances are present.

The Requested Exemption is Authorized by Law

There is no known law that would be violated by the granting of the proposed exemption. 10 CFR 50.12 provides the basis for granting exemptions to the requirements of 10 CFR 50 regulations. The NRC has granted similar exemptions in the past. Therefore, the exemption is authorized by law.

The Requested Exemption Does Not Present an Undue Risk to the Public Health and Safety

10 CFR 50, Appendix J states that the purpose of the regulation is to assure that leakage through primary containment and systems and components penetrating containment does not exceed allowable values, as specified in the Technical Specifications or associated bases, and that proper maintenance and repair are performed throughout the service life of the containment boundary components. The ILRT history for VEGP, Unit 1 during the first 10 year service period inspection interval indicated that the containment structure has not experienced degradation. The NRC has conducted a detailed study of integrated leak rate tests performed from 1987 to 1993. That study, documented in draft NUREG–1493, determined that 97% of the leakage rate tests that exceed the acceptance criteria are identified by LLRT programs. The LLRT program at VEGP, Unit 1 has been successful in maintaining low Type B and C containment leakage. Since there has been no identified containment structural leakage, the

LLRT program has contributed to the successful ILRTs. Therefore, as shown in the NRC study and as indicated by the VEGP, Unit 1 containment performance history, postponing the ILRT by one refueling cycle remains consistent with the intent of the regulation and will not present an undue risk to the public health and safety.

The Requested Exemption Will Not Endanger the Common Defense and Security

GPC interprets the term "common defense and security" as referring principally to the safeguarding of special nuclear material, the absence of foreign control over the applicant, and the protection of restricted data. The granting of the requested exemption will not affect any of those matters, and thus, the granting of the exemption is consistent with the common defense and security of the United States.

Special Circumstances are Present Which Necessitate the Request for an Exemption to the Regulations of 10 CFR 50, Appendix J, Section III.A.5(b)(2)

The special circumstances of 10 CFR 50.12(a)(2) (ii), (iii), and (vi) apply to this requested exemption.

50.12(a)(2)(ii)—Application of the Regulation is Not Necessary to Achieve the Underlying Purpose of the Rule

The underlying purpose of 10 CFR 50, Appendix J will still be served if a third ILRT is not conducted during the first 10-year service period. Appendix J states that the leakage test requirements provide for periodic verification by tests of the leak tight integrity of the primary reactor containment. The Appendix further states that the purpose of the tests is to assure that leakage through the primary reactor containment shall not exceed the allowable leakage rate values as specified in the Technical Specifications or associated bases.

10 CFR 50, Appendix J, Section III.D.1(a) states that a set of three periodic tests shall be performed at approximately equal intervals during each 10-year period and that the third test shall be conducted when the plant is shut down for the 10-year plant inservice inspections. The proposed exemption would permit delaying of the scheduled Type A test and permit performance of the Type A test after the completion of the first 10-year inservice inspection interval in accordance with the schedule to be provided in the proposed revision to Appendix J. The methodology, acceptance criteria, and Technical Specifications leakage limits for performance of the Type A test will not change.

The testing history, structural capability of the containment, and the risk assessment discussed previously establish that 1) VEGP, Unit 1 has had acceptable containment leakage rate test results, 2) the structural integrity of containment is assured, and 3) there is negligible risk impact in changing the Type A test schedule on a one-time basis.

Thus, there is significant assurance that the extended interval between Type A tests in concert with the Type B and C testing continue to provide periodic verification of the leak tight integrity of the containment.

10 CFR 50.12(a)(2)(iii)—Compliance With the Regulation Would Result in Undue Hardship or Other Costs That Are Significantly in Excess of Those Contemplated When the Regulation Was Adapted

Postponing the ILRT for VEGP, Unit 1 will eliminate unnecessary testing without any reduction in plant safety. The ILRT typically requires two-to-three days to perform, with the possibility of significant extended time requirements. Outage activities are severely impacted during the preparation period prior to the ILRT and during the performance of the ILRT. A cost savings can be realized by a reduction in outage time, eliminating the impact of the ILRT on other outage activities, and direct costs related to obtaining equipment and services necessary for performance of the ILRT. This proposed exemption could result in a total cost benefit of about $1,100,000, by eliminating one ILRT.

10 CFR 50.12(a)(2)(vi)—Presence of Material Circumstances Not Considered When the Regulation Was Adopted

Certain material circumstances were not considered when the regulation was adopted. The benefit of time has provided experience and information that give a better perspective about containment integrity. Two important material circumstances are testing history and the development of probabilistic risk assessments (PRAs).

Since the promulgation of 10 CFR 50, Appendix J, in 1973, more than 20 years of nuclear power plant operating experience has been obtained. A review of industry data did not find any instances where a Type A test failed to meet Appendix J acceptance criteria as a result of a containment structural leak not due to initial fabrication or a plant modification. That operating history provides a significant indicator that containment structural integrity (passive structure) is not a significant safety concern.

Plant specific PRAs were not available in 1973, and therefore, were not considered when the regulation requiring compliance with Appendix J [10 CFR 50.54(o)] was adopted. Overall plant risk due to containment leakage is relatively small given the small probability of containment leakage itself. The predominant contributor to degraded containment integrity is the phenomenological effects of a severe accident, not pre-existing containment integrity conditions. An assessment of the risk impact in the exemption request indicates that there is no undue risk to the public health and safety as a result of the proposed scheduler extension of the Type A test.

There have been no modifications to the containment structure or liner that would impact the overall containment integrity and leak tightness.

IV

Section III.D.1.(a) of Appendix J to 10 CFR Part 50 states that a set of three Type A leakage rate tests shall be performed at approximately equal intervals during each 10-year service period.

The licensee proposes an exemption to this section which would provide a one-time interval extension for the Type A test by approximately 18 months. The Commission has determined that pursuant to 10 CFR 50.12(a)(1) this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission further determines that special circumstances as provided in 10 CFR 50.12(a)(2)(ii) are present justifying the exemption. Specifically, these circumstances are that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. The purpose of the tests is to assure that leakage through the primary reactor containment shall not exceed allowable leakage rate values. The staff has concluded, for the reasons set forth herein, that the purpose of the rule will continue to be achieved with the licensee's proposed exemption.

The NRC staff has reviewed the basis and supporting information provided by the licensee in the exemption request. The NRC staff has noted that the licensee has a good record of ensuring a leak-tight containment. All of the Type A tests have passed and the licensee has noted that the results of the Type A testing have been confirmatory of the Type B and C tests which will continue to be performed. The licensee will perform the general containment inspection although it is only required by Appendix J (Section V.A.) to be performed in conjunction with Type A tests. The NRC staff considers that these inspections, though limited in scope, provide an important added level of confidence in the continued integrity of the containment boundary.

The NRC staff has also made use of a draft staff report, NUREG–1493, which provides the technical jusification for the present Appendix J rulemaking effort which also includes a 10-year test interval for Type A tests. The integrated leakage rate test, or Type A test, measures overall containment leakage. However, operating experience with all types of containments used in this country demonstrates that essentially all containment leakage can be detected by local leakage rate tests (Type B and C). According to results given in NUREG–1493, out of 180 ILRT reports covering 110 individual reactors and approximately 770 years of operating history, only 5 ILRT failures were found which local leakage rate testing could not detect. This is 3% of all failures. This study agrees well with previous NRC staff studies which show that Type B and C testing can detect a very large percentage of containment leaks.

The Nuclear Management and Resources Council (NUMARC), now the Nuclear Energy Institute (NEI), collected and provided the NRC staff with summaries of data to asssist in the Appendix J rulemaking effort. NUMARC collected results of 144 ILRTs from 33 units; 23 ILRTs exceeded $1.0L_a$. Of these, only nine were not due to Type B or C leakage penalties. The NEI data also added another perspective. The NEI data show that in about one-third of the cases exceeding allowable leakage, the as-found leakage was less than $2L_a$; in one case the leakage was found to be approximately $2L_a$; in one case the as-found leakage was less than $3L_a$; one case approached $10L_a$; and in one case the leakage was found to be approximately $21L_a$. For about half of the failed ILRTs, the as-found leakage was not quantified. These data show that, for those ILRTs for which the leakage was quantified, the leakage values are small in comparison to the leakage value at which the risk to the public starts to increase over the value of risk corresponding to L_a (approximately $200L_a$, as discussed in NUREG–1493).

Based on generic and plant specific data, the NRC staff finds the basis for the licensee's proposed exemption to allow a one-time exemption to permit a schedular extension of one cycle for the performance of the Appendix Type A test to be acceptable.

Pursuant to 10 CFR 51.32, the Commission has determined that granting this Exemption will not have a significant impact on the environment (60 FR 44514).

This Exemption is effective upon issuance and shall expire at the completion of the 1997 refueling outage.

Dated at Rockville, Maryland, this 29th day of August 1995.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

OFFICE OF PERSONNEL MANAGEMENT

Federal Salary Council

AGENCY: Office of Personnel Management.

ACTION: Notice of meeting.

SUMMARY: According to the provisions of section 10 of the Federal Advisory Committee Act (P.L. 92–463), notice is hereby given that the forty-sixth meeting of the Federal Salary Council will be held at the time and place shown below. At the meeting the Council will continue discussing issues relating to locality-based comparability payments authorized by the Federal Employees Pay Comparability Act of 1990 (FEPCA). The meeting is open to the public.

DATES: September 28, 1995, at 10:00 a.m.

ADDRESSES: Office of Personnel Management, 1900 E Street NW., Room 7B09, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ruth O'Donnell, Chief, Salary System Division, Office of Personnel Management, 1900 E Street NW., Room 6H31, Washington, DC 20415–0001. Telephone number: (202) 606–2838.

For the President's Pay Agent

Lorraine A. Green,

Deputy Director.

RESOLUTION TRUST CORPORATION

Coastal Barrier Improvement Act; Property Availability; Clinton Woods, Passaic County, NJ, Chapel Farms, Talbot County, MD

AGENCY: Resolution Trust Corporation.

ACTION: Notice.

SUMMARY: Notice is hereby given that the properties known as Clinton Woods, located in West Milford, Passaic County, New Jersey, and Chapel Farms, located in Easton, Talbot County, Maryland, are affected by Section 10 of the Coastal Barrier Improvement Act of 1990 as specified below.

DATES: Written notice of serious interest to purchase or effect other transfer of all or any portion of these properties may be mailed or faxed to the RTC until December 4, 1995.

ADDRESSES: Copies of detailed descriptions of these properties, including maps, can be obtained from or are available for inspection by contacting the following person:

For the Clinton Woods property: Mr. Steve Kilduff, Resolution Trust Corporation, c/o RPC-Mitchell/Titus, Inc., 440 East Sweedsford Road, Suite 2000, Wayne, PA 19087, (610) 254–0400; Fax (610) 254–0363.

For the Chapel Farms property: Mr. Dan Hummer, Resolution Trust Corporation, Atlanta Field Office, 245 Peachtree Center Avenue, NE, Marquis One Tower, 10th Floor, Atlanta, GA 30303, (404) 230–6594; Fax (404) 230–8159.

SUPPLEMENTARY INFORMATION: The Clinton Woods property is located in the northern portion of Passaic County, approximately 2 miles northeast of the Town of West Milford and is situated east of Brook Road, south of Lookover Drive and Mount Laurel Lake. The site consists of approximately 90.9 acres of undeveloped land and contains wetlands. This property is adjacent to Wawayanda State Park and the Bearfort Mountain Natural Area, both of which are managed by the State of New Jersey for recreational and natural resource conservation purposes.

The Chapel Farms property is located in Easton, Maryland, and is accessible via Chapel Farms Drive and Laurel Street to the north or Plum Street to the west. The site has recreational value, contains wetlands, and consists of approximately 58.46 acres of undeveloped land with portions of the property being used for farming. This property is adjacent to a State-owned railroad right-of-way to be leased by the Town of Easton as a hiking and biking trail for recreational purposes. These properties are covered property within the meaning of Section 10 of the Coastal Barrier Improvement Act of 1990, P.L. 101–591 (12 U.S.C. 1441a–3).

Written notice of serious interest in the purchase or other transfer of all or any portion of these properties must be received on or before December 4, 1995. by the Resolution Trust Corporation at the appropriate address stated above.

Those entitles eligible to submit written notices of serious interest are:

1. Agencies or entities of the Federal government;
2. Agencies or entities of State or local government;
3. "Qualified organizations" pursuant to section 170(h)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 170(h)(3)).

Written notices of serious interest must be submitted in the following form:

Notice of Serious Interest

RE: [insert name of property]
Federal Register Publication Date:

[insert **Federal Register** publication date]

1. Entity name.
2. Declaration of eligibility to submit Notice under criteria set forth in the Coastal Barrier Improvement Act of 1990, P.L. 101–591, section 10(b)(2), (12 U.S.C. 1441a–3(b)(2)), including, for qualified organizations, a determination letter from the United States Internal Revenue Service regarding the organization's status under section 170(h)(3) of the U.S. Internal Revenue Code (26 U.S.C. 170(h)(3)).
3. Brief description of proposed terms of purchase or other offer for all or any

portion of the property (e.g., price, method of financing, expected closing date, etc.).

4. Declaration of entity that it intends to use the property for wildlife refuge, sanctuary, open space, recreational, historical, cultural, or natural resource conservation purposes (12 U.S.C. 1441a–3(b)(4)), as provided in a clear written description of the purpose(s) to which the property will be put and the location and acreage of the area covered by each purpose(s) including a declaration of entity that it will accept the placement, by the RTC, of an easement or deed restriction on the property consistent with its intended conservation use(s) as stated in its notice of serious interest.

5. Authorized Representative (Name/Address/Telephone/Fax).

List of Subjects: Environmental protection.

Dated: August 29, 1995.

Resolution Trust Corporation.

BILLING CODE 6714-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–36162; File No. SR–OCC–95–02]

Self-Regulatory Organizations; The Options Clearing Corporation; Order Approving a Proposed Rule Change Making the Stock Loan/Hedge Program Available to Market-Maker and Specialist Accounts Established and Maintained by Clearing Members

August 29, 1995.

On January 13, 1995, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") a proposed rule change (File No. SR–OCC–95–02) pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act").[1] Notice of the proposal was published in the **Federal Register** on April 11, 1995.[2] No comment letters were received. For the reasons discussed below, the Commission is approving the proposed rule change.

I. Description of the Proposal

The primary purpose of the proposed rule change is to make OCC's Stock Loan/Hedge Program [3] available to accounts established and maintained with OCC by clearing members for market-makers and specialists.[4] Pursuant to OCC's By-Laws and Rules regarding its Stock Loan/Hedge Program, clearing members are permitted to carry stock loan and borrow positions in market-maker accounts.[5] However, at the time OCC proposed its Stock Loan/Hedge Program, OCC was concerned that its market-maker agreements [6] did not adequately accommodate stock loans. Accordingly, in the original Stock/Loan Hedge filing OCC appended an Interpretation to Article XXI, section 5 of its By-Laws stating that OCC would not permit stock loan positions and stock borrow positions to be maintained in a market-maker's account unless the market-maker had entered into an account agreement authorizing stock loan positions and stock borrow positions to be maintained in the account. In addition, OCC stated in that filing that it intended to submit revised versions of the various forms of market-maker agreements to the Commission in a separate proposed rule change in the near future.

OCC has reviewed its current market-maker agreement forms and has concluded that the current forms do adequately accommodate the Stock Loan/Hedge Program. Section 1 of each market-maker agreement causes the market-maker and the clearing member to each agree that OCC has a lien "on all long positions, securities, margin and other funds and assets in the Account." OCC believes that stock loan and borrow positions are "securities, margin and other funds and assets" and accordingly has concluded that this language adequately establishes its rights with respect to stock loan and borrow positions carried in market-maker accounts.

In addition, OCC has concluded that section 3 of its market-maker agreements causes market-makers signing the agreement to authorize the clearing member to lend assets (*i.e.*, stock) in the account and to authorize OCC to rely on the terms on which the assets are loaned.[7] Therefore, OCC now believes that the Interpretation to Article XXI, section 5 of its By-Laws is unnecessary and proposes to delete the Interpretation.

II. Discussion

Section 17A(a)(1)(B) of the Act [8] sets forth Congress' finding that inefficient procedures for clearance and settlement impose unnecessary costs on investors and persons facilitating transactions by and acting on behalf of investors. Under Section 17A(a)(2),[9] Congress directs the Commission to use its authority to carry out the objectives set forth in section 17A(a)(1). As discussed below, the Commission believes that OCC's proposed rule change is consistent with the objectives established by Congress under the Act because it should remove inefficient procedures from the clearance and settlement system.

Stock loan positions for which the loaned stock is held for the account of

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] Securities Exchange Act Release No. 35567 (April 5, 1995), 60 FR 18433.

[3] For a description of OCC's Stock Loan/Hedge Program, refer to Securities Exchange Act Release No. 32638 (July 15, 1993), 58 FR 39264 (File No. SR–OCC–92–34) (order granting permanent approval of the Stock Loan/Hedge Program).

[4] Market-makers and specialists are collectively referred to in this order as "market-makers," and accounts established and maintained with OCC by clearing members for market-makers, including separate market-maker's or specialist's accounts, combined market-makers' or specialists' accounts, registered trader's accounts, and stock market-maker's or stock specialist's accounts (as described in Article VI, Section 3 of OCC's By-Laws) are collectively referred to in this order as "market-maker accounts."

[5] For examples of permitted stock loan and borrow positions, refer to OCC By-Laws Article XXI, section 5 stating that a stock loan position may not be maintained in a market-maker's account unless the loaned stock to which the stock loan position relates is held for the account of the market-maker; OCC Rule 601(c) setting out margin requirements for market-maker accounts in which stock loan and borrow positions are carried; and OCC Rules 2209 and 2210 describing the treatment of stock loan and borrow positions of a suspended clearing member, including stock loan and borrow positions carried in a market-maker's account.

[6] The term "market-maker agreements" is used in this order to refer collectively to the three forms of agreement for market-maker accounts (*i.e.*, separate market-maker's accounts, combined market-makers' accounts, and joint accounts).

[7] A stock loan is not the result of an "exchange transaction" for purposes of OCC's rules because it does not arise from a transaction on an exchange. Therefore, OCC was concerned that the language of section 1 of the market-maker agreements did not adequately accommodate stock loans because the language is limited to exchange transactions of market-makers for whom an account is established. However, a stock borrow or loan position is established by a lending clearing member or borrowing clearing member and not by a market-maker. As defined in Article I, section 1(S)(8), the term "stock borrow position" means the position of a borrowing clearing member with respect to a stock loan. In addition, in Article I, section 1(S)(11), the term "stock loan position" means the position of a lending clearing member with respect to a stock loan. A borrowing clearing member does not need any authorization from market-makers because the position is entirely the responsibility of the clearing member. Similarly, a stock loan position is entirely the responsibility of the lending clearing member. However, because a stock loan position in a market-maker account may arise only from a clearing member's lending of stock held for a market-maker for whom the account is carried (pursuant to Article XXI, section 5(d) of OCC's By-Laws), a lending clearing member does not need authority from a market-maker to permit the clearing member to lend the market-maker's stock, and OCC needs authority from the market-maker to rely upon the terms of the loan. As described in the text, OCC believes the current form of the market-maker agreements cause market-makers to provide this authority to both the clearing member and OCC.

[8] 15 U.S.C. 78q–1(a)(1)(B) (1988).

[9] 15 U.S.C. 78q–1(a)(2) (1988).

a customer other than a market-maker must be carried in the clearing member's customers' account. Stock loan positions for which the loaned stock is held for the account of a market-maker may be carried in the lending clearing member's customers' account or market-maker's account. Currently, stock loan and borrow positions may not be maintained in a market-maker's account unless the market-maker has entered into a market-maker's account agreement that specifically authorizes stock loan and borrow positions to be maintained in the account. Additionally, in the case of a combined market-makers' account, stock loan and borrow positions may not be maintained therein unless each market-maker that is a participant in the account has entered into an account agreement that specifically authorizes stock loan and borrow positions to be maintained in such an account. Because OCC has determined that its market-maker's account agreement does accommodate stock loans, OCC is proposing to amend its By-Laws and Rules to allow stock loan and borrow positions to be maintained in market-maker accounts without the execution of an additional agreement.

OCC continues to employ its monitoring and risk reduction procedures which are subject to Commission review and approval. Under the Stock Loan/Hedge Program, OCC has a lien and right of set off against stock loan and borrow positions, and the clearing members' margin requirements will reflect the increase or decrease in risk to OCC associated with stock loan and borrow positions. Open stock loan positions of clearing members will continue to be taken into account in calculating their stock clearing fund obligations. OCC's stock clearing fund is available to cover losses suffered by OCC as a result of the failure of a clearing member to perform any of its obligation to OCC with respect to stock loan and borrow positions.

OCC requires each participating clearing member to instruct OCC as to which accounts the stock loan and borrow positions are to be carried.[10] Clearing members may maintain stock loan positions in a customer's account, a market-maker's account, or a firm account. An instruction from a clearing member to OCC designating a customer's account or a market-maker's account as the account in which a stock loan position is to be carried will constitute a representation (1) that the loaned securities to which the stock loan position relates are carried for the account of a customer and that the hypothecation of such loaned stock to OCC does not contravene any provision of Commission Rules 8c–1 and 15c2–1 [11] and (2) that the lending of the securities is consistent with Commission Rule 15c3–3.[12]

Because OCC has assured itself that its market-maker agreements are adequate to accommodate the entry of market-makers into the Stock Loan/Hedge Program, the Commission believes that the removal of OCC's interpretation to its By-Laws that requires a market-maker to execute a separate agreement in order to participate in the Stock Loan/Hedge Program will expedite the process of a market-maker's entry into the program. Thus, the Commission believes that the rule change is consistent with Congress' objective under section 17A(a) (1) (B) of the Act [13] because it removes inefficient procedures for clearance and settlement thereby eliminating unnecessary costs on investors and persons facilitating transactions by and acting on behalf of investors. Additionally, the Commission believes OCC's proposal is consistent with section 17A(a) (2) (A) of the Act [14] because the Stock Loan/Hedge Program extends the availability of intermarket clearing facilities by further linking and coordinating the clearance and settlement of securities and securities options.

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposal is consistent with the requirements of section 17A(b) (3) (F) of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b) (2) of the Act, that the proposed rule change (File No. SR–OCC–95–02) be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[15]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

---

[10] Clearing members may submit standing instructions stating the account or accounts in which all of the clearing member's stock loan or borrow positions are to be carried.

[11] Rules 8c–1 and 15c2–1 (17 CFR 240.8c–1 and 240.15c2–1) prohibit the hypothecation and commingling of customer securities without first obtaining the written consent of each customer whose securities are to be hypothecated or commingled.

[12] Because Rule 15c3–3 (17 CFR 240.15c3–3) requires that a broker-dealer maintain possession or control of all customer fully-paid and excess margin securities, such securities can not be the subject of a stock loan. However, customer securities that the broker-dealer clearing member is permitted to lend may be the subject of a stock loan conducted through the Stock Loan/Hedge Program.

[Public Notice No. 2251]

Shipping Coordinating Committee; Subcommittee on Safety of Life at Sea; Working Group on Fire Protection; Meeting

The U.S. Safety of Life at Sea (SOLAS) Working Group on Fire Protection will conduct an open meeting on Tuesday, October 3, 1995 at 9:30 a.m. in Room 6319 at U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593. The purpose of the meeting is to discuss the outcome of the Fortieth Session of the International Maritime Organization's Sub-Committee on Fire Protection, held on July 17, 1995.

The meeting will focus on proposed amendments to SOLAS for the fire safety of commercial vessels. Specific discussion areas include: smoke and toxicity, closing mechanisms of fire doors, heat radiation through windows and glass partitions, sprinkler systems and fixed water spraying systems, emergency escape breathing devices, high speed craft, criteria for maximum fire loads, fire safety measures for deep fat cooking equipment, foam concentrates, phasing out of halons, interpretations to SOLAS 74, role of the human element in maritime casualties, safety of passenger submersible craft, smoke control and ventilation, fire safety aspects of composite materials used on board ships, and matters relating to tanker safety.

Members of the public may attend up to the seating capacity of the room. For further information regarding the meeting of the SOLAS Working Group on Fire Protection contact Mr. Jack Booth at (202) 267–2997.

Dated: August 24, 1995.

Charles A. Mast,

Chairman, Shipping Coordinating Committee.

[FR Doc. 95–21841 Filed 9–1–95; 8:45 am]

BILLING CODE 4710-07-M

[Public Notice No. 2250]

Shipping Coordinating Committee International Maritime Organization (IMO) Legal Committee; Meeting

The U.S. Shipping Coordinating Committee (SHC) will conduct an open meeting at 10 a.m., on Thursday, September 28, 1995, in Room 6319 of U.S. Coast Guard Headquarters, 2100

Second Street, SW., Washington, DC. The purpose of this meeting is to assist the United States Delegation in preparing for the eighth session of the Joint Intergovernmental Group of Experts on Maritime Liens and Mortgages (JIGE), to be held October 9–10, 1995, and the 73rd session of the International Maritime Organization (IMO) Legal Committee, to be held October 11–13, 1995. Public comment will also be sought at the meeting regarding the acceptability of the International Convention on Maritime Liens and Mortgages, 1993 (93 MLM Convention).

To facilitate the attendance of those participants who may be interested in only certain aspects of the public meeting, the first subject addressed will be the status of the JIGE negotiations to revise the International Convention on the Unification of Certain Rules Related to the Arrest of Seagoing Ships, 1952 (1952 Arrest Convention). The principal focus of the JIGE will be: (1) Expanding the list of maritime claims for which a vessel may be arrested; (2) whether personal liability of the owner is a prerequisite to arrest, particularly when the claim is secured by a maritime lien; (3) the obligation of contracting parties to recognize and permit enforcement of national maritime liens granted under Article 6 of the 93 MLM Convention; (4) whether the arresting court should decide the merits of the case; and (5) the extent to which the Convention should be applied to vessels of non-contracting States. The United States has not ratified the 1952 Arrest Convention. However, the interests of United States owners of foreign flag vessels, cargo owners, and maritime claimants may be affected by changes to the Convention.

The second major group of subjects, which will be considered at approximately 10:30 a.m., will be the agenda items set for discussion at the 73rd session of the Legal Committee. The first agenda item will be preparations for the upcoming diplomatic conference that will adopt the draft Convention on Liability and Compensation in Connection with the Carriage of Hazardous and Noxious Substances by Sea (HNS Convention) and the Protocol to amend the International Convention on Limitation of Liability for Maritime Claims (76 LLMC). Substantive agenda items for the 73rd session of the Legal Committee include consideration of a draft convention on offshore mobile craft, possible work on a draft convention on wreck removal, and consideration of a liability and compensation regime for bunker fuel incidents.

Last, at approximately 11:30 a.m., the public will be invited to comment on the acceptability of the 93 MLM Convention. In May 1993, the new Convention was adopted by delegations from sixty-five nations at a diplomatic conference convened under the joint auspices of the IMO and the United Nations Conference on Trade and Development (UNCTAD). The United States is not a signatory to the 93 MLM Convention, but the interests of United States shipowners and lienholders could be affected once the Convention enters into force abroad, particularly regarding ship financing and the recognition, priority, and extinction of maritime liens.

Members of the public are invited to attend the SHC meeting, up to the seating capacity of the room. For further information or to submit views concerning the subjects of discussion, contact either Captain David J. Kantor or Lieutenant Commander Steven D. Poulin, U.S. Coast Guard (G–LMI), 2100 Second Street, SW., Washington, DC 20593, telephone (202) 267–1527, telefax (202) 267–4496.

Dated: August 24, 1995.

Charles A. Mast,

Chairman, Shipping Coordinating Committee.

BILLING CODE 4710–07–M

[Public Notice No. 2248]

Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea and Associated Bodies Working Group on Stability and Load Lines and on Fishing Vessels Safety; Meeting

The Working Group on Stability and Load Lines and on Fishing Vessels Safety of the Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting at 1 p.m. on Tuesday, October 3, 1995, in room 4513, at U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001. This meeting will discuss the upcoming 40th Session of the Subcommittee on Stability and Load Lines and on Fishing Vessels Safety (SLF) and associated bodies of the International Maritime Organization (IMO) which will be held on Sept. 2–6, 1996, at the IMO Headquarters in London, England.

Items of discussion will include the following:

a. The role of human factors in marine casualties;

b. Harmonization of probabilistic damage stability provisions for all ship types;

c. Technical revisions to the 1966 Load Line Convention;

d. Probabilistic oil outflow;

e. Ro-ro passenger vessel safety.

Members of the public may attend this meeting up to the seating capacity of the room. Interested persons may seek information by writing: Mr. Paul Cojeen or Mr. William Hayden, U.S. Coast Guard Headquarters, Commandant (G–MMS–2), Room 1308, 2100 Second Street, SW., Washington, DC 20593–0001 or by calling: (202) 267–2988.

Dated: August 24, 1995.

Charles A. Mast,

Chairman, Shipping Coordinating Committee.

DEPARTMENT OF THE TREASURY

Customs Service

AES Satellite Broadcast

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Satellite Broadcast on the Automated Export System (AES).

SUPPLEMENTARY INFORMATION: On Thursday, September 7, 1995, from 2 to 3 p.m. EDT, there will be a satellite broadcast on the Automated Export System, what it is and what it does.

The broadcast includes interviews with members of the export trade community, partnership agencies and Customs field personnel. It will also include a roundtable discussion on the current status and future direction of AES. Participating in the roundtable discussion will be:

Michael Lane, Deputy Commissioner

Sharon Mazur, Director AES Development Team

Harvey Monk, Chief Foreign Trade Division, Bureau of the Census

Ray Pechacek, Texas Instruments

Dennis Murphy, District Director, Norfolk—(Moderator)

The broadcast will also include a dial-in question and answer session. An "800" number will be provided on screen during the broadcast for anyone interested in calling in to ask a question or to offer suggestions regarding AES.

Tune in to C band, Galaxy 4, Transponder 7, or Ku band, Galaxy 4, Transponder 12 to view the broadcast. Members of the trade are also welcome to view the broadcast on a space available basis at a local Customs office. Contact the nearest Customs District office for more information.

Dated: August 24, 1995.

Mary C. King,

Acting Director, AES Development Team

BILLING CODE 4820–02–P

Notice of Issuance of Final Determination Concerning Carddock Units

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of final determination.

SUMMARY: This document provides notice that Customs has issued a final determination concerning the country of origin of certain CardDock units which are being offered to the U.S. Air Force ("Air Force"), under a procurement designated under Air Force Solicitation No. F01620–94–R–A430. The final determination found that based upon the facts presented, the country of origin of CardDock units which are manufactured in the U.S. from U.S. and foreign components is the U.S.

DATES: The final determination was issued on August 21, 1995. Any party-at-interest, as defined at 19 CFR 177.22(d), may seek judicial review of this final determination within 30 days of September 5, 1995. A copy of the nonconfidential portions of this final determination will be published in the Customs Bulletin.

FOR FURTHER INFORMATION CONTACT: Anthony A. Tonucci, Attorney-Advisor, Office of Regulations and Rulings, (202) 482–7073.

SUPPLEMENTARY INFORMATION: Notice is hereby given that on August 21, 1995, pursuant to Subpart B of Part 177, Customs Regulations (19 CFR Part 177, Subpart B), Customs issued a final determination concerning the country of origin of certain CardDock units which are being offered to the Air Force, under a procurement designated under Air Force Solicitation No. F01620–94–R–A430. The U.S. Customs ruling number is HQ 559255. This final determination was issued at the request of one of the offerors under procedures set forth at 19 CFR 177 subpart B, which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2511–18). The final determination concluded that based upon the facts presented, ISA boards, frame assemblies and connector cables are substantially transformed in the U.S. as a result of being assembled with U.S. origin Bay Boards into CardDock units. Accordingly, the country of origin of the CardDock units is the U.S. This document gives notice pursuant to section 177.29, Customs Regulations, (19 CFR 177.29), of that final determination. Any party-at-interest, as defined at 19 CFR 177.22(d), may seek judicial review of this final determination within 30 days of September 5, 1995.

Dated: August 21, 1995.

Harvey B. Fox,

Director, Office of Regulations and Rulings.

BILLING CODE 4820–02–P

Notice to Test the Use of Reconciliation for Adjustments Made to the Price of Imported Merchandise by Related Party Companies under 26 U.S.C. 482

AGENCY: Customs Service, Department of the Treasury.

ACTION: Final notice.

SUMMARY: This notice announces Customs plan to conduct a test regarding the use of reconciliation for those related party importers which have reason to believe upward adjustments may be made to the price of imported merchandise for tax purposes pursuant to 26 U.S.C. 482. This notice invites public participation in the test, and sets out the eligibility requirements for voluntary participation in the testing of reconciliation, for this purpose, and describes the basis on which Customs will select participants.

DATES: The test will commence no earlier than October 1, 1995, and will run until December 31, 1996. To participate in this reconciliation test, the application must be filed and approved by Customs on or before October 1, 1995.

ADDRESSES: To be considered for voluntary participation in this test applications should be submitted to Mr. William F. Inch, Director, Office of Regulatory Audit, Office of Strategic Trade, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2311, Washington, DC 20229–0001.

FOR FURTHER INFORMATION CONTACT: Matthew Krimski 202–927–0411.

SUPPLEMENTARY INFORMATION:

Background

Section 1059A of the Internal Revenue Code

Section 1059A of the Internal Revenue Code provides that in related party transactions the amount of any costs—

(1) Which are taken into account in computing the basis or inventory cost of such property by the purchaser, and

(2) Which are also taken into account in computing the customs value of such property shall not, for purposes of computing such basis or inventory cost for purposes of this chapter, be greater than the amount of such costs taken into account in computing such customs value.

The legislative history of section 1059A indicates that Congress intended to preclude the "whipsaw" effect on U.S. revenue which occurs when a party is allowed to claim a price for "computing the customs value of such property by the purchaser" that is lower than the price claimed for tax purposes.

When section 1059A was enacted, Congress was aware that the Customs value statute recently had been amended to make price paid the critical cost factor taken into account by the Customs Service in valuing goods for duty purposes. The legislative history of section 1059A also indicates that Congress wanted section 1059A to address this situation by attempting to place a ceiling on "the amount of any (such) costs" that can be claimed for tax purposes. All of the applicable legislative reports indicate, without exception, that Congress intended that section 1059A would instill some uniformity on the amount of costs which may be claimed to the IRS for tax purposes by limiting the amount of such costs to the amount claimed to, and taken into account by, the Customs Service in computing the Customs value.

The legislative history did state that appropriate adjustments may be made in cases where customs pricing rules differ from appropriate tax rules—as, for example, with the inclusion or exclusion of freight charges. Finally, the history states section 1059A applies to transfer prices subject to section 482 of the Internal Revenue Code.

In July of 1994, the Internal Revenue Service (IRS) issued final regulations implementing 26 U.S.C. 482. The IRS subsequently began considering whether and to what extent the 1059A regulations should be amended in the context of the new section 482 regulations. The section 482 regulations, specifically 26 CFR 1.482–1(a)(3), permits a controlled taxpayer, if necessary to reflect an "arm's length result," to "report on timely filed U.S. income tax return (including extensions) the results of its controlled transactions based upon prices different from those actually charged." The IRS is considering whether the 1059A regulations should be amended to allow the taxpayer, under appropriate circumstances, to make the upward section 482 adjustment.

This document announces a test that will facilitate the IRS/Customs decision as to whether reconciliation procedures provide a viable and appropriate circumstance for a taxpayer/importer to make a post entry upward adjustment to the price of imported merchandise.

Customs Value Law

For Customs purposes the appraised value of imported merchandise is determined pursuant to section 402 of the Tariff Act of 1930, as amended by the Trade Agreements Act (TAA) of 1979. Transaction value is the primary basis of appraisement. Transaction value is defined in section 402(b)(1) as the "price actually paid or payable for the merchandise when sold for exportation to the United States" plus specified statutory additions.

Pursuant to section 402(b)(2)(A)(iv) the transaction value of imported merchandise shall be the appraised value only if the buyer and seller are not related, or if the buyer and the seller are related, the transaction value is acceptable under 402(b)(2)(B). Section 402(b)(2)(B) provides that transaction value between a related buyer and seller is acceptable if the buyer demonstrates that the declared transaction value meets one of the following two tests: (1) Circumstances of the Sale or (2) Test Values.

The reconciliation test, announced in this document, is designed for participants that engage in related party transactions.

Related Party Transactions

Under section 402(g) of the TAA the following persons are treated as related:

(1) Members of the same family, including brothers and sisters (whether by whole or half blood), spouse, ancestors, and lineal descendants.

(2) Any officer or director of an organization and such organization.

(3) An officer or director of an organization and an officer or director of another organization, if each such individual is also an officer or director in the other organization.

(4) Partners.

(5) Employer and employee.

(6) Any person directly or indirectly owning, controlling, or holding with power to vote, 5 percent or more of the outstanding voting stock or shares of any organization and such organization.

(7) Two or more persons directly or indirectly controlling, controlled by, or under common control with, any person.

For purposes of 402(g)(G), the phrase "two or more persons directly or indirectly controlling, controlled by, or under common control with, any person" is understood to cover the following situations:

(1) Where one of them directly or indirectly controls the other;

(2) Where both of them are directly or indirectly controlled by a third person; or

(3) Where together they directly or indirectly control a third person.

For purposes of this test, Customs will consider the fact that the related party importer has reason to believe that an upward adjustment may be made to the price as evidence that the relationship may have affected the price actually paid or payable for the imported merchandise. Therefore, transaction value may not be acceptable.

Rather, the merchandise may be appraised under section 402(f). The appraised value pursuant to section 402(f) will be derived from the transaction value method. That is, the appraised value will be the price for the imported merchandise after the upward section 482 adjustment is undertaken by the importer/taxpayer plus the applicable statutory additions: Packing, selling commissions, assists, royalties/license fees and proceeds of subsequent resale. In order to participate in the test, the importer/taxpayer must agree that 402(f) is the proper basis of appraisement, in the event an upward section 482 adjustment is, in fact, claimed for tax purposes.

Title VI of the North American Free Trade Agreement Implementation Act

In order for the importer to comply with Customs value law, when making upward adjustments, a mechanism must be established that permits the importer to submit information related to the upward adjustment after the time of entry. Customs has determined that the reconciliation provisions of the North American Free Trade Agreement Implementation Act (the Act) create a possible vehicle permitting these circumstances. Specifically, Title VI of the Act, Public Law 103–182, 107 Stat. 2057 (December 8, 1993), contains provisions pertaining to Customs Modernization (107 Stat. 2170). Subtitle B of Title VI establishes the National Customs Automation Program (NCAP), an automated and electronic system for the processing of commercial importations. Section 637 in Subtitle B of the Act amends section 484 of the Tariff Act of 1930 by establishing a new subsection (b) entitled "Reconciliation". Reconciliation is a planned component of the NCAP. Section 631 of the Act authorizes tests of planned NCAP components. Section 101.9(b) of the Customs Regulations, provides the regulations governing the testing of NCAP components. See T.D. 95–21 (60 FR 14211, March 16, 1995). This test is established pursuant to those regulations.

Reconciliation

Reconciliation will allow an importer to provide Customs with information not available at the time of entry summary filing and which is necessary to ascertain the final classification and appraisement of imported merchandise. The reconciliation must be filed no later than 15 months from the date of the first entry summary filed under that reconciliation.

A reconciliation permits the liquidation of an entry summary/summaries despite the fact that undetermined information will be transmitted to Customs at a later time through the reconciliation process. Assuming there are no other outstanding issues, the entry summaries will be liquidated for all purposes other than that which is identified by the importer as pending reconciliation. The reconciliation will be liquidated in accordance with 19 U.S.C. 1500. The liquidation of the reconciliation may be protested, in accordance with 19 U.S.C. 1514, but the protest may only pertain to issues covered by the liquidated reconciliation.

A draft notice was published requesting comments from interested parties on July 5, 1995. We received ten comments and the following is Customs analysis and response to those comments.

Discussion of Comments

Bond Requirement

Comment: The commenter, a surety company, states that language should be added to clearly define the bond requirements for the reconciliation entry.

Customs Response: All entries which are pending reconciliation must be secured by a continuous bond. Customs will allow only one surety for all entries under the reconciliation. If a participant changes sureties during the reconciliation period, Customs must be notified before the change is actually made. No additional entries will be added to the first reconciliation, and a new reconciliation entry will be initiated. In this situation, Customs will issue a separate reconciliation entry number for the future entries to be filed during the remainder of the reconciliation period. Both reconciliation summaries will be due at the close of the reconciliation period.

A separate bond will not be required for the reconciliation entry. The continuous bond on the subject entries will provide coverage for the

reconciliation entry. The Basic Importation and Entry Bond Conditions under 19 CFR 113.62 provide for an agreement of the principal and surety to pay, as demanded by Customs, all additional duties, taxes, and charges subsequently found due, legally fixed, and imposed on any entry secured by the bond. The bond conditions as prescribed by regulation also provide for agreement by the principal to file within the time and in the manner prescribed by law and regulation, documentation to enable Customs to properly assess duties on the merchandise, collect accurate statistics with respect to the merchandise, and determine whether applicable law and regulation are met.

Bond Sufficiency

Comment: The commenter, a surety company, is concerned that a continuous bond may not adequately cover the amount due on the reconciliation entry.

Customs Response: For purposes of this test, Customs believes the continuous bond for the entry summaries will adequately cover the amount due on the reconciliation entry. Customs will monitor each reconciliation individually and should additional coverage be deemed necessary, it will be requested. Customs is conducting research into bond sufficiency from the standpoint of the Chief Financial Officers Act, with respect to all programs under the Mod Act.

Notice to Sureties

Comment: The commenter, a surety company, states that Customs must notify the surety bonding the entries subject to reconciliation that the importer is using reconciliation. Accordingly, the commenter suggests that Customs advises the surety, electronically if possible, as to which entries are subject to reconciliation as well as the specific issue pending reconciliation.

Customs Response: Upon acceptance into this reconciliation prototype, Customs will issue a confirmation letter to the participant. This letter will provide the reconciliation entry number which is to be utilized. In this document, Customs will also confirm that all entries filed on behalf of the applicant, within the designated time frame, meeting the scope as defined by the applicant, will be subject to reconciliation of the entered value pending upward adjustments in accordance with 26 U.S.C. 482. A courtesy copy of this confirmation letter will be sent to the surety company, which is designated in the application. This will serve as the notice to the surety that all entries filed within the designated time frame, meeting the scope as defined by the applicant, will be subject to reconciliation of the entered value. The value element on the subject entries will be liquidated on the reconciliation entry.

Identification of Reconciliation

Comment: The commenter, a surety company, asks how Customs will identify such reconciliation.

Customs Response: Each reconciliation will be identified by a separate entry number issued by Customs.

Scope of Reconciliation

Comment: The commenter, a surety company, is concerned that Customs will be withholding liquidation pending reconciliation of the valuation on all entries filed by the applicant, when in fact, not all merchandise on those entries may be subject to the possible upward adjustment.

Customs Response: For the purposes of this reconciliation prototype, the importer is required to provide, in the application, the scope of the reconciliation. The scope will be defined in the application to include the importer, filer, surety, merchandise (by Harmonized Tariff Schedule number) which will be subject to the reconciliation, and reconciliation time frame (October 1, 1995 through March 31, 1996, or the end of their tax year, whichever comes first). During the reconciliation period, the entered value, with respect to upward 482 adjustments, on the entries meeting the designated scope criteria will be held open pending the reconciliation.

Liquidation

Comment: The commenter, a surety company, requests information regarding the liquidation of the reconciliation.

Customs Response: The reconciliation is an entry, identified by entry type 09. The reconciliation will permit the liquidation of the entries despite the fact that the undetermined value information will be provided to Customs at a later time. Upon liquidation of the entries, any Customs decision entering into that liquidation, e.g., classification, may be protested pursuant to 19 U.S.C. 1514. When the value information is provided in the reconciliation, the reconciliation will be treated as an entry and liquidated. The liquidation of the reconciliation may also be protested but the protest may only pertain to elements contained in the liquidated reconciliation, i.e., the protest may not re-visit elements previously liquidated in the entries.

Customs will take action to liquidate all reconciliation entries filed pursuant to this prototype, and extend the liquidation if necessary. Should the reconciliation NOT be filed, the importer will be subject to liquidated damages as the terms of the bond have been breached. In such a case, Customs will analyze the individual situation and liquidate the reconciliation appropriately.

Possible Abuse of Reconciliation

Comment: The commenter, a surety company, states that Customs should limit the number of reconciliations an importer can use, so as to avoid separate reconciliations for each issue for each entry.

Customs Response: For the purposes of this test, the only element open for reconciliation is valuation, specifically an adjustment to the price made to comply with 26 U.S.C. 482. Customs will be able to adequately monitor the amount of reconciliations requested through the application process. The intent of the reconciliation is to link all entries with common, undetermined value information to one reconciliation entry.

Expansion to Include Downward Adjustments

Comment: The test should be expanded to include both upward and downward adjustments.

Customs Response: This test is designed to address a specific issue identified by the Internal Revenue Service. That is, if an importer must make an upward adjustment to its transfer price in order to comply with 26 U.S.C. 482, section 1059A acts as a bar to such adjustment if the lower price was declared to Customs. The section 1059A bar does not apply to situations in which the importer contemplates making a downward adjustment to the price. Given the restricted scope of the test, Customs has concluded that the test will continue to be limited to importers that contemplate making an upward adjustment to their transfer prices to comply with 26 U.S.C. 482. However, Customs is analyzing whether downward adjustments to prices can and should be addressed in future reconciliation tests.

Bases of Appraisement

Comment: There is no reason why section 1401a(a)(I)(f) must be the applicable basis of appraisement in the proposed test.

Customs Response: As was stated in the initial notice, Customs considers the fact that the related party importer has reason to believe that an upward adjustment may be made to the price of the imported merchandise as evidence that the relationship may have affected the price actually paid or payable for the merchandise. Therefore, transaction value will not be considered to be the proper basis of appraisement. The importer continues to have the right to have the hierarchy of appraisement applied to its transactions. However, if the importer claims another basis of appraisement, such as deductive value, then the importer will not be able to participate in the proposed test. This is due to the fact that the test is designed to determine how Customs can use the prices that the importer paid to the seller and the upward adjustments to those prices by using reconciliation. If a basis of appraisement is used that does not use these adjusted prices then the information is meaningless, for purposes of this test. Appraisement under section 402(f) of the Tariff Act of 1930, as amended by the Trade Agreements Act of 1979 allows Customs to utilize the importer's information on the price it paid, and to reasonably appraise the merchandise using that information.

Providing Customs With IRS Form 5472

Comment: One commenter responded with a suggestion that the Internal Revenue Service routinely provide the U.S. Customs Service with the IRS Form 5472 which requests information on import transactions and the related party status of the exporter/importer. The information on the Form 5472 would identify differences between the basis or inventory costs of imported goods as carried for IRS purposes and the Customs value of the imported goods. If such differences did exist, IRS Form 5472 requires an explanation for such differences and if supporting documentation exists in the United States.

Customs Response: Under existing IRS confidentiality statutes, the routine transfer of IRS information to the U.S. Customs Service is prohibited. Only in cases where the Customs Service has a Customs Regulatory Audit planned or in progress, can Customs request certain specific information from the IRS and only in cases when the importer has refused to provide the information voluntarily. The existing provisions for these transfers are contained in Public Law 103–182 passed December 8, 1993.

Description of Test

This test will be limited to participants who meet the eligibility criteria set forth below. It will cover entry summaries filed by those participants from October 1, 1995 to March 31, 1996 or the end of the participant's tax year, whichever comes first. Each reconciliation is limited to one importer/filer/surety combination.

By statute, reconciliation must be filed within 15 months of the entry summary. The reconciliation entry (i.e. the intent to file the reconciliation) is considered filed when the application is submitted to Customs. For purposes of this test, participants must file the reconciliation summary, which provides the outstanding value information, within 15 months of the filing of the first affected entry summary or by December 31, 1996, whichever comes first. All reconciliation entries will be filed to the attention of Matthew Krimski, Office of Regulatory Audit, Office of Strategic Trade, U.S. Customs Service, 1301 Constitution Avenue, NW, Washington, DC 20229. Customs will advise participants where additional duties resulting from the reconciliation are to be tendered.

All entries which are pending reconciliation must be secured by a continuous bond. Customs will allow only one surety for all entries under the reconciliation. If a participant changes sureties during the reconciliation period, Customs must be notified before the change actually is made. No additional entries will be added to the first reconciliation, and a new reconciliation entry will be initiated. In this situation, Customs will issue a separate reconciliation entry number for the future entries to be filed during the remainder of the reconciliation period. Both reconciliation summaries will be due at the close of the reconciliation period.

The continuous bond on the subject entries will provide coverage for the reconciliation entry. The Basic Importation and Entry Bond Conditions under 19 CFR 113.2 provide for an agreement of the principal and surety to pay as demanded by Customs all additional duties, taxes, and charges subsequently found due, legally fixed and imposed on any entry secured by the bond. The bond conditions as prescribed by regulation also provide for agreement by the principal to file within the time and in the manner prescribed by law and regulation, documentation to enable Customs to properly assess duties on the merchandise, collect accurate statistics with respect to the merchandise and determine whether applicable law and regulation are met.

The reconciliation is an entry identified by entry type 09. The reconciliation will permit the liquidation of the entries despite the fact that the undetermined value information will be provided to Customs at a later time. Upon liquidation of the entries, any Customs decision entering into liquidation e.g. classification, may be protested pursuant to 19 U.S.C. 1514. When the value information is provided in the reconciliation, the reconciliation will be treated as an entry and liquidated. The liquidation of the reconciliation also may be protested, but the protest may only pertain to elements contained in the liquidated reconciliation, i.e. the protest may not re-visit elements previously liquidated in the entry.

Note: In those cases in which the Harmonized Tariff Schedule (HTS) classification is determined by the unit value, the classification for those commodities also will be held open pending the reconciliation.

Customs will take action to liquidate all reconciliation entries filed pursuant to this prototype and extend the liquidation if necessary. Should the reconciliation not be filed, the importer will be subject to liquidation damages as the terms of the bond have been breached. In such cases, Customs will analyze the individual situation and liquidate the reconciliation appropriately.

Application

Applications will be submitted to Mr. William F. Inch, Director, Office of Regulatory Audit, United States Customs Service, 1301 Constitution Ave. NW., Room 2311, Washington, DC 20229–0001. All applicants will be notified in writing of approval or disapproval regarding test participation. All applicants who meet the eligibility criteria will be chosen to participate in this test. The application must address the ability to meet the eligibility requirements. The applicant must consent, in the application, to all the conditions set forth in the description of this test and eligibility criteria. The applicant must set forth in the application the date on which the applicant's tax year ends. The following information must be included in the application:

1. Importer and IR number;
2. Filer;
3. Surety;
4. Reconciliation Time frame (October 1, 1995 through end of tax year or March 31, 1996, whichever comes first;
5. Merchandise, by Harmonized Tariff Schedule number, impacted by the possible 482 adjustment;
6. Countries of origin of impacted merchandise; and
7. Ports of entry through which the subject merchandise will be imported during the reconciliation period.

By applying, applicants agree that the value for merchandise covered by all entry summaries filed by them or on their behalf on or after October 1, 1995 until the end of the tax year or March 31, 1996, whichever comes first, shall be finally determined by the liquidation of the reconciliation filed in accordance with the test. The Office of Regulatory Audit will review the application to determine that the applicant has met all eligibility requirements.

Documentation Required to Support Reconciliation

The approved participant shall maintain and produce upon Customs request all relevant documentation to support the change in the entered value. The reconciliation shall include the following information:

1. The entry numbers and entry dates, total entered value and ports of entry of all entries filed with Customs falling within the scope of the test.
2. Broken down by entry number, a cumulative list of units imported by classification number and the change (final entered value) to that entered value.
3. Proposed duty due pursuant to reconciliation.

In order to support the reconciliation, the approved applicant shall maintain and produce upon Customs request all relevant documentation to support the change in entered value. The approved applicant may be required to provide any or all of the following documentation:

1. The IRS Schedule M–1, and the Form 1120 Corporate Tax Return.
2. Any and all other supporting documentation filed along with the M–1 and the Form 1120 that was furnished to the IRS.
3. Any or all IRS documents or communications with the participant regarding the relevant 482 adjustment.
4. Any and all documentation including any books and records or computerized data to relate the 482 adjustment to the entries filed with Customs.

Such information and supporting material should be provided in a format or electronic media commonly in use. Examples are an IBM compatible computer 3.5 disk utilizing a software product such as Access or Excel or other similar spreadsheet or database application such as Lotus 1, 2, 3.

Verification

Customs Regulatory Audit, in conjunction with other Customs disciplines, will determine if any verification effort is necessary to establish the accuracy of the details submitted. The extent of the verification will be determined by Regulatory Audit, and if an audit is required, established Regulatory Audit procedures will be followed.

Eligibility Criteria

In order to qualify for this test of reconciliation, importers must have reason to believe they may invoke the IRS regulations to make upward adjustments to the price of the imported merchandise. Importers must provide, on an entry-by-entry basis, the electronic entry of merchandise and the electronic entry summary of required information (ABI). Other requirements and conditions are as follows:

1. The test only applies to the related party transactions engaged in by participants who qualify under Internal Revenue Service Section 482 requirements to make upward adjustments and which are not subject to Antidumping/Countervailing Duty proceedings.
2. Participants' tax year must end between October 31, 1995 and March 31, 1996.
3. Customs decision to allow a company to participate in the test program will be made in consultation with the Internal Revenue Service.
4. Each participant must provide U.S. Customs with the methodology that will be used to arrive at the final price of the imported merchandise.
5. Each participant agrees that appraisement is under section 402(f) of the Tariff Act of 1930, as amended by the Trade Agreements Act of 1979, if, in fact, an upward section 482 adjustment is made for tax purposes.
6. Entries involving merchandise under this test will not be eligible for drawback.

Selectivity Criteria

The Office of Regulatory Audit, in conjunction with other Customs disciplines, will review the application to ensure the eligibility requirements are met. All applicants who meet the eligibility criteria will be allowed to participate, provided no other Customs office objects.

Objectives of the Test

The objectives of this test are:

1. To work with the trade community to further compliance in the value area regarding related party transactions.
2. To allow companies intending to make Internal Revenue Service Section 482 adjustments, which may ultimately result in an upward adjustment to the price for merchandise, the opportunity to reconcile their business operations regarding U.S. Customs and Internal Revenue Service requirements applicable to related party transactions.
3. To determine if reconciliation is a viable method to ensure a coordinated and consistent Customs response to Internal Revenue Section 482 adjustments which result in the upward adjustment of the Customs valuation under Section 1059A.
5. To test the type of information needed by Customs to process a reconciliation.

Test Evaluation Criteria

The criteria which will be used to evaluate whether or not reconciliation is a viable means to allow importers which make upward adjustments to the price of imported merchandise will be based on measurable outcomes which include:

1. The number of participants;
2. Customs resources expended to administer and monitor the program;
3. Customs resources expended to verify final reconciliation entry claims and the methodologies applied;
4. Amount of additional revenue collected;
5. Survey of participants on the conduct of the test and its effect on their business operations; and
6. IRS and Census satisfaction with the results of the test.

Dated: August 30, 1995.

Edward F. Kwas,

Assistant Commissioner, Office of Strategic Trade.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85–5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects in the exhibit, "Pandora's Box: Women in Classical Greece" (see list[1]) imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to loan agreements with the foreign lenders. I also determine that the temporary exhibition of the objects at the Walters Art Gallery, Baltimore, MD, from on or about November 5, 1995, to on or about January 7, 1996, and, at the Dallas Museum of Art, Dallas, TX, from on or about February 4, 1996, to on or about March 31, 1996, is in the national interest.

---

[1] A copy of this list may be obtained by contacting Ms. Carol Epstein of the Office of the General Counsel of USIA. The telephone number is 202/619–6981, and the address is Room 700, U.S. Information Agency, 301 4th Street, SW., Washington, DC 20547.

Public notice of this determination is ordered to be published in the **Federal Register**.

Dated: August 29, 1995.

Les Jin,

General Counsel.

Sunshine Act Meetings

Federal Register
Vol. 60, No. 171
Tuesday, September 5, 1995

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

ASSASSINATION RECORDS REVIEW BOARD

Government in the Sunshine Act Meeting Notice

SUMMARY: On August 30, 1995, at 2:45 p.m., the Assassination Records Review Board determined that it would need to hold an emergency meeting for the afternoon of the same day. The Review Board determined that it needed to take immediate action to withdraw from Presidential consideration its recommendations regarding the release of certain Federal Bureau of Investigation documents. The Review Board determined that discussion of and voting on the issue could not be delayed for seven days in order to give the public seven days notice of the meeting pursuant to the Government in the Sunshine Act. Thus, pursuant to 5 U.S.C. 552b(e)(1), a majority of the members of the Review Board voted by recorded vote to hold an emergency meeting on August 30, 1995. The Review Board is issuing this notice of the meeting at the earliest practicable time—on the same day that the Review Board is meeting—pursuant to the requirements of the Government in the Sunshine Act.

DATE: August 30, 1995.

PLACE: Assassination Records Review Board, 600 E Street, N.W., 2nd Floor, Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: Motion to withdraw from Presidential consideration the Review Board's recommendations regarding the release of certain Federal Bureau of Investigation documents.

CONTACT PERSON FOR MORE INFORMATION: Thomas Samoluk, Associate Director for Communications, 600 E Street, N.W., Second Floor, Washington, D.C. 20530. Telephone: (202) 724–0088. Fax: (202) 724–0457.

Dated: August 30, 1995.

David G. Marwell,

Executive Director.

Corrections

Federal Register
Vol. 60, No. 171
Tuesday, September 5, 1995

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

OFFICE OF MANAGEMENT AND BUDGET

5 CFR Part 1320

Controlling Paperwork Burdens on the Public; Regulatory Changes Reflecting Recodification of the Paperwork Reduction Act

Correction

In rule document 95–21235 beginning on page 44978 in the issue of Tuesday, August 29, 1995, make the following correction:

§ 1320.5 [Corrected]

Due to printing errors, page 44988 is being reprinted in its entirety as follows:

BILLING CODE 1505–01–D

(2)(i) the agency informs the potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

(ii) An agency shall provide the information described in paragraph (b)(2)(i) of this section in a manner that is reasonably calculated to inform the public.

(A) In the case of forms, questionnaires, instructions, and other written collections of information sent or made available to potential respondents (other than in an electronic format), the information described in paragraph (b)(2)(i) of this section is provided "in a manner that is reasonably calculated to inform the public" if the agency includes it either on the form, questionnaire or other collection of information, or in the instructions for such collection.

(B) in the case of forms, questionnaires, instructions, and other written collections of information sent or made available to potential respondents in an electronic format, the information described in paragraph (b)(2)(i) of this section is provided "in a manner that is reasonably calculated to inform the public" if the agency places the currently valid OMB control number in the instructions, near the title of the electronic collection instrument, or, for on-line applications, on the first screen viewed by the respondent.

(C) in the case of collections of information published in regulations, guidelines, and other issuances in the **Federal Register**, the information described in paragraph (b)(2)(i) of this section is provided "in a manner that is reasonably calculated to inform the public" if the agency publishes such information in the **Federal Register** (for example, in the case of a collection of information in a regulation, by publishing such information in the preamble or the regulatory text, or in a technical amendment to the regulation, or in a separate notice announcing OMB approval of the collection of information). In the case of a collection of information published in an issuance that is also included in the Code of Federal Regulations, publication of such information in the Code of Federal Regulations constitutes an alternative means of providing it "in a manner that is reasonably calculated to inform the public." In the case of a collection of information published in an issuance that is also included in the Code of Federal Regulations, OMB recommends for ease of future reference that, even where an agency has already provided such information "in a manner that is reasonably calculated to inform the public" by publishing it in the **Federal Register** as a separate notice or in the preamble for the final rule (rather than in the regulatory text for the final rule or in a technical amendment to the final rule), the agency also publish such information along with a table or codified section of OMB control numbers to be included in the Code of Federal Regulations (see § 1320.3(f)(3)).

(D) in other cases, and where OMB determines in advance in writing that special circumstances exist, to use other means that are reasonably calculated to inform the public of the information described in paragraph (b)(2)(i) of this section.

(c)(1) Agencies shall submit all collections of information, other than those contained in proposed rules published for public comment in the **Federal Register** or in current regulations that were published as final rules in the **Federal Register**, in accordance with the requirements in § 1320.10. Agencies shall submit collections of information contained in interim final rules or direct final rules in accordance with the requirements of § 1320.10.

(2) Agencies shall submit collections of information contained in proposed rules published for public comment in the **Federal Register** in accordance with the requirements in § 1320.11.

(3) Agencies shall submit collections of information contained in current regulations that were published as final rules in the **Federal Register** in accordance with the requirements in § 1320.12.

(4) Special rules for emergency processing of collections of information are set forth in § 1320.13.

(5) For purposes of time limits for OMB review of collections of information, any submission properly submitted and received by OMB after 12:00 noon will be deemed to have been received on the following business day.

(d)(1) To obtain OMB approval of a collection of information, an agency shall demonstrate that it has taken every reasonable step to ensure that the proposed collection of information:

(i) is the least burdensome necessary for the proper performance of the agency's functions to comply with legal requirements and achieve program objectives;

(ii) is not duplicative of information otherwise accessible to the agency; and

(iii) has practical utility. The agency shall also seek to minimize the cost to itself of collecting, processing, and using the information, but shall not do so by means of shifting disproportionate costs or burdens onto the public.

(2) Unless the agency is able to demonstrate, in its submission for OMB clearance, that such characteristic of the collection of information is necessary to satisfy statutory requirements or other substantial need, OMB will not approve a collection of information—

(i) requiring respondents to report information to the agency more often than quarterly;

(ii) requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;

(iii) requiring respondents to submit more than an original and two copies of any document;

(iv) requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records, for more than three years;

(v) in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;

(vi) requiring the use of a statistical data classification that has not been reviewed and approved by OMB;

(vii) that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or

(viii) requiring respondents to submit proprietary, trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.

(e) OMB shall determine whether the collection of information, as submitted by the agency, is necessary for the proper performance of the agency's functions. In making this determination, OMB will take into account the criteria set forth in paragraph (d) of this section, and will consider whether the burden of the collection of information is justified by its practical utility. In addition:

(1) OMB will consider necessary any collection of information specifically mandated by statute or court order, but will independently assess any collection of information to the extent that the agency exercises discretion in its implementation; and

(2) OMB will consider necessary any collection of information specifically required by an agency rule approved or not acted upon by OMB under § 1320.11 or § 1320.12, but will independently assess any such collection of

[Docket No. FR–3887–I–01]

RIN 2535–AA23

HUD Acquisition Regulation; Field Reorganization, Streamlining, and Simplification

AGENCY: Office of the Assistant Secretary for Administration, HUD.

ACTION: Interim rule and request for comments.

SUMMARY: This interim rule makes changes to the HUD Acquisition Regulation (HUDAR) required to implement: the Department's Field reorganization, particularly the establishment of the Administrative Service Centers; the Federal Acquisition Streamlining Act of 1994 (FASA); and Departmental efforts to streamline and simplify the procurement process.

DATES: Effective Date: October 5, 1995.

Comment due date: Comments on this interim rule must be submitted on or before November 6, 1995.

ADDRESSES: Send written comments to Rules Docket Clerk, Room 10276, U.S. Department of Housing and Urban Development, 451 Seventh St., SW, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Edward L. Girovasi, Jr., Director, Policy and Evaluation Division, Office of Procurement and Contracts, Room 5262, 451 Seventh Street, SW., Washington, DC 20410–3000 (voice (202) 708–0294, TDD (202) 708–1112). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

The uniform regulation for the procurement of supplies and services by Federal departments and agencies, the Federal Acquisition Regulation (FAR), was promulgated on September 19, 1983 (48 FR 42102). The FAR is codified in title 48, chapter 1, of the Code of Federal Regulations. HUD promulgated its regulation to implement the FAR on March 1, 1984 (49 FR 7696).

The HUDAR (title 48, chapter 24 of the Code of Federal Regulations) is prescribed by the Assistant Secretary for Administration under section 7(d) of the Department of HUD Act (42 U.S.C. 3535(d)); section 205(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c)); the Secretary's delegation effective October 9, 1985 (50 FR 42097); and the general authorization in FAR 1.301.

The purpose of this interim rule is to amend the HUDAR to update existing coverage with respect to the Department's structure and organizational responsibilities; to implement FASA (Pub. L. 103–355, approved October 13, 1994); and to streamline Departmental procurement practices.

The heading of HUDAR subpart 2401.6 is revised to read "Career Development, Contracting Authority, and Responsibilities".

HUDAR 2401.601–73 is retitled "Administrative Service Centers" and is revised to reflect HUD's current field structure and to eliminate content which duplicates published delegations of procurement authority.

HUDAR 2401.602–3 is revised to conform to the structure of FAR 1.602–3 and provide greater discretion to the HCA in handling ratifications.

HUDAR 2402.101 is revised to add definitions for the "accounting office", and the "best value" and "lowest-priced technically acceptable proposal" approaches to source selection; to correct the HCA designation for field procurements; to provide a more generic definition for "Legal Counsel"; to add the "General Counsel" to the list of "Primary Organization Heads"; and to clarify the definition of "Source Selection Official".

The heading of HUDAR Subpart 2404.8 is revised to read "Government Contract Files".

HUDAR 2404.805–1 is renumbered and retitled to conform to recent FAR changes, and the content is revised to grant the contracting officer greater discretion in managing the disposition of unsuccessful proposals.

HUDAR subpart 2405.3 and section 2405.301 are removed in their entirety. HUD's practices in synopsizing contract awards will conform to the FAR.

HUDAR 2406.304–70 is revised to establish an approval official (Director, Office of Procurement and Contracts) for field contracts at a level consistent with that required by FAR 6.304.

HUDAR 2406.304–71 is removed in its entirety. HUD's practices in reviewing and approving justifications for other than full and open competition will conform to the FAR.

HUDAR 2406.501 is revised to state that the Senior Procurement Executive will designate the Department's Competition Advocate by **Federal Register** notice and to authorize each HCA to appoint contracting activity-level competition advocates.

HUDAR Part 2413 is retitled to conform to the FAR.

HUDAR 2413.107 is redesignated as 2413.106–2 and retitled to conform to the FAR. The regulation text is unchanged.

HUDAR 2413.403 is redesignated as 2413.402 to conform to the FAR, and revised to remove an obsolete directive and add correct information regarding the operation of imprest funds.

HUDAR 2413.404 is redesignated as 2413.403 to conform to the FAR and the text is revised to avoid duplication of imprest fund transaction limits stated in the FAR.

HUDAR 2413.505–2 is redesignated as 2413.505–1(b) and retitled to conform to the FAR. Its text is revised to authorize the use of Form HUD–2542, Purchase Order and Payment Authorization, for any small purchase charged to the FHA Fund, and to remove information that is internal in nature.

HUDAR subpart 2413.6 and section 2413.601 are added to reference HUD's internal directive governing use of the Government-wide commercial credit card to make micro-purchases.

HUDAR 2414.406–4 is revised to clarify that the concurrence of counsel should be obtained at headquarters or the field, depending on the location of the contracting activity.

HUDAR 2415.407 is revised to separate the basic provision dealing with proposal content from those cases requiring cost and pricing data. When the latter are required, new Alternate I is prescribed for use. In addition, contracting officers are granted the latitude to adapt Alternate I or develop additional text to deal with situations when partial cost and pricing data may be needed as provided in FAR 15.804–6(a)(2).

HUDAR 2415.408 is removed because adequate coverage on issuing solicitations is contained in the FAR.

HUDAR 2415.411 and 2415.411–70 are removed in their entirety. The prescribed use of the Form HUD–4056, Abstract of Proposals, is an internal agency matter.

HUDAR subpart 2415.6 contains numerous revisions to simplify HUD's source selection practices. While each section change is explained in turn below, the general thrust of these revisions is to move to one procedure for the evaluation of proposals, and to clarify distinctions in procedures when using the "lowest-priced technically acceptable proposal" or "best value" approach to source selection.

HUDAR 2415.604 is revised to establish a single procedure for the

evaluation of proposals and to distinguish responsibility for the source selection decision under the two possible source selection approaches—"best value" or "lowest-priced technically acceptable proposal".

HUDAR 2415.605 is revised to require that each solicitation identify the source selection approach to be used in evaluating proposals, and to provide a distinction between the types of evaluation factors available for use.

HUDAR 2415.608 is revised to clarify procedural differences in the evaluation of proposals under the two possible source selection approaches, and to eliminate information adequately covered in the FAR.

HUDAR 2415.609 is removed. The content of this section was removed in an earlier HUDAR amendment; the section title was overlooked.

HUDAR 2415.611 is added to clarify requirements for documentation of the source selection decision.

HUDAR 2415.612 and 2415.612–70 are removed in their entirety. In order to streamline and expedite the procurement process, HUD will not use formal source selection procedures.

HUDAR 2415.613–70 is revised to clarify that the alternative procedures authorized by this section use the best value approach to source selection. That same section and 2415.613–72 are both revised to eliminate references to Source Evaluation Boards, a formal procedure that will no longer be used.

HUDAR Subpart 2416.3, Cost-Reimbursement Contracts, and sections 2416.301 and 2416.301–3 are removed in their entirety. Recent changes to the FAR to implement FASA eliminated the requirement for determinations and findings to support the selection of contract type.

HUDAR subpart 2426.1 is redesignated as subpart 2426.70 to conform to the FAR. Accordingly, HUDAR 2426.101, 2426.102, and 2426.103 are redesignated as 2426.701, 2426.702, and 2426.703 (the regulation text of the latter two sections is unchanged). HUDAR 2426.701 is revised to delete the list of ethnic groups designated as "Minority Business Enterprises", and instead rely on definitions established by the Small Business Administration pursuant to Section 8(d) of the Small Business Act.

HUDAR subpart 2426.2 and section 2426.201 are removed.

HUDAR Subpart 2428.2, Sureties, the heading of section 2428.204, and section 2428.204–70 are removed in their entirety. FAR 28.203–2 contains adequate information regarding the use of irrevocable letters of credit.

HUDAR 2429.101 is revised to conform the section title to the FAR and clarify that coordination with legal counsel may be at headquarters or in the field, depending on the location of the contracting activity.

HUDAR 2432.402, 2432.906 and 2432.908 are revised to correct references to HUD field components consistent with the Department's reorganization.

HUDAR 2436.602–2 and 2436.602–4 are revised to: authorize the appointment of non-voting advisors to architect-engineer evaluation boards; change appointment and selection authorities consistent with the Department's field reorganization; correct references to HUD's Standards of Conduct; and, clarify that referral of matters to legal counsel may occur at headquarters or in the field, as appropriate.

HUDAR 2437.205 is revised to remove the requirement for higher-level review of contracts for advisory and assistance services contracts consistent with recent changes to the FAR. In addition, the use of Form HUD–24003, GTR Performance Assessment (Final) is prescribed to document the utility of products or services delivered by the contractor, as required by FAR 37.205.

HUDAR 2452.215–70 is revised to separate the requirement for cost and pricing data from the basic provision concerning proposal content. A new Alternate I has been added to deal with situations when cost and pricing data are required, in conformance with recent FAR changes increasing the threshold for submission of cost and pricing data to $500,000.

HUDAR 2452.219–70 is revised to eliminate repetition and clarify the content of Alternate I.

HUDAR 2452.226–70 is revised to make a conforming change in a reference from 2426.103 to 2426.703, and to delete "Hasidic Jewish Americans" from the ethnic groups listed as "Minority Business Enterprises". Their inclusion was based on an improper application of the Minority Business Development Agency's regulations at 15 CFR 1400.1 which defines groups eligible for MBDA assistance. Those regulations do not establish eligibility for other Federal or Federally-funded programs.

HUDAR 2452.232–70 and 2452.232–71 are revised to allow discretion in their application and to correct the reference to field components in Alternate I to both clauses.

HUDAR 2453.213–71 is removed because Form HUD–24001, Order for Supplies or Services, is no longer in use.

HUDAR 2453.213–72 is renumbered as 2453.213–71 and is revised to authorize the use of Form HUD–2542, Purchase Order and Payment Authorization, for any small purchase charged to the FHA Fund.

HUDAR 2453.237–70 is added to define the use of Form HUD–24002, GTR Performance Assessment (Final), to document contractor performance and the utility of products or services delivered.

Other Matters

Paperwork Reduction Act

The Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520) requires that Federal agencies obtain approval from the Office of Management and Budget (OMB) before collecting information from 10 or more persons. There are no new information collection requirements contained in these amendments to the HUDAR. The OMB Approval Number is 2535–0091.

Justification for Interim Rulemaking

The Department has determined that this rule should be adopted without the delay occasioned by requiring prior notice and comment because the majority of the changes either: implement FAR revisions already in effect that must be followed by HUD contracting personnel immediately; or, simply correct references to HUD organizational components consistent with the Department's field reorganization. Since this interim rule only makes conforming and clarifying changes to existing provisions, prior notice and comment are unnecessary under 24 CFR Part 10.

Environmental Impact

In accordance with 40 CFR 1508.4 of the regulations of the Council on Environmental Quality and 24 CFR 50.20(k) of the HUD regulations, the policies and procedures contained in this rule relate only to the performance of accounting, auditing and fiscal functions and, therefore, are categorically excluded from the requirements of the National Environmental Policy Act.

Regulatory Flexibility Act

As required by section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities because it merely makes amendments to the Department's acquisition regulations that: simplify HUD's procurement process, revise internal HUD component references, and implement FAR revisions without adding additional requirements.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under Section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. The rule makes technical revisions and corrections to the agency's regulations. As a result, the rule is not subject to review under the Order.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule will not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The rule involves Departmental procurement procedures only.

Semiannual Agenda of Regulations

This rule was not listed in the Department's Semiannual Agenda of Regulations published on May 8, 1995 (60 FR 23368,) under Executive Order 12866 and the Regulatory Flexibility Act.

List of Subjects in 48 CFR Parts 2401, 2402, 2404, 2405, 2406, 2413, 2415, 2416, 2419, 2426, 2428, 2429, 2432, 2436, 2437, 2452 and 2453

Government procurement, HUD acquisition regulations.

Accordingly, title 48, Chapter 24 of the Code of Federal Regulations, is amended as follows:

PART 2401—FEDERAL ACQUISITION REGULATIONS SYSTEM

1. The authority citation for part 2401 continues to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

2. The heading of subpart 2401.6 is revised to read as follows:

Subpart 2401.6—Career Development, Contracting Authority, and Responsibilities

3. Section 2401.601–73 is revised to read as follows:

2401.601–73 Administrative Service Centers.

Procurement of supplies and services for HUD field components is accomplished at the three Administrative Service Centers, each of which has a Contracting Division. The ASC Contracting Division Director may redelegate contracting authority to qualified personnel within their service area jurisdiction, consistent with the Department's published delegations of procurement authority and 2401.603.

4. Section 2401.602–3 is revised to read as follows:

2401.602–3 Ratification of unauthorized commitments.

(b)(1) *Policy.* A request for ratification shall be sent to the Contracting Officer through the Head of the Contracting Activity (HCA). The request will include an explanation as to the need for the service, the reason why normal procurement procedures were not followed, to what extent price competition was received or the price otherwise justified, and, corrective management actions to avoid ratifications in the future. If the justification is adequate, the ratification will be signed by the Contracting Officer and forwarded to the HCA or designee for approval.

(b)(3) The HCA may delegate authority to approve ratifications below the simplified acquisition threshold to:

(i) Contracting division directors (Headquarters); or,

(ii) Contracting branch chiefs (Field).

(c)(5) Legal concurrence may be requested if there is a legal issue involved, e.g. the propriety of the funding source, appropriateness of the expense, etc.

PART 2402—DEFINITIONS OF WORDS AND TERMS

5. The authority citation for part 2402 continues to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

6. In § 2402.101, the definitions of *Head of Contracting Activity, Primary Organization Heads,* and *Source Selection Official* are revised, and the definitions of *Accounting Office, Best Value, Legal Counsel,* and *Lowest-Priced Technically Acceptable Proposal* are added in alphabetical order, to read as follows:

2402.101 Definitions.

Accounting Office means the Office of Finance and Accounting in headquarters or the Field Accounting Divisions in the field.

Best Value is an approach to source selection that considers the appropriate balance of technical merit, management capability, and cost/price factors in deciding which proposal offers the overall "best value" to the Government. A best value procurement permits the government to award a contract to an offeror with a higher price in order to obtain a better technical product or service with a lower risk that performance will be unsuccessful. The selection decision may be based on a determination of whether to tradeoff paying a higher price to obtain the added value of a particular proposal.

* * * * *

Head of Contracting Activity (HCA) is defined in accordance with the FAR. The following HUD officials are designated HCAs:

(1) Director, Office of Procurement and Contracts, for HUD Headquarters procurement;

(2) The Directors, Administrative Service Center Contracting Divisions for field procurement;

(3) The President, Government National Mortgage Association (GNMA), for procurement transactions that are conducted by GNMA in accordance with 2401.601–72(c).

Legal Counsel means the Office of General Counsel in Headquarters, or the cognizant Assistant General Counsel in the field.

Lowest-Priced Technically Acceptable Proposal is an approach to source selection under which all evaluation factors, except price, are evaluated on a "Pass-Fail" basis. It is used when price will be the deciding factor once the technical acceptability of proposals has been determined.

Primary Organization Heads are those officials of the Department who are responsible for the major organizational components of HUD and who report directly to the Secretary or Deputy Secretary. The Primary Organization Heads of HUD include: the Assistant Secretaries, the Inspector General, and the General Counsel.

* * * * *

Source Selection Official means the head of the office initiating and providing funding for the procurement, or his/her designee. This role may also be delegated to the contracting officer.

PART 2404—ADMINISTRATIVE MATTERS

7. The authority citation for part 2404 is revised to read as follows:

Authority: 42 U.S.C. 3535(d).

8. The heading of subpart 2404.8 is revised to read as follows:

Subpart 2404.8—Government Contract Files

9. Section 2404.805–1 is redesignated as 2404.805 and amended by revising the section heading and paragraph (a), to read as follows:

2404.805 Storage, handling and disposal of contract files.

(a) Unsuccessful cost and technical proposals shall be retained in the contracting activity for a period of two months following the contract award as reference material for debriefings. Upon expiration of the two month period, the contracting office shall either:

(1) Retain one copy of each such proposal with the official contract file; or,

(2) Ship one copy of each unsuccessful bid or proposal to the Federal Records Center unless a debriefing has been requested but not held, or a protest is pending concerning the procurement. In no event shall these documents be destroyed before expiration of the retention periods in FAR 4.805.

* * * * *

PART 2405—PUBLICIZING CONTRACT ACTIONS

10. The authority citation for part 2405 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 41 U.S.C. 253; 42 U.S.C. 3535(d); and FAR class deviation approved November 15, 1990.

Subpart 2405.3—[Removed]

11. and 12. Subpart 2405.3 *Synopses of Contract Awards* is removed.

PART 2406—COMPETITION REQUIREMENTS

13. The authority citation for part 2406 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 41 U.S.C. 253; 42 U.S.C. 3535(d).

14. Section 2406.304–70 is revised to read as follows:

2406.304–70 Approval of the justification—field procurements.

(a) The justification for other than full and open competition for field procurements shall be approved in writing—

(3) For a proposed contract more than $1 million but not exceeding $10 million, by the Director, Office of Procurement and Contracts.

2406.304–71 [Removed]

15. Section 2406.304–71 is removed.

16. Section 2406.501 is revised to read as follows:

2406.501 Requirement.

The Senior Procurement Executive shall designate the Department's competition advocate by **Federal Register** notice. Contracting activity-level competition advocates shall be appointed by each HCA.

PART 2413—SMALL PURCHASES AND OTHER SIMPLIFIED PURCHASING PROCEDURES

17. The authority citation for part 2413 continues to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

18. The heading of part 2413 is revised to read as follows:

PART 2413—SIMPLIFIED ACQUISITION PROCEDURES

2413.107 [Redesignated as 2413.106–2]

19. Section 2413.107 is redesignated as 2413.106–2 and revised to read as follows:

2413.106–2 Data to support purchases.

(d) Contracting officers may use Form HUD–24007, Purchase/Delivery Order Data File, to record all relevant data pertaining to a small purchase, including recording written and oral quotations received and documenting orders against GSA contracts.

2413.403 [Redesignated as 2413.402]

20. Section 2413.403 is redesignated as 2413.402 and revised to read as follows:

2413.402 Agency responsibilities.

(c) Policies and procedures governing the operation of imprest funds are established in internal directives issued by HUD's Office of the Chief Financial Officer.

2413.404 [Redesignated as 2413.403]

21. Section 2413.404 is redesignated as 2413.403 and revised to read as follows:

2413.403 Conditions for use.

(a) Transaction limits above that established in FAR 13.403(a) may be approved by the Senior Procurement Executive.

2413.505–2 [Redesignated as 2413.505–1]

22. Section 2413.505–2 is redesignated as 2413.505–1 and revised to read as follows:

2413.505–1 Optional Form (OF) 347, order for supplies and services, and Optional Form 348, order for supplies and services schedule-continuation.

(b) For small purchases charged to the FHA Fund, contracting officers may use Form HUD–2542, Purchase Order and Payment Authorization.

23. A new subpart 2413.6 and a new section 2413.601 are added to read as follows:

Subpart 2413.6—Micro-Purchase

2413.601 General.

(c) HUD's procedures concerning the use of the government-wide commercial purchase card are contained in its Handbook on the Government-wide Commercial Credit Card Program.

PART 2414—SEALED BIDDING

24. The authority citation for part 2414 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 41 U.S.C. 253; 42 U.S.C. 3535(d).

25. Section 2414.406–4 is revised to read as follows:

2414.406–4 Mistakes after award.

(d) For determinations under FAR 14.406–4(b)(1) and (2), the Head of the Contracting Activity will obtain the concurrence of legal counsel before notification to the Contractor. The Contracting Officer shall be notified promptly of action to be taken.

PART 2415—CONTRACTING BY NEGOTIATION

26. The authority citation for part 2415 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 41 U.S.C. 253; 42 U.S.C. 3535(d).

27. In section 2415.407, new paragraphs (b) and (c) are added, to read as follows:

2415.407 Solicitation provisions.

* * * * *

(b) The contracting officer shall use the language at Alternate I to request cost and pricing data when it is anticipated that a contract or subcontract resulting from this solicitation will exceed $500,000 in value. This language shall also be used for those instances when the contracting officer determines that full cost and pricing data are required pursuant to FAR 15.804–2(a)(3).

(c) In those instances when certified cost and pricing data are not required because an action is $500,000 or less, the contracting officer may request partial or limited data in order to determine a reasonable price (see FAR 15.804–6(a)(2)). The contracting officer shall request only that data which is considered necessary to determine a reasonable price. If partial or limited data is required, the contracting officer may adapt the content of Alternate I to suit the circumstances of the procurement, or develop additional text as required.

2415.408 [Removed]

28. Section 2415.408 is removed.

2415.411 [Removed]

29. Section 2415.411 is removed.

2415.411–70 [Removed]

30. Section 2415.411–70 is removed.

31. Section 2415.604 is revised to read as follows:

2415.604 Responsibilities.

(b) The technical requirements related to source selection shall be performed by a Technical Evaluation Panel (TEP). Generally, a TEP will consist of three to five voting members, with one member serving as the chairperson. For more complex procurements, the TEP may add advisors and/or a committee structure to focus on specific technical issues or concerns. For inexpensive or routine acquisitions of equipment, supplies or services, the TEP may consist of one technical representative. The TEP is responsible for documenting the evaluation of all proposals as appropriate to the source selection approach in use, and for making the source selection recommendation(s).

(c)(4) The selection of the source(s) for contract award shall be made by:

(i) The contracting officer for awards using the "lowest-priced technically-acceptable proposal" approach; or,

(ii) The Source Selection Official (SSO) for awards based on the "best value" approach.

32. Section 2415.605 is revised to read as follows:

2415.605 Evaluation factors.

(c) The solicitation shall state the basis for the source selection decision as either "lowest-priced technically-acceptable proposal" (LPTAP) or "best value" (see 2402.1, Definitions).

(e) When using the best value approach, each technical evaluation factor and subfactor shall be assigned a numerical weight (except for pass-fail factors) which shall appear in the RFP. When using LPTAP, each evaluation factor is applied on a "pass-fail" basis; numerical scores are not assigned. "Pass-Fail" evaluation factors define a standard of comparison for solicitation/contract requirements which proposals either completely satisfy or fail to meet.

33. In section 2415.608, paragraph (a) is revised to read as follows:

2415.608 Proposal evaluation.

(a) After receipt of proposals, the Contracting Officer will forward copies of the technical portion of each proposal to the TEP Chairperson or his or her designee. The cost/price portion of each proposal shall be retained by the Contracting Officer pending initial technical evaluation by the TEP.

(2) *Technical evaluation.* The TEP shall rate each proposal based on the evaluation factors specified in the solicitation. The TEP shall identify each proposal as being either acceptable, unacceptable but capable of being made acceptable, or unacceptable. A proposal shall be considered unacceptable if it is so clearly deficient that it cannot be corrected through written or oral discussions. Under the best value approach, predetermined cut-off scores designed to determine a threshold level of acceptability of proposals shall not be employed. However, under solicitations where mandatory requirements are established, those proposals that do not meet the mandatory requirements may be found unacceptable without further review.

(3) A technical evaluation report, which complies with FAR 15.608(a)(2), shall be prepared and signed by the technical evaluator(s), furnished to the contracting officer, and maintained as a permanent record in the official procurement file.

* * * * *

2415.609 [Removed]

34. Section 2415.609 is removed.

35. A new section 2415.611 is added to read as follows:

2415.611 Best and final offers.

(d) After receipt and evaluation of best and final offers, the TEP shall document its selection recommendation(s) in a final written report. The final report shall include sufficient information to support the recommendation(s) made, appropriate to the source selection approach and type and complexity of the acquisition.

2415.612 [Removed]

36. Section 2415.612 is removed.

2415.612–70 [Removed]

37. Section 2415.612–70 is removed.

38. In section 2415.613, paragraph (a) is revised to read as follows:

2415.613 Alternative source selection procedures.

(a) The Department of Housing and Urban Development uses procedures authorized by FAR 15.613 for all research and development contracts and other contracts where the contractor's proposed methodology of carrying out the work is a significant selection factor and the award decision will follow the best value approach.

* * * * *

39. Section 2415.613–70 is revised to read as follows:

2415.613–70 Technical evaluation.

The TEP shall perform the required technical evaluation of proposals received in accordance with 2415.608.

40. In section 2415.613–72, paragraph (a) is revised to read as follows:

2415.613–72 Selection and final negotiation.

(a) *Selection.* After the close of discussions and receipt of best and final offers, the TEP shall perform a final evaluation and prepare its selection recommendation for the SSO. Based on this evaluation, the SSO shall select for final contract negotiation the offeror(s) whose proposal is most advantageous to the Government in terms of price/cost, technical and other relevant factors included in the solicitation.

* * * * *

PART 2416—TYPES OF CONTRACTS

41. The authority citation for part 2416 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 41 U.S.C. 253; 42 U.S.C. 3535(d).

Subpart 2416.3—[Removed]

42–44. Subpart 2416.3—*Cost-Reimbursement Contracts* is removed.

PART 2426—OTHER SOCIOECONOMIC PROGRAMS

45. The authority citation for part 2426 continues to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

Subpart 2426.1—[Redesignated as Subpart 2426.70]

46. The heading, subpart 2426.1—*Minority Business Enterprises,* is redesignated as subpart 2426.70.

2426.101 [Removed]

47. Section 2426.101 is removed.

2426.102 [Removed]

48. Section 2426.102 is removed.

2426.103 [Removed]

49. Section 2426.103 is removed.

Subpart 2426.2—[Removed]

50–51. Subpart 2426.2—*Historically Black Colleges and Universities* is removed.

52. A new section 2426.701 is added, to read as follows:

2426.701 Policy.

It is the policy of the Department to foster and promote Minority Business Enterprise (MBE) participation in its procurement program, to the extent permitted by law and consistent with its primary mission. A "minority business enterprise" is a business which is at least 51 percent owned by one or more minority group members; or, in the case of a publicly-owned business, one in which at least 51 percent of its voting stock is owned by one or more minority group members, and whose management and daily business operations are controlled by one or more such individuals. For this purpose, minority group members are those groups of U.S. citizens found to be disadvantaged by the Small Business Administration pursuant to Section 8(d) of the Small Business Act.

53. A new section 2426.702 is added, to read as follows:

2426.702 Responsibility.

The Director of the Office of Small and Disadvantaged Business Utilization (OSDBU) develops Departmental MBE plans and policies in accordance with Executive Orders 11625 and 12432 and by directive from the Secretary. He or she provides advice and guidance to the Secretary and Primary Organization Heads on MBE functions, reviews and makes recommendations to the Secretary on MBE annual plans and goals, monitors and evaluates the Department's MBE program, and reports on MBE program performance to the Department of Commerce.

54. A new section 2426.703 is added, to read as follows:

2426.703 Solicitation provision.

Contracting officers shall request all interested contractors, bidders, or offerors (including those responding to requests for quotations) to complete the certification at 2452.226–70, Certification of Status as a Minority Business Enterprise. Completion of this certification is voluntary and is not a condition of eligibility for contract award.

PART 2428—BONDS AND INSURANCE

55. The authority citation for part 2428 continues to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

Subpart 2428.2—[Removed]

56.–58. Subpart 2428.2—*Sureties* is removed.

PART 2429—TAXES

59. The authority citation for part 2429 is revised to read as follows:

Authority: 42 U.S.C. 3535(d).

60. Section 2429.101 is revised to read as follows:

2429.101 Resolving tax problems.

In order to have uniformity in HUD's treatment of the tax aspects of contracting and ensure effective cooperation with other Government agencies on tax matters of mutual interest, the Office of General Counsel has the responsibility within HUD for handling all those tax problems. Therefore, the contracting activity will not engage in negotiation with any taxing authority for the purpose of determining the validity or applicability of, or obtaining exemptions from or refund of, any tax. When a problem exists, the Contracting Officer shall request, in writing, the assistance of legal counsel. The request shall detail the problem and be accompanied by appropriate backup data. Counsel shall report to the Contracting Officer as to the necessary disposition of the tax problem. The Contracting Officer will notify the contractor of the outcome of the tax problem. Counsel is responsible for communications with the Department of Justice for representation or intervention in proceedings concerning taxes.

PART 2432—CONTRACT FINANCING

61. The authority citation for part 2432 continues to read as follows:

Authority: 31 U.S.C. 3901–3906; 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

62. Section 2432.402 is revised to read as follows:

2432.402 General.

(e)(1) The Determination and Findings required by FAR 32.402(c)(1)(iii) shall be made by the Director, Office of Procurement and Contracts for Headquarters contracts, or the cognizant Director, Administrative Services Center Contracting Division for field contracts.

(2) Each advance payment situation shall be coordinated with the head of the cognizant accounting office, before authorization may be given, to ensure that there are controls in place to assure proper administration of advance payments.

63. Section 2432.906 is revised to read as follows:

2432.906 Contract financing payments.

Except for construction contracts (see FAR 52.232–27), periods for payment shorter than 30 days shall not be specified in contracts without the prior approval of the cognizant accounting office to ensure that procedures are in place to allow timely payment.

64. Section 2432.908 is revised to read as follows:

2432.908 Contract clauses.

(a) The Contracting Officer shall insert a clause substantially the same as provided at 2452.232–70, Payment Schedule and Invoice Submission (Fixed-Price), in all fixed-price solicitations and contracts. The clause with its Alternate I may be used for solicitations and contracts issued by the Administrative Service Centers.

(b) The Contracting Officer shall insert a clause substantially the same as provided at 2452.232–71, Voucher Submission (Cost-Reimbursement), in all cost-reimbursement solicitations and contracts when vouchers are to be sent directly to the paying office. The clause with its Alternate I may be used for solicitations and contracts issued by the Administrative Service Centers.

PART 2436—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

65. The authority citation for part 2436 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

66. In section 2436.602–2, paragraphs (a) introductory text, (a)(2), and (c) are revised, and paragraph (a)(3) is removed, to read as follows:

2436.602–2 Evaluation boards.

(a) Each architect-engineer evaluation board, whether permanent or ad hoc (which may include preselection boards), shall consist of at least three voting members who are Federal employees from the appropriate program area or from Federal offices outside the program area as appropriate. One member of each board shall be appointed chairperson. Non-voting advisors may also be appointed, including private practitioners in architecture, engineering and related professions. The members of a permanent board shall be appointed for a period of two years. Appointment shall be made by the following authorities with copies of appointment memoranda furnished to the appropriate contracting activity:

(1) * * *

(2) The cognizant program office head within the State or Area Office for boards appointed at the field level.

(c) *Conflict of interest.* Each board member, whether voting or nonvoting, shall be advised of, and presumed to be familiar with the regulations at 24 CFR Part 0, Standards of Conduct, regarding conflicts of interest. If at any time during the selection process a board member encounters a situation with one or more of the firms being considered that might be or might appear to be a conflict of interest, he or she will disqualify him or herself and call it to the attention of the chairperson for resolution and proper action. The chairperson will refer the matter to legal counsel.

* * * * *

67. Section 2436.602–4 is revised to read as follows:

2436.602–4 Selection authority.

(a) The final selection decision shall be made by the appropriate Primary Organization Head (Headquarters) or the appropriate program office head at the cognizant State or Area Office (Field).

PART 2437—SERVICE CONTRACTING

68. The authority citation for part 2437 continues to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

69. Section 2437.205 is revised to read as follows:

2437.205 Management controls.

Documentation of the contractor's performance and the utility of products or services delivered shall be recorded on Form HUD–24002, GTR Performance Assessment (Final) by the responsible Government Technical Representative. This form may also be used to document contractor performance on other contracts.

PART 2452—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

70. The authority citation for part 2452 continues to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

71. Section 2452.215–70 is revised to read as follows:

2452.215–70 Proposal content and outline.

As prescribed in 2415.407(a), insert the following solicitation provision in all negotiated solicitations over the small purchase limitation:

PROPOSAL CONTENT AND OUTLINE
(Insert Month, Year)

(a) Proposals shall be submitted in two separate parts as further described below and shall be enclosed in a sealed envelope and addressed to the office specified in the solicitation. The envelope must show the hour and date specified in the solicitation for receipt, the solicitation number, and the name and address of the offeror. Part I shall consist of the technical and management submittal of the proposed work. Part II shall consist of a business proposal comprised of, cost and pricing data, (if required), and the offeror's representations and certifications. Each part of the proposal shall be complete in itself so that the evaluation of both parts can be accomplished concurrently, and the evaluation of the technical and management submittal can be made strictly on the basis of its merit.

(b) Proposals shall be submitted in [insert number] copies of each Part I and [insert number] copies of Part II.

(c) Part I—Technical and Management

Section 1: Proposal Coverage. Cover the scope of work and general objectives which the proposal addresses.

Section 2: Tasks and Methods. Describe the principal tasks or sub-projects to be undertaken together with a discussion of their relationships to each other. Discuss the considerations for selecting, performing and the time sequencing of the tasks or sub-projects. Describe and discuss the method of personnel training and field personnel recruitment and the method of project control to be applied to the project to ensure timely, professional and quality performance. The Contractor must clearly state his/her plans for project management and in providing current and updated project progress to HUD during those phases of Contractor performance that require substantial coordination with HUD personnel.

Section 3: Organization and Staffing. Include an organizational chart for the project showing the name of the project manager and the names of key personnel. Include a brief resume for each person shown on the special qualifications applicable to the performance of the project. Describe the specific effort to be contributed to the project by each of the key personnel and include a statement expressed either in percentage or person-hours that each will devote to the effort. Include a summation of the minimum person-hours or person-months of professional effort to be used in completing the project. Describe the physical facilities to be used. If consultants, advisors or subcontractors are to be used, describe the arrangements and include resumes of the Key personnel.

Section 4: Prior and Current Experience. Include a list of projects currently in progress and/or completed within the last two years which are relevant to this procurement. Include names, addresses, and telephone numbers of contact points with these clients. The Government reserves the right to request information from any source so named.

Section 5: Conflicting or Multiple Use of Contractor Resources. Include a description of the contractor's current or planned projects that may draw upon resources or personnel, including top management, proposed to be committed to this project. Explain how such conflicting or multiple uses will be resolved to avoid impairing the timely, professional, and high-quality performance of this project. If the proposer has one or more existing HUD projects that will run concurrently with this project, explain how the level of attention described in the proposal will be preserved across projects.

The Government reserves the right to downgrade the related Factor for Award score for any proposal that does not adequately and credibly address such conflicts or multiple uses.

Section 6: Security Investigation. The offeror shall address in its technical proposal how it intends to manage the security of automated systems as required by HUDAR clause 2452.237–76. This includes developing security procedures, requesting background investigations for employees and subcontractors as required, and requesting investigations for replacements of such individuals as necessary due to turnover, rotation, or other reasons.

(d) Part II—Business Proposal

Section 1: Representations and Certifications. The Offeror's Representations and Certifications provided in Section K of this solicitation shall be included in this section.

(End of provision)

ALTERNATE I (Insert Month, Year)

This alternate shall be used as prescribed at 2415.407(b) when the submission of cost and pricing data are required. In such cases, add the following Section 2 to paragraph (d) of the basic provision:

Section 2: Cost and Pricing Data. The offeror shall furnish cost or pricing data using the SF–1411, Contract Pricing Proposal, provided in Section L of this solicitation, and the instructions attached to it, which are also printed at FAR 15.804–6. Round all amounts to the nearest dollar. Your data will be subject to review and evaluation by various Government personnel, and thus the estimates furnished on the SF–1411 should be supported by the required supplementary data so that the review and evaluation can be conducted with a minimum amount of delay and effort. In particular, ensure that the following essential elements are provided:

(i) A summary of total cost by cost element cross-referenced to each proposed contract line item (instruction number 1).

(ii) Identification of the basis for the kinds, quantities, and cost of all material elements proposed; and a consolidated priced summary of individual material quantities, or a consolidated priced bill of material (BOM), for the entire proposal. A well prepared BOM includes: part number/description, unit cost, quantity required, any nonrecurring costs, extended cost, and basis for the proposed price (quotation, prior buy, similar item, etc.) (instruction number 1, Materials).

(iii) For each subcontract over $500,000 show: source, deliverable, quantity, price, type of subcontract, degree of competition, basis for selecting vendor and establishing reasonableness of price. When required, the subcontractor's cost or pricing data must be submitted with the offeror's initial proposal. If available and if required by FAR 15.806, the contractor should provide the results of review and evaluation of subcontract proposals. Though not required, the offeror should provide reasons for omitted data/reviews with dates when the data/reviews will be available (instruction number 1, Materials).

(iv) A Justification, submitted on an SF–1412, Claim for Exemption from Submission of Certified Cost or Pricing Data, when claiming an exemption from submitting cost or pricing data (instruction number 1, Materials).

(v) A time phased, e.g., quarterly, annual, breakdown of labor rates and hours by category or skill level, and the basis for the estimates of rates and hours, e.g., historical experiences, engineering estimates, learning curves, etc. If labor is the allocation base for indirect costs, summarize for each overhead pool and year (instruction number 1, Direct Labor).

(vi) In the absence of a forward pricing rate agreement or indirect rate proposal, the contractor should show how indirect rates were estimated and applied as a basis for evaluating the reasonableness of the proposed rates. Support for the indirect rates could consist of cost breakdowns, trends, and budgetary data (instruction number 1, Indirect Costs).

(vii) Identification of all other costs by category and basis for pricing (instruction number 1, Other Costs).

(viii) When claiming cost of money, the contractor must submit Form CASB–CMF and show the calculation of the proposed amount (instruction number 1, Facilities Capital Cost of Money).

(ix) Identification of cost or pricing data, i.e., data that are verifiable and factual, and an explanation of the estimating process. When applicable, the following items should be specifically identified:

(A) Judgmental factors and the methods used in the estimate, including those used in projecting from known data; and

(B) The nature and amount of any contingencies (instruction number 2).

(x) An index referencing all cost or pricing data and information accompanying or identified in the proposal (instruction number 4).

(xi) For change order proposals: an estimate of the cost to complete deleted work not yet performed; identification of the actual or estimated cost of deleted work already performed; and an estimate of the cost of work added (instruction number 7B).

(End of provision)

72. In section 2452.219–70, the section heading and Alternate I are revised to read as follows (and footnote 8 is removed):

2452.219–70 Small Business and Small Disadvantaged Business Subcontracting Plan.

* * * * *

ALTERNATE I (DEC 1992)

This alternate is required for all sealed bid solicitations exceeding $500,000 ($1,000,000 for construction) that are not set aside for small business. In such cases, insert the following paragraph (d) for that in the basic clause:

(d) The contract expected to result from this solicitation will contain the clause at FAR 52.219–9, "Small Business and Small Disadvantaged Business Subcontracting Plan (Alternate I)." The offeror submitting the apparent low bid, upon request by the Contracting Officer, shall submit a subcontracting plan, where applicable, which addresses separately subcontracting with small business concerns and small disadvantaged business concerns, and which shall be included in and made a part of the resultant contract. The Contracting Officer will review the adequacy of the subcontracting plan as part of the responsibility determination (FAR subpart 9.1). Failure to submit an adequate subcontracting plan where applicable shall make the offeror ineligible for the contract award.

(End of provision)

73. Section 2452.226–70 is revised to read as follows:

2452.226–70 Certification of status as a minority business enterprise.

As prescribed in 2426.703, insert the following provision in all solicitations:

CERTIFICATION OF STATUS AS A MINORITY BUSINESS ENTERPRISE

(August 1995)

Bidder, Offeror or Supplier certifies that he or she ______ is, ______ is not, (check one), a minority business enterprise which is defined as a business which is at least 51 percent owned by one or more minority group members or, in the case of a publicly owned business, at least 51 percent of its voting stock is owned by one or more minority group members, and whose management and daily operations are controlled by one or more such individuals. For the purpose of this definition, minority group members are:

(Check the box applicable to you)

[ ] Black Americans
[ ] Hispanic Americans
[ ] Native Americans
[ ] Asian Pacific Americans
[ ] Asian Indian Americans

74. In section 2452.232–70, Alternate I is revised to read as follows:

2452.232–70 Payment schedule and invoice submission (fixed-price).

* * * * *

ALTERNATE I (MAR 1988)

This alternate may be used in fixed-price contracts awarded by the Administrative Service Centers. In such cases, substitute the following paragraph (c) for that in the basic clause:

(c) Invoices shall be submitted in an original and three (3) copies to the office identified on the cover page of the contract (SF–26 or SF–33). To constitute a proper invoice, the invoice must include all items per FAR 52.232–25, "Prompt Payment."

75. In section 2452.232–71, Alternate I is revised to read as follows:

2452.232–71 Voucher submission (cost-reimbursement).

* * * * *

ALTERNATE I (MAR 1988)

This alternate may be used in cost-reimbursement contracts awarded by the Administrative Service Centers. In such cases, substitute the following paragraph (a) for that in the basic clause:

(a) The Contractor shall submit, on a monthly basis [Contracting Officer may substitute a different time frame, if appropriate], an original and three (3) copies of each voucher. In addition to the items necessary per FAR 52.232–25, "Prompt Payment," the voucher shall show the elements of cost for the billing period and the cumulative costs to date. All vouchers shall be submitted to the Contracting Officer specified on the cover page of the contract (SF–26 or SF–33).

75a. In section 2452.237–77, footnote 9 is redesignated as footnote 8.

PART 2453—FORMS

76. The authority citation for part 2453 is revised to read as follows:

2452.237–77 [Footnote 9 redesignated as Footnote 8]

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

77. Section 2453.213–71 is revised to read as follows:

2453.213–71 HUD Form 2542, Purchase Order and Payment Authorization.

As prescribed in 2413.505–2(b), Contracting Officers may use HUD Form 2542 for small purchases charged to the FHA Fund.

2453.213–72 [Removed]

78. Section 2453.213–72 is removed.

79. A new section 2453.237–70 is added, to read as follows:

2453.237–70 HUD Form 24002, GTR Performance Assessment (Final).

As prescribed in 2437.205, Government Technical Representatives shall use HUD Form 24002 to document the contractor's performance and the utility of products or services delivered. This form may also be used for other contracts.

Dated: August 2, 1995.

Marilynn A. Davis,
Assistant Secretary for Administration.

BILLING CODE 4210–01–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Administration

[Docket No. FR-3887-N-02]

Notice of Competition Advocate Designation Under the HUD Acquisition Regulation

AGENCY: Office of the Assistant Secretary for Administration, HUD.

ACTION: Notice of competition advocate designation.

SUMMARY: This notice designates the Deputy Assistant Secretary for Resource Management and Operations of the Office of the Assistant Secretary for Administration as the HUD Competition Advocate in accordance with the newly-revised 24 CFR 2406.501.

EFFECTIVE DATE: October 5, 1995.

FOR FURTHER INFORMATION CONTACT: Edward L. Girovasi, Jr., Director, Policy and Evaluation Division, Office of Procurement and Contracts, Room 5262, 451 Seventh Street, SW., Washington, DC 20410-3000 (voice (202) 708-0294, TDD (202) 708-1112). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The uniform regulation for the procurement of supplies and services by Federal departments and agencies, the Federal Acquisition Regulation (FAR), was promulgated on September 19, 1983 (48 FR 42102). The FAR is codified in title 48, chapter 1, of the Code of Federal Regulations. The HUD Acquisition Regulation (HUDAR) was first promulgated to implement the FAR on March 1, 1984 (49 FR 7696).

The HUDAR (title 48, chapter 24 of the Code of Federal Regulations) is prescribed by the Assistant Secretary for Administration under section 7(d) of the Department of HUD Act (42 U.S.C. 3535(d)); section 205(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c)); the Secretary's delegation effective October 9, 1985 (50 FR 42097); and the general authorization in FAR 1.301.

The purpose of this notice is to implement a recent change to the HUDAR at 48 CFR 2406.501, which provides that the Senior Procurement Executive shall designate the Department's Competition Advocate by **Federal Register** notice.

Accordingly, the Assistant Secretary for Administration, HUD, designates the Deputy Assistant Secretary for Resource Management and Operations of the Office of the Assistant Secretary for Administration as the HUD Competition Advocate.

Dated: August 2, 1995.

Marilynn A. Davis,

Assistant Secretary for Administration.

Part III

Department of Defense

General Services Administration

National Aeronautics and Space Administration

Federal Acquisition Regulation (FAR); Agency Information Collection Activities Under OMB Review; Notices

DEPARTMENT OF DEFENSE

GERERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0097]

Clearance Request for Information Reporting to the Internal Revenue Service (IRS) (Taxpayer Identification Number)

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0097).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Information Reporting to the Internal Revenue Service (IRS) (Taxpayer Identification Number).

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Subpart 4.9, Information Reporting to the Internal Revenue Service (IRS), and the provision at 52.204–3, Taxpayer Identification, implement statutory and regulatory requirements pertaining to taxpayer identification and reporting. This amendment further revises 4.9 and the provision at 52.204–3 to require the collection and reporting of the Taxpayer Identification Number (TIN) of certain contract modifications. A determination was made that additional FAR coverage was necessary in order to ensure that these contract actions are reported to the Internal Revenue Service.

When the Internal Revenue Service issued its final regulations implementing section 6050M of the Tax Reform Act of 1986 (Pub. L. 99–514), the reporting requirements included the requirement to report certain modifications to contracts that were awarded before January 1, 1989. It was determined that additional FAR coverage was required.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *6* minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *250,000*; responses per respondent, *12*; total annual responses, *3,000,000*; preparation hours per response, *.10*; and total response burden hours, *300,000*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0097, Information Reporting to the Internal Revenue Service (IRS) (Taxpayer Identification Number), in all correspondence.

Dated: August 2, 1995.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820–EP–M

[OMB Control No. 9000–0037]

Clearance Request for Presolicitation Notice and Response, Standard Form 1417

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0037).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Presolicitation Notice and Response, Standard Form 1417.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Presolicitation notices are used by the Government for several reasons, one of which is to aid prospective contractors in submitting proposals without undue expenditure of effort, time, and money. The Government also uses the presolicitation notices to control printing and mailing costs. The presolicitation notice response is used to determine the number of solicitation documents needed and to assure that interested offerors receive the solicitation documents. The responses are placed in the contract file and referred to when solicitation documents are ready for mailing. After mailing, the responses remain in the contract file and become a matter of record.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *10* minutes per completion, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *5,900*; responses per respondent, *8*; total annual responses, *47,200*; preparation hours per response, *.167*; and total response burden hours, *7,882*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0037, Presolicitation Notice and Response, Standard Form 1417, in all correspondence.

Dated: August 2, 1995.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820–EP–M

[OMB Control No. 9000–0036]

Clearance Request for Information Regarding Previous Contracts

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0036).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Information Regarding Previous Contracts.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

When the same item or class of items is being acquired by more than one agency, the exchange and coordination of pertinent information, particularly cost and pricing data, is necessary to promote uniformity of treatment of major issues and the resolution of particularly difficult or controversial issues. For this reason, the contracting officer, early in a negotiation of a contract, or in connection with the review of a subcontract, must request the contractor to furnish information as to the contractor's or subcontractor's previous Government contracts and subcontracts for the same or similar end items and major subcontractor components. This information is particularly beneficial during the period of acquisition planning, presolicitation, evaluation, and preaward survey. The information is used to determine a firm's responsibility.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *15* minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *2,000*; responses per respondent, *10*; total annual responses, *20,000*; preparation hours per response, *.25*; and total response burden hours, *5,000*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0036, Information Regarding Previous Contracts, in all correspondence.

Dated: August 2, 1995.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820–EP–M

[OMB Control No. 9000–0033]

Clearance Request for Contractor's Signature Authority

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0033).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Contractor's Signature Authority.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA, (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Entities doing business with the Government must identify those persons who have authority to bind the principal. This information is needed to ensure that Government contracts are legal and binding. The information is used by the contracting officer to ensure that authorized persons sign contracts.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average 1 minute per completion, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *12,000*; responses per respondent, *10*; total annual responses, *120,000*; preparation hours per response, *.017*; and total response burden hours, *2,040*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0033, Contractor's Signature Authority, in all correspondence.

Dated: August 2, 1995.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820–EP–M

[OMB Control No. 9000–0030]

Clearance Request for Sale of Used Items to the Government

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0030).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Sale of Used Items to the Government.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

The Government does not normally purchase used items. Therefore, when a contractor proposes the substitution of a used item for a new item, data must be furnished to the contracting officer so the proposal can be properly evaluated. A description of the item, quantity, date of acquisition, source, and monetary advantages to the Government are the basic data necessary to evaluate the proposal. Upon completion of the contracting officer's evaluation and determination, the data is placed in the contract file and becomes a matter of record.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *.25* hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *790;* responses per respondent; *4;* total annual responses, *3,160;* preparation hours per response, *.25;* and total response burden hours, *790.*

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0030, Sale of Used Items to the Government, in all correspondence.

Dated: August 2, 1995.

BILLING CODE 6820–EP–M

[OMB Control No. 9000–0029]

Clearance Request for Extraordinary Contractual Action Requests

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0029).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Extraordinary Contractual Action Requests.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

This request covers the collection of information as a first step under Public Law 85–804, as amended by Public Law 93–155 and Executive Order 10789 dated November 14, 1958, that allows contracts to be entered into, amended, or modified in order to facilitate national defense. In order for a firm to be granted relief under the Act, specific evidence must be submitted which supports the firm's assertion that relief is appropriate and that the matter cannot be disposed of under the terms of the contract.

The information is used by the Government to determine if relief can be granted under the Act and to determine the appropriate type and amount of relief.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *16* hours (or minutes) per completion, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *100*; responses per respondent, *1*; total annual responses, *100*; preparation hours per response, *16*; and total response burden hours, *1,600*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0029, Extraordinary Contractual Action Requests, in all correspondence.

Dated: August 2, 1995.

Beverly Fayson,

FAR Secretariat.

[FR Doc. 95–21795 Filed 9–1–95; 8:45 am]

BILLING CODE 6820–EP–M

[OMB Control No. 9000–0028]

Clearance Request for Termination Requirements

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0028).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Termination Requirements.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Contracting officers terminate contracts, for default or convenience, only when it is in the best interest of the Government to do so. After receipt of the notice of termination, contractors are required to terminate subcontracts, advise the contracting officer of any special circumstances, submit any requests for an equitable adjustment, submit a settlement proposal, and take other action as directed. Records regarding the terminated contract must be maintained for 3 years.

The information submitted or retained in connection with contract termination is used to reach an equitable settlement with firms and to protect the interests of the Government and the terminated contractor.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *3* hours per termination, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *2,920*; responses per respondent, *1*; total annual responses, *2,920*; preparation hours per response, *3*; and total response burden hours, *8,760*; and total recordkeeping hours, *2,920*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB

applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0028, Termination Requirements, in all correspondence.

Dated: August 2, 1995.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820–EP–M

[OMB Control No. 9000–0025]

Clearance Request for Buy American Act, Trade Agreements Act, Balance of Payments Program Certificate

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0025).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Buy American Act, Trade Agreements Act, Balance of Payments Program Certificate.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Under the Trade Agreements Act of 1979, unless specifically exempted by statute or regulation, agencies are required to evaluate offers over a certain dollar limitation not to supply an eligible product without regard to the restrictions of the Buy American Act or the Balance of Payments program. Offerors identify excluded end products on this certificate.

The contracting officer uses the information to identify the offered items which are domestic end products. Items having components of unknown origin are considered to have been mined, produced, or manufactured outside the Untied States or a designated country of the Act.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *10* minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *1,140;* responses per respondent, *10;* total annual responses, *11,400;* preparation hours per response, *.167;* and total response burden hours, *1,904.*

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0025, Buy American Act, Trade Agreements Act, Balance of Payments Program Certificate, in all correspondence.

Dated: August 2, 1995.

Beverly Fayson,

FAR Secretariat.

[OMB Control No. 9000–0024]

Clearance Request for Buy American Certificate

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0024).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Buy American Certificate.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

The Buy American Act requires that only domestic end products be acquired for public use unless specifically authorized by statute or regulation, provided that the cost of the domestic products is reasonable.

The Buy American Certificate provides the contracting office with the information necessary to identify which products offered are domestic end products and which are of foreign origin. Components of unknown origin are considered to have been supplied from outside the United States.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *10* minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th and F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *2,663*; responses per respondent, *20*; total annual responses, *53,260*; preparation hours per response, *167*; and total response burden hours, *8,894*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0024, Buy American Certificate, in all correspondence.

Dated: August 2, 1995.

[OMB Control No. 9000–0022]

Clearance Request for Customs and Duties

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0022).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management

and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Customs and Duties.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

United States laws impose duties on foreign supplies imported into the customs territory of the United States. Certain exemptions from these duties are available to Government agencies. These exemptions are used whenever the anticipated savings outweigh the administrative costs associated with processing required documentation. When a Government contractor purchases foreign supplies, it must notify the contracting officer to determine whether the supplies should be duty-free. In addition, all shipping documents and containers must specify certain information to assure the duty-free entry of the supplies.

The contracting officer analyzes the information submitted by the contractor to determine whether or not supplies should enter the country duty-free. The information, the contracting officer's determination, and the U.S. Customs forms are placed in the contract file.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *30* minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *1,330*; responses per respondent, *10*; total annual responses, *13,300*; preparation hours per response, *.5*; and total response burden hours, *6,650*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0022, Customs and Duties, in all correspondence.

Dated: August 2, 1995.

[OMB Control No. 9000–0018]

Clearance Request for Certification of Independent Price Determination and Parent Company and Identifying Data

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0018).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Certification of Independent Price Determination and Parent Company and Identifying Data.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Agencies are required to report under 41 U.S.C. 252(d) and 10 U.S.C. 2305(d) suspected violations of the antitrust laws (*e.g.*, collusive bidding, identical bids, uniform estimating systems, etc.) to the Attorney General.

As a first step in assuring that Government contracts are not awarded to firms violating such laws, offerors on Government contracts must complete the certificate of independent price determination. An offer will not be considered for award where the certificate has been deleted or modified. Deletions or modifications of the certificate and suspected false certificates are reported to the Attorney General.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *.04 hours for the first completion, .0083 hours for subsequent completions, or an average of .01 hours per completion*, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *64,250*; responses per respondent, *20*; total annual responses, *1,285,000*; preparation hours per response, *.02*; and total response burden hours, *25,700*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0018, Certification of Independent Price Determination and Parent Company and Identifying Data, in all correspondence.

Dated: August 2, 1995.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820–EP–M

[OMB Control No. 9000–0001]

Clearance Request for Standard Form 28, Affidavit of Individual Surety

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0001).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Standard Form 28, Affidavit of Individual Surety.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

The Affidavit of Individual Surety (Standard Form (SF) 28) will be used by all executive agencies, including the Department of Defense, to obtain information from individuals wishing to serve as sureties to Government bonds.

In order to qualify as a surety on a Government bond, the individual must show a net worth not less than the penal amount of the bond on the SF 28. It is an elective decision on the part of the maker to use individual sureties instead of other available sources of surety or sureties for Government bonds. We are not aware if other formats exist for the collection of this information.

The information on SF 28 will be used to assist the contracting officer in determining the acceptability of individuals proposed as sureties.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average *.4* hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to General Services Administration, FAR Secretariat, 18th & F Streets, NW., Room 4037, Washington, DC 20405.

The annual reporting burden is estimated as follows: Respondents, *500*; responses per respondent, *1.43*; total annual responses, *715*; preparation hours per response, *.4*; and total response burden hours, *286*.

Obtaining Copies of Proposals: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), Room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0001, Standard Form 28, Affidavit of Individual Surety, in all correspondence.

Dated: August 2, 1995.

Risk-Based Capital Standards: Derivative Transactions

AGENCIES: Office of the Comptroller of the Currency (OCC), Department of the Treasury; Board of Governors of the Federal Reserve System (Board); and Federal Deposit Insurance Corporation (FDIC).

ACTION: Final rule.

SUMMARY: The OCC, the Board, and the FDIC (the banking agencies) are amending their respective risk-based capital standards for banks and bank holding companies (banking organizations, institutions). This final rule implements a recent revision to the Basle Accord revising and expanding the set of conversion factors used to calculate the potential future exposure of derivative contracts and recognizing the effects of netting arrangements in the calculation of potential future exposure for derivative contracts subject to qualifying bilateral netting arrangements. The effect of this final rule is threefold. First, long-dated interest rate and exchange rate contracts are subject to higher conversion factors and new conversion factors are set forth that specifically apply to derivative contracts related to equities, precious metals, and other commodities. Second, institutions are permitted to recognize a reduction in potential future credit exposure for transactions subject to qualifying bilateral netting arrangements. Third, derivative contracts related to equities, precious metals and other commodities may be recognized in bilateral netting arrangements for risk-based capital purposes.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT:

OCC: For issues relating to netting and the calculation of risk-based capital ratios, Roger Tufts, Senior Economic Advisor (202/874–5070), Office of the Chief National Bank Examiner. For legal issues, Eugene H. Cantor, Senior Attorney, Securities and Corporate Practices (202/874–5210), or Ronald Shimabukuro, Senior Attorney, Legislative and Regulatory Activities Division (202/874–5090), Office of the Comptroller of the Currency, 250 E Street, S.W., Washington, D.C. 20219.

Board: Roger Cole, Deputy Associate Director (202/452–2618), Norah Barger, Manager (202/452–2402), Robert Motyka, Supervisory Financial Analyst (202)/452–3621), Barbara Bouchard, Supervisory Financial Analyst (202/452–3072), Division of Banking Supervision and Regulation; or Stephanie Martin, Senior Attorney (202/452–3198), Legal Division. For the Hearing Impaired only, Telecommunications Device for the Deaf, Dorothea Thompson (202/452–3544), 20th and C Streets, N.W., Washington, D.C. 20551.

FDIC: William A. Stark, Assistant Director, (202/898–6972), Curtis Wong, Capital Markets Specialist, (202/898–7327), Division of Supervision, or Jeffrey M. Kopchik, Counsel, (202/898–3872), Legal Division, FDIC, 550 17th St., N.W., Washington, D.C. 20429.

SUPPLEMENTARY INFORMATION:

I. Background

The Basle Accord [1] established a risk-based capital framework for assessing capital adequacy that was implemented in the United States by the banking agencies in 1989. Under this framework, off-balance-sheet transactions are incorporated into the risk-based structure by converting each item into a credit equivalent amount that is then assigned to the appropriate credit risk category according to the identity of the obligor or counterparty, or if relevant, the guarantor or the nature of collateral.

The credit equivalent amount of an off-balance-sheet interest rate or exchange rate contract (rate contract) is determined by adding together the current replacement cost (current exposure) of the contract and an estimate of the possible increase in future replacement cost (potential future exposure, also referred to as the add-on) in view of the volatility of the current exposure of the contract. The maximum risk category for rate contracts is 50 percent.[2]

Current Exposure

For risk-based capital purposes, a rate contract with a positive mark-to-market value has a current exposure equal to that market value. If the mark-to-market value is zero or negative, then the current exposure is zero. The sum of current exposures for a defined set of contracts is sometimes referred to as the gross current exposure for that set of contracts. When they were initially issued, the Basle Accord and the banking agencies' risk-based capital standards provided, generally, that current exposure would be determined individually for each rate contract entered into by a banking organization.

In July 1994 the Basle Accord was revised to permit institutions to net, that is, offset, positive and negative mark-to-market values of rate contracts entered into with a single counterparty subject to a qualifying, legally enforceable, bilateral netting arrangement. Effective at year-end 1994, the banking agencies each amended, in a uniform manner, their risk-based capital standards to implement the revision to the Accord.[3] Accordingly, U.S. banking organizations with qualifying, legally enforceable, bilateral netting arrangements may replace the gross current exposure of a set of contracts included in such an arrangement with a single net current exposure for purposes of determining the credit equivalent amount for the included contracts.

Potential Future Exposure

The potential future exposure portion of the credit equivalent amount for rate contracts is an estimate of the additional credit exposure that may arise as a result of fluctuations in prices or rates. The add-on for potential future exposure is estimated by multiplying the notional principal amount [4] of the contract by a credit conversion factor that is determined by the remaining maturity of the contract and the type of contract. The original conversion factors in the Basle Accord and the banking agencies' risk-based capital standards are set forth in the following matrix:

Remaining maturity	Interest rate (in percent)	Exchange rate (in percent)
One year or less	0	1.0
Over one year	0.5	5.0

An individual add-on for potential future exposure is calculated for all rate contracts regardless of whether the market value is zero, positive, or negative, or whether the current exposure is calculated on a gross or net basis. The banking agencies' recent amendments to expand the recognition of bilateral netting arrangements did not revise the calculation of the add-on for potential future exposure. Accordingly, an add-on is calculated separately for each individual contract subject to a qualifying bilateral netting arrangement. These individual potential future exposures are added together to arrive at a gross add-on amount. The gross add-on amount is added to the net current exposure to determine one credit equivalent amount for the contracts subject to the qualifying bilateral netting arrangement.

Commenters to the Basle proposal to expand the recognition of bilateral netting arrangements urged regulators to also recognize reductions in potential future credit exposure arising from such arrangements. They also commented that commodity and equity derivative transactions should be eligible for netting for risk-based capital purposes. Accordingly, in July 1994 the Basle Supervisors Committee proposed revisions to the Basle Accord regarding the risk-based capital treatment of derivative transactions.[5] Under the proposed revision, the matrix of conversion factors used to calculate potential future exposure would be expanded to take into account innovations in the derivatives markets. Specifically, the Basle Committee proposed that higher conversion factors be added to address long-dated transactions (that is, contracts with remaining maturities over five years) and new conversion factors be added to explicitly cover certain types of derivatives transactions not directly mentioned by the Accord when it was endorsed in 1988. These include commodity-, precious metal-, and equity-linked derivative transactions.[6] The proposed revision also would have formally extended the recognition of qualifying bilateral netting arrangements to commodity, precious metal, and equity derivative contracts so that these types of transactions could be netted when determining current exposure for the netting contract. In addition, the proposed revision set forth a formula for institutions to employ in recognizing reductions in the potential future exposure of derivatives contracts that can result from entering into qualifying bilateral netting arrangements.

II. The Agencies' Proposals

After the Basle Supervisors Committee issued its proposed revisions to the Basle Accord, the banking agencies each issued for public comment proposals to amend their respective risk-based capital standards based on the international proposal.[7] The agencies' proposed conversion factor matrix is set forth below:

CONVERSION FACTOR MATRIX [1]

[Amounts in percent]

Residual maturity	Interest rate	Foreign exchange and gold	Equity [2]	Precious metals, except gold	Other commodities
Less than one year	0.0	1.0	6.0	7.0	12.0
One to five years	0.5	5.0	8.0	7.0	12.0
Five years or more	1.5	7.5	10.0	8.0	15.0

[1] For contracts with multiple exchanges of principal, the factors are to be multiplied by the number of remaining payments in the contract.

[2] For contracts that automatically reset to zero value following a payment, the remaining maturity is set equal to the time remaining until the next payment.

The proposed matrix was designed to accommodate a variety of contracts and was intended to provide a reasonable balance between precision, on the one hand, and complexity and burden, on the other.

The agencies also proposed the same methodology as the Basle Supervisors Committee to calculate a reduction in the add-on amount for contacts subject to qualifying bilateral netting arrangements. Under the agencies' proposals, institutions would apply the following formula [8] to adjust the amount of the add-on for potential future exposure:

$$A_{net} = 0.5(A_{gross} + (NGR \times A_{gross}))$$

Where A_{net} is the adjusted add-on for all contracts subject to the netting arrangement, A_{gross} is the amount of the add-on as calculated under the current agency standards, and NGR is the ratio of the net current exposure of the set of contracts included in the netting arrangement to the gross current exposure of those contracts. The proposals would have given partial credit to the effect of the NGR by applying a weighted averaging factor of 0.5.

Under the proposals, institutions would calculate a separate NGR for each counterparty with which it has a qualifying bilateral netting contract. The proposals requested general comments as well as specific comment as to whether the NGR should be calculated on a counterparty-by-counterparty basis or on an aggregate basis for all contracts subject to qualifying bilateral netting arrangements.

---

[1] The Basle Accord is a risk-based framework that was proposed by the Basle Committee on Banking Supervision (Basle Supervisors Committee) and endorsed by the central bank governors of the Group of Ten (G–10) countries in July 1988. The Basle Supervisors Committee is comprised of representatives of the central banks and supervisory authorities from the G–10 countries (Belgium, Canada, France, Germany, Italy, Japan, Netherlands, Sweden, Switzerland, the United Kingdom, and the United States) and Luxembourg.

[2] Exchange rate contracts with an original maturity of 14 calendar days or less and instruments traded on exchanges that require daily receipt and payment of cash variation margin are excluded from the risk-based capital ratio calculations.

[3] The Board issued its amendment on December 7, 1994 (59 FR 62987), the OCC and FDIC issued their amendments on December 28, 1994 (59 FR 66645 for the OCC final rule and 59 FR 66656 for the FDIC final rule).

[4] The notional principal amount is a reference amount of money used to calculate payment streams between counterparties.

[5] The proposed revisions are contained in a document entitled "The capital adequacy treatment of the credit risk associated with certain off-balance-sheet items" that is available upon request from the Board's or OCC's Freedom of Information Offices or the FDIC's Office of the Executive Secretary.

[6] In general terms, these are off-balance-sheet derivative contracts that have a return, or a portion of their return, linked to the price or an index of prices for a particular commodity, precious metal, or equity. These types of transactions were not specifically addressed in the 1988 Accord (or in the banking agencies' original risk-based capital standards) because they were not prevalent in the derivatives markets at that time.

[7] The Board issued its proposal on August 24, 1994 (59 FR 43508), the OCC issued its proposal on September 1, 1994 (59 FR 45243), and the FDIC issued its proposal on October 19, 1994 (59 FR 52714).

[8] This formula may also be expressed as: $A_{net} = (1-P)A_{gross} + P(NGR \times A_{gross})$ [P or policy factor = 0.5].

III. Comments Received

The banking agencies together received nineteen public comments on their proposed amendments. Fifteen of the commenters were banks and bank holding companies and four were industry trade associations and other organizations. Commenters generally supported the proposed amendments, in particular the recognition of the effects of bilateral netting arrangements in the calculation of potential future exposure, and several urged adoption of the amendments as soon as possible. Commenters offered suggestions and opinions on several aspects of the proposals including the conversion factors, the formula for recognizing potential future exposure, ways of calculating the NGR, and recognizing additional risk-reducing techniques.

Expanded Matrix

Over one half of the commenters addressed the proposed expanded conversion factor matrix. Of these commenters, most indicated the proposed factors were generally reasonable and acceptable. Several commenters discussed the underlying assumptions used in the simulation models for arriving at the proposed factors for commodity transactions and expressed concern that the conversion factors for certain commodity derivative transactions were too high. One commenter suggested the conversion factor for commodity contracts across all time bands should be twelve percent. Another commenter expressed the view that the proposed conversion factor for interest rate contracts with remaining maturities greater than five years (1.5 percent) was an excessive increment over the current 0.5 percent conversion factor for interest rate contracts with remaining maturities greater than one year. This commenter suggested an additional time band for interest rate contracts with five to eight years remaining maturity and a corresponding conversion factor of 1.0 percent. Another commenter suggested there should be no capital charge for potential future exposure for commodity contracts based on two floating indices.

One commenter supported continuing the existing time band of "one year or less" as opposed to the proposed time band of "less than one year." Two commenters expressed the view that the proposed time band for contracts with remaining maturities greater than five years was unnecessary. One commenter suggested adding a time band and appropriate conversion factors for contracts with remaining maturities between one and two years.

Several commenters discussed the matrix footnotes. One suggested extending the footnote applicable to equity contracts with automatic reset features following a payment to any derivative contract with effective early termination or periodic reset features. With regard to the footnote pertaining to contracts with multiple exchanges of principal, one commenter requested further clarification on the types of contracts included, while another expressed the view that multiplying the conversion factor by the number of remaining payments in a contract was too conservative. A few commenters recommended clarification as to the appropriate capital treatment when transactions are leveraged or enhanced by a stated multiple.

Netting and Potential Future Exposure

A number of commenters discussed the proposed formula for recognizing the effects of bilateral netting arrangements in the calculation of potential future exposure. Most of these commenters supported the use of the NGR as a reasonable proxy to estimate the risk-reducing benefits of netting arrangements. Several commenters supported giving full weight to the NGR or, alternatively, weighting the NGR with a higher averaging factor than the proposed 0.5 factor. Another commenter offered a revised formula that would weight the netting portion of the formula by two and divide the entire formula by three. This commenter stated the revised formula would effectively reduce the credit equivalent amount and place greater emphasis on the portion of the formula affected by a netting arrangement. One commenter suggested that net credit risk should be the basis for the add-on amount.

Several commenters addressed the proposal's specific request for comment on whether the NGR should be calculated on a counterparty-by-counterparty basis or on an aggregate basis across all portfolios eligible for capital netting treatment. A few commenters supported a counterparty-by-counterparty NGR as providing a more accurate indication of credit risks. Other commenters preferred an aggregate NGR, characterizing an aggregate NGR as less burdensome to calculate. Two commenters suggested applying a single NGR to all counterparties within each risk weight classification.

Other Comments

Several commenters encouraged recognizing other risk reducing techniques such as margin and collateral agreements, frequent settlement of mark-to-market values, and periodic resetting of terms and early termination agreements. One commenter suggested there should be no capital charge for potential future exposure when current exposure is less than a certain level (e.g., negative $1 million). One commenter suggested using negative net mark-to-market values to offset potential future exposure. A few commenters supported the use of internal systems to calculate capital requirements and recommended continued monitoring of developments in the banking industry.

IV. Final Rule

After consideration of the comments received and further deliberation on the issues involved, the banking agencies have determined to adopt a final rule that is substantially the same as proposed. The final rule amends the matrix of conversion factors used to calculate potential future exposure and permits institutions to recognize the effects of qualifying bilateral netting arrangements in the calculation of potential future exposure. The final rule is consistent with a revision to the Basle Accord announced by the Basle Supervisors Committee in April 1995.[9]

Expanded Matrix

The banking agencies believe that the proposed conversion factors generally provide a reasonable measure of potential future exposure for long-dated interest rate and exchange rate contracts and for other derivative instruments not addressed in the original Accord. In addition, the banking agencies believe that the proposed matrix adequately accommodates a variety of contracts and appropriately provides a reasonable balance between precision, and complexity and burden. The agencies, however, have taken into consideration issues raised by commenters regarding the simulation methods used to arrive at the conversion factors for other commodities. After additional simulation analysis, the agencies have concluded that the conversion factor for other commodity transactions with maturities of one year or less should be lowered from 12 percent to 10 percent. Any off-balance-sheet derivative contract not explicitly covered by the expanded matrix is subject to the add-on conversion factors for other commodities. Furthermore, in response to commenters' concerns, the banking agencies have revised the proposed time band of "less than one year" to "one year or less" to maintain consistency with the existing time bands for remaining maturity.

The proposed matrix included a footnote applicable to equity contracts that automatically reset market value to zero following a payment. Under the proposal, the remaining maturity of such contracts would be the time until the next payment. Several commenters asserted this treatment should extend to a wider range of contacts. The agencies have determined that for contracts structured to settle outstanding exposure to zero following specified payment dates and where the terms of the contract are reset so that the market value of the contract is zero on these dates, the remaining maturity may be set equal to the time until the next reset date. However, the agencies believe that a long-dated interest rate swap, with, for example, a six-month zero reset provision, represents a greater risk than an interest rate swap that terminates after six months. The final rule provides that the minimum add-on conversion factor for interest rate contacts with remaining maturities of greater than one year is 0.5 percent.

Under the final rule, which is identical to the proposal in this regard, gold derivative contracts are accorded the same conversion factors as exchange rate contracts. However, while exchange rate contracts with original maturities of fourteen calendar days or less may be excluded from the risk-based ratio calculation,[10] gold contracts with such original maturities are to be included.

Finally, the agencies note that the conversion factors are to be regarded as provisional and may be subject to amendment as a result of changes in the volatility of rates and prices.

Netting and Potential Future Exposure

The final rule adopts, in substantially the same form, the proposed methodology for reducing potential future exposure for contracts subject to qualifying bilateral netting arrangements. The agencies have considered the argument presented by several commenters that the proposed formula did not give sufficient recognition to reductions in credit risk resulting from participating in qualifying netting arrangements. These commenters suggested giving full weight to the NGR or, alternatively, that it be weighted at 90 percent. The agencies believe that only partial weight should be given to the NGR as it is neither a precise, nor a stable indicator of future changes in net exposure relative to changes in gross exposure. The agencies agree, to a limited extent, with commenters that a 0.5 averaging factor (referred to as the policy or P factor) may not sufficiently recognize reductions in potential future exposure resulting from qualifying bilateral netting arrangements and have determined that the P factor should be raised to 0.6. This weight represents an appropriate compromise between recognizing effects of bilateral netting arrangements in calculating the add-on and providing a cushion against additional exposure that may arise as a result of fluctuations in prices or rates. The formula adopted by the agencies is expressed as:

$$A_{net}=(0.4\times A_{gross})+0.6(NGR\times A_{gross})$$

The agencies have also considered comments discussing whether the NGR should be calculated on a counterparty-by-counterparty basis (that is, an individual NGR for each bilateral netting contract) or on an aggregate basis for all contracts subject to legally enforceable netting arrangements. The agencies have determined that an institution may elect to calculate separate NGRs for each of its bilateral netting arrangements or an aggregate NGR so long as the method chosen is used consistently and is subject to examiner review.

Regardless of the method employed by an institution to calculate its NGR(s), the NGR should be applied separately and individually to each of the institution's bilateral netting arrangements. If an institution calculates an NGR for each bilateral netting arrangement, then it should use a different NGR when determining the potential future exposure for each bilateral netting arrangement. If an institution aggregates its net and gross replacement costs across all bilateral netting contracts to determine a single NGR, then it should use the same NGR when determining the potential future exposure for each bilateral netting arrangement.

Institutions with equity, precious metal, and other commodity contracts included in bilateral netting contracts should now include those types of transactions when determining the net current exposure for the bilateral netting contract and when determining potential future exposure in accordance with this final rule.

The final rule permits, subject to certain conditions, institutions to take into account qualifying collateral when assigning the credit equivalent amount of a netting arrangement to the appropriate risk category in accordance with the procedures and requirements currently set forth in each agency's risk-based capital standards.

Finally, the agencies note that the methodology for recognizing the effects of qualifying bilateral netting arrangements is subject to review and revision as determined to be appropriate.

V. Regulatory Flexibility Act Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act, the agencies do not believe that this final rule will have a significant impact on a substantial number of small business entities in accord with the spirit and purposes of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). In this regard, while some institutions with limited derivative portfolios may experience an increase in capital charges, for most of these institutions the final rule will have no effect. For institutions with more developed derivative portfolios, the overall effect of the rule will likely be to reduce regulatory burden and decrease the capital charge for certain derivative transactions. In addition, because the risk-based capital standards generally do not apply to bank holding companies with consolidated assets of less than $150 million, this final rule will not affect such companies.

VI. Paperwork Reduction Act and Regulatory Burden

The agencies have determined that this final rule will not increase the regulatory paperwork burden of banking organizations pursuant to the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Section 302 of the Riegle Community Development and Regulatory Improvement Act of 1994 (Pub. L. 103–325, 108 Stat. 2160) provides that the federal banking agencies must consider the administrative burdens and benefits of any new regulation that imposes additional requirements on insured depository institutions. As noted above, the rule may result in higher capital charges for some institutions and lower charges for others, but any additional paperwork or recordkeeping burden should be minimal. The rule provides a more accurate measure of risks related to derivative contracts and the capital required to cover those risks.

---

[9] The revision to the Basle Accord is in an annex with the heading "Forwards, swaps, purchased options and similar derivative contracts" that was issued along with the Basle Supervisors Committee's consultative proposal on Market Risk on April 12, 1995. This document is available upon request from the Board's and OCC's Freedom of Information Offices and the FDIC's Office of the Executive Secretary.

[10] Exchange rate contracts with original maturities of 14 calendar days or less are normally excluded from the risk-based capital ratio. When such contracts are included in a bilateral netting arrangement, however, the institution may elect consistently either to include or exclude all mark-to-market values of those contracts when determining net current exposure. These contracts should continue to be excluded when determining potential future exposure.

Section 302 also requires such a rule to become effective on the first day of the calendar quarter following publication of the rule, unless the agency, for good cause, determines an earlier effective date is appropriate. Accordingly, the agencies have determined that an effective date of October 1, 1995 is appropriate.

VII. OCC Executive Order 12866

It has been determined that this final rule is not a significant regulatory action as defined in Executive Order 12866.

VIII. OCC Unfunded Mandates Act of 1995

Section 202 of the Unfunded Mandates Act of 1995 (Unfunded Mandates Act) (signed into law on March 22, 1995) requires that certain agencies prepare a budgetary impact statement before promulgating a rule that includes a federal mandate that may result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year. If a budgetary impact statement is required, section 205 of the Unfunded Mandates Act also requires the agency to identify and consider a reasonable number of regulatory alternatives before promulgating a rule. The OCC has determined that this joint agency final rule will not result in expenditures by state, local and tribal governments, or by the private sector, of more than $100 million in any one year. Accordingly, the OCC has not prepared a budgetary impact statement or specifically addressed the regulatory alternatives considered.

As discussed in the preamble, this joint agency final rule amends the risk-based capital guidelines to (1) revise and expand the credit conversion factors used to calculate the potential future credit exposure for derivative contracts and long-dated interest rate and foreign exchange rate contracts and (2) permit banks to net multiple derivative contracts subject to a qualifying bilateral netting contract when calculating the potential future credit exposure. While the impact of this final rule on any particular national bank will depend on the composition of its derivatives portfolio, the OCC believes that this final rule generally will have little or no impact on most banks since most banks have limited derivative portfolios. For those banks with more developed derivatives portfolios, the OCC believes that the effect of this final rule will likely be a decrease in the capital requirements for certain derivative contracts.

Authority and Issuance

OFFICE OF THE COMPTROLLER OF THE CURRENCY

12 CFR CHAPTER I

For the reasons set out in the joint preamble, appendix A to part 3 of title 12, chapter 1 of the Code of Federal Regulations is amended as set forth below.

PART 3—MINIMUM CAPITAL RATIOS; ISSUANCE OF DIRECTIVES

1. The authority citation for part 3 continues to read as follows:

Authority: 12 U.S.C. 93a, 161, 1818, 1828(n), 1828 note, 1831n note, 1835, 3907, and 3909.

2. In appendix A, to part 3, section 1 is revised by redesignating paragraphs (c)(10) through (c)(30) as paragraphs (c)(11) through (c)(31) and adding new paragraph (c)(10) to read as follows:

Appendix A to Part 3—Risk-Based Capital Guidelines

Section 1. Purpose, Applicability of Guidelines, and Definitions.

* * * * *

(c) * * *

(10) *Derivative contract* means generally a financial contract whose value is derived from the values of one or more underlying assets, reference rates or indexes of asset values. Derivative contracts include interest rate, foreign exchange rate, equity, precious metals and commodity contracts, or any other instrument that poses similar credit risks.

* * * * *

3. In appendix A, to part 3, section 3 is amended:

a. By revising paragraph (a)(1)(viii);

b. In paragraph (a)(3)(ii) by removing the words "interest rate and exchange rate contracts," and adding in their place the words "derivative contracts,"; and

c. In paragraph (b) by revising the introductory text and paragraph (b)(5).

The revisions read as follows:

* * * * *

Section 3. Risk Categories/Weights for On-Balance Sheet Assets and Off-Balance Sheet Items.

* * * * *

(a) * * *

(1) * * *

(viii) That portion of assets and off-balance sheet transactions [9a] collateralized by cash or securities issued or directly and unconditionally guaranteed by the United States Government or its agencies, or the central government of an OECD country, provided that: [9b]

* * * * *

(b) *Off-Balance Sheet Activities.* The risk weight assigned to an off-balance sheet item is determined by a two-step process. First, the face amount of the off-balance sheet item is multiplied by the appropriate credit conversion factor specified in this section. This calculation translates the face amount of an off-balance sheet item into an on-balance sheet credit equivalent amount. Second, the resulting credit equivalent amount is then assigned to the proper risk category using the criteria regarding obligors, guarantors, and collateral listed in section 3(a) of this appendix A. Collateral and guarantees are applied to the face amount of an off-balance sheet item; however, with respect to derivative contracts under section 3(b)(5) of this appendix A, collateral and guarantees are applied to the credit equivalent amounts of such derivative contracts. The following are the credit conversion factors and the off-balance sheet items to which they apply.

* * * * *

(5) *Derivative contracts.* (i) *Calculation of credit equivalent amounts.* The credit equivalent amount of a derivative contract equals the sum of the current credit exposure and the potential future credit exposure of the derivative contract. The calculation of credit equivalent amounts must be measured in U.S. dollars, regardless of the currency or currencies specified in the derivative contract.

[9a] See footnote 22 in section 3(b)(5)(iii) of this appendix A (collateral held against derivative contracts).

[9b] Assets and off-balance sheet transactions collateralized by securities issued or guaranteed by the United States Government or its agencies, or the central government of an OECD country include, but are not limited to, securities lending transactions, repurchase agreements, collateralized letters of credit, such as reinsurance letters of credit, and other similar financial guarantees. Swaps, forwards, futures, and options transactions are also eligible, if they meet the collateral requirements. However, the OCC may at its discretion require that certain collateralized transactions be risk weighted at 20 percent if they involve more than a minimal risk.

(A) *Current credit exposure.* The current credit exposure for a single derivative contract is determined by the mark-to-market value of the derivative contract. If the mark-to-market value is positive, then the current credit exposure equals that mark-to-market value. If the mark-to-market is zero or negative, then the current credit exposure is zero. The current credit exposure for multiple derivative contracts executed with a single counterparty and subject to a qualifying bilateral netting contract is determined as provided by section 3(b)(5)(ii)(A) of this appendix A.

(B) *Potential future credit exposure.* The potential future credit exposure for a single derivative contract, including a derivative contract with negative mark-to-market value, is calculated by multiplying the notional principal [19] of the derivative contract by one of the credit conversion factors in Table A—Conversion Factor Matrix of this appendix A, for the appropriate category.[20] The potential future credit exposure for gold contracts shall be calculated using the foreign exchange rate conversion factors. For any derivative contract that does not fall within one of the specified categories in Table A—Conversion Factor Matrix of this appendix A, the potential future credit exposure shall be calculated using the other commodity conversion factors. Subject to examiner review, banks should use the effective rather than the apparent or stated notional amount in calculating the potential future credit exposure. The potential future credit exposure for multiple derivatives contracts executed with a single counterparty and subject to a qualifying bilateral netting contract is determined as provided by section 3(b)(5)(ii)(A) of this appendix A.

TABLE A—CONVERSION FACTOR MATRIX[1]

Remaining maturity[2]	Interest rate	Foreign exchange rate and gold	Equity[2]	Precious metals	Other commodity
One year or less	0.0	1.0	6.0	7.0	10.0
Over one to five years	0.5	5.0	8.0	7.0	12.0
Over five years	1.5	7.5	10.0	8.0	15.0

[1] For derivative contracts with multiple exchanges of principal, the conversion factors are multiplied by the number of remaining payments in the derivative contract.

[2] For derivative contracts that automatically reset to zero value following a payment, the remaining maturity equals the time until the next payment. However, interest rate contracts with remaining maturities of greater than one year shall be subject to a minimum conversion factor of 0.5 percent.

(ii) *Derivative contracts subject to a qualifying bilateral netting contract.* (A) *Netting calculation.* The credit equivalent amount for multiple derivative contracts executed with a single counterparty and subject to a qualifying bilateral netting contract as provided by section (3)(b)(5)(ii)(B) of this appendix A is calculated by adding the net current credit exposure and the adjusted sum of the potential future credit exposure for all derivative contracts subject to the qualifying bilateral netting contract.

(*1*) *Net current credit exposure.* The net current credit exposure is the net sum of all positive and negative mark-to-market values of the individual derivative contracts subject to a qualifying bilateral netting contract. If the net sum of the mark-to-market value is positive, then the net current credit exposure equals that net sum of the mark-to-market value. If the net sum of the mark-to-market value is zero or negative, then the net current credit exposure is zero.

(*2*) *Adjusted sum of the potential future credit exposure.* The adjusted sum of the potential future credit exposure is calculated as:

$$A_{net}=0.4\times A_{gross}+(0.6\times NGR\times A_{gross})$$

A_{net} is the adjusted sum of the potential future credit exposure, A_{gross} is the gross potential future credit exposure, and NGR is the net to gross ratio. A_{gross} is the sum of the potential future credit exposure (as determined under section 3(b)(5)(i)(B) of this appendix A) for each individual derivative contract subject to the qualifying bilateral netting contract. The NGR is the ratio of the net current credit exposure to the gross current credit exposure. In calculating the NGR, the gross current credit exposure equals the sum of the positive current credit exposures (as determined under section 3(b)(5)(i)(A) of this appendix A) of all individual derivative contracts subject to the qualifying bilateral netting contract.

(B) *Qualifying bilateral netting contract.* In determining the current credit exposure for multiple derivative contracts executed with a single counterparty, a bank may net derivative contracts subject to a qualifying bilateral netting contract by offsetting positive and negative mark-to-market values, provided that:

(*1*) The qualifying bilateral netting contract is in writing.

(*2*) The qualifying bilateral netting contract is not subject to a walkaway clause.

(*3*) The qualifying bilateral netting contract creates a single legal obligation for all individual derivative contracts covered by the qualifying bilateral netting contract. In effect, the qualifying bilateral netting contract must provide that the bank would have a single claim or obligation either to receive or to pay only the net amount of the sum of the positive and negative mark-to-market values on the individual derivative contracts covered by the qualifying bilateral netting contract. The single legal obligation for the net amount is operative in the event that a counterparty, or a counterparty to whom the qualifying bilateral netting contract has been assigned, fails to perform due to any of the following events: default, insolvency, bankruptcy, or other similar circumstances.

(*4*) The bank obtains a written and reasoned legal opinion(s) that represents, with a high degree of certainty, that in the event of a legal challenge, including one resulting from default, insolvency, bankruptcy, or similar circumstances, the relevant court and administrative authorities would find the bank's exposure to be the net amount under:

(*i*) The law of the jurisdiction in which the counterparty is chartered or the equivalent location in the case of noncorporate entities, and if a branch of the counterparty is involved, then also under the law of the jurisdiction in which the branch is located;

(*ii*) The law of the jurisdiction that governs the individual derivative contracts covered by the bilateral netting contract; and

(*iii*) The law of the jurisdiction that governs the qualifying bilateral netting contract.

(*5*) The bank establishes and maintains procedures to monitor possible changes in relevant law and to ensure that the qualifying bilateral netting contract continues to satisfy the requirement of this section.

(*6*) The bank maintains in its files documentation adequate to support the netting of a derivative contract.[21]

---

[19] For purposes of calculating either the potential future credit exposure under section 3(b)(5)(i)(B) of this appendix A or the gross potential future credit exposure under section 3(b)(5)(ii)(A)(2) of this appendix A for foreign exchange contracts and other similar contracts in which the notional principal is equivalent to the cash flows, total notional principal is the net receipts to each party falling due on each value date in each currency.

[20] No potential future credit exposure is calculated for single currency interest rate swaps in which payments are made based upon two floating indices, so-called floating/floating or basis swaps; the credit equivalent amount is measured solely on the basis of the current credit exposure.

[21] By netting individual derivative contracts for the purpose of calculating its credit equivalent amount, a bank represents that documentation adequate to support the netting of a set of derivative contract is in the bank's files and available for inspection by the OCC. Upon determination by the OCC that a bank's files are inadequate or that a qualifying bilateral netting contract may not be legally enforceable in any one of the bodies of law described in section 3(b)(5)(ii)(B)(*3*)(*i*) through (*iii*) of this appendix A, the underlying derivative contracts may not be netted for the purposes of this section.

(iii) *Risk weighting*. Once the bank determines the credit equivalent amount for a derivative contract or a set of derivative contracts subject to a qualifying bilateral netting contract, the bank assigns that amount to the risk weight category appropriate to the counterparty, or, if relevant, the nature of any collateral or guarantee.[22] However, the maximum weight that will be applied to the credit equivalent amount of such derivative contract(s) is 50 percent.

(iv) *Exceptions*. The following derivative contracts are not subject to the above calculation, and therefore, are not part of the denominator of a national bank's risk-based capital ratio:

(A) An exchange rate contract with an original maturity of 14 calendar days or less;[23] and

(B) A derivative contract that is traded on an exchange requiring the daily payment of any variations in the market value of the contract.

* * * * *

4. Table 3, at the end of appendix A, is revised to read as follows:

* * * * *

Table 3—Treatment of Derivative Contracts

1. The current exposure method is used to calculate the credit equivalent amounts of derivative contracts. These amounts are assigned a risk weight appropriate to the obligor or any collateral or guarantee. However, the maximum risk weight is limited to 50 percent. Multiple derivative contracts with a single counterparty may be netted if those contracts are subject to a qualifying bilateral netting contract.

CONVERSION FACTOR MATRIX [1]

[Percent]

Remaining maturity [2]	Interest rate	Foreign exchange rate and gold	Equity [2]	Precious metals	Other commodity
One year or less	0.0	1.0	6.0	7.0	10.0
Over one to five years	0.5	5.0	8.0	7.0	12.0
Over five years	1.5	7.5	10.0	8.0	15.0

[1] For derivative contracts with multiple exchanges of principal, the conversion factors are multiplied by the number of remaining payments in the derivative contract.

[2] For derivative contracts that automatically reset to zero value following a payment, the remaining maturity equals the time until the next payment. However, interest rate contracts with remaining maturities of greater than one year shall be subject to a minimum conversion factor of 0.5 percent.

2. The following derivative contracts will be excluded:

a. Exchange rate contract with an original maturity of 14 calendar days or less; and

b. Derivative contract traded on exchanges and subject to daily margin requirements.

Dated: August 24, 1995.

Eugene A. Ludwig,

Comptroller of the Currency.

FEDERAL RESERVE SYSTEM

12 CFR CHAPTER II

For the reasons set out in the joint preamble, the Board of Governors of the Federal Reserve System amends 12 CFR parts 208 and 225 as set forth below.

PART 208—MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM (REGULATION H)

1. The authority citation for part 208 continues to read as follows:

Authority: 12 U.S.C. 36, 248(a), 248(c), 321–338a, 371d, 461, 481–486, 601, 611, 1814, 1823(j), 1828(o), 1831o, 1831p-1, 3105, 3310, 3331–3351, and 3906–3909; 15 U.S.C. 78b, 78l(b), 78l(g), 78l(i), 78o-4(c)(5), 78q, 78q-1 and 78w; 31 U.S.C. 5318; 42 U.S.C. 4012a, 4104a, 4104b.

2. In part 208, appendix A is amended by revising the last paragraph of section III.C.3. and footnote 40 in the introductory text of section III.D. to read as follows:

Appendix A to Part 208—Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure

* * * * *

III. * * *

C. * * *

3. * * *

Credit equivalent amounts of derivative contracts involving standard risk obligors (that is, obligors whose loans or debt securities would be assigned to the 100 percent risk category) are included in the 50 percent category, unless they are backed by collateral or guarantees that allow them to be placed in a lower risk category.

* * * * *

D. * * * [40] * * *

* * * * *

3. In part 208, appendix A is amended by revising the section III.E. heading and section III.E. to read as follows:

* * * * *

III. * * *

E. Derivative Contracts (Interest Rate, Exchange Rate, Commodity— (including precious metals) and Equity-Linked Contracts)

1. *Scope*. Credit equivalent amounts are computed for each of the following off-balance-sheet derivative contracts:

a. Interest Rate Contracts. These include single currency interest rate swaps, basis swaps, forward rate agreements, interest rate options purchased (including caps, collars, and floors purchased), and any other instrument linked to interest rates that gives rise to similar credit risks (including when-issued securities and forward forward deposits accepted).

b. Exchange Rate Contracts. These include cross-currency interest rate swaps, forward foreign exchange contracts, currency options purchased, and any other instrument linked to exchange rates that gives rise to similar credit risks.

c. Equity Derivative Contracts. These include equity-linked swaps, equity-linked options purchased, forward equity-linked contracts, and any other instrument linked to equities that gives rise to similar credit risks.

d. Commodity (including precious metal) Derivative Contracts. These include commodity-linked swaps, commodity-linked options purchased, forward commodity-linked contracts, and any other instrument

---

[22] Derivative contracts are an exception to the general rule of applying collateral and guarantees to the face value of off-balance sheet items. The sufficiency of collateral and guarantees is determined on the basis of the credit equivalent amount of derivative contracts. However, collateral and guarantees held against a qualifying bilateral netting contract is not recognized for capital purposes unless it is legally available for all contracts included in the qualifying bilateral netting contract.

[23] Notwithstanding section 3(b)(5)(B) of this appendix A, gold contracts do not qualify for this exception.

[40] The sufficiency of collateral and guarantees for off-balance-sheet items is determined by the market value of the collateral or the amount of the guarantee in relation to the face amount of the item, except for derivative contracts, for which this determination is generally made in relation to the credit equivalent amount. Collateral and guarantees are subject to the same provisions noted under section III.B. of this appendix A.

linked to commodities that gives rise to similar credit risks.

e. Exceptions. Exchange rate contracts with an original maturity of fourteen or fewer calendar days and derivative contracts traded on exchanges that require daily receipt and payment of cash variation margin may be excluded from the risk-based ratio calculation. Gold contracts are accorded the same treatment as exchange rate contracts except that gold contracts with an original maturity of fourteen or fewer calendar days are included in the risk-based ratio calculation. Over-the-counter options purchased are included and treated in the same way as other derivative contracts.

2. *Calculation of credit equivalent amounts*. a. The credit equivalent amount of a derivative contract that is not subject to a qualifying bilateral netting contract in accordance with section III.E.3. of this appendix A is equal to the sum of (i) the current exposure (sometimes referred to as the replacement cost) of the contract; and (ii) an estimate of the potential future credit exposure of the contract.

b. The current exposure is determined by the mark-to-market value of the contract. If the mark-to-market value is positive, then the current exposure is equal to that mark-to-market value. If the mark-to-market value is zero or negative, then the current exposure is zero. Mark-to-market values are measured in dollars, regardless of the currency or currencies specified in the contract, and should reflect changes in underlying rates, prices, and indices, as well as counterparty credit quality.

c. The potential future credit exposure of a contract, including a contract with a negative mark-to-market value, is estimated by multiplying the notional principal amount of the contract by a credit conversion factor. Banks should use, subject to examiner review, the effective rather than the apparent or stated notional amount in this calculation. The credit conversion factors are:

CONVERSION FACTORS

[In percent]

Remaining maturity	Interest rate	Exchange rate and gold	Equity	Commodity, excluding precious metals	Precious metals, except gold
One year or less	0.0	1.0	6.0	10.0	7.0
Over one to five years	0.5	5.0	8.0	12.0	7.0
Over five years	1.5	7.5	10.0	15.0	8.0

d. For a contract that is structured such that on specified dates any outstanding exposure is settled and the terms are reset so that the market value of the contract is zero, the remaining maturity is equal to the time until the next reset date. For an interest rate contract with a remaining maturity of more than one year that meets these criteria, the minimum conversion factor is 0.5 percent.

e. For a contract with multiple exchanges of principal, the conversion factor is multiplied by the number of remaining payments in the contract. A derivative contract not included in the definitions of interest rate, exchange rate, equity, or commodity contracts as set forth in section III.E.1. of this appendix A, is subject to the same conversion factors as a commodity, excluding precious metals.

f. No potential future exposure is calculated for a single currency interest rate swap in which payments are made based upon two floating rate indices (a so called floating/floating or basis swap); the credit exposure on such a contract is evaluated solely on the basis of the mark-to-market value.

g. The Board notes that the conversion factors set forth above, which are based on observed volatilities of the particular types of instruments, are subject to review and modification in light of changing volatilities or market conditions.

3. *Netting*. a. For purposes of this appendix A, netting refers to the offsetting of positive and negative mark-to-market values when determining a current exposure to be used in the calculation of a credit equivalent amount. Any legally enforceable form of bilateral netting (that is, netting with a single counterparty) of derivative contracts is recognized for purposes of calculating the credit equivalent amount provided that:

i. The netting is accomplished under a written netting contract that creates a single legal obligation, covering all included individual contracts, with the effect that the bank would have a claim to receive, or obligation to pay, only the net amount of the sum of the positive and negative mark-to-market values on included individual contracts in the event that a counterparty, or a counterparty to whom the contract has been validly assigned, fails to perform due to any of the following events: default, insolvency, liquidation, or similar circumstances.

ii. The bank obtains a written and reasoned legal opinion(s) representing that in the event of a legal challenge—including one resulting from default, insolvency, liquidation, or similar circumstances—the relevant court and administrative authorities would find the bank's exposure to be the net amount under:

1. The law of the jurisdiction in which the counterparty is chartered or the equivalent location in the case of noncorporate entities, and if a branch of the counterparty is involved, then also under the law of the jurisdiction in which the branch is located;

2. The law that governs the individual contracts covered by the netting contract; and

3. The law that governs the netting contract.

iii. The bank establishes and maintains procedures to ensure that the legal characteristics of netting contracts are kept under review in the light of possible changes in relevant law.

iv. The bank maintains in its files documentation adequate to support the netting of derivative contracts, including a copy of the bilateral netting contract and necessary legal opinions.

b. A contract containing a walkaway clause is not eligible for netting for purposes of calculating the credit equivalent amount.[49]

c. A bank netting individual contracts for the purpose of calculating credit equivalent amounts of derivative contracts, represents that it has met the requirements of this appendix A and all the appropriate documents are in the bank's files and available for inspection by the Federal Reserve. The Federal Reserve may determine that a bank's files are inadequate or that a netting contract, or any of its underlying individual contracts, may not be legally enforceable under any one of the bodies of law described in section III.E.3.a.ii. of this appendix A. If such a determination is made, the netting contract may be disqualified from recognition for risk-based capital purposes or underlying individual contracts may be treated as though they are not subject to the netting contract.

d. The credit equivalent amount of contracts that are subject to a qualifying bilateral netting contract is calculated by adding (i) the current exposure of the netting contract (net current exposure) and (ii) the sum of the estimates of potential future credit exposures on all individual contracts subject to the netting contract (gross potential future exposure) adjusted to reflect the effects of the netting contract.[50]

e. The net current exposure is the sum of all positive and negative mark-to-market values of the individual contracts included in the netting contract. If the net sum of the mark-to-market values is positive, then the net current exposure is equal to that sum. If the net sum of the mark-to-market values is zero or negative, then the net current exposure is zero. The Federal Reserve may determine that a netting contract qualifies for risk-based capital netting treatment even though certain individual contracts included under the netting contract may not qualify. In such instances, the nonqualifying contracts should be treated as individual contracts that are not subject to the netting contract.

---

[49] A walkaway clause is a provision in a netting contract that permits a non-defaulting counterparty to make lower payments than it would make otherwise under the contract, or no payment at all, to a defaulter or to the estate of a defaulter, even if the defaulter or the estate of the defaulter is a net creditor under the contract.

[50] For purposes of calculating potential future credit exposure to a netting counterparty for foreign exchange contracts and other similar contracts in which notional principal is equivalent to cash flows, total notional principal is defined as the net receipts falling due on each value date in each currency.

f. Gross potential future exposure, or A_{gross} is calculated by summing the estimates of potential future exposure (determined in accordance with section III.E.2 of this appendix A) for each individual contract subject to the qualifying bilateral netting contract.

g. The effects of the bilateral netting contract on the gross potential future exposure are recognized through the application of a formula that results in an adjusted add-on amount (A_{net}). The formula, which employs the ratio of net current exposure to gross current exposure (NGR) is expressed as:

$$A_{net} = (0.4 \times A_{gross}) + 0.6(NGR \times A_{gross})$$

h. The NGR may be calculated in accordance with either the counterparty-by-counterparty approach or the aggregate approach.

i. Under the counterparty-by-counterparty approach, the NGR is the ratio of the net current exposure for a netting contract to the gross current exposure of the netting contract. The gross current exposure is the sum of the current exposures of all individual contracts subject to the netting contract calculated in accordance with section III.E.2. of this appendix A. Net negative mark-to-market values for individual netting contracts with the same counterparty may not be used to offset net positive mark-to-market values for other netting contracts with that counterparty.

ii. Under the aggregate approach, the NGR is the ratio of the sum of all of the net current exposures for qualifying bilateral netting contracts to the sum of all of the gross current exposures for those netting contracts (each gross current exposure is calculated in the same manner as in section III.E.3.h.i. of this appendix A). Net negative mark-to-market values for individual counterparties may not be used to offset net positive mark-to-market values for other counterparties.

iii. A bank must consistently use either the counterparty-by-counterparty approach or the aggregate approach to calculate the NGR. Regardless of the approach used, the NGR should be applied individually to each qualifying bilateral netting contract to determine the adjusted add-on for that netting contract.

i. In the event a netting contract covers contracts that are normally excluded from the risk-based ratio calculation—for example, exchange rate contracts with an original maturity of fourteen or fewer calendar days or instruments traded on exchanges that require daily payment and receipt of cash variation margin—a bank may elect to either include or exclude all mark-to-market values of such contracts when determining net current exposure, provided the method chosen is applied consistently.

4. *Risk Weights.* Once the credit equivalent amount for a derivative contract, or a group of derivative contracts subject to a qualifying bilateral netting contract, has been determined, that amount is assigned to the risk category appropriate to the counterparty, or, if relevant, the guarantor or the nature of any collateral.[51] However, the maximum risk weight applicable to the credit equivalent amount of such contracts is 50 percent.

5. *Avoidance of double counting.* a. In certain cases, credit exposures arising from the derivative contracts covered by section III.E. of this appendix A may already be reflected, in part, on the balance sheet. To avoid double counting such exposures in the assessment of capital adequacy and, perhaps, assigning inappropriate risk weights, counterparty credit exposures arising from the derivative instruments covered by these guidelines may need to be excluded from balance sheet assets in calculating a bank's risk-based capital ratios.

b. Examples of the calculation of credit equivalent amounts for contracts covered under this section III.E. are contained in Attachment V of this appendix A.

* * * * *

4. In appendix A to part 208, Attachments IV and V are revised to read as follows:

* * * * *

Attachment IV—Credit Conversion Factors for Off-Balance-Sheet Items for State Member Banks

100 Percent Conversion Factor

1. Direct credit substitutes. (These include general guarantees of indebtedness and all guarantee-type instruments, including standby letters of credit backing the financial obligations of other parties.)

2. Risk participations in bankers acceptances and direct credit substitutes, such as standby letters of credit.

3. Sale and repurchase agreements and assets sold with recourse that are not included on the balance sheet.

4. Forward agreements to purchase assets, including financing facilities, on which drawdown is certain.

5. Securities lent for which the bank is at risk.

50 Percent Conversion Factor

1. Transaction-related contingencies. (These include bid-bonds, performance bonds, warranties, and standby letters of credit backing the nonfinancial performance of other parties.)

2. Unused portions of commitments with an original maturity exceeding one year, including underwriting commitments and commercial credit lines.

3. Revolving underwriting facilities (RUFs), note issuance facilities (NIFs), and similar arrangements.

20 Percent Conversion Factor

Short-term, self-liquidating trade-related contingencies, including commercial letters of credit.

Zero Percent Conversion Factor

Unused portions of commitments with an original maturity of one year or less, or which are unconditionally cancellable at any time, provided a separate credit decision is made before each drawing.

Credit Conversion for Derivative Contracts

1. The credit equivalent amount of a derivative contract is the sum of the current credit exposure of the contract and an estimate of potential future increases in credit exposure. The current exposure is the positive mark-to-market value of the contract (or zero if the mark-to-market value is zero or negative). For derivative contracts that are subject to a qualifying bilateral netting contract, the current exposure is, generally, the net sum of the positive and negative mark-to-market values of the contracts included in the netting contract (or zero if the net sum of the mark-to-market values is zero or negative). The potential future exposure is calculated by multiplying the effective notional amount of a contract by one of the following credit conversion factors, as appropriate:

CONVERSION FACTORS

[In percent]

Remaining maturity	Interest rate	Exchange rate and gold	Equity	Commodity, excluding precious metals	Precious metals, except gold
One year or less	0.0	1.0	6.0	10.0	7.0
Over one to five years	0.5	5.0	8.0	12.0	7.0
Over five years	1.5	7.5	10.0	15.0	8.0

---

[51] For derivative contracts, sufficiency of collateral or guarantees is generally determined by the market value of the collateral or the amount of the guarantee in relation to the credit equivalent amount. Collateral and guarantees are subject to the same provisions noted under section III.B. of this appendix A.

For contracts subject to a qualifying bilateral netting contract, the potential future exposure is, generally, the sum of the individual potential future exposures for each contract included under the netting contract adjusted by the application of the following formula:

$$A_{net}=(0.4 \times A_{gross})+0.6(NGR \times A_{gross})$$

NGR is the ratio of net current exposure to gross current exposure.

2. No potential future exposure is calculated for single currency interest rate swaps in which payments are made based upon two floating indices, that is, so called floating/floating or basis swaps. The credit exposure on these contracts is evaluated solely on the basis of their mark-to-market value. Exchange rate contracts with an original maturity of fourteen days or fewer are excluded. Instruments traded on exchanges that require daily receipt and payment of cash variation margin are also excluded.

ATTACHMENT V—CALCULATING CREDIT EQUIVALENT AMOUNTS FOR DERIVATIVE CONTRACTS

Type of contract	Notional principal amount	Conversion factor	Potential exposure (dollars)	Mark-to-market	Current exposure (dollars)	Credit equivalent amount
(1) 120-day forward foreign exchange	5,000,000	0.01	50,000	100,000	100,000	150,000
(2) 4-year forward foreign exchange	6,000,000	0.05	300,000	−120,000	0	300,000
(3) 3-year single-currency fixed & floating interest rate swap	10,000,000	0.005	50,000	200,000	200,000	250,000
(4) 6-month oil swap	10,000,000	0.10	1,000,000	−250,000	0	1,000,000
(5) 7-year cross-currency floating & floating interest rate swap	20,000,000	0.075	1,500,000	−1,500,000	0	1,500,000
Total			2,900,000	+	300,000	3,200,000

a. If contracts (1) through (5) above are subject to a qualifying bilateral netting contract, then the following applies:

Contract	Potential future exposure	Net current exposure	Credit equivalent amount
(1)	50,000		
(2)	300,000		
(3)	50,000		
(4)	1,000,000		
(5)	1,500,000		
Total	2,900,000	+0	2,900,000

NOTE: The total of the mark-to-market values from the first table is −$1,370,000. Since this is a negative amount, the net current exposure is zero.

b. To recognize the effects of bilateral netting on potential future exposure the following formula applies:

$$A_{net}=(.4 \times A_{gross})+.6(NGR \times A_{gross})$$

c. In the above example where the net current exposure is zero, the credit equivalent amount would be calculated as follows:

$NGR=0=(0/300,000)$

$A_{net}=(0.4 \times \$2,900,000)+0.6\ (0 \times \$2,900,000)$

$A_{net}=\$1,160,000$

The credit equivalent amount is $1,160,000+0=$1,160,000.

d. If the net current exposure was a positive number, for example $200,000, the credit equivalent amount would be calculated as follows:

$NGR=.67=(\$200,000/\$300,000)$

$A_{net}=(0.4 \times \$2,900,000)+0.6(.67 \times \$2,900,000)$

$A_{net}=\$2,325,800.$

The credit equivalent amount would be $2,325,800+$200,000=$2,525,800.

* * * * *

PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (REGULATION Y)

1. The authority citation for part 225 continues to read as follows:

Authority: 12 U.S.C. 1817(j)(13), 1818, 1828(o), 1831i, 1831p–1, 1843(c)(8), 1844(b), 1972(1), 3106, 3108, 3310, 3331–3351, 3907, and 3909.

2. In part 225, appendix A is amended by revising the last paragraph of section III.C.3. and footnote 43 in the introductory text of section III.D. to read as follows:

Appendix A to Part 225—Capital Adequacy Guidelines for Bank Holding Companies: Risk-Based Measure

* * * * *

III. * * *

C. * * *

3. * * *

Credit equivalent amounts of derivative contracts involving standard risk obligors (that is, obligors whose loans or debt securities would be assigned to the 100 percent risk category) are included in the 50 percent category, unless they are backed by collateral or guarantees that allow them to be placed in a lower risk category.

* * * * *

D. * * *[43] * * *

* * * * *

3. In part 225, appendix A is amended by revising the section III.E. heading and section III.*E.* to read as follows:

* * * * *

III. * * *

E. Derivative Contracts (Interest Rate, Exchange Rate, Commodity- (including

---

[43] The sufficiency of collateral and guarantees for off-balance-sheet items is determined by the market value of the collateral or the amount of the guarantee in relation to the face amount of the item, except for derivative contracts, for which this determination is generally made in relation to the credit equivalent amount. Collateral and guarantees are subject to the same provisions noted under section III.B. of this appendix A.

precious metals) and Equity-Linked Contracts)

1. *Scope.* Credit equivalent amounts are computed for each of the following off-balance-sheet derivative contracts:

a. Interest Rate Contracts. These include single currency interest rate swaps, basis swaps, forward rate agreements, interest rate options purchased (including caps, collars, and floors purchased), and any other instrument linked to interest rates that gives rise to similar credit risks (including when-issued securities and forward forward deposits accepted).

b. Exchange Rate Contracts. These include cross-currency interest rate swaps, forward foreign exchange contracts, currency options purchased, and any other instrument linked to exchange rates that gives rise to similar credit risks.

c. Equity Derivative Contracts. These include equity-linked swaps, equity-linked options purchased, forward equity-linked contracts, and any other instrument linked to equities that gives rise to similar credit risks.

d. Commodity (including precious metal) Derivative Contracts. These include commodity-linked swaps, commodity-linked options purchased, forward commodity-linked contracts, and any other instrument linked to commodities that gives rise to similar credit risks.

e. Exceptions. Exchange rate contracts with an original maturity of fourteen or fewer calendar days and derivative contracts traded on exchanges that require daily receipt and payment of cash variation margin may be excluded from the risk-based ratio calculation. Gold contracts are accorded the same treatment as exchange rate contracts except that gold contracts with an original maturity of fourteen or fewer calendar days are included in the risk-based ratio calculation. Over-the-counter options purchased are included and treated in the same way as other derivative contracts.

2. *Calculation of credit equivalent amounts.* a. The credit equivalent amount of a derivative contract that is not subject to a qualifying bilateral netting contract in accordance with section III.E.3. of this appendix A is equal to the sum of (i) the current exposure (sometimes referred to as the replacement cost) of the contract; and (ii) an estimate of the potential future credit exposure of the contract.

b. The current exposure is determined by the mark-to-market value of the contract. If the mark-to-market value is positive, then the current exposure is equal to that mark-to-market value. If the mark-to-market value is zero or negative, then the current exposure is zero. Mark-to-market values are measured in dollars, regardless of the currency or currencies specified in the contract and should reflect changes in underlying rates, prices, and indices, as well as counterparty credit quality.

c. The potential future credit exposure of a contract, including a contract with a negative mark-to-market value, is estimated by multiplying the notional principal amount of the contract by a credit conversion factor. Banking organizations should use, subject to examiner review, the effective rather than the apparent or stated notional amount in this calculation. The credit conversion factors are:

Conversion Factors

[In percent]

Remaining maturity	Interest rate	Exchange rate and gold	Equity	Commodity, excluding precious metals	Precious metals, except gold
One year or less	0.0	1.0	6.0	10.0	7.0
Over one to five years	0.5	5.0	8.0	12.0	7.0
Over five years	1.5	7.5	10.0	15.0	8.0

d. For a contract that is structured such that on specified dates any outstanding exposure is settled and the terms are reset so that the market value of the contract is zero, the remaining maturity is equal to the time until the next reset date. For an interest rate contract with a remaining maturity of more than one year that meets these criteria, the minimum conversion factor is 0.5 percent.

e. For a contract with multiple exchanges of principal, the conversion factor is multiplied by the number of remaining payments in the contract. A derivative contract not included in the definitions of interest rate, exchange rate, equity, or commodity contracts as set forth in section III.*E.*1. of this appendix A is subject to the same conversion factors as a commodity, excluding precious metals.

f. No potential future exposure is calculated for a single currency interest rate swap in which payments are made based upon two floating rate indices (a so called floating/floating or basis swap); the credit exposure on such a contract is evaluated solely on the basis of the mark-to-market value.

g. The Board notes that the conversion factors set forth above, which are based on observed volatilities of the particular types of instruments, are subject to review and modification in light of changing volatilities or market conditions.

3. *Netting.* a. For purposes of this appendix A, netting refers to the offsetting of positive and negative mark-to-market values when determining a current exposure to be used in the calculation of a credit equivalent amount. Any legally enforceable form of bilateral netting (that is, netting with a single counterparty) of derivative contracts is recognized for purposes of calculating the credit equivalent amount provided that:

i. The netting is accomplished under a written netting contract that creates a single legal obligation, covering all included individual contracts, with the effect that the banking organization would have a claim to receive, or obligation to pay, only the net amount of the sum of the positive and negative mark-to-market values on included individual contracts in the event that a counterparty, or a counterparty to whom the contract has been validly assigned, fails to perform due to any of the following events: default, insolvency, liquidation, or similar circumstances.

ii. The banking organization obtains a written and reasoned legal opinion(s) representing that in the event of a legal challenge—including one resulting from default, insolvency, liquidation, or similar circumstances—the relevant court and administrative authorities would find the banking organization's exposure to be the net amount under:

1. The law of the jurisdiction in which the counterparty is chartered or the equivalent location in the case of noncorporate entities, and if a branch of the counterparty is involved, then also under the law of the jurisdiction in which the branch is located;

2. The law that governs the individual contracts covered by the netting contract; and

3. The law that governs the netting contract.

iii. The banking organization establishes and maintains procedures to ensure that the legal characteristics of netting contracts are kept under review in the light of possible changes in relevant law.

iv. The banking organization maintains in its files documentation adequate to support the netting of derivative contracts, including a copy of the bilateral netting contract and necessary legal opinions.

b. A contract containing a walkaway clause is not eligible for netting for purposes of calculating the credit equivalent amount.[53]

c. A banking organization netting individual contracts for the purpose of calculating credit equivalent amounts of derivative contracts represents that it has met the requirements of this appendix A and all the appropriate documents are in the banking organization's files and available for inspection by the Federal Reserve. The Federal Reserve may determine that a banking organization's files are inadequate or that a netting contract, or any of its underlying individual contracts, may not be legally enforceable under any one of the bodies of law described in section III.*E.*3.a.ii. of this appendix A. If such a determination is made, the netting contract may be disqualified from recognition for risk-based capital purposes or underlying individual contracts may be treated as though they are not subject to the netting contract.

d. The credit equivalent amount of contracts that are subject to a qualifying bilateral netting contract is calculated by adding (i) the current exposure of the netting contract (net current exposure) and (ii) the sum of the estimates of potential future credit exposures on all individual contracts subject to the netting contract (gross potential future exposure) adjusted to reflect the effects of the netting contract.[54]

e. The net current exposure is the sum of all positive and negative mark-to-market values of the individual contracts included in the netting contract. If the net sum of the mark-to-market values is positive, then the net current exposure is equal to that sum. If the net sum of the mark-to-market values is zero or negative, then the net current exposure is zero. The Federal Reserve may determine that a netting contract qualifies for risk-based capital netting treatment even though certain individual contracts included under the netting contract may not qualify. In such instances, the nonqualifying contracts should be treated as individual contracts that are not subject to the netting contract.

f. Gross potential future exposure, or A_{gross} is calculated by summing the estimates of potential future exposure (determined in accordance with section III.*E.*2 of this appendix A) for each individual contract subject to the qualifying bilateral netting contract.

g. The effects of the bilateral netting contract on the gross potential future exposure are recognized through the application of a formula that results in an adjusted add-on amount (A_{net}). The formula, which employs the ratio of net current exposure to gross current exposure (NGR), is expressed as:

$$A_{net}=(0.4\times A_{gross})+0.6(NGR\times A_{gross})$$

h. The NGR may be calculated in accordance with either the counterparty-by-counterparty approach or the aggregate approach.

i. Under the counterparty-by-counterparty approach, the NGR is the ratio of the net current exposure for a netting contract to the gross current exposure of the netting contract. The gross current exposure is the sum of the current exposures of all individual contracts subject to the netting contract calculated in accordance with section III.*E.*2. of this appendix A. Net negative mark-to-market values for individual netting contracts with the same counterparty may not be used to offset net positive mark-to-market values for other netting contracts with the same counterparty.

ii. Under the aggregate approach, the NGR is the ratio of the sum of all of the net current exposures for qualifying bilateral netting contracts to the sum of all of the gross current exposures for those netting contracts (each gross current exposure is calculated in the same manner as in section III.*E.*3.h.i. of this appendix A). Net negative mark-to-market values for individual counterparties may not be used to offset net positive current exposures for other counterparties.

iii. A banking organization must use consistently either the counterparty-by-counterparty approach or the aggregate approach to calculate the NGR. Regardless of the approach used, the NGR should be applied individually to each qualifying bilateral netting contract to determine the adjusted add-on for that netting contract.

i. In the event a netting contract covers contracts that are normally excluded from the risk-based ratio calculation—for example, exchange rate contracts with an original maturity of fourteen or fewer calendar days or instruments traded on exchanges that require daily payment and receipt of cash variation margin—an institution may elect to either include or exclude all mark-to-market values of such contracts when determining net current exposure, provided the method chosen is applied consistently.

4. *Risk Weights.* Once the credit equivalent amount for a derivative contract, or a group of derivative contracts subject to a qualifying bilateral netting contract, has been determined, that amount is assigned to the risk category appropriate to the counterparty, or, if relevant, the guarantor or the nature of any collateral.[55] However, the maximum risk weight applicable to the credit equivalent amount of such contracts is 50 percent.

5. *Avoidance of double counting.* a. In certain cases, credit exposures arising from the derivative contracts covered by section III.*E.* of this appendix A may already be reflected, in part, on the balance sheet. To avoid double counting such exposures in the assessment of capital adequacy and, perhaps, assigning inappropriate risk weights, counterparty credit exposures arising from the derivative instruments covered by these guidelines may need to be excluded from balance sheet assets in calculating a banking organization's risk-based capital ratios.

b. Examples of the calculation of credit equivalent amounts for contracts covered under this section III.*E.* are contained in Attachment V of this appendix A.

* * * * *

4. In appendix A to part 225, Attachments IV and V are revised to read as follows:

* * * * *

Attachment IV—Credit Conversion Factors for Off-Balance-Sheet Items for Bank Holding Companies

100 Percent Conversion Factor

1. Direct credit substitutes. (These include general guarantees of indebtedness and all guarantee-type instruments, including standby letters of credit backing the financial obligations of other parties.)

2. Risk participations in bankers acceptances and direct credit substitutes, such as standby letters of credit.

3. Sale and repurchase agreements and assets sold with recourse that are not included on the balance sheet.

4. Forward agreements to purchase assets, including financing facilities, on which drawdown is certain.

5. Securities lent for which the banking organization is at risk.

50 Percent Conversion Factor

1. Transaction-related contingencies. (These include bid-bonds, performance bonds, warranties, and standby letters of credit backing the nonfinancial performance of other parties.)

2. Unused portions of commitments with an original maturity exceeding one year, including underwriting commitments and commercial credit lines.

3. Revolving underwriting facilities (RUFs), note issuance facilities (NIFs), and similar arrangements.

20 Percent Conversion Factor

Short-term, self-liquidating trade-related contingencies, including commercial letters of credit.

Zero Percent Conversion Factor

Unused portions of commitments with an original maturity of one year or less, or which are unconditionally cancellable at any time, provided a separate credit decision is made before each drawing.

Credit Conversion for Derivative Contracts

1. The credit equivalent amount of a derivative contract is the sum of the current credit exposure of the contract and an estimate of potential future increases in credit exposure. The current exposure is the positive mark-to-market value of the contract (or zero if the mark-to-market value is zero or negative). For derivative contracts that are subject to a qualifying bilateral netting contract, the current exposure is, generally, the net sum of the positive and negative mark-to-market values of the contracts included in the netting contract (or zero if the net sum of the mark-to-market values is zero or negative). The potential future exposure is calculated by multiplying the effective notional amount of a contract by one of the following credit conversion factors, as appropriate:

---

[53] A walkaway clause is a provision in a netting contract that permits a non-defaulting counterparty to make lower payments than it would make otherwise under the contract, or no payment at all, to a defaulter or to the estate of a defaulter, even if the defaulter or the estate of the defaulter is a net creditor under the contract.

[54] For purposes of calculating potential future credit exposure to a netting counterparty for foreign exchange contracts and other similar contracts in which notional principal is equivalent to cash flows, total notional principal is defined as the net receipts falling due on each value date in each currency.

[55] For derivative contracts, sufficiency of collateral or guarantees is generally determined by the market value of the collateral or the amount of the guarantee in relation to the credit equivalent amount. Collateral and guarantees are subject to the same provisions noted under section III.*B.* of this appendix A.

CONVERSION FACTORS

[In percent]

Remaining maturity	Interest rate	Exchange rate and gold	Equity	Commodity, excluding precious metals	Precious metals, except gold
One year or less	0.0	1.0	6.0	10.0	7.0
Over one to five years	0.5	5.0	8.0	12.0	7.0
Over five years	1.5	7.5	10.0	15.0	8.0

For contracts subject to a qualifying bilateral netting contract, the potential future exposure is, generally, the sum of the individual potential future exposures for each contract included under the netting contract adjusted by the application of the following formula:

$A_{net}=(0.4\times A_{gross})+0.6(NGR\times A_{gross})$

NGR is the ratio of net current exposure to gross current exposure.

2. No potential future exposure is calculated for single currency interest rate swaps in which payments are made based upon two floating indices, that is, so called floating/floating or basis swaps. The credit exposure on these contracts is evaluated solely on the basis of their mark-to-market value. Exchange rate contracts with an original maturity of fourteen or fewer days are excluded. Instruments traded on exchanges that require daily receipt and payment of cash variation margin are also excluded.

ATTACHMENT V—CALCULATING CREDIT EQUIVALENT AMOUNTS FOR DERIVATIVE CONTRACTS

Type of Contract	Notional principal amount	Conversion factor	Potential exposure (dollars)	Mark-to-market	Current exposure (dollars)	Credit equivalent amount
(1) 120-day forward foreign exchange	5,000,000	.01	50,000	100,000	100,000	150,000
(2) 4-year forward foreign exchange	6,000,000	.05	300,000	−120,000	0	300,000
(3) 3-year single-currency fixed & floating interest rate swap	10,000,000	.005	50,000	200,000	200,000	250,000
(4) 6-month oil swap	10,000,000	.10	1,000,000	−250,000	0	1,000,000
(5) 7-year cross-currency floating & floating interest rate swap	20,000,000	.075	1,500,000	−1,500,000	0	1,500,000
Total			2,900,000	+	300,000	3,200,000

a. If contracts (1) through (5) above are subject to a qualifying bilateral netting contract, then the following applies:

Contract	Potential future exposure	Net current exposure	Credit equivalent amount
(1)	50,000		
(2)	300,000		
(3)	50,000		
(4)	1,000,000		
(5)	1,500,000		
Total	2,900,000	+0	2,900,000

Note: The total of the mark-to-market values from the first table is −$1,370,000. Since this is a negative amount the net current exposure is zero.

b. To recognize the effects of bilateral netting on potential future exposure the following formula applies:

$A_{net}=(0.4\times A_{gross})+0.6(NGR\times A_{gross})$

c. In the above example, where the net current exposure is zero, the credit equivalent amount would be calculated as follows:

$NGR=0=(0/300,000)$

$A_{net}=(0.4\times \$2,900,000)+.6(0\times \$2,900,000)$

$A_{net}=\$1,160,000$

The credit equivalent amount is $1,160,000+0=$1,160,000.

d. If the net current exposure was a positive number, for example $200,000, the credit equivalent would be calculated as follows:

$NGR=.67=(\$200,000/\$300,000)$

$A_{net}=(0.4\times \$2,900,000)+0.6(.67\times \$2,900,000)$

$A_{net}=\$2,325,800$

The credit equivalent amount would be $2,325,800+$200,000=$2,525,800.

By order of the Board of Governors of the Federal Reserve System, August 25, 1995.

Jennifer J. Johnson,

Deputy Secretary of the Board.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR CHAPTER III

For the reasons set forth in the joint preamble, the Board of Directors of the FDIC amends 12 CFR part 325 as follows:

PART 325—CAPITAL MAINTENANCE

1. The authority citation for part 325 continues to read as follows:

Authority: 12 U.S.C. 1815(a), 1815(b), 1816, 1818(a), 1818(b), 1818(c), 1818(t), 1819(Tenth), 1828(c), 1828(d), 1828(I), 1828(n), 1828(o), 1831o, 1835, 3907, 3909, 4808; Pub. L. 102–233, 105 Stat. 1761, 1789, 1790 (12 U.S.C. 1831n note) Pub. L. 102–242, 105 Stat. 2236, 2355, 2386 (12 U.S.C. 1828 note).

2. In appendix A to part 325, section II is amended by:

a. Revising the last sentence in section II.C. Category 3;

b. Redesignating footnotes 35 through 38 as footnotes 36 through 39;

c. Adding new footnote 35 at the end of the introductory text of section II.*D.*; and

d. Revising section II.E. to read as follows:

Appendix A to Part 325—Statement of Policy on Risk-Based Capital

* * * * *

II. * * *

C. * * *

Category 3 * * * In addition, the credit equivalent amount of derivative contracts that do not qualify for a lower risk weight are assigned to the 50 percent risk category.

* * * * *

D. * * *[35] * * *

* * * * *

E. Derivative Contracts (Interest Rate, Exchange Rate, Commodity (including precious metal) and Equity Derivative Contracts)

1. Credit equivalent amounts are computed for each of the following off-balance-sheet derivative contracts:

(a) Interest Rate Contracts

(i) Single currency interest rate swaps.

(ii) Basis swaps.

(iii) Forward rate agreements.

(iv) Interest rate options purchased (including caps, collars, and floors purchased).

(v) Any other instrument linked to interest rates that gives rise to similar credit risks (including when-issued securities and forward deposits accepted).

(b) Exchange Rate Contracts

(i) Cross-currency interest rate swaps.

(ii) Forward foreign exchange contracts.

(iii) Currency options purchased.

(iv) Any other instrument linked to exchange rates that gives rise to similar credit risks.

(c) Commodity (including precious metal) or Equity Derivative Contracts

(i) Commodity- or equity-linked swaps.

(ii) Commodity- or equity-linked options purchased.

(iii) Forward commodity- or equity-linked contracts.

(iv) Any other instrument linked to commodities or equities that gives rise to similar credit risks.

2. Exchange rate contracts with an original maturity of 14 calendar days or less and derivative contracts traded on exchanges that require daily receipt and payment of cash variation margin may be excluded from the risk-based ratio calculation. Gold contracts are accorded the same treatment as exchange rate contracts except gold contracts with an original maturity of 14 calendar days or less are included in the risk-based calculation. Over-the-counter options purchased are included and treated in the same way as other derivative contracts.

3. *Credit Equivalent Amounts for Derivative Contracts.* (a) The credit equivalent amount of a derivative contract that is not subject to a qualifying bilateral netting contract in accordance with section II.*E*.5. of this appendix A is equal to the sum of:

(i) The current exposure (which is equal to the mark-to-market value,[40] if positive, and is sometimes referred to as the replacement cost) of the contract; and

(ii) An estimate of the potential future credit exposure.

(b) The current exposure is determined by the mark-to-market value of the contract. If the mark-to-market value is positive, then the current exposure is equal to that mark-to-market value. If the mark-to-market value is zero or negative, then the current exposure is zero.

(c) The potential future credit exposure of a contract, including a contract with a negative mark-to-market value, is estimated by multiplying the notional principal amount of the contract by a credit conversion factor. Banks should, subject to examiner review, use the effective rather than the apparent or stated notional amount in this calculation. The credit conversion factors are:

CONVERSION FACTOR MATRIX

Remaining maturity	Interest rate	Exchange rate and gold	Equity	Precious metals, except gold	Other commodities
One year or less	0.0%	1.0%	6.0%	7.0%	10.0%
More than one year to five years	0.5%	5.0%	8.0%	7.0%	12.0%
More than five years	1.5%	7.5%	10.0%	8.0%	15.0%

(d) For contracts that are structured to settle outstanding exposure on specified dates and where the terms are reset such that the market value of the contract is zero on these specified dates, the remaining maturity is equal to the time until the next reset date. For interest rate contracts with remaining maturities of more than one year and that meet these criteria, the conversion factor is subject to a minimum value of 0.5 percent.

(e) For contracts with multiple exchanges of principal, the conversion factors are to be multiplied by the number of remaining payments in the contract. Derivative contracts not explicitly covered by any of the columns of the conversion factor matrix are to be treated as "other commodities."

(f) No potential future exposure is calculated for single currency interest rate swaps in which payments are made based upon two floating rate indices (so called floating/floating or basis swaps); the credit exposure on these contracts is evaluated solely on the basis of their mark-to-market values.

4. *Risk Weights and Avoidance of Double Counting.* (a) Once the credit equivalent amount for a derivative contract, or a group of derivative contracts subject to a qualifying bilateral netting agreement, has been determined, that amount is assigned to the risk category appropriate to the counterparty, or, if relevant, the guarantor or the nature of any collateral. However, the maximum weight that will be applied to the credit equivalent amount of such contracts is 50 percent.

(b) In certain cases, credit exposures arising from the derivative contracts covered by these guidelines may already be reflected, in part, on the balance sheet. To avoid double counting such exposures in the assessment of capital adequacy and, perhaps, assigning inappropriate risk weights, counterparty credit exposures arising from the types of instruments covered by these guidelines may need to be excluded from balance sheet assets in calculating a bank's risk-based capital ratio.

(c) The FDIC notes that the conversion factors set forth in section II.*E*.3. of appendix A, which are based on observed volatilities of the particular types of instruments, are subject to review and modification in light of changing volatilities or market conditions.

(d) Examples of the calculation of credit equivalent amounts for these types of contracts are contained in Table IV of this appendix A.

5. *Netting.* (a) For purposes of this appendix A, netting refers to the offsetting of positive and negative mark-to-market values when determining a current exposure to be used in the calculation of a credit equivalent amount. Any legally enforceable form of bilateral netting (that is, netting with a single counterparty) of derivative contracts is recognized for purposes of calculating the credit equivalent amount provided that:

(i) The netting is accomplished under a written netting contract that creates a single legal obligation, covering all included individual contracts, with the effect that the bank would have a claim or obligation to receive or pay, respectively, only the net amount of the sum of the positive and negative mark-to-market values on included individual contracts in the event that a counterparty, or a counterparty to whom the contract has been validly assigned, fails to perform due to default, bankruptcy, liquidation, or similar circumstances;

---

[35] The sufficiency of collateral and guarantees for off-balance-sheet items is determined by the market value of the collateral or the amount of the guarantee in relation to the face amount of the item, except for derivative contracts, for which this determination is generally made in relation to the credit equivalent amount. Collateral and guarantees are subject to the same provisions noted under section II.*B*. of this appendix A.

[40] Mark-to-market values are measured in dollars, regardless of the currency or currencies specified in the contract and should reflect changes in both underlying rates, prices and indices, and counterparty credit quality.

(ii) The bank obtains a written and reasoned legal opinion(s) representing that in the event of a legal challenge, including one resulting from default, insolvency, bankruptcy or similar circumstances, the relevant court and administrative authorities would find the bank's exposure to be such a net amount under:

(*1*) The law of the jurisdiction in which the counterparty is chartered or the equivalent location in the case of noncorporate entities and, if a branch of the counterparty is involved, then also under the law of the jurisdiction in which the branch is located;

(*2*) The law that governs the individual contracts covered by the netting contract; and

(*3*) The law that governs the netting contract.

(iii) The bank establishes and maintains procedures to ensure that the legal characteristics of netting contracts are kept under review in the light of possible changes in relevant law; and

(iv) The bank maintains in its file documentation adequate to support the netting of derivative contracts, including a copy of the bilateral netting contract and necessary legal opinions.

(b) A contract containing a walkaway clause is not eligible for netting for purposes of calculating the credit equivalent amount.[41]

(c) By netting individual contracts for the purpose of calculating its credit equivalent amount, a bank represents that it has met the requirements of this appendix A and all the appropriate documents are in the bank's files and available for inspection by the FDIC. Upon determination by the FDIC that a bank's files are inadequate or that a netting contract may not be legally enforceable under any one of the bodies of law described in paragraphs (ii)(1) through (3) of section II.E.5.(a) of this appendix A, underlying individual contracts may be treated as though they were not subject to the netting contract.

(d) The credit equivalent amount of derivative contracts that are subject to a qualifying bilateral netting contract is calculated by adding:

(i) The net current exposure of the netting contract; and

(ii) The sum of the estimates of potential future exposure for all individual contracts subject to the netting contract, adjusted to take into account the effects of the netting contract.[42]

(e) The net current exposure is the sum of all positive and negative mark-to-market values of the individual contracts subject to the netting contract. If the net sum of the mark-to-market values is positive, then the net current exposure is equal to that sum. If the net sum of the mark-to-market values is zero or negative, then the net current exposure is zero.

(f) The effects of the bilateral netting contract on the gross potential future exposure are recognized through application of a formula, resulting in an adjusted add-on amount (A_{net}). The formula, which employs the ratio of net current exposure to gross current exposure (NGR) is expressed as:

$A_{net}=(0.4\times A_{gross})+0.6(NGR\times A_{gross})$

The effect of this formula is that A_{net} is the weighted average of A_{gross}, and A_{gross} adjusted by the NGR.

(g) The NGR may be calculated in either one of two ways—referred to as the counterparty-by-counterparty approach and the aggregate approach.

(i) Under the counterparty-by-counterparty approach, the NGR is the ratio of the net current exposure of the netting contract to the gross current exposure of the netting contract. The gross current exposure is the sum of the current exposures of all individual contracts subject to the netting contract calculated in accordance with section II.E. of this appendix A.

(ii) Under the aggregate approach, the NGR is the ratio of the sum of all of the net current exposures for qualifying bilateral netting contracts to the sum of all of the gross current exposures for those netting contracts (each gross current exposure is calculated in the same manner as in section II.*E*.5.(g)(i) of this appendix A). Net negative mark-to-market values to individual counterparties cannot be used to offset net positive current exposures to other counterparties.

(iii) A bank must use consistently either the counterparty-by-counterparty approach or the aggregate approach to calculate the NGR. Regardless of the approach used, the NGR should be applied individually to each qualifying bilateral netting contract to determine the adjusted add-on for that netting contract.

3. In appendix A to part 325, Table III is amended by:

a. In the last sentence, removing "II.E.3." and adding in its place "II.*E*.5."; and

b. Revising the chart and its heading to read as follows:

Table III. * * *

* * * * *

Credit Conversion for Derivative Contracts

* * * * *

CONVERSION FACTOR MATRIX

Remaining maturity	Interest rate	Exchange rate and gold	Equity	Precious metals, except gold	Other commodities
One year or less	0.0%	1.0%	6.0%	7.0%	10.0%
More than one year to five years	0.5%	5.0%	8.0%	7.0%	12.0%
More than five years	1.5%	7.5%	10.0%	8.0%	15.0%

* * * * *

4. Appendix A to part 325, Table IV, is revised to read as follows:

TABLE IV.—CALCULATION OF CREDIT EQUIVALENT AMOUNTS FOR DERIVATIVE CONTRACTS

Potential exposure	+	Current exposure	=	Credit equivalent amount		Credit equivalent amount
Type of contract (remaining maturity)	Notional principal (dollars)	Conversion factor	Potential exposure (dollars)	Mark-to market value	Current exposure (dollars)	
(1) 120-Day Forward Foreign Exchange	5,000,000	.01	50,000	100,000	100,000	150,000
(2) 4-Year Forward Foreign Exchange	6,000,000	.05	300,000	−120,000	0	300,000
(3) 3-Year Single-Currency Fixed/Floating Interest Rate Swap	10,000,000	.005	50,000	200,000	200,000	250,000
(4) 6-Month Oil Swap	10,000,000	.10	1,000,000	−250,000	0	1,000,000
(5) 7-Year Cross-Currency Floating/Floating Interest Rate Swap	20,000,000	.075	1,500,000	−1,500,000	0	1,500,000
Total			2,900,000		300,000	3,200,000

(1) If contracts (1) through (5) above are subject to a qualifying bilateral netting contract, then the following applies:

	Potential future exposure (from above)		Net current exposure*		Credit equivalent amount
(1)	50,000				
(2)	300,000				
(3)	50,000				
(4)	1,000,000				
(5)	1,500,000				
Total	2,900,000	+	0	=	2,900,000

*The total of the mark-to-market values from above is −1,370,000. Since this is a negative amount, the net current exposure is zero.

(2) To recognize the effects of netting on potential future exposure, the following formula applies:

$A_{net}=(0.4\times A_{gross})+0.6(NGR\times A_{gross})$

(3) In the above example:

$NGR=0=(0/300,000)$
$A_{net}=(0.4\times 2,900,000)+0.6(0\times 2,900,000)$
$A_{net}=1,160,000$
Credit Equivalent Amount: 1,160,000+0=1,160,000

(4) If the net current exposure was a positive amount, for example, $200,000, the credit equivalent amount would be calculated as follows:

$NGR=.67=(200,000/300,000)$
$A_{net}=(0.4\times 2,900,000)+0.6(.67\times 2,900,000)$
$A_{net}=2,325,800$
Credit Equivalent Amount: 2,325,800+200,000=2,525,800

By order of the Board of Directors.

Dated at Washington, D.C. this 25th day of August, 1995.

Federal Deposit Insurance Corporation.
Jerry L. Langley,
Executive Secretary.

[FR Doc. 95–21608 Filed 9–1–95; 8:45 am]

BILLING CODE 4810–33–P, 6210–01–P, 6714–01–P

---

[41] For purposes of this section, a walkaway clause means a provision in a netting contract that permits a non-defaulting counterparty to make lower payments than it would make otherwise under the contract, or no payment at all, to a defaulter or to the estate of a defaulter, even if a defaulter or the estate of a defaulter is a net creditor under the contract.

[42] For purposes of calculating potential future credit exposure for foreign exchange contracts and other similar contracts in which notional principal is equivalent to cash flows, total notional principal is defined as the net receipts to each party falling due on each value date in each currency.

19 CFR Parts 10, 12, 102 and 178
Rules of Origin for Textile and Apparel Products; Final Rule

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Parts 10, 12, 102 and 178

[T.D. 95–69]

RIN 1515–AB71

Rules of Origin for Textile and Apparel Products

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document sets forth final amendments to the Customs Regulations to implement the provisions of section 334 of the Uruguay Round Agreements Act ("the Act") regarding the country of origin of textile and apparel products. Except for the purpose of identifying products of Israel, the regulations will govern the determination of the country of origin of imported textile and apparel products for purposes of laws enforced by the Customs Service. The regulations also implement the provisions of section 334 of the Act regarding the treatment of components that are cut to shape in the United States from foreign fabric, exported for assembly, and returned to the United States. This document also sets forth regulations implementing previously-enacted provisions regarding the treatment of articles assembled or produced in a Caribbean Basin Initiative beneficiary country wholly from U.S.-produced components, materials or ingredients.

EFFECTIVE DATE: Final rule effective October 5, 1995.

FOR FURTHER INFORMATION CONTACT: Phil Robins, Office of Regulations and Rulings (202–482–7029).

SUPPLEMENTARY INFORMATION:

Background

On December 8, 1994, President Clinton signed into law the Uruguay Round Agreements Act ("the Act"), Public Law 103–465, 108 Stat. 4809. Subtitle D of Title III of the Act deals with textiles and includes section 334 (codified at 19 U.S.C. 3592) which concerns rules of origin for textile and apparel products.

Paragraph (a) of section 334 provides that the Secretary of the Treasury shall prescribe rules implementing the principles contained in paragraph (b) for determining the origin of "textiles and apparel products".

Paragraph (b) of section 334 incorporates the following provisions: (1) for purposes of the customs laws and the administration of quantitative restrictions and except as otherwise provided for by statute, general rules for determining when a "textile or apparel product" originates in a country, territory, or insular possession, and is the growth, product, or manufacture of that country, territory, or insular possession; (2) special origin rules for goods classifiable under certain specified tariff headings and subheadings; (3) a "multicountry rule" for determining origin when the origin of a good cannot be determined under the preceding provisions of paragraph (b); (4) special rules governing the treatment of components that are cut to shape in the United States from foreign fabric, exported for assembly, and returned to the United States; and (5) an exception to the application of section 334 that specifically provides for the continued application of the administrative practices that were applied immediately before the enactment of the Act to determine the origin of textile and apparel products from Israel, unless such practices are modified by the mutual consent of the United States and Israel.

Paragraph (c) of section 334 provides that section 334 shall apply to goods entered, or withdrawn from warehouse, for consumption on or after July 1, 1996. Paragraph (c) further provides that section 334 shall not apply to goods entered or withdrawn from warehouse on or before January 1, 1998, that are covered by contracts of sale which were entered into, with all material terms fixed, before July 20, 1994, and which are filed, with an accompanying certification, with the Commissioner of Customs within 60 days after the date of the enactment of the Act. On January 27, 1995, Customs published in the **Federal Register** (60 FR 5457) a notice setting forth the procedures for filing such contracts and certifications.

On May 23, 1995, Customs published in the **Federal Register** (60 FR 27378) a notice of proposed rulemaking setting forth proposed amendments to the Customs Regulations to implement the rules of origin principles of section 334(b) of the Act. In that document Customs proposed to implement those provisions of section 334(b) of the Act that have broad application under the terms of the statute by amending Part 102 of the Customs Regulations (19 CFR Part 102) and by amending other regulatory provisions as necessary to conform to those Part 102 changes. With regard to the remaining provisions of section 334(b) (that is, the special rules governing the treatment of components that are cut to shape in the United States from foreign fabric, exported for assembly, and returned to the United States), Customs proposed to implement those provisions through amendments to Part 10 of the Customs Regulations (19 CFR Part 10). In addition, Customs proposed to make a number of amendments to existing regulatory provisions to ensure that those existing provisions will be consistent with the new regulatory proposals implementing section 334(b) of the Act. Finally, Customs included in the proposed Part 10 amendments a text to implement U.S. Note 2(b), Subchapter II, Chapter 98, Harmonized Tariff Schedule of the United States (HTSUS), which had not been previously treated in the regulations and which is similar in operation and effect to the cut-to-shape components provision of section 334(b)(4)(B) of the Act.

The May 23, 1995, notice of proposed rulemaking invited the public to submit comments on the proposed regulatory amendments for consideration by Customs before adoption of the proposals as a final rule. The public comment period closed on June 22, 1995.

Discussion of Comments

A total of 43 commenters responded to the solicitation of public comments in the May 23, 1995, notice of proposed rulemaking. The comments submitted, and the Customs responses thereto, are set forth below.

Effective date

Comment: Five commenters were concerned about the effective date of § 334 and the regulations implementing that statute. They stated that sometimes it is not possible to know the exact date goods will arrive in the United States. As a result, goods will be arriving after July 1, 1996, with the wrong visa. In order to avoid this problem, four commenters requested that Customs establish a grace period delaying the application of § 334 for such goods. One commenter suggested that the new regulations should only be applicable to goods shipped after July 1, 1996.

Customs Response: The effective date of § 334 is expressly set out in that statute. Section 334(c) provides that the provisions of § 334 "shall apply to goods entered, or withdrawn for warehouse, for consumption on or after July 1, 1996." Section 334(c) contains an exception to that effective date only for goods contracted for prior to July 20, 1994, if a copy of the contract containing all material terms of sale was filed with Customs within 60 days after enactment of § 334 and the goods are entered, or withdrawn from warehouse, for consumption on or before January 1, 1998.

While Customs recognizes the potential problem faced by importers receiving land or sea shipments, the statute is clear as regards the effective date of its provisions, and Customs has no authority to deviate from the express terms of the statute. As regards the suggestion for a grace period to allow the entry of goods imported with incorrect visas, that issue falls within the jurisdiction of, and thus should be more properly addressed to, the Committee for the Implementation of Textile Agreements (CITA).

Scope of "textile or apparel product"

Comment: Several commenters stated that the Customs decision to utilize the Agreement on Textiles and Clothing of the Agreement Establishing the World Trade Organization (the WTO Agreement) to determine the scope of section 334 of the Act constitutes an unauthorized broadening of that legislation. These commenters believe there is nothing to indicate that Congress meant to enlarge the scope of textiles and apparel products. The commenters noted the present position of Customs that the textile and apparel rules of origin contained in § 12.130 of the Customs Regulations (19 CFR 12.130) cover all goods classifiable in Section XI (Chapters 50 though 63), HTSUS, and any headings or subheadings outside Section XI for which a textile and apparel category number has been designated. On the other hand, these commenters noted that the Agreement on Textiles and Clothing of the WTO Agreement lists several HTSUS headings and subheadings outside Section XI which do not have a textile and apparel category number designation and which have not traditionally been considered within the class of goods known as textiles and apparel.

Customs response: Customs disagrees with the position advocated by these commenters. As noted in our discussion of this point in the May 23, 1995, notice of proposed rulemaking, the United States is a signatory to both the WTO Agreement and the Agreement on Textiles and Clothing annexed thereto. The latter agreement specifically defines the scope of "textiles and clothing" by a listing of headings and subheadings in the international Harmonized System. Customs also pointed out in the May 23, 1995, notice that three provisions of the Act outside section 334 specifically refer to the Agreement on Textiles and Clothing of the WTO Agreement. One of those provisions is section 332 which amended section 204 of the Agricultural Act of 1956 (7 U.S.C. 1854) to specifically cite the Agreement on Textiles and Clothing of the WTO Agreement as a multilateral agreement concluded under the authority of section 204. Section 204, as amended, refers to world trade in "the articles with respect to which the agreement [that is, any multilateral agreement concluded under the authority of section 204] was concluded" and authorizes the President to issue regulations governing the entry or withdrawal from warehouse of "the same articles" which are products of countries not parties to the agreement or countries to which the United States does not apply the agreement. Thus, the product coverage of section 204 and of the regulations issued thereunder is a function of the agreements concluded under section 204, including the Agreement on Textiles and Clothing of the WTO Agreement. Since section 12.130 of the Customs Regulations was promulgated under the authority of section 204, the product coverage of § 12.130 must be the same as that of section 204.

Customs believes that it would be inappropriate to conclude that Congress, in drafting section 334 of the Act, was unmindful of the adoption of the Agreement on Textiles and Clothing of the WTO Agreement and the changes to section 204 made by section 332 of the Act, with the result that the regulations mandated by section 334 of the Act could be promulgated without regard to the product coverage of the Agreement on Textiles and Clothing of the WTO Agreement. In light of the context in which section 334 of the Act was enacted, Customs believes it is more proper to conclude that Congress intended that the regulations implementing section 334 of the Act include the products covered by the Agreement on Textiles and Clothing of the WTO Agreement for the specific and limited purpose of section 334 of the Act, that is, the determination of the country of origin of textile and apparel products, while recognizing that such products would also be covered by any regulations governing entry or withdrawal from warehouse that may be separately issued under the authority of section 204. Therefore, Customs does not believe that the scope of the regulations implementing section 334 of the Act should be controlled by the traditional scope of § 12.130 of the Customs Regulations. On the contrary, it seems clear that the product coverage of § 12.130 has been effectively expanded by the adoption of the Agreement on Textiles and Clothing of the WTO Agreement and by the amendment of section 204 effected by section 332 of the Act. Accordingly, Customs believes that the May 23, 1995, notice of proposed rulemaking reflects the correct position on this issue.

Section 102.21(b)(3)—Definition of "knit to shape"

Comment: Section 334(b)(2)(B) of the Act provides that, notwithstanding the assembly rule contained in section 334(b)(1)(D), "a textile or apparel product which is knit to shape shall be considered to originate in, and be the growth, product, or manufacture of, the country, territory, or possession in which it is knit." A number of comments were submitted regarding the proposed definition of "knit to shape" in § 102.21(b)(3). That definition would require a good to have its entire exterior surface area, except for trimming around the neck and on the front opening, to be comprised of fabrics that have been knit or crocheted directly to the shape used in the good.

Two commenters suggested that Customs should maintain its present position, that is, that a good is knit to shape if any single major part has been knit to shape.

One commenter suggested that the term "components" be substituted for the term "fabrics".

Two commenters thought that the proposed definition was too rigid in that the incorporation into a garment of added components such as trim or pockets would disqualify a good from being considered "knit to shape". These commenters suggested that the definition be amended by adding the words "or in principal part" so that the definition would read ". . . with an exterior surface area wholly or in principal part comprised of one or more fabrics knitted or crocheted directly to the shape used in the good . . ."

Three commenters noted that socks, pantyhose, tights, and other hosiery articles are knit to shape and their country of origin should be determined by where they were knit with no account taken of minor operations such as closing toes. One commenter specifically referred to gussets and top elastics in pantyhose, saying that the addition of those components should not change the country of origin from the country of knitting. One commenter wanted to ensure that tube-type T-shirts (T-shirts without side seams) were not considered to be knit to shape.

Customs response: Customs cannot agree to the suggestion to maintain the present position, because that position does not accurately reflect the language of section 334(b)(2)(B) of the Act. Customs does not believe that it was the intent of Congress, in providing a special rule for knit to shape products, that a good should qualify as being knit to shape where that good contains only one panel knit or crocheted to shape.

Customs agrees that the word "fabrics" may be confusing and thus should not be used in the definition. However, Customs believes that "parts" would be preferable to "components".

Customs agrees that the proposed definition of "knit to shape" is too tightly drawn and thus unnecessarily restricts application of section 334(b)(2)(B) of the Act. However, Customs believes that the suggested additional language is imprecise and overly broad and thus would create uncertainty in the application of the definition.

Customs agrees that socks, pantyhose, tights, and other knitted hosiery goods should be covered by the definition of "knit to shape" without regard to minor finishing operations such as closing toes or adding gussets or top elastics. Whether a good such as a T-shirt is knit to shape depends on that particular good; however, Customs would not normally consider the knitting of a tube with no definitive contours to constitute the creation of a knit-to-shape good within the meaning of these origin rules.

In order to address the points made in the above comments on which Customs is in substantial agreement, the definition of "knit to shape" in § 102.21(b)(3) has been modified as set forth below to cover a good of which "50 percent or more" of the exterior surface area is formed by "major parts" knitted or crocheted directly to the shape as used in the good. The modified definition specifically excludes from consideration certain exterior features (that is, patch pockets, appliques, or the like) but includes "sewing" as one of the specified permisible minor operations. In addition, a new paragraph (b)(4) has been included in § 102.21 as set forth below to define "major parts"; this definition is essentially the same as the definition of "major parts" set forth in Note (1)b in the Section XI rules under § 102.20 of the Customs Regulations (19 CFR 102.20). Under these definitions, there should be no uncertainty concerning the treatment of hosiery and similar goods that include features such as gussets and top elastics or that have been subjected to a toe closing operation.

Section 102.21(c)(2)—Goods Consisting of Materials That Meet the § 102.21(e) Tariff Shift and Other Requirements

Comment: Under proposed § 102.21(c)(2), where a good is not wholly the product of a single country, territory, or insular possession, the country of origin of the good is the single country, territory, or insular possession in which "each foreign material" in the good underwent an applicable change in tariff classification, and/or met any other requirement, specified in § 102.21(e). One commenter noted that this is inconsistent with the §§ 102.21 (b)(3) and (b)(5) definitions of "knit to shape" and "wholly assembled", which do not require that all of the materials in the good be knit to shape or wholly assembled in a single country, territory, or insular possession. This commenter suggested that only the portion of the good which imparts the essential character to that good should be required to comply with the applicable § 102.21(e) requirements.

Customs response: Customs does not agree. This comment appears to reflect a misunderstanding of the operation of the general rule in paragraph (c)(2) and the tariff shift and other requirements under paragraph (e). In this regard Customs notes that the definitions of "knit to shape" (as modified as discussed above) and "wholly assembled" make allowances (or exceptions) for some materials so that the presence of such materials will not affect the status of the good as "knit to shape" or "wholly assembled". Those exceptions are solely for the purpose of applying any § 102.21 general rule, tariff shift rule or other requirement in which the defined terms are used; they do not affect the question of whether a requisite tariff shift rule under paragraph (e) has been met. In other words, if a good in fact consists of "knit to shape" or "wholly assembled" components and those components meet the requisite tariff shift rule, any foreign materials (as defined in § 102.1(e)) incorporated in the good at issue that are excepted from the definitions in question would also undergo the requisite tariff shift.

Section 102.21(d)—Treatment of Sets

Comment: One commenter stated that since it is necessary to determine the origin of each textile and apparel component in a set, there is little point in referring to the origin of the entire set in § 102.21(d).

Customs response: Customs believes the wording of § 102.21(d) is correct. Section 102.21(d) covers situations in which two or more of the components in the set were produced in different countries. If all the components in a set are produced in a single country, there would be no need for separate determination of the origin of any textile or apparel components of the set.

Assembly

Comment: With regard to the definition of "wholly assembled" in § 102.21(b)(5), one commenter argued that Customs should be more specific concerning which subassemblies will not preclude a good from being "wholly assembled". This commenter suggested that this could be done by including in the regulation a specific listing of the assemblies that will qualify a good to be "wholly assembled", in the same manner as the Government of Hong Kong has done. In the alternative, this commenter suggested that the joining of all components of a good in one country would always be at least as important as the joining of components into a subassembly and, therefore, under the second multicountry rule (§ 102.21(c)(5), the last place where important processing occurs) the country of origin would be the place where the components of the good are assembled.

Customs response: Customs does not believe that it would be appropriate to have a rigid set of rules in the context mentioned by this commenter. In the opinion of Customs it would be preferable to address these interpretive issues on a case-by-case basis through the Customs ruling program whereby prospective importers may obtain appropriate advance guidance according to their particular needs. This will result in the eventual development of a body of decisions for the general guidance of importers based on consideration of a multitude of factors that cannot be anticipated at the present time. As regards the alternative suggestion of this commenter, Customs agrees with this interpretation and notes that the comment does not appear to warrant a change to the regulatory texts.

Fabric

Comment: Six commenters expressed the view that substantial finishing of greige fabric (*e.g.* dyeing and/or printing combined with other finishing processes) results in a new article of commerce and, therefore, the country of origin of such fabric should be the country in which those processes were performed. One commenter made essentially the same argument for yarns.

Customs response: Sections 334(b)(1)(B) and 334(b)(1)(C) of the Act set forth specific rules for determining the country of origin of yarns and fabric. Section 334(b)(1)(B) states that the country of origin of staple yarns is the country where the yarns were spun and that the country of origin of filament yarns is the country where the filaments were extruded. Section 334(b)(1)(C)

states that the country of origin of a fabric is the country in which the constituent fibers, filaments, or yarns were transformed (that is, into a fabric) by a fabric-making process. The language of §§ 334(b)(1)(B) and 334(b)(1)(C) is clear and unambiguous. Accordingly, it would be inappropriate for Customs to prescribe rules that would lead to results inconsistent with that statutory language.

Subheadings 5810.91–5810.99—Embroidery

Comment: Three commenters took issue with the proposed tariff shift rule for subheadings 5810.91 through 5810.99. They stated that it is unreasonable for the United States to consider the country of origin of embroidery in the piece or in strips to be the country where the base fabric was formed. These commenters argued that the embroidering of fabrics is a highly complex operation that requires a great deal of skill and expense. They also pointed out that the HTSUS refers to embroidery as "embroidery" or as "Embroidery in the piece, [or] in strips," not as "fabric".

Customs response: Section 334(b)(1)(C) of the Act provides that the country of origin of a fabric is the country where the fabric was created by a fabric-making process. It is the view of Customs that embroidery, whether in the piece or in strips, is fabric. It is commonly known in the United States as embroidered fabric. If Customs were to agree that embroidery cannot be considered to be a fabric because the relevant tariff provisions do not specifically refer to embroidery as fabric, Customs would have to take the same position in regard to other fabrics which are not specifically referred to as such, *i.e.* netting, lace, gauze, felt, nonwovens, terry toweling, labels in the piece, belting, and hosepiping, all of which are imported as fabrics.

Customs also notes that the industry definition of piece goods supports the conclusion that embroidery in the piece is fabric. *Fairchild's Dictionary of Textiles,* 1970, defines "Piece Goods" as "a general term for fabrics woven in lengths to be sold by the yard in retail stores. May also mean all goods which are not cut" (at page 435). *The Modern Textile and Apparel Dictionary,* 4th Edition, 1973, defines "Piece Goods" as "Cloth sold by the yard or some definite cut length" (at page 422). Both dictionaries define "Piece" as standard lengths of woven fabric or cloth.

Although the commenters would have Customs distinguish embroidery in strips from other forms of embroidery, Customs believes that embroideries on base fabrics in strips are just as much fabrics as those strips without embroidery. Customs perceives no distinction between embroidering wide lengths of fabric and embroidering fabric strips. In either case, the process starts with fabric and ends with embroidered fabric.

The terms of § 334(b)(1)(C) of the Act are clear and Customs has no choice but to adhere to the express wording of that provision—the country of origin of embroidered fabric classifiable in subheadings 5810.91 through 5810.99 is the country in which the base fabric was formed by a fabric-making process.

However, in reviewing this area, Customs has determined that the proposed tariff shift rule for subheadings 5810.91 through 5810.99 does not accurately effectuate § 334(b)(1)(C) of the Act. In this regard Customs notes that under the proposed rule the country of origin of the embroidered fabric would not always be the country where the base fabric was formed. This is because the proposed rule refers to "A change to subheading 5810.91 through 5810.99 * * *", and where fabric is embroidered in a second country there has been no change to embroidered fabric in the country where the fabric was formed. Accordingly, the proposed tariff shift rule for subheadings 5810.91 through 5810.99 has been divided into three rules as set forth below with the first rule intended to address this problem (with regard to the other two rules, see the discussion below regarding embroidered badges, emblems, and similar articles).

Subheading 5810.10—Embroidery Without Visible Ground

Comment: A commenter complained that the country of origin of embroidery without a visible ground, classifiable in subheading 5810.10, should be the country where the embroidery was applied to the base fabric. The tariff shift rule proposed for subheading 5810.10 provided for a change to that subheading from any other heading.

Customs response: Customs agrees that the rule for subheading 5810.10 does not accomplish what was intended. The proposed tariff shift rule in question reflected the application of § 334(b)(3)(A) of the Act, the first multicountry rule. Customs believes that embroidery without a visible ground is a fabric that is not made by a fabric-making process because it comes into commercial existence after a base fabric is embroidered and the base fabric is removed. In the opinion of Customs, the most important manufacturing process in the production of embroidery without a visible ground is the application of the embroidery and not the removal of the ground. Accordingly, Customs intentionally required a shift from another heading so that the production prior to the removal of the base fabric would confer origin, because a change within the heading would allow the removal of the base fabric to confer origin. However, the proposed rule was inadvertently drafted to refer to a change "to subheading 5810.10". Thus, if fabric from country A were embroidered in country B and the ground fabric removed in country C, the tariff shift rule would not be satisfied and one would be required to go to the next applicable general rule to determine origin. In this circumstance, country B would properly be determined to be the country of origin by application of § 102.21(c)(4). However, Customs believes that for purposes of transparency, it is desirable, to the greatest extent possible, for a country of origin to be determinable by application of the rules referred to in § 102.21(c)(2) and contained in § 102.21(e) rather than by application of the multicountry rules of §§ 102.21(c)(4) and (5). Accordingly, the rule specified for subheading 5810.10 has been modified as set forth below to reflect these considerations.

Embroidered Badges, Emblems, and Similar Articles

Comment: One commenter expressed the view that embroidered badges or emblems are not fabrics and should not be treated as such.

Customs response: Customs agrees that badges, emblems, and similar embroidered articles are not imported in the form of fabric. However, the country of origin of badges, emblems, and similar embroidered articles is not necessarily where those goods were embroidered. Pursuant to § 334(b)(1)(D) of the Act, the country of origin of badges, emblems, and the like, which consist of two or more layers of fabric assembled together by gluing, sewing, or other means, is the country where the good was wholly assembled. A new second rule has been included in the rules for subheadings 5810.91 through 5810.99 as set forth below to reflect the application of § 334(b)(1)(D).

However, badges, emblems, and similar embroidered articles which are processed in more than one country and which do not have multiple components present certain other problems. Customs believes that there is a difference between emblems created by embroidery and printed emblems on which embroidery may be present merely to enhance the printed design.

Where embroidery forms the entire design and, therefore, creates the emblem, the determination of the country of origin of the emblem is governed by the first multicountry rule (§ 334(b)(3) of the Act and § 102.21(c)(4) of the regulations). With reference to the requirements of § 334(b)(3) and § 102.21(c)(4), the embroidery is the most important manufacturing process in the production of the good and, as a result, the country of origin of that good is the country, territory, or insular possession where the embroidery was created. However, where embroidery does not create the motif, but is present merely to enhance a printed design on the emblem, Customs does not believe that application of the embroidery should confer origin.

Customs has not been able to draft a tariff shift rule that adequately distinguishes between the two types of badges, emblems, and similar embroidered articles mentioned above. Accordingly, it was decided to make the tariff shift rule applicable to such goods (the proposed rule for subheadings 5810.91 through 5810.99, which is set forth below in modified form as the third rule for those subheadings) difficult to satisfy, that is, by requiring all manufacturing, from the forming of the fabric forward, to be done in a single country, territory, or insular possession. Thus, if an emblem, badge, etc., is produced in country A from fabric formed in country B, the tariff shift rule will not be satisfied and, in the hierarchy of rules, the next applicable rule is the first multicountry rule, § 102.21(c)(4), which provides that the country of origin will be the country, territory, or insular possession where the most important manufacturing process occurred. While Customs believes it is preferable in principle to employ the objective, specific tariff shift or related rules under §§ 102.21(c) (2) and (e), in some instances, as here, Customs has been unable to avoid a certain degree of subjectivity in the application of the appropriate rule of origin.

Application of § 334(b)(2)(A)—Special Rules for Specified Headings and Subheadings

Comment: Section 334(b)(2)(A) of the Act provides that the origin of goods classifiable under certain specified tariff provisions "shall be determined under subparagraph (A), (B), or (C) of paragraph (1), as appropriate". The May 23, 1995, notice of proposed rulemaking stated that since all of the headings and subheadings specified in § 334(b)(2)(A) cover goods that have been advanced beyond yarn or fabric form, the origin of those goods should be determined by the yarns (in the case of heading 5609) or the fabrics which comprise the good. Three commenters concurred with that position, stating that the majority of time, labor, and cost is in the greige fabric. One commenter specifically stated that § 334(b)(2)(A) is clear that the origin of the goods classifiable under the listed headings and subheadings is determined by the origin of the fabric from which the goods are constructed. However, six commenters objected to taking a restrictive interpretation of the words "as appropriate" and one, without mentioning the interpretation of those words, stated that the origin of goods of subheading 9404.90 should be determined by where they are assembled.

One commenter noted that the proposed tariff shift rule for subheading 9404.90, which covers comforters, quilts, etc., would result in the goods having their country of origin in the country where those goods are assembled. The commenter stated that this would be contrary to the terms of § 334(b)(2)(A) under which, notwithstanding the general assembly rule in § 334(b)(1)(D), the country of origin of goods classifiable under any of the headings or subheadings listed in that section will be the country that produced the yarns or fabrics, as appropriate, from which those goods are made.

Customs response: After reviewing all of the comments and the commenters' suggestions as to how the words "as appropriate" should be interpreted, Customs adheres to the position set forth in the May 23, 1995, notice. No commenter in opposition to the position proposed by Customs offered an acceptable legal alternative to that position. While several of the commenters cited judicial case law concerning the interpretation of statutes, all of their citations and quotations involved statutory language that was not the same as, or similar to, the language of § 334(b)(2)(A). Moreover, none of the interpretations suggested by those commenters adequately addressed the fact that all of the headings and subheadings listed in § 334(b)(2)(A) provide for goods made from materials and that, therefore, the most reasonable interpretation of that section is that it is *appropriate* to determine the origin of those goods according to § 334(b)(1)(B), the rule for yarns, or § 334(b)(1)(C), the rule for fabrics.

The comment regarding the tariff shift rule for subheading 9404.90 prompted Customs to review the proposed tariff shift rules for all of the headings and subheadings listed in § 334(b)(2)(A). That review disclosed that Customs erred in the proposal for subheading 9404.90 and in the proposed rules for the other 15 listed headings or subheadings because, in each instance, the proposed rule both referred to a change to the named heading or subheading and included a proviso regarding the process by which the change must result. For example, if a fabric is woven in one country and wholly assembled in a second country into a good subject to § 334(b)(2)(A), the required tariff shift change does not occur in the country in which the fabric was formed (in other words, the change does not result from a fabric-making process as prescribed in the applicable proposed rule). As a result and as the above commenter noted, the terms of the tariff shift rule would not be met and the next relevant general rule, § 102.21(c)(3)(ii), would cause the country of origin of that good to be the country of assembly. Therefore, each of the rules for the headings and subheadings listed in § 334(b)(2)(A) has been modified as set forth below to provide that the country of origin of a good classifiable under those headings or subheadings is either the country of origin of the yarns (in the case of heading 5609) or of the fabric (for the rest of the listed headings or subheadings) from which those goods are made.

In addition, since the clear intent of § 334(b)(2)(A) is to eliminate assembly from conferring origin in the case of goods classifiable under any of the provisions listed in that section, § 102.21(c)(3)(ii) has been modified as set forth below to preclude assembly from automatically conferring origin on those goods when the § 102.21(c)(2) tariff shift or other requirements are not met (*e.g.* when a good is made from fabrics originating in different countries).

Multicountry rules

Comment: Eight commenters stated, in one fashion or another, that the proposed multicountry rules (§§ 102.21(c) (4) and (5)) should be made clearer, either by adding definitions or by adding examples.

Customs response: Given the wide variety of textile and apparel products and the multiplicity of manufacturing processes involving those products, Customs is adverse to defining the terms "most important assembly or manufacturing process" and "important assembly or manufacturing process" which form the basis of the multicountry rules. Customs recognizes that the concern underlying the submitted comments revolves around the meaning of the word "important", and, in fact, during the development of the proposed regulatory texts Customs decided to eschew use of definitions calling for comparisons of such criteria as time involved in processing, labor and other costs of processing, complexity, and value added. Customs views the word "important" as referring to the relative significance of the manufacturing or assembly processes involved in the production of a good; thus, the word "important," has the same connotation as the word "meaningful". Accordingly, in determining relative importance, a manufacturing operation in a low wage country is no less important to the production of a good than that same manufacturing operation in a high wage country, nor is a manufacturing operation done by an expensive machine more important than that same manufacturing operation done by hand.

There is only one example, discussed elsewhere in this document, on which Customs has reached a definitive conclusion regarding relative importance of manufacturing processes: forming a fabric is a more important process than cutting that fabric. Decisions on all other comparisons must be made on a case-by-case basis according to the specific facts presented. Customs recognizes that this may appear to leave importers with a degree of uncertainty. However, Customs believes that a large proportion of multicountry processing is unnecessary from a manufacturing standpoint and thus is done more for quota-engineering purposes, that is, for the primary purpose of avoiding quantitative restraints imposed by international agreements. Moreover, if a manufacturer or importer has any doubts about which country, territory, or insular possession is the country of origin of its goods, that party may obtain appropriate advance guidance under the Customs ruling program.

Cutting and Products of Insular Possessions

Comment: The May 23, 1995, notice of proposed rulemaking stated that Customs believes cutting was not intended to play any role in determining the country of origin of textile and apparel products. That statement raised the question, both within Customs and among members of the importing public, of whether Customs would continue the current tariff treatment of garments that are cut and assembled in insular possessions.

General Note 3(a)(iv), HTSUS, provides that goods of insular possessions are excepted from duty if, among other requirements, they are "manufactured or produced in any such possession from materials the growth, product, or manufacture" of that insular possession. Customs has ruled that this portion of General Note 3(a)(iv) may be satisfied by *two* significant manufacturing or processing operations. Under existing rulings, the cutting of fabric into garment parts and the assembly of those parts into garments are normally considered by Customs to constitute the required two significant manufacturing or processing operations that would qualify the garments for duty-free treatment.

One commenter wanted Customs to retain cutting as a process that confers origin. Nine commenters were concerned that the language in the May 23, 1995, notice of proposed rulemaking meant that garments cut and assembled in insular possessions would no longer be eligible for duty-free entry. Two commenters argued that cutting is equal to, or more important than, forming fabric while three commenters stated that cutting fabric is a very small part of producing a garment. One commenter referred specifically to the importance, for origin purposes, of the high degree of precision and expense involved in cutting components for men's tailored clothing. Many of the commenters pointed out that there is no evidence to indicate that Congress intended to change the tariff status of apparel goods cut and assembled in insular possessions. Other commenters noted that General Note 3(a)(iv) was intended by Congress to benefit insular possessions and should, therefore, be liberally construed. A number of commenters were concerned that Customs would never consider cutting when determining the origin of textiles and apparel products and expressed their disagreement with that position. Several commenters noted that there is nothing in § 334 of the Act that requires Customs to ignore entirely the role cutting plays in the manufacture of textile and apparel articles. Some commenters also pointed out that General Note 3(a)(iv) concerns preferential duty status of goods rather than the determination of their origin.

Customs response: Customs concurs with most of the commenters on this issue that, since § 334 deals with the country of origin of textile and apparel products and not with value requirements for purposes of duty preferences, § 334 will not affect either foreign material value determinations required under General Note 3(a)(iv) or value-added requirements contained in other statutory provisions. Accordingly, Customs intends to continue its current tariff treatment of garments which are cut and assembled in insular possessions.

Nevertheless, Customs believes that the position that cutting is not an origin-conferring process is correct for *country of origin* determinations. While cutting is a process which may be considered to be an important manufacturing process, as between the production of fabric and the cutting of that fabric to shape, fabric production is considered to be the more important process. The intent of Congress to not allow cutting of fabric to confer origin is demonstrated by the adoption of § 334(b)(4) of the Act which continues the present tariff treatment of components cut to shape in the United States from imported fabric and sent abroad for assembly: if Congress had intended the cutting of components from fabric to confer origin, there would have been no need for § 334(b)(4). Thus, when applying the first multicountry rule (§ 102.21(c)(4), which provides that the most important assembly or manufacturing process will determine the country of origin), the country which produced the fabric will be determined to be the country of origin of unassembled components merely cut from fabric in another country.

Components Cut in the United States

Comment: Three commenters wrote in support of the continuation of the treatment accorded goods by subheading 9802.00.80, HTSUS.

Customs response: These comments reflect some apparent confusion regarding the overall effect of § 334 of the Act in this area.

Under the present rules of origin, cutting apparel components from fabric (regardless of the country of origin of that fabric) will usually result in the cut components being considered a product of the country where the cutting is performed. Thus, when foreign fabric is imported into the United States and cut into apparel components, the United States is the country of origin of those components. Accordingly, if apparel components cut from foreign fabric in the United States are exported for assembly and the assembled goods are then imported into the United States, pursuant to subheading 9802.00.80, HTSUS, duty may be assessed on the full value of the imported goods less the cost or value of the components cut in the United States.

As previously noted, Congress adopted § 334(b)(4) because §§ 334(b) (1) and (2) of the Act in effect eliminate cutting as a process conferring origin for most purposes. Under § 334(b)(4), where goods are assembled abroad from components cut in the United States from foreign fabric (even though under the § 334 rules the cut components are not products of the United States and the assembling country is the country of origin), the assembled goods, when imported into the United States, will continue to receive the same duty treatment presently accorded to such goods under subheading 9802.00.80, HTSUS. Thus, because § 334(b)(4) serves to preserve a tariff treatment that otherwise would no longer be available under the § 334 origin rules, this statutory provision in effect addresses the concern of these commenters.

World Trade Organization and NAFTA Obligations

Comment: Twelve commenters believed that the proposed rules are in violation of the Uruguay Round Agreement and the obligations the United States agreed to when it became a member of the World Trade Organization (WTO). While some commenters questioned why the United States is making significant changes in its textile origin rules at the same time that the WTO is embarking on a project involving the development of international uniform rules of origin, two other commenters expressed the view that the proposed rules will simplify the WTO work on harmonized rules of origin. Several commenters stated that the new origin rules will change the applicable textile restraint categories for many products, creating problems in the administration of international textile agreements.

A number of commenters referred to the obligations the United States incurred under the North American Free Trade Agreement (NAFTA). Two commenters made the general statement that § 334(b)(2)(A) of the Act was contrary to the NAFTA, and a third commenter made the same statement but with specific reference to Article 309(1) of the NAFTA. Four commenters noted that the proposed rules conflicted with the NAFTA marking rules, and one of these commenters argued that Canada has a reasonable expectation that established marking rules will continue in effect. Another commenter observed that the proposed rules will cause some goods now subject to Tariff Preference Levels (TPLs) under the NAFTA to no longer be considered products of a NAFTA party, with the result that those goods will not be allowed entry into the United States under a TPL.

One commenter stated that if the country in which down comforters are assembled is not the country of origin of those goods, in order to avoid an unfair advantage for Canadian and Mexican comforter manufacturers, Customs should clearly state that the NAFTA preference rules do not govern goods processed in a NAFTA country that fall within the scope of § 334 of the Act.

Another commenter thought that the wording of proposed § 102.21 is ambiguous concerning the application of § 102.19 (the "NAFTA preference override" provision) to "originating goods" under the NAFTA.

Customs response: In discussing § 334, both the President's Statement of Administrative Action and the relevant Senate report stated that § 334 would more accurately reflect where the most significant production activity occurs, would help combat transshipment and other circumvention of textile and apparel quotas, would bring the U.S. rules of origin in line with rules employed by other major textile and apparel importing countries and by U.S. trading partners, and would advance the goal of harmonizing international rules of origin set out in the WTO Agreement on Rules of Origin. It was also noted that, pursuant to Article 4 of the Agreement on Textiles and Clothing which provides for consultations in the case of a disruption of trade or an adverse affect on market access, the Administration will undertake consultations "where appropriate".

It is not the function of Customs to determine whether the enactment of § 334 constitutes a breach of either the WTO Agreement or the NAFTA. Both agreements have specified procedures for signatory parties to follow if it is believed that another signatory has violated its commitments. Accordingly, the question of whether there has been a violation of a provision of the WTO Agreement on Rules of Origin or of the NAFTA is a matter to be decided within the framework of those agreements.

With regard to the comment on down comforters, Customs is unable to accede to this commenter's request. Section 334(b)(1) of the Act opens with the words "[e]xcept as otherwise provided for by statute," and Customs followed this statutory language by including in the first sentence of proposed § 102.21(a) the words "except as otherwise provided for by statute"; thus, origin rules contained in other statutes will take precedence over the origin rules in § 334 and in § 102.21 of the regulations. The NAFTA rules of origin for duty preference purposes are set forth in 19 U.S.C. 3332 and in General Note 12, HTSUS. Accordingly, if, as in the case of down comforters, the NAFTA origin rule for duty preference purposes is less restrictive than the corresponding rule contained in § 334 of the Act and in § 102.21 of the regulations, then the NAFTA origin rule will control for NAFTA duty preference purposes.

As regards the alleged ambiguity between § 102.19 and § 102.21, Customs does not believe that any change to the proposed regulatory texts is appropriate in this regard. Section 102.19 was originally adopted in a strictly NAFTA context in order to clarify the relationship between the Part 102 NAFTA marking rules and the separate rules of origin that apply under the NAFTA for duty preference purposes. Proposed § 102.21(c) included § 102.19 among the existing Part 102 provisions that may apply for purposes of the § 102.21(c) general rules because a failure to mention § 102.19 in this context might incorrectly give the impression, contrary to the express terms of § 334 as discussed in the preceding comment response, that the rules of origin applicable to "originating goods" under the NAFTA do not take precedence over the § 102.21 provisions.

Miscellaneous Goods

Comment: One commenter stated that the manufacture of goods classifiable in headings 5604–5609, 5808–5809, 5901–5903, 5905–5908 and 5910 and in subheading 5911.90 requires special equipment and knowledge and, therefore, the tariff shift rule for those provisions should prescribe a change from any other heading.

Customs response: The proposed tariff shift rules for each of the mentioned headings and subheading were carefully drafted to reflect the express requirements of § 334(b) of the Act. Most of those headings mentioned by the commenter provide specifically for yarns, cordage, braids, or fabrics, and § 334(b) is very specific regarding the rules for determining the origin of those goods. In some instances, the proposed tariff shift rule was drafted to reflect that assembly (under § 334(b)(1)(D) of the Act) confers origin. In a very few instances (*e.g.* fishing nets of heading 5608), the tariff shift rule was drafted to reflect the application of the first multicountry rule (§ 334(b)(3)(A) of the Act and § 102.21(c)(4) of the regulations). To do as this commenter suggested would cause the application of the tariff shift rules to result, for some goods, in determinations of origin not consistent with the requirements of § 334(b).

Miscellaneous Issues

Comment: Five commenters referred to the substantial transformation concept, noting variously that there is no definition of "substantial transformation" in the proposed regulatory texts, that the proposed texts

do not comply with accepted principles of what constitutes a substantial transformation, or that the United States should retain substantial transformation as the basis for determining the origin of imported goods. One commenter also noted that there is no value-added criterion. In addition, while two commenters noted that the rules in § 334 of the Act are more similar to the rules followed by the rest of the industrialized nations than are the present rules applied by Customs, another commenter noted that § 334(b)(2)(A) of the Act (the special rule of origin listing 16 provisions which are not subject to the assembly rule) is not consistent with rules applied by Canada. One commenter pointed out that § 334 conflicts with past practices and rulings of Customs. Finally, one commenter expressed concern that the rules of origin contained in § 334 are inconsistent with the Federal Trade Commission Regulation in 16 CFR 303.33(a)(3) which requires that each textile product made in the United States in whole or part of imported materials contain a label disclosing those facts.

Customs response: Section 334 is a Congressionally enacted statute and, as such, it prevails over all prior U.S. regulations, rulings, and judicial decisions that are inconsistent with its terms, and it applies without regard to the laws of other countries. It provides an objective set of rules to be applied without reference to the substantial transformation concept, which is the present basis applied generally by the courts and by Customs for determining the origin of merchandise processed in more than one country. While § 334 may represent the view of Congress concerning how it believes the substantial transformation principle should be applied, when the origin provisions of § 334 take effect on July 1, 1996, they will effectively remove from consideration the question of whether or not a processing or manufacturing operation constitutes a substantial transformation for most Customs and related purposes. With regard to the cited Federal Trade Commission regulations, Customs would also note that those regulations are promulgated under separate statutory authority applicable to that agency and, therefore, the issue of the alleged inconsistency is not a matter that can be unilaterally addressed by Customs in the regulations implementing § 334.

Other Changes to the Regulatory Texts

In addition to the changes to the proposed regulatory texts discussed above in connection with the public comments, Customs has determined that a number of other changes should be made to the proposed texts based on further internal review. These changes are discussed below.

Section 10.26(c)(3)

In proposed new § 10.26, paragraph (a) implemented the provisions of U.S. Note 2(b), Subchapter II, Chapter 98, HTSUS, paragraph (b) implemented the provisions of § 334(b)(4)(B) of the Act, and paragraph (c) set forth definitions or rules for purposes of the section as a whole. In paragraph (c)(3) which set forth a rule regarding entry into the commerce of a non-beneficiary country, reference was made to a "component" (which is the term used in § 334(b)(4)(B) of the Act) but references to a "material" and an "ingredient" (which are terms used in U.S. Note 2(b), Subchapter II, Chapter 98, HTSUS) were inadvertently omitted. The text of § 10.26(c)(3) as set forth below has been modified to correct this oversight.

Section 102.21(b)(2)—Definition of "fabric-making process"

In reviewing proposed § 102.21(b)(2), Customs discovered that fabric strips were inadvertently omitted from the list of materials which may comprise a fabric. It has been the experience of Customs that a fabric may be formed (usually woven) with narrow fabric strips. While fabric strips are not a material specifically mentioned in § 334(b)(1)(C) of the Act, Customs is of the view that the formation of a fabric from fabric strips is a fabric-making process and should be treated as such in the regulations, in particular for purposes of applying those § 102.21(e) tariff shift or other requirements that specifically refer to a "fabric-making process". Customs also notes that the first multicountry rule (§ 334(b)(3)(A) of the Act and § 102.21(c)(4) of the regulations) would yield the same result because, in the case of a fabric, the most important manufacturing process is the actual forming of the fabric. Accordingly, § 102.21(b)(2) as set forth below has been modified to reflect that a fabric-making process may include a manufacturing operation which begins with fabric strips.

Subheading 5808.10

Customs inadvertently omitted the word "other" before the word "heading" in the first proposed tariff shift rule for subheading 5808.10. In order to eliminate any possible confusion and conform the wording to that used in other tariff shift rules, the first tariff shift for subheading 5808.10 as set forth below has been modified accordingly.

Heading 5904

Since lamination of preexisting components is considered to be an assembly, the proposed tariff shift rule for heading 5904 provided a meaningful rule for goods that have been manufactured by a lamination process. However, that tariff shift rule did not provide for goods of heading 5904 that have been produced by means of a coating process. In view of the various manufacturing processes used in the production of such coated goods and the differences in materials that may be used, Customs does not believe that it is feasible to craft a tariff shift rule for those goods. Consequently, the country of origin of goods of heading 5904 produced by means of a coating process must be determined by application of the multicountry rules in §§ 102.21(c)(4) and (5). Accordingly, the proposed tariff shift rule for heading 5904 has been replaced by two rules as set forth below to reflect these considerations, the first rule covering goods that are wholly assembled by means of a laminating process and the second rule covering all other goods.

Subheadings 5911.10–5911.40

On further review of the proposed tariff shift rule for subheadings 5911.10 through 5911.40, Customs found that no provision was made for application of the assembly rule (§ 334(b)(1)(D) of the Act) to goods classifiable in subheadings 5911.31 through 5911.32 fitted with linking devices. Customs notes in this regard that the combining of linking devices with textile fabrics or felts may constitute an assembly, in which case § 334(b)(1)(D) would apply to determine the country of origin. Accordingly, the proposed tariff shift rule for subheadings 5911.10 through 5911.40 has been modified as set forth below (1) by setting forth a rule separately both for subheading 5911.10 through 5911.20 and for subheading 5911.40 and with no change in substance and (2) by including two separate rules for subheadings 5911.31 through 5911.32, the first of which follows the originally proposed rule and the second of which is intended to cover goods incorporating such linking devices.

Subheading 5911.90

On further review of the three tariff shift rules proposed for subheading 5911.90, Customs has determined that the first and third rules overlap in terms of goods covered. The first rule is for "goods of yarn, rope, cord, braid" and thus includes made up articles which, using normal classification principles, would be considered to be "of" the named materials. The third rule specifically covers goods which are made up articles. To eliminate this overlap, the third tariff shift rule for subheading 5911.90 has been modified as set forth below by the addition of an exception clause for goods subject to the first tariff shift rule.

Headings 6501 and 6503

Headings 6501 and 6503 cover goods of felt. When the proposed tariff shift rules for these headings were drafted, Customs inadvertently included, in the exception clause in the second tariff shift rule for each heading, a reference to heading 5603 which covers nonwovens; the reference should have been to heading 5602 which provides for felts. Accordingly, the second tariff shift rule for each of these headings has been modified as set forth below to correct this error.

Issuance of Rulings During the Interim Period

Although this final rule action is effective 30 days after its publication in the **Federal Register**, Customs notes that the final regulatory provisions set forth herein that implement the provisions of section 334 of the Act apply to goods entered, or withdrawn from warehouse, for consumption on or after July 1, 1996, in keeping with the effective date set forth in section 334. Customs recognizes that the realities of the textile and apparel trade often require sourcing and production decisions long in advance of the ultimate date of importation of the goods. In order to ensure that prospective importers may have appropriate advance guidance regarding the Customs interpretation of the final regulations set forth in this document, Customs has determined that the Customs ruling program should accommodate ruling requests regarding those regulatory texts during the interim period between the effective date of this final rule action and the applicability date for the regulatory texts rather than only after the section 334(b) provisions take effect. Accordingly, Customs will accept requests for rulings on the regulatory texts set forth herein, submitted in accordance with the provisions of Part 177 of the Customs Regulations (19 CFR Part 177), commencing 30 days after the date of publication of this final rule document in the **Federal Register**.

Conclusion

Accordingly, based on the comments received and the analysis of those comments and based on the additional considerations as discussed above, Customs believes that the proposed regulatory amendments should be adopted as a final rule with certain changes thereto as discussed above and set forth below. As a consequence of the adoption of these substantive regulatory amendments, this document also includes an appropriate update of the list of information collection approvals contained in § 178.2 of the Customs Regulations (19 CFR 178.2).

Executive Order 12866

This document does not meet the criteria for a "significant regulatory action" as specified in E.O. 12866.

Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that the amendments will not have a significant economic impact on a substantial number of small entities. Accordingly, the amendments are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Paperwork Reduction Act

The collection of information requirements contained in these final regulations have been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507) under control number 1515–0207. The estimated average annual burden associated with this collection is 1.5 hours per respondent or recordkeeper. Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the U.S. Customs Service, Paperwork Management Branch, Room 6316, 1301 Constitution Avenue NW., Washington, D.C. 20229, or the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, D.C. 20503.

Drafting Information

The principal author of this document was Francis W. Foote, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects

19 CFR Part 10

Customs duties and inspection, Imports, Reporting and recordkeeping requirements.

19 CFR Part 12

Customs duties and inspection, Labeling, Marking, Reporting and recordkeeping requirements, Textiles and textile products.

19 CFR Part 102

Customs duties and inspections, Imports, Reporting and recordkeeping requirements, Rules of origin, Trade agreements.

19 CFR Part 178

Collections of information, Paperwork requirements, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, for the reasons stated above, Parts 10, 12, 102 and 178, Customs Regulations (19 CFR Parts 10, 12, 102 and 178), are amended as set forth below.

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. The general authority citation for Part 10 and the specific authority citations for §§ 10.191–10.198 continue to read, and a specific authority citation for §§ 10.25 and 10.26 is added to read, as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States), 1321, 1481, 1484, 1498, 1508, 1623, 1624, 3314;

* * * * *

Sections 10.25 and 10.26 also issued under 19 U.S.C. 3592;

* * * * *

Sections 10.191–10.198 also issued under 19 U.S.C. 2701 *et seq.*;

* * * * *

2. Sections 10.25 and 10.26 are added under the heading "Articles assembled abroad with United States components" to read as follows:

§ 10.25 Textile components cut to shape in the United States and assembled abroad.

Where a textile component is cut to shape (but not to length, width, or both) in the United States from foreign fabric and exported to another country, territory, or insular possession for assembly into an article that is then returned to the United States and entered, or withdrawn from warehouse, for consumption on or after July 1, 1996, the value of the textile component shall not be included in the dutiable value of the article. For purposes of determining whether a reduction in the dutiable value of an imported article may be allowed under this section:

(a) The terms "textile component" and "fabric" have reference only to goods covered by the definition of "textile or apparel product" set forth in § 102.21(b)(4) of this chapter;

(b) The operations performed abroad on the textile component shall conform to the requirements and examples set forth in § 10.16 insofar as they may be applicable to a textile component; and

(c) The valuation and documentation provisions of §§ 10.17, 10.18, 10.21 and 10.24 shall apply.

§ 10.26 Articles assembled or processed in a beneficiary country in whole of U.S. components or ingredients; articles assembled in a beneficiary country from textile components cut to shape in the United States.

(a) No article (except a textile article, apparel article, or petroleum, or any product derived from petroleum, provided for in heading 2709 or 2710, Harmonized Tariff Schedule of the United States (HTSUS)) shall be treated as a foreign article or as subject to duty:

(1) If the article is assembled or processed in a beneficiary country in whole of fabricated components that are a product of the United States; or

(2) If the article is processed in a beneficiary country in whole of ingredients (other than water) that are a product of the United States; and

(3) Neither the fabricated components, materials or ingredients after their exportation from the United States, nor the article before its importation into the United States, enters into the commerce of any foreign country other than a beneficiary country.

(b) No article (except a textile or apparel product) entered, or withdrawn from warehouse, for consumption on or after July 1, 1996, shall be treated as a foreign article or as subject to duty:

(1) If the article is assembled in a beneficiary country in whole of textile components cut to shape (but not to length, width, or both) in the United States from foreign fabric; or

(2) If the article is assembled in a beneficiary country in whole of both textile components described in paragraph (b)(1) of this section and components that are products of the United States; and

(3) Neither the components after their exportation from the United States, nor the article before its importation into the United States, enters into the commerce of any foreign country other than a beneficiary country.

(c) For purposes of this section:

(1) The terms "textile article", "apparel article", and "textile or apparel product" cover all articles, other than footwear and parts of footwear, that are classifiable in an HTSUS subheading which carries a textile and apparel category number designation;

(2) The term "beneficiary country" has the meaning set forth in § 10.191(b)(1); and

(3) A component, material, ingredient, or article shall be deemed to have not entered into the commerce of any foreign country other than a beneficiary country if:

(i) The component, material, or ingredient was shipped directly from the United States to a beneficiary country, or the article was shipped directly to the United States from a beneficiary country, without passing through the territory of any non-beneficiary country; or

(ii) Where the component, material, ingredient, or article passed through the territory of a non-beneficiary country while en route to a beneficiary country or the United States:

(A) The invoices, bills of lading, and other shipping documents pertaining to the component, material, ingredient, or article show a beneficiary country or the United States as the final destination and the component, material, ingredient, or article was neither sold at wholesale or retail nor subjected to any processing or other operation in the non-beneficiary country; or

(B) The component, material, ingredient, or article remained under the control of the customs authority of the non-beneficiary country and was not subjected to operations in that non-beneficiary country other than loading and unloading and activities necessary to preserve the component, material, ingredient, or article in good condition.

3. In § 10.195, paragraphs (d) and (e) are redesignated as paragraphs (e) and (f) respectively and a new paragraph (d) is added to read as follows:

§ 10.195 Country of origin criteria.

* * * * *

(d) *Textile components cut to shape in the U.S.* The percentage referred to in paragraph (c) of this section may be attributed in whole or in part to the cost or value of a textile component that is cut to shape (but not to length, width, or both) in the U.S. (including the Commonwealth of Puerto Rico) from foreign fabric and exported to a beneficiary country for assembly into an article that is then returned to the U.S. and entered, or withdrawn from warehouse, for consumption on or after July 1, 1996. For purposes of this paragraph, the terms "textile component" and "fabric" have reference only to goods covered by the definition of "textile or apparel product" set forth in § 102.21(b)(4) of this chapter.

* * * * *

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The authority citation for Part 12 continues to read in part as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States (HTSUS)), 1624;

* * * * *

Sections 12.130 and 12.131 also issued under 7 U.S.C. 1854;

* * * * *

2. In § 12.130:

a. the last sentence of paragraph (b) is amended by adding after "Mexico" the words ", and the origin of textile and apparel products covered by § 102.21 of this chapter,";

b. the last sentence of the introductory text of paragraph (d) is amended by adding after "Mexico" the words ", and the origin of textile and apparel products covered by § 102.21 of this chapter,"; and

c. the introductory text of paragraph (e)(1) is amended by adding after "Mexico" the words "and except for textile and apparel products".

PART 102—RULES OF ORIGIN

1. The authority citation for Part 102 is revised to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States), 1624, 3314, 3592.

2. Section 102.0 is amended by removing the word "This" at the beginning of the first sentence and adding, in its place, the words "Except in the case of goods covered by § 102.21, this" and by adding a sentence at the end to read as follows:

§ 102.0 Scope.

* * * The rules for determining the country of origin of textile and apparel products set forth in § 102.21 apply for the foregoing purposes and for the other purposes stated in that section.

3. Section 102.11 is amended by adding an introductory paragraph before paragraph (a) to read as follows:

§ 102.11 General rules.

The following rules shall apply for purposes of determining the country of origin of imported goods other than textile and apparel products covered by § 102.21.

* * * * *

4. Section 102.21 is added to read as follows:

§ 102.21 Textile and apparel products.

(a) *Applicability.* Except for purposes of determining whether goods originate in Israel or are the growth, product, or manufacture of Israel, and except as otherwise provided for by statute, the provisions of this section shall control the determination of the country of origin of imported textile and apparel products for purposes of the Customs laws and the administration of quantitative restrictions. The provisions of this section shall apply to goods entered, or withdrawn from warehouse, for consumption on or after July 1, 1996.

(b) *Definitions.* The following terms shall have the meanings indicated when used in this section:

(1) *Country of origin.* The term country of origin means the country, territory, or insular possession in which a good originates or of which a good is the growth, product, or manufacture.

(2) *Fabric-making process. A fabric-making process* is any manufacturing operation that begins with polymers, fibers, filaments (including strips), yarns, twine, cordage, rope, or fabric strips and results in a textile fabric.

(3) *Knit to shape.* The term *knit to shape* applies to any good of which 50 percent or more of the exterior surface area is formed by major parts that have been knitted or crocheted directly to the shape used in the good, with no consideration being given to patch pockets, appliques, or the like. Minor cutting, trimming, or sewing of those major parts will not affect the determination of whether a good is "knit to shape."

(4) *Major parts.* The term *major parts* means integral components of a good but does not include collars, cuffs, waistbands, plackets, pockets, linings, paddings, trim, accessories, or similar parts.

(5) *Textile or apparel product.* A *textile or apparel product* is any good classifiable in Chapters 50 through 63, Harmonized Tariff Schedule of the United States (HTSUS), and any good classifiable under one of the following HTSUS headings or subheadings:

3005.90
3921.12.15
3921.13.15
3921.90.2550
4202.12.40–80
4202.22.40–80
4202.32.40–95
4202.92.15–30
4202.92.60–90
6405.20.60
6406.10.77
6406.10.90
6406.99.15
6501
6502
6503
6504
6505.90
6601.10–99
7019.10.15
7019.10.28
7019.20
8708.21
8804
9113.90.40
9404.90.10
9404.90.80–95
9502.91
9612.10.9010

(6) *Wholly assembled.* The term "wholly assembled" when used with reference to a good means that all components, of which there must be at least two, preexisted in essentially the same condition as found in the finished good and were combined to form the finished good in a single country, territory, or insular possession. Minor attachments and minor embellishments (for example, appliques, beads, spangles, embroidery, buttons) not appreciably affecting the identity of the good, and minor subassemblies (for example, collars, cuffs, plackets, pockets), will not affect the status of a good as "wholly assembled" in a single country, territory, or insular possession.

(c) *General rules.* Subject to paragraph (d) of this section, the country of origin of a textile or apparel product shall be determined by sequential application of paragraphs (c) (1) through (5) of this section and, in each case where appropriate to the specific context, by application of the additional requirements or conditions of §§ 102.12 through 102.19 of this part.

(1) The country of origin of a textile or apparel product is the single country, territory, or insular possession in which the good was wholly obtained or produced.

(2) Where the country of origin of a textile or apparel product cannot be determined under paragraph (c)(1) of this section, the country of origin of the good is the single country, territory, or insular possession in which each foreign material incorporated in that good underwent an applicable change in tariff classification, and/or met any other requirement, specified for the good in paragraph (e) of this section.

(3) Where the country of origin of a textile or apparel product cannot be determined under paragraph (c) (1) or (2) of this section:

(i) If the good was knit to shape, the country of origin of the good is the single country, territory, or insular possession in which the good was knit; or

(ii) Except for goods of heading 5609, 5807, 5811, 6213, 6214, 6301 through 6306, and 6308, and subheadings 6209.20.5040, 6307.10, 6307.90, and 9404.90, if the good was not knit to shape and the good was wholly assembled in a single country, territory, or insular possession, the country of origin of the good is the country, territory, or insular possession in which the good was wholly assembled.

(4) Where the country of origin of a textile or apparel product cannot be determined under paragraph (c) (1), (2) or (3) of this section, the country of origin of the good is the single country, territory, or insular possession in which the most important assembly or manufacturing process occurred.

(5) Where the country of origin of a textile or apparel product cannot be determined under paragraph (c) (1), (2), (3) or (4) of this section, the country of origin of the good is the last country, territory, or insular possession in which an important assembly or manufacturing process occurred.

(d) *Treatment of sets.* Where a good classifiable in the HTSUS as a set includes one or more components that are textile or apparel products and a single country of origin for all of the components of the set cannot be determined under paragraph (c) of this section, the country of origin of each component of the set that is a textile or apparel product shall be determined separately under paragraph (c) of this section.

(e) *Specific rules by tariff classification.* The following rules shall apply for purposes of determining the country of origin of a textile or apparel product under paragraph (c)(2) of this section:

HTSUS	Tariff shift and/or other requirements
3005.90	If the good contains pharmaceutical substances, a change to subheading 3005.90 from any other heading; or If the good does not contain pharmaceutical substances, a change to subheading 3005.90 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5601 through 5603, 5801 through 5804, 5806, 5809, 5903, 5906 through 5907, and 6001 through 6002.
3921.12.15	A change to subheading 3921.12.15 from any other heading.
3921.13.15	A change to subheading 3921.13.15 from any other heading.
3921.90.2550	A change to subheading 3921.90.2550 from any other heading.
4202.12.40–4202.12.80	A change to subheading 4202.12.40 through 4202.12.80 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
4202.22.40–4202.22.80	A change to subheading 4202.22.40 through 4202.22.80 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
4202.32.40–4202.32.95	A change to subheading 4202.32.40 through 4202.32.95 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
4202.92.15–4202.92.30	A change to subheading 4202.92.15 through 4202.92.30 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
4202.92.60–4202.92.90	A change to subheading 4202.92.60 through 4202.92.90 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
5001–5002	A change to heading 5001 through 5002 from any other chapter.
5003	A change to heading 5003 from any other heading, provided that the change is the result of garnetting. If the change to heading 5003 is not the result of garnetting, the country of origin of the good is the country of origin of the good prior to its becoming waste.
5004–5006	(1) If the good is of staple fibers, a change to heading 5004 through 5006 from any heading outside that group, provided that the change is the result of a spinning process. (2) If the good is of filaments, a change to heading 5004 through 5006 from any heading outside that group, provided that the change is the result of an extrusion process.
5007	A change to heading 5007 from any other heading, provided that the change is the result of a fabric-making process.
5101–5103	A change to heading 5101 through 5103 from any other chapter.
5104	A change to heading 5104 from any other heading.
5105	A change to heading 5105 from any other chapter.
5106–5110	A change to heading 5106 through 5110 from any heading outside that group, provided that the change is the result of a spinning process.
5111–5113	A change to heading 5111 through 5113 from any heading outside that group, provided that the change is the result of a fabric-making process.
5201	A change to heading 5201 from any other chapter.
5202	A change to heading 5202 from any other heading, provided that the change is the result of garnetting. If the change to heading 5202 is not the result of garnetting, the country of origin of the good is the country of origin of the good prior to its becoming waste.
5203	A change to heading 5203 from any other chapter.
5204–5207	A change to heading 5204 through 5207 from any heading outside that group, provided that the change is the result of a spinning process.
5208–5212	A change to heading 5208 through 5212 from any heading outside that group provided the change is the result of a fabric-making process.
5301–5305	(1) Except for waste, a change to heading 5301 through 5305 from any other chapter. (2) For waste, a change to heading 5301 through 5305 from any heading outside that group, provided that the change is the result of garnetting. If the change is not the result of garnetting, the country of origin of the good is the country of origin of the good prior to its becoming waste.
5306–5307	A change to heading 5306 through 5307 from any heading outside that group, provided that the change is the result of a spinning process.
5308	(1) Except for paper yarns, a change to heading 5308 from any other heading, provided that the change is the result of a spinning process. (2) For paper yarns, a change to heading 5308 from any other heading, except from heading 4707, 4801 through 4806, 4811, and 4818.
5309–5311	A change to heading 5309 through 5311 from any heading outside that group, provided that the change is the result of a fabric-making process.
5401–5406	A change to heading 5401 through 5406 from any other heading, provided that the change is the result of an extrusion process.
5407–5408	A change to heading 5407 through 5408 from any heading outside that group, provided that the change is the result of a fabric-making process.
5501–5502	A change to heading 5501 through 5502 from any other chapter, provided that the change is the result of an extrusion process.
5503–5504	A change to heading 5503 through 5504 from any other chapter, except from Chapter 54.
5505	A change to heading 5505 from any other heading, provided that the change is the result of garnetting. If the change is not the result of garnetting, the country of origin of the good is the country of origin of the good prior to its becoming waste.
5506–5507	A change to heading 5506 through 5507 from any other chapter, except from Chapter 54.
5508–5511	A change to heading 5508 through 5511 from any heading outside that group, provided that the change is the result of a spinning process.
5512–5516	A change to heading 5512 through 5516 from any heading outside that group, provided that the change is the result of a fabric-making process.
5601	(1) A change to wadding of heading 5601 from any other heading, except from heading 5105, 5203, and 5501 through 5507. (2) A change to flock, textile dust, mill neps, or articles of wadding, of heading 5601 from any other heading or from wadding of heading 5601.
5602–5603	A change to heading 5602 through 5603 from any heading outside that group, provided that the change is the result of a fabric-making process.
5604	(1) If the textile component is of continuous filaments, including strips, a change of those filaments, including strips, to heading 5604 from any other heading, except from heading 5001 through 5007, 5401 through 5408, and 5501 through 5502, and provided that the change is the result of an extrusion process.

HTSUS	Tariff shift and/or other requirements
	(2) If the textile component is of staple fibers, a change of those fibers to heading 5604 from any other heading, except from heading 5004 through 5006, 5106 through 5110, 5204 through 5207, 5306 through 5308, and 5508 through 5511, and provided that the change is the result of a spinning process.
5605–5606	If the good is of continuous filaments, including strips, a change of those filaments, including strips, to heading 5605 through 5606 from any other heading, except from heading 5001 through 5007, 5401 through 5408, and 5501 through 5502, and provided that the change is the result of an extrusion process; or If the good is of staple fibers, a change of those fibers to heading 5605 through 5606 from any other heading, except from heading 5106 through 5110, 5204 through 5207, 5306 through 5308, and 5508 through 5511, and provided that the change is the result of a spinning process.
5607	If the good is of continuous filaments, including strips, a change of those filaments, including strips, to heading 5607 from any other heading, except from heading 5001 through 5007, 5401 through 5406, and 5501 through 5511, and provided that the change is the result of an extrusion process; or If the good is of staple fibers, a change of those fibers to heading 5607 from any other heading, except from heading 5106 through 5110, 5204 through 5207, 5306 through 5308, and 5508 through 5511, and provided that the change is the result of a spinning process.
5608	(1) A change to netting of heading 5608 from any other heading, except from heading 5804, and provided that the change is the result of a fabric-making process. (2) A change to fishing nets or other made up nets of heading 5608: (a) If the good does not contain nontextile attachments, from any other heading, except from heading 5804 and 6002, and provided that the change is the result of a fabric-making process; or (b) If the good contains nontextile attachments, from any heading, including a change from another good of heading 5608, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
5609	(1) If of continuous filaments, including strips, the country of origin of a good classifiable under heading 5609 is the country, territory, or insular possession in which those filaments, including strips, were extruded. (2) If of staple fibers, the country of origin of a good classifiable under heading 5609 is the country, territory, or insular possession in which those fibers were spun into yarns.
5701–5705	A change to heading 5701 through 5705 from any other chapter.
5801–5803	A change to heading 5801 through 5803 from any other heading, including a heading within that group, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, and 6002, and provided that the change is the result of a fabric-making process.
5804.10	A change to subheading 5804.10 from any other heading, except from heading 5608, and provided that the change is the result of a fabric-making process.
5804.21–5804.30	A change to subheading 5804.21 through 5804.30 from any other heading, provided that the change is the result of a fabric-making process.
5805	A change to heading 5805 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, and 5512 through 5516, and provided that the change is the result of a fabric-making process.
5806	A change to heading 5806 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, and 5801 through 5803, and provided that the change is the result of a fabric-making process.
5807	The country of origin of a good classifiable under heading 5807 is the country, territory, or insular possession in which the fabric comprising the good was formed by a fabric-making process.
5808.10	(1) If the good is of continuous filaments, including strips, a change of those filaments, including strips, to subheading 5808.10 from any other heading, except from heading 5001 through 5007, 5401 through 5406, 5501 through 5502, and 5604 through 5607, and provided that the change is the result of an extrusion process. (2) If the good is of staple fibers, a change of those fibers to heading 5808.10 from any other heading, except from heading 5106 through 5113, 5204 through 5212, 5306 through 5311, 5401 through 5408, 5508 through 5516, and 5604 through 5607, and provided that the change is the result of a spinning process.
5808.90	(1) For ornamental fabric trimmings, a change to subheading 5808.90 from any other chapter, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, and 5512 through 5516, and provided that the change is the result of a fabric-making process. (2) For nonfabric ornamental trimmings: (a) If the trimming is of continuous filaments, including strips, a change to subheading 5808.90 from any other heading, except from heading 5001 through 5007, 5401 through 5408, 5501 through 5502, and 5604 through 5607, and provided that the change is the result of an extrusion process; or (b) If the trimming is of staple fibers, a change to subheading 5808.90 from any other heading, except from heading 5106 through 5113, 5204 through 5212, 5306 through 5311, 5401 through 5408, 5508 through 5516, and 5604 through 5607, and provided that the change is the result of a spinning process. (3) For tassels, pompons and similar articles: (a) If the good has been wholly assembled in a single country, territory, or insular possession, a change to subheading 5808.90 from any other heading; (b) If the good has not been wholly assembled in a single country, territory, or insular possession and the good is of staple fibers, a change to subheading 5808.90 from any other heading, except from heading 5004 through 5006, 5106 through 5110, 5204 through 5207, 5306 through 5308, and 5508 through 5511, and 5604 through 5607, and provided that the change is the result of a spinning process; or (c) If the good has not been wholly assembled in a single country, territory, or insular possession and the good is of filaments, including strips, a change to subheading 5808.90 from any other heading, except from heading 5001 through 5007, 5401 through 5406, and 5501 through 5502, and provided that the change is the result of an extrusion process.
5809	A change to heading 5809 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5801 through 5802, 5804, and 5806, and provided that the change is the result of a fabric-making process.

HTSUS	Tariff shift and/or other requirements
5810.10	The country of origin of goods of subheading 5810.10 is the single country, territory, or insular possession in which the embroidery was performed.
5810.91–5810.99	(1) For embroidered fabric, the country of origin is the country, territory, or insular possession in which the fabric was produced by a fabric-making process. (2) For embroidered badges, emblems, insignia, and the like, comprised of multiple components, the country of origin is the place of assembly, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (3) For embroidered badges, emblems, insignia, and the like, not comprised of multiple components, a change to subheading 5810.91 through 5810.99 from any other chapter, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5608, 5903, 5907, 6001 through 6002, and provided that the change is the result of a fabric-making process.
5811	The country of origin of a good classifiable under heading 5811 is the country, territory, or insular possession in which the fabric comprising the good was formed by a fabric-making process.
5901–5903	A change to heading 5901 through 5903 from any other heading, including a heading within that group, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5803, 5806, 5808, and 6002, and provided that the change is the result of a fabric-making process.
5904	(1) For goods that have been wholly assembled by means of a lamination process, a change to heading 5904 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) For all other goods, the country of origin of the good will be determined by application of § 102.21(c)(4) or, if the country of origin cannot be determined under that section, by application of § 102.21(c)(5).
5905	A change to heading 5905 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5603, 5803, 5806, 5808, and 6002, and provided that the change is the result of a fabric-making process.
5906–5907	A change to heading 5906 through 5907 from any other chapter, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5803, 5806, 5808, and 6002, and provided that the change is the result of a fabric-making process.
5908	(1) Except for yarns, twine, cord, and braid, a change to heading 5908 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5801 through 5802, 5806, 5808, and 6001 through 6002. (2) For yarns, twine, cord, and braid: (a) If the good is of continuous filaments, including strips, a change to heading 5908 from any other heading, except from heading 5001 through 5007, 5401 through 5406, and 5501 through 5502, and provided that the change is the result of an extrusion process; or (b) If the good is of staple fibers, a change to heading 5908 from any other heading, except from heading 5106 through 5110, 5204 through 5207, 5306 through 5308, and 5508 through 5511, and 5605 through 5607, and provided that the change is the result of a spinning process.
5909	A change to heading 5909 from any other chapter, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5603, 5801 through 5804, 5806, 5808, and 6001 through 6002, and provided that the good does not contain armor or accessories of nontextile material and provided that the change is the result of a fabric-making process; or A change to textile hosepiping with armor or accessories of nontextile material, of heading 5909, from any heading, including a change from another good of heading 5909, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
5910	(1) For belts and belting of braid, rope, or cord: (a) If the good is of continuous filaments, including strips, a change of those filaments, including strips, to heading 5910 from any other heading, except from heading 5001 through 5006, 5401 through 5406, and 5501 through 5502, and provided that the change is the result of an extrusion process; or (b) If the good is of staple fibers, a change of those fibers to heading 5910 from any other heading, except from heading 5106 through 5110, 5204 through 5207, 5306 through 5308, and 5508 through 5511, and provided that the change is the result of a spinning process. (2) For fabric belting and belts, not braids and not combined with nontextile components, whether or not reinforced with metal or other material, a change to heading 5910 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5804, 5806, 5808 through 5809, and 6001 through 6002, and provided the change is the result of a fabric-making process. (3) For fabric belts, including belts of braided materials, combined with nontextile components, whether or not reinforced with metal or other material, a change to heading 5910 from any heading, including a change from another good of heading 5910, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
5911.10–5911.20	A change to subheading 5911.10 through 5911.20 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5804, 5806, and 6001 through 6002, and provided that the change is the result of a fabric-making process.
5911.31–5911.32	(1) For goods not combined with nontextile components, a change to subheading 5911.31 through 5911.32 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5804, 5806, and 6001 through 6002, and provided that the change is the result of a fabric-making process. (2) For goods combined with nontextile components, a change to subheading 5911.31 through 5911.32 from any other heading, provided that the change is the result of the good being wholly assembled in single country, territory, or insular possession.

HTSUS	Tariff shift and/or other requirements
5911.40	A change to subheading 5911.40 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5804, 5806, and 6001 through 6002, and provided that the change is the result of a fabric-making process.
5911.90	(1) For goods of yarn, rope, cord, or braid: (a) If the good is of continuous filaments, including strips, a change of those filaments, including strips, to subheading 5911.90 from any other heading, except from heading 5001 through 5006, 5401 through 5406, and 5501 through 5502, and provided that the change is the result of an extrusion process; or (b) If the good is of staple fibers, a change of those fibers to subheading 5911.90 from any other heading, except from heading 5106 through 5110, 5204 through 5207, 5306 through 5308, and 5508 through 5511, and provided that the change is the result of a spinning process. (2) If the good is a fabric, a change to subheading 5911.90 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5804, 5806, 5809, and 6001 through 6002, and provided that the change is the result of a fabric-making process. (3) If the good is a made up article other than a good of yarn, rope, cord, or braid, a change to subheading 5911.90 from any heading, including a change from another good of heading 5911, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
6001–6002	A change to heading 6001 through 6002 from any heading outside that group, provided that the change is the result of a fabric-making process.
6101–6117	(1) If the good is not knit to shape and consists of two or more component parts, a change to an assembled good of heading 6101 through 6117 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good is not knit to shape and does not consist of two or more component parts, a change to heading 6101 through 6117 from any heading outside that group, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5806, 5809 through 5811, 5903, 5906 through 5907, and 6001 through 6002, and subheading 6307.90, and provided that the change is the result of a fabric-making process. (3) If the good is knit to shape, a change to heading 6101 through 6117 from any heading outside that group, provided that the knit-to-shape components are knit in a single country, territory, or insular possession.
6201–6208	(1) If the good consists of two or more component parts, a change to an assembled good of heading 6201 through 6208 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more component parts, a change to heading 6201 through 6208 from any heading outside that group, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5806, 5809 through 5811, 5903, 5906 through 5907, and 6217, and subheading 6307.90, and provided that the change is the result of a fabric-making process.
6209.10.0000–6209.20.5035	(1) If the good consists of two or more component parts, a change to an assembled good of subheading 6209.10.0000 through 6209.20.5035 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more component parts, a change to subheading 6209.10.0000 through 6209.20.5035 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5806, 5809 through 5811, 5903, 5906 through 5907, and 6217, and subheading 6307.90, and provided that the change is the result of a fabric-making process.
6209.20.5040	The country of origin of a good classifiable in subheading 6209.20.5040 is the country, territory, or insular possession in which the fabric comprising the good was formed by a fabric-making process.
6209.20.5045–6209.90.9000	(1) If the good consists of two or more component parts, a change to an assembled good of subheading 6209.20.5045 through 6209.90.9000 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more component parts, a change to subheading 6209.20.5045 through 6209.90.9000 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5806, 5809 through 5811, 5903, 5906 through 5907, and 6217, and subheading 6307.90, and provided that the change is the result of a fabric-making process.
6210–6212	(1) If the good consists of two or more component parts, a change to an assembled good of heading 6210 through 6212 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more component parts, a change to heading 6210 through 6212 from any heading outside that group, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5806, 5809 through 5811, 5903, 5906 through 5907, 6001 through 6002, and 6217, and subheading 6307.90, and provided that the change is the result of a fabric-making process.
6213–6214	The country of origin of a good classifiable under heading 6213 through 6214 is the country, territory, or insular possession in which the fabric comprising the good was formed by a fabric-making process.
6215–6217	(1) If the good consists of two or more component parts, a change to an assembled good of heading 6215 through 6217 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more component parts, a change to heading 6215 through 6217 from any heading outside that group, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5801 through 5806, 5809 through 5811, 5903, 5906 through 5907, and 6217, and subheading 6307.90, and provided that the change is the result of a fabric-making process.

HTSUS	Tariff shift and/or other requirements
6301–6306	The country of origin of a good classifiable under heading 6301 through 6306 is the country, territory, or insular possession in which the fabric comprising the good was formed by a fabric-making process.
6307.10	The country of origin of a good classifiable under subheading 6307.10 is the country, territory, or insular possession in which the fabric comprising the good was formed by a fabric-making process.
6307.20	A change to subheading 6307.20 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
6307.90	The country of origin of a good classifiable under subheading 6307.90 is the country, territory, or insular possession in which the fabric comprising the good was formed by a fabric-making process.
6308	The country of origin of a good classifiable under heading 6308 is the country, territory, or insular possession in which the woven fabric component of the good was formed by a fabric-making process.
6309–6310	The country of origin of a good classifiable under heading 6309 through 6310 is the country, territory, or insular possession in which the good was last collected and packaged for shipment.
6405.20.60	A change to subheading 6405.20.60 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
6406.10.77	(1) If the good consists of two or more components, a change to subheading 6406.10.77 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more components, a change to subheading 6406.10.77 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5608, 5801 through 5804, 5806, 5808 through 5810, 5903, 5906 through 5907, and 6001 through 6002, and provided that the change is the result of a fabric-making process.
6406.10.90	(1) If the good consists of two or more components, a change to subheading 6406.10.90 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more components, a change to subheading 6406.10.90 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5608, 5801 through 5804, 5806, 58[illegible]8 thr[illegible]10, 5903, 5906 through 5907, and 6001 through 6002, and provided that the change is the result of a fabric-making process.
6406.99.15	(1) If the good consists of two or more components, a change to subheading 6406.9[illegible] any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more components, a change to subheading 6406.99.15 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5608, 5801 through 5804, 5806, 5808 through 5810, 5903, 5906 through 5907, and 6001 through 6002, and provided that the change is the result of a fabric-making process.
6501	(1) If the good consists of two or more components, a change to heading 6501 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more components, a change to heading 6501 from any other heading, except from heading 5602, and provided that the change is the result of a fabric-making process.
6502	(1) If the good consists of two or more components, a change to heading 6502 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more components, a change to heading 6502 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5608, 5801 through 5804, 5806, 5808 through 5810, 5903, 5906 through 5907, and 6001 through 6002, and provided that the change is the result of a fabric-making process.
6503	(1) If the good consists of two or more components, a change to heading 6503 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more components, a change to heading 6503 from any other heading, except from heading 5602, and provided that the change is the result of a fabric-making process.
6504	(1) If the good consists of two or more components, a change to heading 6504 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more components, a change to heading 6504 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5608, 5801 through 5804, 5806, 5808 through 5810, 5903, 5906 through 5907, and 6001 through 6002, and provided that the change is the result of a fabric-making process.
6505.90	(1) If the good consists of two or more components, a change to subheading 6505.90 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more components, a change to subheading 6505.90 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5407 through 5408, 5512 through 5516, 5602 through 5603, 5608, 5801 through 5804, 5806, 5808 through 5811, 5903, 5906 through 5907, and 6001 through 6002, and provided that the change is the result of a fabric-making process.
6601.10–6601.91	A change to subheading 6601.10 through 6601.91 from any other heading, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
7019.10.15	(1) If the good is of filaments, a change to subheading 7019.10.15 from any other heading, provided that the change is the result of an extrusion process. (2) If the good is of staple fibers, a change to subheading 7019.10.15 from any other subheading, except from subheading 7019.10.30 through 7019.10.90 and 7019.31 through 7019.90, and provided that the change is the result of a spinning process.

HTSUS	Tariff shift and/or other requirements
7019.10.28	(1) If the good is of filaments, a change to subheading 7019.10.28 from any other heading, provided that the change is the result of an extrusion process. (2) If the good is of staple fibers, a change to subheading 7019.10.28 from any other subheading, except from subheading 7019.10.30 through 7019.10.90 and 7019.31 through 7019.90, and provided that the change is the result of a spinning process.
7019.20	A change to subheading 7019.20 from any other heading, provided that the change is the result of a fabric-making process.
8708.21	(1) For seat belts not combined with nontextile components, a change to subheading 8708.21 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, and 5512 through 5516, and provided that the change is the result of a fabric-making process. (2) For seat belts combined with nontextile components, a change to an assembled good of subheading 8708.21 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
8804	(1) If the good consists of two or more component parts, a change to an assembled good of heading 8804 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more component parts, a change to heading 8804 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5603, 5801 through 5804, 5806, 5809 through 5811, 5903, 5906 through 5907, and 6001 through 6002, and subheading 6307.90, and provided that the change is the result of a fabric-making process.
9113.90.40	(1) If the good consists of two or more component parts, a change to an assembled good of subheading 9113.90.40 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession. (2) If the good does not consist of two or more component parts, a change to subheading 9113.90.40 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5603, 5801 through 5802, 5806, 5809, 5903, 5906 through 5907, and 6001 through 6002, and subheading 6307.90, and provided that the change is the result of a fabric-making process.
9404.90	The country of origin of a good classifiable under subheading 9404.90 is the country, territory, or insular possession in which the fabric comprising the good was formed by a fabric-making process.
9502.91	A change to an assembled good of subheading 9502.91 from unassembled components, provided that the change is the result of the good being wholly assembled in a single country, territory, or insular possession.
9612.10.9010	A change to subheading 9612.10.9010 from any other heading, except from heading 5007, 5111 through 5113, 5208 through 5212, 5309 through 5311, 5407 through 5408, 5512 through 5516, 5603, 5806, 5903, 5906 through 5907, and 6002, and provided that the change is the result of a fabric-making process.

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 178 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 1624; 44 U.S.C. 3501 *et seq.*

2. Section 178.2 is amended by adding to the table a new listing for § 10.25 to read as follows:

§ 178.2 Listing of OMB control numbers.

19 CFR Section	Description	OMB control No.
	* * * * *	
§ 10.25	Declaration by foreign assembler and endorsement by importer that articles were assembled in whole or in part from textile components cut to shape in the U.S.	1515–0207
	* * * * *	

George J. Weise,
Commissioner of Customs.

Approved: August 16, 1995.

John P. Simpson,
Deputy Assistant Secretary of the Treasury.

Part VI

Environmental Protection Agency

40 CFR Part 61

National Emission Standards for Radionuclide Emissions From Facilities Licensed by the Nuclear Regulatory Commission and Federal Facilities not Covered by Subpart H; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[FRL–5290–8]

RIN 2060–AE38

National Emission Standards for Radionuclide Emissions From Facilities Licensed by the Nuclear Regulatory Commission and Federal Facilities not Covered by Subpart H

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is rescinding subpart I of 40 CFR part 61 as it applies to nuclear power reactors, pursuant to section 112(d)(9) of the Clean Air Act Amendments of 1990. This section allows EPA to decline to regulate Nuclear Regulatory Commission (NRC) licensees if the Administrator determines by rule, and in consultation with the NRC, that the regulatory program established by the NRC pursuant to the Atomic Energy Act provides an ample margin of safety to protect the public health.

A proposed rule to rescind subpart I as it applies to nuclear power reactors was published on August 5, 1991. Based upon the record compiled in the subsequent rulemaking, EPA has concluded that the NRC regulatory program controlling air emissions of radionuclides from nuclear power reactors will assure that the resultant doses will consistently and predictably be below the levels which EPA has determined are necessary to provide an ample margin of safety to protect the public health.

EFFECTIVE DATE: This final rule is effective on September 5, 1995. Under section 307(b)(1) of the Clean Air Act (CAA), judicial review of this final rule is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit within 60 days of the publication of this rule.

FOR FURTHER INFORMATION CONTACT: Fran Jonesi, Risk Assessment and Air Standards Branch, Criteria and Standards Division (6602J), Office of Radiation and Indoor Air, Environmental Protection Agency, Washington, DC 20460, (202) 233–9300.

SUPPLEMENTARY INFORMATION:

Docket

The rulemaking record is contained in Docket No. A–94–61 (cross-referenced with A–79–11) and contains all information considered by EPA in determining the doses associated with radionuclide emissions from NRC-licensed nuclear power reactors. It also contains all comments received from the public during the comment period, and a document describing the Agency's responses to the comments received. This docket is available for public inspection and copying between 8 a.m. and 5 p.m. on weekdays. A fee may be charged for copying.

A single copy of a Background Information Document (BID) (EPA/520/1–89–006–1,2,5,7) containing information on airborne radionuclide emissions to the environment from nuclear power reactors has been included in the docket. Copies of the BID may also be obtained by writing to: Director, Criteria and Standards Division (6602J), Office of Radiation and Indoor Air, Environmental Protection Agency, Washington, DC 20460.

A. Background

1. Regulatory History

On October 31, 1989, EPA promulgated National Emission Standards for Hazardous Air Pollutants (NESHAPS) under Section 112 of the Clean Air Act to control radionuclide emissions to the ambient air from a number of different source categories. 54 FR 51654 (December 15, 1989). Subpart I of 40 CFR part 61 covers two groups of facilities: (1) Facilities licensed and regulated by the Nuclear Regulatory Commission (NRC) and its individual Agreement States, and (2) federal facilities which are not licensed by the NRC and are not owned or operated by the Department of Energy. The first group is quite diverse, and includes facilities which have received a license to use or possess nuclear materials such as hospitals, medical research facilities, radiopharmaceutical manufacturers, laboratories and industrial facilities, as well as facilities involved in the uranium fuel cycle (the conversion of uranium ore to electric power) such as uranium mills (other than radon releases), fuel fabrication plants, and nuclear power reactors. It is a subset of the uranium fuel cycle facilities, nuclear power reactors, which is the subject of today's action. The second group consists of federal facilities such as naval nuclear facilities which are not licensed by the NRC and are not affected in any way by the proposals to rescind subpart I with respect to NRC licensees.

Subpart I limits radionuclide emissions to the ambient air to amounts which would not cause any member of the public to receive in any year an effective dose equivalent (ede) greater than 10 millirem, of which no more than 3 millirem ede may be caused by radioiodines.

When subpart I was originally promulgated in December 1989, EPA simultaneously granted reconsideration of subpart I based on information received late in the rulemaking on the subject of duplicative regulation by NRC and EPA of NRC-licensed facilities and on the potential negative effects of the standard on nuclear medicine. EPA established a comment period to receive further information on these subjects, and granted a 90-day stay of subpart I as permitted by Clean Air Act section 307(d)(7)(B), 42 U.S.C. 7607(d)(7)(B). That stay expired on March 15, 1990. EPA subsequently extended the stay of the effective date of subpart I on several occasions pursuant to the authority provided by section 10(d) of the Administrative Procedure Act, 5 U.S.C. 705, and section 301(a) of the Clean Air Act, 42 U.S.C. 7601(a). (See 55 FR 10455, March 21, 1990; 55 FR 29205, July 18, 1990; and 55 FR 38057, September 17, 1990). On July 26, 1991, EPA issued a final rule staying the effectiveness of subpart I of 40 CFR part 61 for NRC-licensed commercial nuclear power reactors pending completion of today's rulemaking. See 56 FR 37158 (September 26, 1991), and 40 CFR 61.109(b).

EPA also stayed subpart I for NRC and Agreement State licensees other than nuclear power reactors while EPA was collecting additional information necessary to make a determination under section 112(d)(9) of the 1990 Clean Air Act Amendments. See 56 FR 18735 (April 24, 1991), and 40 CFR 61.109(a). However, on September 25, 1992, the D.C. Court of Appeals issued a decision that EPA had exceeded its authority by staying subpart I while EPA was collecting information needed to make a determination under section 112(d)(9). *Natural Resources Defense Council* v. *Reilly,* 976 F.2d 36 (D.C. Cir. 1992). The stay for licensees other than nuclear power reactors expired before the *NRDC* decision could be implemented on November 15, 1992, and subpart I took effect for these licensees on November 16, 1992.

2. New Authority in the Clean Air Act Amendments

In November of 1990, Congress enacted amendments to the Clean Air Act. Section 112(d)(9) of the Clean Air Act Amendments allows EPA to decline to regulate NRC-licensed facilities if the Administrator determines, by rule, and after consultation with the Nuclear Regulatory Commission, that the regulatory program established by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act for such category or subcategory provides an ample margin of safety to protect the public health.

The legislative history of section 112(d)(9) indicates the manner in which Congress intended that EPA interpret the phrase "an ample margin of safety to protect the public health" when making the finding required by section 112(d)(9). The Conference Report indicates that the "ample margin of safety" the Administrator must find under section 112(d)(9) is the same "ample margin of safety" that governed the development of standards promulgated under section 112 prior to the 1990 amendments. H.R. Rep. 952, 101st Cong., 2d Sess. 339 (1990). The two-step process by which EPA identified an "ample margin of safety" was described in detail in a U.S. Court of Appeals decision, *NRDC* v. *EPA,* 824 F.2d 1146 (D.C.Cir 1987) (the Vinyl Chloride decision). The 1989 NESHAPs standard represents the Agency's application of the *Vinyl Cloride* decision and is consistent with the Agency's approach for regulating hazardous air pollutants under section 112 of the Clean Air Act.

3. Construction of Section 112(d)(9)

From the language of section 112(d)(9), it is apparent that where EPA has already specifically determined what level of emissions must be achieved to provide an "ample margin of safety," that level is the benchmark by which EPA must evaluate the adequacy of the NRC program. In the present case, EPA specifically found when it promulgated 40 CFR part 61, subpart I, that an emission level that would result in a dose no greater than 10 mrem/year was necessary to provide the requisite "ample margin of safety." 54 FR 51654 (December 15, 1989).

Section 112(d)(9) does not, however, require exact equivalence between the EPA and NRC programs applicable to a particular category of licensees before EPA may decline to regulate radionuclide emissions from that category. Rather, it requires that EPA conclude that implementation of the NRC program as a whole will achieve substantive protection of the public health equivalent to or better than that which would be achieved by enforcement of an EPA standard. Thus, if the NRC program as a whole will assure that emissions from all affected licensees remain below the EPA standard, the NRC program may be deemed to provide an ample margin of safety, regardless of whether this results from enforcement by NRC of a single numerical standard.

In deciding whether EPA may decline to regulate a particular category or subcategory of NRC or Agreement State licensees, EPA construes section 112(d)(9) as requiring that EPA determine: (1) That emissions from NRC licensees (or Agreement State licensees when authority to regulate the licensees has been relinquished by NRC) in that category or subcategory will be consistently and predictably at or below a level resulting in a dose of 10 mrem/year, and (2) that NRC (or the Agreement States) can and will require any individual licensee in that category or subcategory with emissions that cause a dose exceeding 10 mrem/year to reduce the emissions sufficiently that the dose will not exceed 10 mrem/year.

4. Reconsideration of Subpart I

After the adoption of section 112(d)(9), EPA reviewed the information available to the Agency, including the information provided during the Agency's reconsideration of subpart I, to decide whether it could determine, for particular categories of licensees, that the NRC regulatory program protects public health with an ample margin of safety. EPA's initial analysis focused on two general issues: (1) Whether the NRC regulatory program in practice results in sufficiently low doses to protect the public health with an ample margin of safety; and (2) whether the NRC program is sufficiently comprehensive and thorough and administered in a manner which will continue to protect public health in the future.

a. Nuclear Power Reactors

During its initial assessment of the NRC program under section 112(d)(9), EPA concluded that the Agency had sufficient information concerning NRC regulation of nuclear power reactors to enable EPA to make the requisite finding concerning the adequacy of the NRC program. For nuclear power reactors, EPA made a preliminary determination that the NRC regulatory program protects public health with an ample margin of safety. On March 13, 1991, EPA issued an Advanced Notice of Proposed Rulemaking announcing the Agency's intention to enter into a rulemaking to rescind subpart I as applied to nuclear power reactors. (56 FR 10524). This was followed on August 5, 1991 by a Proposed Rule to rescind subpart I with respect to nuclear power reactors. (56 FR 37196).

b. Licensees other than Nuclear Power Reactors

After reviewing the available information for licensees other than nuclear power reactors, EPA concluded that it lacked sufficient information concerning actual emissions from these facilities to make the substantive determination contemplated by section 112(d)(9). Accordingly, EPA undertook an extensive study in order to determine the doses resulting from radionuclide emissions at these facilities. EPA surveyed a randomly selected subset of all licensed facilities, as well as a group of "targeted" facilities chosen because of an expectation that they would have higher emissions.

EPA evaluated the results of its study of NRC and Agreement State licensees other than nuclear power reactors using the COMPLY computer program. None of the facilities evaluated appeared to cause a dose exceeding the 10 mrem/year level established by subpart I. When the results of the survey were statistically extrapolated to the entire population of NRC and Agreement State licensees, EPA concluded that virtually all of the facilities would cause doses to members of the public which are below 10 mrem/year.

After reviewing the current NRC regulatory program, and considering the likely effect of additional measures which NRC had agreed to adopt pursuant to a Memorandum of Understanding, EPA proposed to rescind subpart I for NRC and Agreement State licensees other than nuclear power reactors on December 1, 1992. See 57 FR 56877 (December 1, 1992). However, EPA subsequently identified several concerns regarding the Agency's ability to make the substantive finding for these licensees required by section 112(d)(9). In particular, EPA was concerned that the present NRC program would not assure that radionuclide emissions from each such licensee would cause a dose no greater than 10 mrem/year, and that NRC or the individual Agreement State might not be able to require a particular licensee exceeding 10 mrem/year to reduce its emissions.

EPA initiated consultations with the NRC intended to resolve these concerns, and EPA and NRC have recently agreed on proposals which, when fully implemented, should provide a satisfactory basis for rescission of subpart I for NRC and Agreement State licensees other than nuclear power reactors. In a forthcoming notice, EPA will reaffirm its proposal to rescind subpart I for NRC and Agreement State licensees other than nuclear power reactors, describe the revisions to the NRC program which NRC has proposed, and provide an additional opportunity for comment concerning the sufficiency of the proposed revisions to support the finding required by section 112(d)(9).

B. Assessment of the NRC Program Controlling Air Emissions of Radionuclides From Nuclear Power Reactors

In order to determine whether the NRC regulatory program controlling air emissions from NRC-licensed commercial nuclear power reactors provides an ample margin of safety as required under section 112(d)(9), EPA has evaluated the doses which result from such emissions as well as the specific elements of the NRC program which operate to control or limit such emissions. In performing this analysis, EPA has focussed on the following questions:

(1) Do current radionuclide emissions during routine operations of nuclear power reactors licensed by NRC result in doses no greater than 10 mrem/year?

(2) Will the NRC regulatory program assure that routine radionuclide emissions from licensed nuclear power reactors in the future result in doses which are consistently and predictably no greater than 10 mrem/year?

(3) If at some point an individual nuclear power reactor has routine radionuclide emissions resulting in a dose greater than 10 mrem/year, will NRC require that the facility in question take actions which will reduce emissions to a level resulting in a dose no greater than 10 mrem/year?

1. Doses Resulting From Radionuclide Emissions From Nuclear Power Reactors

Of the 100 light-water-cooled commercial nuclear power reactors operating in the United States at the time that EPA's analysis was conducted, 63 are pressurized water reactors (PWRs) and 37 are boiling water reactors (BWRs). These facilities are licensed by the NRC and involve operations with the potential for large releases of radionuclides.

During the rulemaking that resulted in the promulgation of the final rule in 1989, EPA performed exposure and risk assessments for radionuclide releases from Uranium Fuel Cycle (UFC) facilities, a category which includes nuclear power reactors. The results of these analyses showed that the most exposed individual receives a lifetime dose associated with a risk of fatal cancer of 1.5×10^{-4}. Almost all individuals in the exposed population received a lifetime risk of less than 1×10^{-6}. These estimated risks are for UFC facilities as a whole. For the models used for PWRs and BWRs, the values were much lower. The risk to the most exposed individuals were 3×10^{-6} and 5×10^{-6} for the model PWR and BWR, respectively. The predicted incidences of fatal cancers per year in the populations surrounding these model plants were 7×10^{-4} and 1×10^{-3} for the PWR and BWR, respectively. EPA determined that baseline emissions from the UFC category were at a safe level, i.e., protected the maximally exposed individual to a lifetime risk level of approximately one in ten thousand.

EPA independently calculated doses for every site with one or more operating nuclear power reactor using 1988 emissions data, the most recent year for which a complete set of data was available at that time. If a plant had below normal emissions in 1988, emissions data for a more typical year were used in the analysis. Site-specific data were obtained to the maximum extent practical and used as input to the CAP–88 computer codes. In all cases, the calculated doses to the maximally exposed individual did not exceed 1.0 mrem/year ede. This is equivalent to a maximum lifetime individual risk of approximately 3 in 100,000. Thus, the NRC regulatory program, for the years examined, resulted in doses which are at least 10 times lower than the 10 mrem/year ede standard established by subpart I.

EPA also compared the 1988 data with historical data, dating back to 1975, to determine if the 1988 data were representative of long term trends in population and individual doses. Although the populations around the reactor facilities and the facility capacity factors have increased over the last fifteen years, EPA determined that the average annual collective population doses had steadily declined.

During the present rulemaking, EPA conducted a review of the nuclear power reactor segment of the uranium fuel cycle and determined that the individual doses associated with radionuclide emissions from nuclear power reactors are even lower than were previously estimated. This latest analysis estimates that the most exposed individuals receive doses from nuclear power plants of less than 1.0 mrem/year ede from all radionuclides and a dose of less than 0.01 mrem/year ede from radioiodines. The highest estimated dose in these more recent analyses remains at least an order of magnitude below the 10 mrem/year ede standard established by subpart I.

Thus, the evidence clearly demonstrates that current radionuclide emissions from nuclear power reactors licensed by NRC result in doses no greater than 10 mrem/year. The remaining questions considered by EPA require assessment of the elements of the NRC program which control and limit air emissions from nuclear power reactors. An assessment of the NRC regulatory framework which applies to licensed nuclear power reactors follows.

2. The NRC Regulatory Program for Nuclear Power Reactors

Section 2 of the Atomic Energy Act of 1954 (AEA), as amended, 42 USC 2012, emphasizes that an important national goal in regulating utilization facilities, which would include all nuclear power reactors, is protecting the "health and safety of the public." Pursuant to that mandate, NRC has an extensive regulatory program covering all facets of reactor design, construction, and operation, including regulations specifically addressing the release, airborne and otherwise, of radionuclides.

a. Regulations Governing Radionuclide Emissions

There are three regulations which control routine Radionuclide emissions from commercial nuclear power plants: (1) 10 CFR part 50, Appendix I, "Numerical Guides for Design Objectives and Limiting Conditions for Operation to Meet the Criterion 'As Low As is Reasonably Achievable' for Radioactive Material in Light-Water-Cooled Nuclear Power Reactor Effluents"; (2) 40 CFR part 190, "Environmental Radiation Protection Standards for Nuclear Power Operations"; and (3) 10 CFR part 20, "Standards for Protection Against Radiation."

10 CFR part 50, Appendix I, provides numerical guides for design objectives and limiting conditions for operation to assist licensees in meeting the requirements of §§ 50.34a and 50.36a that radioactive material in effluents released to unrestricted areas be kept as low as is reasonably achievable (ALARA). The licensee satisfies the design objectives, in part, by demonstrating that the gaseous radionuclide releases to the atmosphere from each reactor on site will not result in an estimated average annual air dose in excess of 10 millirad (absorbed dose) for gamma exposure and 20 millirad (absorbed dose) for beta exposure. These limits are air doses, resulting from exposure to noble gases in unrestricted areas, which could be occupied by an individual. Lower radionuclide release rates may be required to satisfy the design objectives if it appears that the releases are likely to result in an estimated annual external dose from gaseous effluents, to any individual in an unrestricted area, in excess of 5 mrem/year. Alternatively, higher release rates may be acceptable if the applicant can provide reasonable assurance that the external dose to any individual in an unrestricted area, from noble gases, will not exceed 5 mrem/year to the whole body. [For noble gases, the whole body dose is the same as the effective dose equivalent.] The applicant must also demonstrate that the calculated annual total quantity of all radioiodines and radioactive particulates released to the atmosphere from each reactor will not cause exposures to any individual in unrestricted areas from all pathways in excess of 15 mrem/year to any organ. A dose of 15 mrem/year to the thyroid from radioiodines will result in an effective dose equivalent of less than 0.5 mrem/year, as the organ weighting factor for calculating the ede for the thyroid is 0.03. Thus, 10 CFR part 50, Appendix I, limits the total effective dose equivalent to approximately 6 mrem/year because essentially all of the internal emitters are radioiodines.

The limiting conditions of operation (LCOs) set forth in Appendix I are used to develop technical specifications which are included in the facility's license. The technical specifications assure that radionuclide releases during operations are consistent with the design objectives to maintain off-site doses ALARA. The technical specifications are enforceable requirements under NRC's enforcement policy (10 CFR part 2, Appendix C).

40 CFR part 190, "Environmental Radiation Protection Standards for Nuclear Power Operations," requires uranium fuel cycle operations to be conducted in such a manner that there is reasonable assurance that the annual radiation dose equivalent to any member of the public from all uranium fuel cycle sources does not exceed 25 mrem to the whole body, 75 mrem to the thyroid, and 25 mrem to any other organ. The standard applies to gaseous and liquid effluent pathways and direct radiation from these facilities.

In 1981, the NRC amended its regulations to incorporate these standards. Sections 20.105(c) and 20.106(g) specifically required licensees engaged in uranium fuel cycle operations to comply with the 40 CFR part 190 dose limits.

10 CFR part 20, "Standards for Protection Against Radiation," consists of standards for protection against radiation hazards arising out of activities conducted under licenses issued pursuant to the AEA of 1954, as amended. The portions of part 20 that applied to radionuclide emissions from licensed facilities were contained in § 20.105, which set permissible levels of radiation in unrestricted areas, and § 20.106, which established limits on radioactivity in effluents to unrestricted areas. On May 21, 1991 (56 FR 23360), major revisions to part 20 were published by the NRC, and compliance with the revisions became mandatory for all licensees on January 1, 1994. The revised rule implements 1987 Presidential guidance on occupational radiation protection and the recommendations of scientific organizations to establish risk-based limits and a system of dose limitation in accordance with the guidance published by the International Commission on Radiation Protection. In adopting the risk-based methodology, the NRC established an explicit dose limit for members of the public of 2 mrem/hr not to exceed 100 mrem/year ede, and extended an explicit ALARA requirement to all licensees. Doses resulting from direct radiation and radionuclides released in gaseous and liquid effluents must be evaluated in determining compliance with the numerical limits. The revised part 20 also requires licensees to comply with the standards set forth in 40 CFR part 190 for the uranium fuel cycle (10 CFR 20.1301(d)).

In addition to these numerical standards, part 20 also requires that each licensee make every reasonable effort to maintain radiation exposures, and releases of radioactive material in effluents to unrestricted areas, to levels which are ALARA (10 CFR 20.1101(b)).

The principal radionuclides routinely released in the gaseous effluents from commercial light-water reactors are noble gases and radioiodines. The whole body dose from noble gas emissions per reactor is limited by the 5 mrem/year limit of Appendix I. The organ doses from radioiodines and particulates are limited to 15 mrem/year. For radioiodines, where the thyroid gland is the critical organ, 15 mrem/yr effective dose equivalent equates to 0.45 mrem/year. Thus, the total ede allowed under Appendix I is even less than 6 mrem/year. The guidelines set forth in Appendix I and the standards set forth in 40 CFR part 190 together establish a regulatory framework that provides a high level of assurance that the routine emissions from commercial light water reactors will not result in exposures in excess of the EPA 10 mrem/year ede standard.

b. Monitoring

Compliance with 10 CFR part 50, Appendix I, and with 40 CFR part 190 is demonstrated through the establishment of Limiting Conditions of Operation (LCOs) and Radiological Effluent Technical Specifications (RETS) for each nuclear power reactor in accordance with 10 CFR 50.36a. The LCOs and associated RETS require that if the quantity of radioactive material actually released in effluents to unrestricted areas in any calendar quarter results in radiation exposure, calculated on the same basis as the design objectives, exceeding one half the annual design objectives, the licensee is required to investigate the cause of the release, define and initiate corrective actions to prevent a recurrence, and report these actions to the NRC within 30 days from the end of the quarter in which the release occurred.

The LCOs and RETS also require licensees to initiate effluent and environmental monitoring programs to provide (1) data on the types and quantities of radionuclides released, (2) the levels of radiation and radioactive materials in the environment, and (3) changes in land use and demography in the vicinity of the site that pertain to compliance with the LCOs. If the monitoring data reveal that the relationship between the quantities of radioactive materials released and the doses to individuals in unrestricted areas is significantly different than that assumed in the calculations used to assess compliance with the design objectives, the NRC may require a modification of the RETS.

In order to provide assistance to licensees in complying with the LCOS and preparing their RETS, the NRC has issued the following guidance: NUREG–0472 and –0473, "Standard Radiological Effluent Technical Specifications for PWRs (and BWRs)," U.S. NRC, January 1983; NUREG–0133, "Preparation of Radiological Effluent Technical Specifications for Nuclear Power Plants," U.S. NRC, October 1978; NUREG–1301 and NUREG–1302, "Offsite Dose Calculation Manual Guidance: Standard Radiological Effluent Controls for Pressurized Water Reactors (and Boiling Water Reactors)," U.S. NRC, April 1991; and U.S. NRC Regulatory Guide 1.21, "Measuring, Evaluating, and Reporting Radioactivity in Solid Waste and Releases of Radioactive Material in Liquid and Gaseous Effluents from Light-Water-Cooled Nuclear Power Plants".

These documents provide highly detailed standard RETS and procedures for implementing them. Detailed guidance is provided in the areas of effluent monitoring instrumentation; specific equations, assumptions and methodologies addressing short- and long-term radioactive releases; and the use of gaseous radwaste treatment systems.

c. Inspections

To ensure that licensees are meeting all regulatory and license-specific effluent and environmental protection requirements, each facility receives approximately 2 radiation protection inspections per year by regional NRC inspectors. Along with the plants' reporting requirements, the inspections determine the degree to which each plant is in compliance with its license and technical specifications, including its RETS. If problem areas are identified, follow-up inspections are scheduled in order to ensure that deficiencies are corrected. If a facility appears to have persistent problems in particular areas, the facility is subjected to inspections on a more frequent basis.

The periodic inspections of the RETS include a review of records and procedures, interviews with plant personnel, and audits of the licensee's effluent and environmental measurements program. The results of these analyses not only indicate the level of radioactive material in the effluent, but also indicate the degree of accuracy and precision of the facility's own effluent monitoring equipment.

Each operating commercial power plant has at least one full time NRC Senior Resident Inspector who provides continuous health and safety oversight of plant operations. Sites with multiple reactors have at least one Resident Inspector per reactor. If problem areas arise pertaining to compliance with the RETS, the Resident Inspector may request special inspections and/or audits of related plant operations on a more frequent basis.

All inspections performed by either on-site Resident Inspectors or inspectors from the NRC Regional offices or NRC Headquarters are fully documented. These reports are made available to the public in the NRC Public Document Rooms located in the host community, the regional offices, and in Washington, DC. The reports are filed in the separate docket established for each reactor site. Reportable licensee events include exceeding effluent release rates, worker overexposures, procedure violations, and accidents. If detailed event information is desired, it can be obtained from the LER filed in the individual docket.

C. Summary of Major Comments and EPA Responses

This section contains a brief description of the major comments received relating to the Agency's rescission of 40 CFR part 61, subpart I for nuclear power reactors. During the comment period for other rulemakings, such as the proposed stays for subpart I, the Agency received additional comments on the specific issue of whether to rescind subpart I for nuclear power reactors. EPA stated at the time that such substantive comments would be addressed at the appropriate time following a proposed rule to rescind subpart I. These comments are now extensively discussed in the Response to Comments Document which has been placed in the docket for public review. The Response to Comment document also addresses those comments received during the 60-day comment period for the subject rulemaking as well as comments presented at the September 1991 public hearings held in Washington, DC and in Seattle, Washington.

A major concern expressed by commenters relates to the regulatory authority of the states and how action such as this rescission, taken pursuant to section 112(d)(9), might affect the states' authority under the CAA to establish radionuclide air emission standards. This issue was recently addressed in a July 2, 1993 letter from Robert M. Bernero, Director of the Office of Nuclear Material Safety and Safeguards to Margo Oge, Director of EPA's Office of Radiation and Indoor Air. Mr. Bernero states that the NRC's Office of the General Counsel has examined the CAA, and relevant portions of the legislative history, "and has concluded that the passage of the 1990 CAA amendments had no effect on the preexisting power of the States under section 116 to establish radionuclide air emission standards, regardless of any action EPA might take pursuant to section 112(d)(9)." EPA concurs with NRC's construction. In addition, this issue was extensively discussed by the Senate during floor debate for the Clean Air Act Amendments of 1990. Passage of the "Simpson amendment" failed on the first vote due to similar concern that the amendment somehow affected states' rights and required resolution before the amendment ultimately succeeded in passage. As explained by Senator Burdick, the bill does not affect existing states' rights. "Section 112(d)(9) provides for State authority for radionuclide emissions in the same manner and to the same extent as does existing section 116" of the Clean Air Act, which contains the provision that "nothing in this Act shall preclude or deny the right of any state or political subdivision thereof to adopt or enforce any standard or limitation respecting emissions of air pollutants * * *" April 3, 1990 Congressional Record-page S3798.

Another significant issue which arose during the comment period concerned whether the performance and testing requirements imposed on licensees to assure that the regulatory requirements for stack emissions monitoring and off-site air monitoring are being met. After carefully reviewing NRC's regulatory requirements for airborne effluent and environmental monitoring, the Standard Review Plan and Regulatory Guides, and the inspection procedures that the NRC uses to assure that licensees have installed and are maintaining monitoring systems in conformance with the regulatory requirements, EPA concluded that NRC's program assured that these factors were being adequately addressed and does not preclude EPA's rescission of Subpart I.

D. Final Action

This final rule rescinding subpart I for commercial nuclear power reactors licensed by the NRC is the culmination of the Agency's reconsideration of Subpart I for this category of licensees. EPA has determined that current radionuclide emissions from NRC-licensed nuclear power reactors during routine operations are consistently well below levels which would result in doses exceeding 10 mrem/year ede. Moreover, EPA has comprehensively evaluated the individual elements of the NRC regulatory program which control radionuclide emissions from these facilities. Based on this evaluation, EPA has determined that radionuclide emissions during routine operations of NRC-licensed nuclear power reactors are expected to remain well below levels which would result in a dose exceeding 10 mrem/year. EPA has further determined that NRC can and will require any licensed nuclear power reactor which has radionuclide emissions resulting in a dose exceeding 10 mrem/year to take specific actions which will reduce emissions to a level which results in a dose below 10 mrem/year. Based on these determinations, EPA finds under section 112(d)(9) that the NRC regulatory program for licensed commercial nuclear power reactors provides an ample margin of safety to protect public health.

This finding with respect to licensed commercial nuclear power reactors does not apply to other NRC or Agreement State licensees. Although EPA anticipates that the revisions to the NRC program for licensees other than nuclear power reactors proposed by NRC as part

of recent consultations with EPA will be sufficient to support the finding required by section 112(d)(9) for these licensees as well, EPA does not intend to conclude the rulemaking concerning rescission of Subpart I for these other licensees until NRC has taken final action concerning its proposals.

EPA is prepared to proceed with rescission for nuclear power reactors immediately due to several factors which are unique to this category of facilities. NRC has established an ALARA guideline for nuclear power reactors which equates to approximately 6 mrem/year ede, and the individual facilities have consistently committed to achieving this level. Measured emissions from nuclear power reactors have also been consistently well below this target level.

In addition, NRC-licensed nuclear power reactors are a relatively small, homogeneous and well-characterized group of facilities. EPA knows enough about the magnitude of routine emissions from nuclear power reactors, the technology utilized to limit such emissions, and the administration of the NRC program to control such emissions to conclude that NRC will not accept or countenance ALARA emissions from these facilities which would result in a dose exceeding 10 mrem/year. NRC itself maintains direct oversight of licensed nuclear power reactors. In contrast, NRC licensees other than nuclear power reactors are a heterogeneous category and consists of a variety of different types of facilities. Based on the available database in EPA's 1992 BID, about 6,000 licensees are administered by NRC and about 12,000 licensees are administered by the NRC Agreement States.

In determining whether the NRC regulatory program for a given category of licensees provides an ample margin of safety to protect the public health, EPA need not establish exact equivalence between the EPA regulatory program under the Clean Air Act and the NRC regulatory program. Instead, EPA has examined the enforceable elements in the NRC program to determine whether they will assure an equivalent degree of protection for public health. EPA is confident that the NRC regulatory program for nuclear power reactors provides protection as stringent as subpart I, and thereby protects public health with an ample margin of safety. Based on this conclusion, EPA is today rescinding 40 CFR part 61, subpart I, as it applies to NRC-licensed commercial nuclear power reactors.

Today's action is based upon the Agency's determinations concerning present emissions from licensed nuclear power reactors, and on the Agency's evaluation of the elements of the current NRC regulatory program. If the NRC program were to change in the future in a manner which permitted radionuclide emissions from routine operations of nuclear power reactors to cause doses exceeding 10 mrem/year, EPA would consider repromulgating subpart I for such licensees at that time.

D. Judicial Review

Any petition for judicial review of this final rule must be filed in the United States Court of Appeals for the District of Columbia within 60 days from the date this rule is published in the **Federal Register**. Only an objection to the rule which was raised with reasonable specificity during the period for public comment (including public hearings) may be raised as part of any petition for judicial review.

E. Miscellaneous

1. Paperwork Reduction Act

The reporting and record keeping requirements rescinded in today's notice were approved by OMB as part of the Information Collection Request for the Radionuclide NESHAP, OMB control number 2060–0191. The EPA has submitted an Information Correction Worksheet to OMB to delete the burden associated with these requirements from that clearance.

2. Executive Order 12866

Under Executive Order 12866, (58 FR 57735, October 4, 1993) the Agency must determine whether this regulation, if promulgated, is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This action will not result in an annual effect on the economy of $100 million or another adverse economic impact, does not create a serious inconsistency or interfere with another agency's action, and does not materially alter the budgetary impacts of entitlements, grants, user fees, etc. However, EPA has concluded that this action may be construed as raising novel legal or policy issues. Accordingly, EPA has submitted this action to OMB and has obtained the requisite approval under the terms of Executive Order 12866.

3. Regulatory Flexibility Analysis

Section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603, requires EPA to prepare and make available for comment an "initial regulatory flexibility analysis" in connection with any rulemaking for which there is a statutory requirement that a general notice of proposed rulemaking be published. The "initial regulatory flexibility analysis" describes the effect of the proposed rule on small business entities. However, section 605(b) of the Act provides that an analysis not be required when the head of an Agency certifies that the rule will not, if promulgated, have a significant impact on a substantial number of small entities.

It was found in the 1989 rule for 40 CFR part 61, subpart I, that there was no significant impact on small business entities. There has been no change in this finding. Because the changes ease the regulatory burdens associated with provisions of the existing final rule, EPA believes that this rule will have no adverse effect on small businesses. For the preceding reason, I certify that this rule will not have significant economic impact on a substantial number of small entities.

List of Subjects in 40 CFR Part 61

Air pollution control, Arsenic, Asbestos, Benzene, Beryllium, Hazardous materials, Mercury, Radionuclides, Vinyl Chloride.

Dated: August 28, 1995.

Carol M. Browner,
Administrator.

Part 61 of chapter I of title 40 of the Code of Federal Regulations is amended as follows:

PART 61—[AMENDED]

1. The authority citation for part 61 continues to read as follows:

Authority: 42 U.S.C. 7401, 7412, 7414, 7416, 7601.

2. Section 61.100 is revised to read as follows:

§ 61.100 Applicability.

The provisions of this subpart apply to facilities other than nuclear power reactors which are licensed by the Nuclear Regulatory Commission. This subpart also applies to facilities owned or operated by any Federal agency other than the Department of Energy, except that this subpart does not apply to disposal at facilities regulated under 40 CFR part 191, subpart B, or to any uranium mill tailings pile after it has been disposed of under 40 CFR part 192, or to low energy accelerators, or to any NRC-licensee that possesses and uses radionuclides only in the form of sealed sources.

§ 61.107 [Amended]

3. Section 61.107 is amended by removing paragraph (c)(1) and by redesignating paragraphs (c)(2) and (3) as (c)(1) and (2).

§ 61.109 [Removed]

4. Section 61.109 is removed.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $883.00 domestic, $220.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 512–1800** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2233.**

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1-189 contains a note only for Parts 1-39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1-39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1-100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1995. The CFR volume issued April 1, 1990, should be retained.

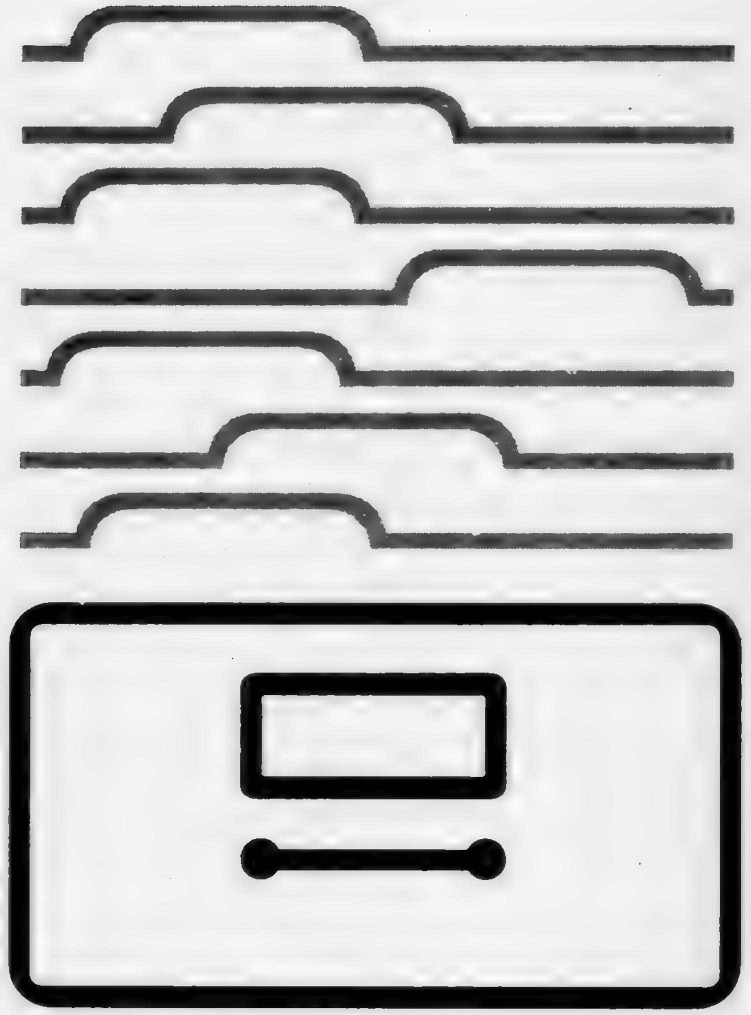
[5] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1995. The CFR volume issued July 1, 1991, should be retained.

[6] No amendments to this volume were promulgated during the period January 1, 1993 to December 31, 1994. The CFR volume issued January 1, 1993, should be retained.

[7] No amendments to this volume were promulgated during the period October 1, 1993, to September 30, 1994. The CFR volume issued October 1, 1993, should be retained.

[8] No amendments to this volume were promulgated during the period April 1, 1994 to March 31, 1995. The CFR volume issued April 1, 1994, should be retained.

[9] Note: Title 19, CFR Parts 141-199, revised 4-1-95 volume is being republished to restore inadvertently omitted text.



NEW EDITION

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

Revised January 1, 1994

The GUIDE is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Public Laws

104th Congress, 1st Session, 1995

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 104th Congress, 1st Session, 1995.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws.)

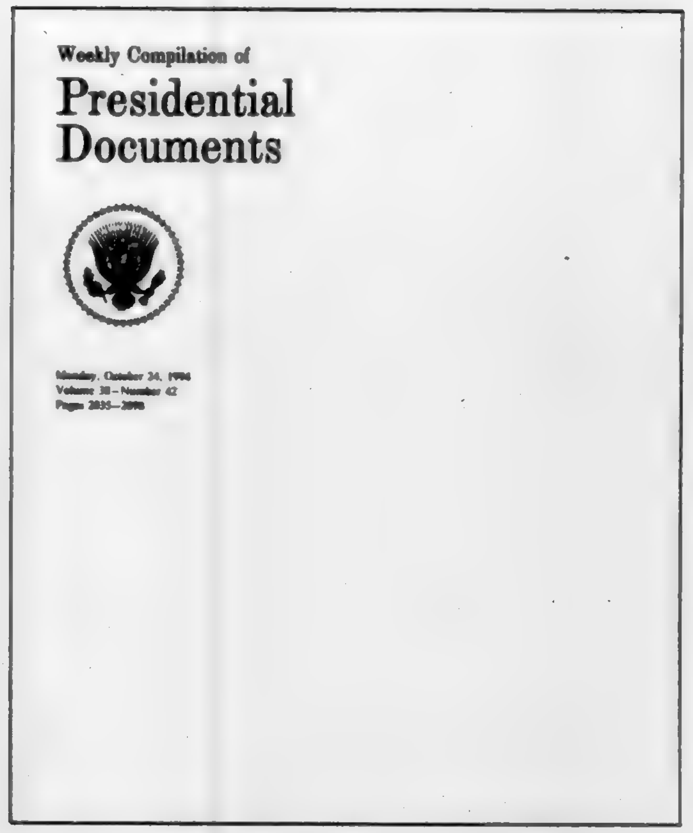
The authentic text behind the news . . .

The Weekly Compilation of
Presidential Documents



Weekly Compilation of
Presidential
Documents

Monday, October 24, 1994
Volume 30—Number 42

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 60, No. 172
Wednesday, September 6, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulauons, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206–AG53

Prevailing Rate Systems; Abolishment of Certain Special Wage Schedules for Printing Positions

AGENCY: Office of Personnel Management.

ACTION: Interim rule with request for comments.

SUMMARY: The Office of Personnel Management is issuing interim regulations to abolish the Federal Wage System special wage schedules for printing positions in the Los Angeles, California; San Diego, California; San Francisco, California; and Seattle-Everett-Tacoma, Washington, wage areas. Printing and lithographic employees in these wage areas will now be paid rates from the regular wage schedule for their respective wage area.

DATES: This interim rule becomes effective on September 6, 1995. Comments must be received by October 6, 1995. Employees paid rates from special wage schedules for printing positions in these areas will continue to to paid rates from those schedules until their conversion to the regular wage schedules for their respective wage areas effective on the first day of the first full pay period beginning on or after September 6, 1995.

ADDRESSES: Send or deliver comments to Donald J. Winstead, Assistant Director for Compensation Policy, Human Resources Systems Service, Office of Personnel Management, Room 6H31, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Paul Shields, (202) 606–2848.

SUPPLEMENTARY INFORMATION: The Department of Defense recommended to the Office of Personnel Management that the Los Angeles, San Diego, San Francisco, and Seattle-Everett-Tacoma Printing and Lithographic wage schedules be abolished and that the regular wage schedule for each area apply to printing employees. Federal employment in printing and lithographic occupations in these wage areas has declined in recent years. Only a small number of employees are now paid from these special wage schedules, and only a few of these employees actually benefit by being paid from the special schedule rather than the regular wage schedule. Most of the covered employees are paid "floor rates" established under the 5 CFR 532.279 provision that no maximum rate on a special printing schedule may be less than the maximum rate for the corresponding grade on the regular wage schedule for the wage area. In addition, with the reduced number of employees, it has been difficult to comply with the requirement that workers paid from the special printing schedule participate in the special wage survey process.

Los Angeles, California: Federal employment in printing and lithographic occupations in the Los Angeles wage area declined from 49 in 1993 to a current total of 16 in 1995. The special printing and lithographic wage schedule for the Los Angeles wage area now applies to 15 Defense Printing Service employees and 1 Department of Agriculture employee. The last full-scale survey involved the substantial work effort of contacting 72 printing establishments spread over Los Angeles County. Upon abolishment of the Los Angeles special printing schedule, three employees will become entitled to pay retention when converted to the regular wage schedule. The remaining 13 employees will benefit upon conversion by receiving higher regular wage rates.

San Diego, California: Federal employment in printing and lithographic occupations in the San Diego wage area declined from 46 in 1993 to a current total of 23 in 1995. The special printing and lithographic wage schedule for the San Diego wage area now applies to 23 Defense Printing Service employees. The last full-scale survey involved the substantial work effort of contracting 65 printing establishments spread over San Diego County. Upon abolishment of the San Diego special printing schedule, six employees will become entitled to pay retention when converted to the regular wage schedule. The remaining 17 employees will benefit upon conversion by receiving higher regular wage rates.

San Francisco, California: Federal employment in printing and lithographic occupations in the San Francisco wage area declined from 55 in 1993 to a current total of 16 in 1995. The special printing and lithographic wage schedule for the San Francisco wage area now applies to seven General Services Administration employees, five Defense Printing Service employees, two National Aeronautics and Space Administration employees, one Department of Agriculture employee, and one United States Coast Guard employee. The last full-scale survey involved the substantial work effort of contacting 71 printing establishments spread over 8 counties in the San Francisco metropolitan area. Upon abolishment of the San Francisco special printing schedule, two employees will become entitled to pay retention when converted to the regular wage schedule. The remaining 14 employees will benefit upon conversion by receiving higher regular wage rates.

Seattle-Everett-Tacoma, Washington: Federal employment in printing and lithographic occupations in the Seattle-Everett-Tacoma wage area declined from 45 in 1994 to a current total of 19 in 1995. The special printing and lithographic wage schedule for the Seattle-Everett-Tacoma wage area now applies to 11 Defense Printing Service employees and 8 General Services Administration employees. The last full-scale survey involved the substantial work effort of contacting 100 printing establishments spread over 4 counties. Upon abolishment of the Seattle-Everett-Tacoma special schedule, all 19 employees will benefit when converted to the regular wage schedule by receiving higher regular wage rates.

Upon abolishment of these special printing schedules, the printing and lithographic employees will be converted to the regular schedule for their wage area on a grade-for-grade basis. Their new rate of pay will be set at the applicable step of the regular schedule that equates to the employees' existing scheduled rate of pay. When the existing rate falls between two steps, the employee's new rate will be set at the rate of the higher of those two steps.

This conversion does not constitute an equivalent increase for within-grade increase purposes. In accordance with the OPM Operating Manual, *The Guide to Processing Personnel Actions*, this pay plan change will be processed as a "Pay Adjustment," Nature of Action Code 894, authority code ZLM, citing this **Federal Register** notice as authority. Pay retention provisions will apply for employees not receiving increases upon conversion.

The Federal Prevailing Rate Advisory Committee has reviewed this recommendation and by consensus has recommended approval.

Pursuant to 5 U.S.C. 553(b)(3)(B), I find that good cause exists for waiving the general notice of proposed rulemaking. Also, pursuant to section 553(d)(3) of title 5, United States Code, I find that good cause exists for making this rule effective in less than 30 days. The notice is being waived and the regulation is being made effective in less than 30 days because preparations for the September 1995 wage surveys in Los Angeles, San Diego, San Francisco, and Seattle-Everett-Tacoma must begin immediately.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they will affect only Federal agencies and employees.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1137

[DA–95–21]

Milk in the Eastern Colorado Marketing Area; Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This document suspends certain performance standards of the Eastern Colorado Federal milk order. Mid-America Dairymen, Inc., a cooperative association that supplies milk for the market's fluid needs, requested the suspension. The suspension will make it easier for handlers to qualify milk for pool status and will prevent uneconomic milk movements that otherwise would be required to maintain pool status for milk of producers who have been historically associated with the market.

EFFECTIVE DATES: The suspension to § 1137.7 is effective from September 1, 1995, through February 29, 1996. The suspensions to § 1137.12 are effective from September 1, 1995, through August 31, 1996.

FOR FURTHER INFORMATION CONTACT: Clifford M. Carman, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–9368.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued July 24, 1995; published July 28, 1995 (60 FR 38767).

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this proposed rule will not have a significant economic impact on a substantial number of small entities. This rule lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers who have been historically associated with this market will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

The Department is issuing this rule in conformance with Executive Order 12866.

This suspension of rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is not intended to have a retroactive effect and will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with the law and requesting a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act, as amended, and of the order regulating the handling of milk in the Eastern Colorado marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on July 28, 1995 (60 FR 38767), concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views and arguments thereon. One comment supporting the suspension was filed and no opposing views were received.

After consideration of all relevant material, including the proposal in the notice, the comment received and other available information, it is hereby found and determined that the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. For the months of September 1, 1995, through February 29, 1996: In the second sentence of § 1137.7(b), the words "plant which has qualified as a" and "of March through August"; and

2. For the months of September 1, 1995, through August 31, 1996: In the first sentence of § 1137.12(a)(1), the words "from whom at least three deliveries of milk are received during the month at a distributing pool plant"; and in the second sentence, the words "30 percent in the months of March, April, May, June, July, and December and 20 percent in other months of", and the word "distributing".

Statement of Consideration

This rule suspends certain portions of the pool plant and producer definitions of the Eastern Colorado order. The suspension will make it easier for handlers to qualify milk for pooling under the order.

The suspension was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that has pooled milk of dairy farmers on the Eastern Colorado order for several years. Mid-Am requested the suspension to prevent the uneconomic and inefficient movement of milk for the sole purpose of pooling the milk of producers who have been historically associated with the Eastern Colorado order.

For the months of September 1995 through February 1996, the restriction on the months when automatic pool plant status applies for supply plants will be removed. For the months of September 1995 through August 1996, the touch-base requirement will not apply and the diversion allowance for cooperatives will be raised.

These provisions have been suspended for several years to maintain the pool status of producers who have historically supplied the fluid needs of Eastern Colorado distributing plants. The marketing conditions which justified the prior suspensions continue to exist.

Mid-Am asserts that they have made a commitment to supply the fluid milk requirements of distributing plants if the suspension request is granted. Without the suspension action, to qualify certain of its milk for pooling, it would be necessary for the cooperative to ship milk from distant farms to Denver-area bottling plants. The distant milk would displace milk produced on nearby farms that would then have to be shipped from the Denver area to manufacturing plants located in outlying areas.

There are ample supplies of locally produced milk that can be delivered directly from farms to distributing plants to meet the market's fluid needs without requiring shipments from supply plants.

This suspension is found to be necessary for the purpose of assuring that producers' milk will not have to be moved in an uneconomic and inefficient manner to ensure that producers whose milk has long been associated with the Eastern Colorado marketing area will continue to benefit from pooling and pricing under the order.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area, in that such rule is necessary to permit the continued pooling of the milk of dairy farmers who have historically supplied the market without the need for making costly and inefficient movements of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. One comment supporting and no comments opposing the suspension were received.

Therefore, good cause exists for making this order effective less than 30 days from the date of publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1137

Milk marketing orders.

For the reasons set forth in the preamble, the following provisions in Title 7, Part 1137, are amended as follows:

PART 1137—MILK IN THE EASTERN COLORADO MARKETING AREA

1. The authority citation for 7 CFR Part 1137 continues to read as follows:

Authority: 7 U.S.C. 601–674.

§ 1137.7 [Suspended in part]

2. In § 1137.7(b), the second sentence is amended by suspending the words "plant which has qualified as a" and "of March through August" from September 1, 1995, through February 29, 1996.

§ 1137.12 [Suspended in part]

3. In § 1137.12(a)(1), the first sentence is amended by suspending the words "from whom at least three deliveries of milk are received during the month at a distributing pool plant" from September 1, 1995, through August 31, 1996.

4. In § 1137.12(a)(1), the second sentence is amended by suspending the words "30 percent in the months of March, April, May, June, July, and December and 20 percent in other months of", and the word "distributing" from September 1, 1995, through August 31, 1996.

Dated: August 29, 1995.

Patricia Jensen,

Acting Assistant Secretary, Marketing and Regulatory Programs.

[FR Doc. 95–22005 Filed 9–5–95; 8:45 am]

BILLING CODE 3410–02–P

Rural Housing and Community Development Service

Rural Business and Cooperative Development Service

Rural Utilities Service

Consolidated Farm Service Agency

7 CFR Part 1942

RIN 0572–AB11

Community Facility Loans and Grants—Timber-Dependent Communities

AGENCIES: Rural Housing and Community Development Service, Rural Business and Cooperative Development Service, Rural Utilities Service, and Consolidated Farm Service Agency, USDA.

ACTION: Final rule.

SUMMARY: The regulations that are utilized by the Rural Utilities Service (RUS) and the Rural Housing and Community Development Service (RHCDS) in administering Community Facility Loans and Grants are being amended. This action is necessary to implement provisions of Public Law 103–427, provides for a temporary increase in the maximum population for eligibility for certain loans and grants as contained in the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) (CONACT) for certain timber-dependent communities in the Pacific Northwest. The temporary expanded eligibility applies to the following programs; (1) Water and Waste Disposal (WWD) loans and grants, (2) Community Facilities Loans (CF), and (3) Local Technical Assistance and Planning Grants.

DATES: This final rule is effective on September 6, 1995.

FOR FURTHER INFORMATION CONTACT: Jerry W. Cooper, Loan Specialist, Water and Waste Disposal Division, Rural Utilities Service, USDA, South Agriculture Building, Room 6328, Washington, DC 20250, telephone: (202) 720–9589.

SUPPLEMENTARY INFORMATION:

Classification

This rule has been determined to be significant and was reviewed by OMB under Executive Order 12866.

Intergovernmental Review

These programs are listed in the Catalog of Federal Domestic Assistance under number 10.760, Water and Waste Systems For Rural Communities and 10.766, Community Facilities Loans and are subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Environmental Impact Statement

This action has been reviewed in accordance with FmHA Instruction 1940–G, "Environmental Program." It has been determined that the action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Compliance With Executive Order 12778

The regulation has been reviewed in light of Executive Order 12778 and meets the applicable standards provided in sections 2(a) and 2(b)(2) of that Order. Provisions within this part which are inconsistent with State law are controlling. All administrative remedies pursuant to 7 CFR Part 1900 Subpart B must be exhausted prior to filing suit.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act (44 U.S.C. 3507), the information collection requirements included in this rule have been approved through 7 CFR 1942–A. The assigned OMB control number is 0575–0015. This rule does not revise or impose any new information collection or recordkeeping requirements from those approved by the Office of Management and Budget.

Background

It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. These amendments, however, are not published for proposed rulemaking because they are merely following the specific directions of Public Law 103–427 and no discretion is left with the agency as to the population eligibility of certain timber-dependent communities in the Pacific Northwest. Good cause is found that notice and public procedure thereon are impractical, unnecessary and contrary to the public interest.

Public Law 103–427 addresses the financial needs of rural communities in the Pacific Northwest that are struggling to retool their economies in the face of necessary changes in timber-cutting policies. Certain rural communities in the Pacific Northwest are experiencing significant economic difficulties as a result of their proximity to the range of the northern spotted owl will benefit from the expanded loan and grant eligibility.

The CONACT caps the eligibility of cities or towns at 10,000 inhabitants for RUS WWD loans and grants and 20,000 inhabitants for RHCDS CF loans. Public Law 103–427 temporarily expands, until September 30, 1998, the population to 25,000 inhabitants if the cities or towns meet certain criteria. The communities must; (1) lie within 100 miles of the boundary of a national forest covered by the Federal document entitled "Forest Plan for a Sustainable Economy and a Sustainable Environment," dated July 1, 1993; and (2) be located in a county in which at least 15 percent of the total primary and secondary labor and proprietor income is derived from forestry, wood products, or forest-related industries such as recreation and tourism.

The Local Technical Assistance and Planning Grant program is impacted by this legislation. However, there are no existing regulations for this program, and therefore, that program is not included in this amendment.

List of Subjects in 7 CFR Part 1942

Community development, Community facilities, Grant programs—Housing and community development, Rural areas, Waste treatment and disposal—Domestic, Water supply—Domestic.

Therefore, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1942—ASSOCIATIONS

1. The authority citation for part 1942 continues to read as follows:

Authority: 7 U.S.C. 1989; 16 U.S.C. 1005; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Community Facility Loans

2. Section 1942.17 is amended by adding paragraph (b)(6) to read as follows:

§ 1942.17 Community facilities.

* * * * *

(b) * * *

(6) Expanded eligibility for timber-dependent communities in Pacific Northwest. In the Pacific Northwest, defined as an area containing national forest covered by the Federal document entitled, "Forest Plan for a Sustainable Economy and a Sustainable Environment," dated July 1, 1993; the population limits contained § 1942.17(b) are expanded to include communities with not more than 25,000 inhabitants until September 30, 1998, if:

(i) Part or all of the community lies within 100 miles of the boundary of a national forest covered by the Federal document entitled, "Forest Plan for a Sustainable Economy and a Sustainable Environment," dated July 1, 1993; and

(ii) The community is located in a county in which at least 15 percent of the total primary and secondary labor and proprietor income is derived from forestry, wood products, or forest-related industries such as recreation and tourism.

* * * * *

Dated: August 4, 1995.

Michael V. Dunn,

Acting Under Secretary for Rural Economic and Community Development.

[FR Doc. 95–22006 Filed 9–5–95; 8:45 am]

BILLING CODE 3410–32–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–ANE–51; Amendment 39–9361; AD 95–18–14]

Airworthiness Directives; General Electric Company CF6 Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to General Electric Company (GE) CF6 series turbofan engines. This action requires a more detailed fluorescent penetrant inspection process for GE CF6 series high pressure compressor rotor (HPCR) stage 3–9 spools. This amendment is prompted by an uncontained failure of the HPCR stage 3–9 spool attributed to a material defect located in the hub to web transition area of the stage 6 disk. The actions specified in this AD are intended to prevent an uncontained HPCR engine failure, which can result in damage to the aircraft.

DATES: Effective September 21, 1995.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 21, 1995.

Comments for inclusion in the Rules Docket must be received on or before November 6, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–ANE–51, 12 New England Executive Park, Burlington, MA 01803–5299.

The service information referenced in this AD may be obtained from General Electric Aircraft Engines, CF6 Distribution Clerk, Room 132, 111 Merchant Street, Cincinnati, OH 45246. This information may be examined at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Richard Woldan, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone (617) 238–7136, fax (617) 238–7199.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) has received a report of an uncontained failure of a General Electric Company (GE) CF6–50 high pressure compressor rotor (HPCR) stage 3–9 spool. The failure resulted from a low cycle fatigue crack originating from a material defect located in the hub to web transition area of the stage 6 disk. The FAA has determined that a more detailed fluorescent penetrant inspection process is required for these high pressure compressor rotor stage 3–9 spools. This condition, if not corrected, could result in an uncontained HPCR engine failure, which can result in damage to the aircraft.

The FAA has reviewed and approved the technical contents of GE All Operators' Wire, Subject: FPI of Deep Disk Spools, Best Practices, dated August 10, 1995, that describes a more detailed fluorescent penetrant inspection process for HPCR stage 3–9 spools.

Since an unsafe condition has been identified that is likely to exist or develop on other GE CF6 series engines of the same type design, this AD is being issued to prevent an uncontained HPCR engine failure, which can result in damage to the aircraft. This AD requires that a more detailed fluorescent penetrant inspection of the HPCR stage 3–9 spool be used whenever fluorescent penetrant inspection of these spools is accomplished. The actions are required to be accomplished in accordance with the All Operators' Wire described previously.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption ADDRESSES. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 95–ANE–51." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption ADDRESSES.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

95–18–14 General Electric Company: Amendment 39–9361. Docket 95–ANE–51.

Applicability: General Electric Company (GE) CF6 series engines. These engines are installed on but not limited to Airbus Industries A300, A310, and A330 series; Boeing 747 and 767 series; and McDonnell Douglas DC10 and MD11 series aircraft.

Note: This AD applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any engine from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent an uncontained high pressure compressor rotor (HPCR) engine failure, which can result in damage to the aircraft, accomplish the following:

(a) After the effective date of this AD all fluorescent penetrant inspections of HPCR stage 3–9 spools must be accomplished in accordance with the process described in GE All Operators' Wire, Subject: FPI of Deep Disk Spools, Best Practices, dated August 10, 1995.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(c) The actions required by this AD shall be accomplished in accordance with the following GE All Operators' Wire:

Document	Pages	Date
Subject: FPI of Deep Disk Spools, Best Practices.	1–3	Aug. 10, 1995.
Total pages: 3.		

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from General Electric Aircraft Engines, CF6 Distribution Clerk, Room 132, 111 Merchant Street, Cincinnati, OH 45246. Copies may be inspected at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(d) This amendment becomes effective on September 21, 1995.

Issued in Burlington, Massachusetts, on August 29, 1995.

Jay J. Pardee,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[FR Doc. 95–21955 Filed 9–1–95; 3:38 pm]

BILLING CODE 4910–13–U

---

14 CFR Part 97

[Docket No. 28315; Amdt. No. 1682]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Area Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPS). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting

these SIAPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Navigation (Air).

Issued in Washington, DC, on August 25, 1995.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 u.t.c. on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 is revised to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120, 44701; and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, and 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME VOR or TACAN, and VOR/DME, or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1601

Procedural Regulations

AGENCY: Equal Employment Opportunity Commission (EEOC).

ACTION: Final rule.

SUMMARY: EEOC is revising its procedural regulations at 29 CFR sections 1601.70 and .71 to rescind the delegations of authority to the Director of the Office of Program Operations to designate a State or local agency as a Fair Employment Practices (FEP) agency and to determine whether a FEP agency's designation shall be withdrawn. Those authorities are now vested in the full Commission. These changes are the result of a Motion adopted by the Commission on May 22, 1995.

EFFECTIVE DATE: September 6, 1995.

FOR FURTHER INFORMATION CONTACT: Thomas J. Schlageter, Assistant Legal Counsel, or John D. Norquist, General Attorney, at (202) 663–4669 (voice) or (202) 663–7026 (TDD). This rule is also available in the following formats: large print, braille, audio tape and electronic file on computer disk. Requests for this rule in an alternative format should be made to the Office of Equal Employment Opportunity at (202) 663–7081 (voice) or (202) 663–7002 (TDD).

SUPPLEMENTARY INFORMATION: Section 706 of Title VII of the Civil Rights Act of 1964 recognizes a State or a political subdivision of a State that has a state or local law prohibiting unlawful employment discrimination and a State or local authority empowered to grant or seek relief from such practice or to institute criminal proceedings. The Commission's regulations allow such a State or local authority to apply for formal designation as a "FEP Agency." The Commission's procedural regulations at 29 CFR 1601, Subpart G, sections 1601.70–.71 set forth the procedures for a FEP Agency to request designation and for the Commission to determine if a designation should be rescinded.

The current 1601.70 provides that any State or local agency or authority seeking FEP agency designation should submit a written request to the Program Director, Office of Program Operations. It also provides that the Program Director will provide to the State attorney general and to any corporation counsel of an involved local government an opportunity to comment upon aspects of State or local law which might affect the qualifications of any new agency. The Commission has determined that it needs to be more involved in the designation process. The Commission is therefore substituting the words "Chairman of the Commission" for "Program Director, Office of Program Operations" in 1601.70.

The current 1601.71 provides that the Program Director, Office of Program Operations, has the authority to determine whether State and local agencies should be designated as FEP agencies. It also provides that when the

Program Director becomes aware of events that lead him or her to believe that a deferral agency no longer meets the requirements for deferral or designation, the Director should notify the agency and request a response. Based on the response or after a hearing, the Program Director is authorized to render a final determination regarding continuation of the agency as a FEP agency. The Commission has determined that these decisions are better made by the full Commission. At its meeting on May 22, 1995, the Commission rescinded the delegation of authority to the Director of the Office of Program Operations to make determinations affecting the designation of a State or local fair employment practices agency as a FEP agency. As a result of this action, the Commission is substituting "Commission" or "Chairman of the Commission" for "Program Director, Office of Program Operations" in 1601.71 and making conforming grammatical adjustments.

This rule is not a significant regulatory action for the purposes of Executive Order 12866. Under the Regulatory Flexibility Act, this rule will not have a significant economic effect on a substantial number of small entities.

List of Subjects in 29 CFR Part 1601

Administrative practice and procedure, Equal employment opportunity, Individuals with disabilities.

For the Commission,

Gilbert F. Casellas,

Chairman.

For the reasons set forth in the preamble, EEOC is amending 29 CFR part 1601 as follows:

PART 1601—[AMENDED]

1. The authority citation for part 1601 continues to read as follows:

Authority: 42 U.S.C. 2000e to 2000e–17; 42 U.S.C. 12111 to 12117.

§ 1601.70 [Amended]

2. Paragraph (b) of section 1601.70 is amended by substituting the words "Chairman of the Commission" for the words "Program Director, Office of Program Operations" in the first sentence.

3. Paragraph (e) of section 1601.70 is amended by substituting the words "Chairman or his or her designee" for the words "Program Director, Office of Program Operations," in the first sentence.

4. Paragraph (a) of section 1601.71 is amended by:

(a) substituting the word "Commission" for the words "Program Director, Office of Program Operations,"; and

(b) substituting the words "the Commission" for the words "he or she".

5. Paragraph (b) of section 1601.71 is amended by substituting the word "Commission" for the words "Program Director, Office of Program Operations," in both places where it is found in the first sentence.

6. Paragraph (c) of section 1601.71 is amended by:

(a) substituting the word "Chairman" for the words "Program Director, Office of Program Operations," in the first sentence;

(b) substituting the words "the Chairman" for the words "such Director" in the first sentence;

(c) substituting the word "Chairman" for the word "Director" in the second sentence; and

(d) substituting the word "Commission" for the word "Director" in the third sentence.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 95–7–6789a; FRL–5280–1]

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision; South Coast Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is taking direct final action to approve revisions to the California State Implementation Plan (SIP). The revisions concern rules from the South Coast Air Quality Management District (SCAQMD) which control oxides of nitrogen (NO_X) from industrial, commercial, and institutional boilers, steam generators, and process heaters. This approval action will incorporate these rules into the Federally approved SIP. The intended effect of approving these rules is to regulate emissions of NO_X in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). The EPA is finalizing the approval of these revisions into the California SIP under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas.

DATES: This final rule is effective on November 6, 1995 unless adverse or critical comments are received by October 6, 1995. If the effective date is delayed, a timely notice will be published in the **Federal Register**.

ADDRESSES: Copies of the rules and EPA's evaluation report of each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rules are available for inspection at the following locations:

Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

Environmental Protection Agency, Air Docket (6102), 401 "M" Street, SW., Washington, D.C. 20460.

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95814.

South Coast Air Quality Management District, 21865 E. Copley Drive, Diamond Bar, CA 91765–4182.

FOR FURTHER INFORMATION CONTACT: Mae Wang, Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901, Telephone: (415) 744–1200.

SUPPLEMENTARY INFORMATION:

Applicability

The rules being approved into the California SIP include: SCAQMD Rule 1146, Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters; and Rule 1146.1, Emissions of Oxides of Nitrogen from Small Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters. These rules were submitted by the California Air Resources Board (CARB) to EPA on July 13, 1994.

Background

On November 15, 1990, the Clean Air Act Amendments of 1990 (CAA or the Act) were enacted. Pub. L. 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. The air quality planning requirements for the reduction of NO_X emissions through reasonably available control technology (RACT) are set out in section 182(f) of the CAA. On November 25, 1992, EPA published a Notice of Proposed Rulemaking (NPRM) entitled "State Implementation Plans; Nitrogen Oxides Supplement to the General

Preamble; Clean Air Act Amendments of 1990 Implementation of Title I; Proposed Rule," (the NO_X Supplement) which describes and provides preliminary guidance on the requirements of section 182(f). 57 FR 55620. The NO_X Supplement should be referred to for further information on the NO_X requirements and is incorporated into this notice of direct final rulemaking by reference.

Section 182(f) of the Clean Air Act requires States to apply the same requirements to major stationary sources of NO_X ("major" as defined in section 302 and section 182 (c), (d), and (e)) as are applied to major stationary sources of volatile organic compound (VOC) emissions, in moderate or above ozone nonattainment areas. The Los Angeles-South Coast Air Basin Area is classified as extreme;[1] therefore this area was subject to section 182(f), the RACT requirements of section 182(b)(2), and the November 15, 1992 deadline, cited below.

Section 182(b)(2) requires submittal of RACT rules for major stationary sources of VOC (and NO_X) emissions (not covered by either a pre-enactment or post-enactment control technologies guideline (CTG) document) by November 15, 1992. There were no NO_X CTGs issued before enactment and EPA has not issued a CTG document for any NO_X sources since enactment of the CAA. The RACT rules covering NOx sources and submitted as SIP revisions, are expected to require final installation of the actual NOx controls as expeditiously as practicable, but no later than May 31, 1995.

SCAQMD Rule 1146 and Rule 1146.1 were adopted by SCAQMD on May 13, 1994, and were submitted by CARB to EPA on July 13, 1994. These submitted rules were found to be complete on July 22, 1994 pursuant to EPA's completeness criteria that are set forth in 40 CFR part 51, appendix V.[2] By today's notice, EPA is taking direct final action to approve these rules into the Federally approved SIP.

SCAQMD Rule 1146 and 1146.1 control emissions of NO_X from industrial, commercial, and institutional boilers, steam generators and process heaters. NO_X emissions contribute to the production of ground level ozone and smog. The rules were adopted as part of SCAQMD's efforts to achieve the National Ambient Air Quality Standards for ozone and in response to the CAA requirements cited above. The following section contains EPA's evaluation and final action for these rules.

EPA Evaluation

In determining the approvability of a NO_X rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for this action, appears in various EPA policy guidance documents.[3] Among these provisions is the requirement that a NO_X rule must, at a minimum, provide for the implementation of RACT for stationary sources of NO_X emissions.

For the purposes of assisting state and local agencies in developing NO_X RACT rules, EPA prepared the NO_X Supplement to the General Preamble. In the NO_X Supplement, EPA provides guidance on how RACT will be determined for stationary sources of NO_X emissions. While most of the guidance issued by EPA on what constitutes RACT for stationary sources has been directed towards application for VOC sources, much of the guidance is also applicable to RACT for stationary sources of NO_X (see section 4.5 of the NO_X Supplement). In addition, pursuant to section 183(c), EPA is issuing alternative control technique documents (ACTs), which identify alternative controls for all categories of stationary sources of NO_X. The ACT documents will provide information on control technology for stationary sources that emit or have the potential to emit 25 tons per year or more of NO_X. However, the ACTs will not establish a presumptive norm for what is considered RACT for stationary sources of NO_X. In general, the guidance documents cited above, as well as other relevant and applicable guidance documents, have been set forth to ensure that submitted NO_X RACT rules meet Federal RACT requirements and are fully enforceable and strengthen or maintain the SIP.

SCAQMD Rule 1146, Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters, contains the following significant changes from the current SIP rule:

1. Expands applicability beyond steam generators with rated heat input capacity (RHIC) of 50 MBtu/hr or more.
2. Lowers emission limits.
3. Adds definitions, control plan requirements, recordkeeping, compliance determination provisions, a compliance schedule, and an equipment tuning procedure.

SCAQMD Rule 1146.1, Emissions of Oxides of Nitrogen from Small Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters, is a new rule which controls emissions from units between 2 and 5 million Btu per hour. The major provisions of this rule include: emission limits, recordkeeping, compliance determination provisions, a compliance schedule, and an equipment tuning procedure.

For the source category of industrial, commercial, and institutional boilers, steam generators, and process heaters, CARB has made a determination on the emission levels that constitute RACT, and CARB has published a guidance document concerning their determination for this source category. EPA believes that the emission limits in Rule 1146 and Rule 1146.1 are consistent with guidance and policy for making RACT determinations, and that these limits satisfy the RACT requirement. A more detailed discussion of the sources controlled,[4] the controls required, and the justification for why these controls represent RACT can be found in the Technical Support Document (TSD) for each rule, available from the U.S. EPA Region IX office.

EPA has evaluated the submitted rule and has determined that it is consistent with the CAA, EPA regulations and EPA policy. Therefore, SCAQMD Rule 1146 and Rule 1146.1 are being approved under section 110(k)(3) of the CAA as meeting the requirements of section 110(a), section 182(b)(2), section 182(f) and the NO_X Supplement to the General Preamble.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

---

[1] The Los Angeles-South Coast Air Basin Area retained its designation of nonattainment and was classified by operation of law pursuant to sections 107(d) and 181(a) upon the date of enactment of the CAA. See 55 FR 56694 (November 6, 1991).

[2] EPA adopted the completeness criteria on February 16, 1990 (55 FR 5830) and, pursuant to section 110(k)(1)(A) of the CAA, revised the criteria on August 26, 1991 (56 FR 42216).

[3] Among other things, the pre-amendment guidance consists of those portions of the proposed post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988).

[4] Rule 1146 and Rule 1146.1 will apply to sources which are not covered in the SCAQMD NO_X RECLAIM program.

EPA is publishing this document without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document elsewhere in this **Federal Register**, the EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 6, 1995, unless, by October 6, 1995, adverse or critical comments are received.

If the EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent notice that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective November 6, 1995.

Regulatory Process

Unfunded Mandates

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector or to state, local, or tribal governments in the aggregate.

Through submission of this state implementation plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under part D of the Clean Air Act. These rules may bind state, local, and tribal governments to perform certain actions and also require the private sector to perform certain duties. The rules being approved by this action will impose no new requirements because affected sources are already subject to these regulations under state law. Therefore, no additional costs to state, local, or tribal governments or to the private sector result from this action. EPA has also determined that this direct final action does not include a mandate that may result in estimated costs of $100 million or more to state, local, or tribal governments in the aggregate or to the private sector.

Small Businesses

Under the Regulatory Flexibility Act, 5 U.S.C. Section 600 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. sections 603 and 604. Alternatively, EPA may certify that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on affected small entities. Moreover, due to the nature of the Federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. U.S. E.P.A. , 427 U.S. 246, 256–66 (S. Ct. 1976); 42 U.S.C. section 7410(a)(2).

The Office of Management and Budget has exempted this regulatory action from review under Executive Order 12866.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Nitrogen oxides, Ozone, Reporting and recordkeeping requirements, Volatile organic compound.

Dated: August 8, 1995.

Felicia Marcus,

Regional Administrator.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

[SD6–1–6947a and SD5–1–6191a; FRL–5279–3]

Clean Air Act Approval and Promulgation of State Implementation Plan for South Dakota; Revisions to the Air Pollution Control Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA approves the State implementation plan (SIP) revisions submitted by the State of South Dakota on November 12, 1993 and March 7, 1995. EPA is replacing the existing rules approved in the SIP with the following chapters of the Administrative Rules of South Dakota (ARSD), as requested by the State: 74:36:01–74:36:04, 74:36:06; 74:36:07, 74:36:10–74:36:13, and 74:36:15, as in effect on January 5, 1995. The State's submittals included revisions to the State's definitions, minor source construction and federally enforceable state operating permit (FESOP) rules, source category emission limitations, sulfur dioxide (SO_2) rules, new source performance standards (NSPS), new source review (NSR) requirements for new and modified major sources impacting nonattainment areas, and enhanced monitoring and compliance certification requirements.

In addition, EPA is approving the State's construction and operating permit program under section 112(l) of the Clean Air Act (Act) for the purposes of creating federally enforceable permit conditions for sources of hazardous air pollutants (HAPs).

DATES: This final rule is effective on November 6, 1995 unless adverse comments are received by October 6, 1995. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Copies of the State's submittal and other information are available for inspection during normal business hours at the following locations: Air Programs Branch, Environmental Protection Agency, Region VIII, 999 18th Street, suite 500, Denver, Colorado 80202–2405; South Dakota Department of Environment and Natural Resources, Division of Environmental Regulation, Joe Foss Building, Pierre, South Dakota 57501; and The Air and Radiation Docket and Information Center, 401 M Street, SW, Washington, D.C. 20460.

Written comments should be addressed to Vicki Stamper, 8ART–AP, Environmental Protection Agency, Region VIII, 999 18th Street, suite 500, Denver, Colorado.

FOR FURTHER INFORMATION CONTACT: Vicki Stamper, (303) 293–1765.

SUPPLEMENTARY INFORMATION:

I. Background

On November 12, 1993, the State of South Dakota submitted revisions to its SIP. Specifically, the State requested that the existing State rules approved in the SIP be replaced with the most recent codification of the ARSD, Chapters 74:36:01–04 and 74:36:06–13 inclusive. In addition to recodification, the State made numerous revisions to its air quality regulations, including definitions, minor source construction and operating permit rules, source category emission limitations, NSPS, national emission standards for hazardous air pollutants (NESHAPs), NSR requirements for new and modified sources impacting nonattainment areas, and other minor revisions.

In a July 13, 1994 letter, EPA noted many deficiencies in the State's November 12, 1993 submittal and requested that the State correct the major deficiencies before EPA would proceed with approval. The State made those corrections to its rules and submitted the rule corrections to EPA on March 7, 1995. In that submittal, the State also addressed EPA's July 7, 1994 call for revision of the South Dakota SIP to comply with the enhanced monitoring and compliance certification program requirements of sections 110, 113, and 114 of the Act. In addition, the State adopted other revisions to its rules, including its acid rain rules and updates to its incorporation by reference of the Federal requirements for NSPS and HAPs.

The March 7 submittal requested that the previous regulations approved in the SIP be replaced with ARSD Chapters 74:36:01–74:36:04, 74:36:06; 74:36:07, 74:36:10–74:36:13, and 74:36:15, as in effect on January 5, 1995. The following State regulations were not included in the State's March 7 SIP submittal: ARSD 74:36:05 Operating Permits for Part 70 Sources, for which EPA granted interim approval on March 22, 1995 (see 60 FR 15066–15069); ARSD 74:36:08 National Emission Standards for Hazardous Air Pollutants, which the State has taken out of the SIP and has instead requested delegation of authority for these standards; ARSD 74:36:09 Prevention of Significant Deterioration (PSD), which incorporates by reference the corresponding Federal rules at 40 CFR 52.21 that EPA delegated authority to the State to implement on July 6, 1994 (see September 15, 1994 **Federal Register**, 59 FR 47260); ARSD 74:36:14 Variances, which the State did not include in the SIP because such a provision could not be approved as part of the SIP as it is inconsistent with section 110(i) of the amended Act; and ARSD 74:36:16 Acid Rain Program, which will be acted on by EPA separate from this SIP approval.

This document evaluates the State's submittal for conformity with the corresponding Federal regulations and the requirements of the Act.

II. This Action

A. Analysis of State Submissions

1. Procedural Background

The Act requires States to observe certain procedural requirements in developing implementation plans and plan revisions for submission to EPA. Section 110(a)(2) of the Act provides that each implementation plan submitted by a State must be adopted after reasonable notice and public hearing. Section 110(l) of the Act similarly provides that each revision to an implementation plan submitted by a State under the Act must be adopted by such State after reasonable notice and public hearing.

The EPA also must determine whether a submittal is complete and therefore warrants further EPA review and action [see section 110(k)(1) and 57 FR 13565, April 16, 1992]. The EPA's completeness criteria for SIP submittals are set out at 40 CFR part 51, appendix V. The EPA attempts to make completeness determinations within 60 days of receiving a submission. However, a submittal is deemed complete by operation of law under section 110(k)(a)(B) if a completeness determination is not made by EPA within six months after receipt of the submission.

The State of South Dakota held public hearings on February 18, 1993 and November 17, 1994 to entertain public comment on the SIP revisions, at which the rule revisions were adopted by the State. These rule revisions were formally submitted to EPA for approval in the SIP on November 12, 1993 and on March 7, 1995.

The SIP revisions were reviewed by EPA to determine completeness shortly after their submittal, in accordance with the completeness criteria referenced above. The submittals were found to be complete, and letters dated January 12, 1994 and June 28, 1995 were forwarded to the Governor indicating the completeness of the submittals and the next steps to be taken in the processing of the SIP submittals.

2. Evaluation of State's Submittals

The following summarizes the State's submittals and EPA's review for approvability:

a. ARSD 74:36:01 Definitions

The State made numerous revisions to its definitions in ARSD 74:36:01 in order to make the definitions consistent with other provisions in the State's rules and with the corresponding Federal regulations, including the State's recently adopted title V permitting program in ARSD 74:36:05 and the acid rain program in ARSD 74:36:16.

EPA has reviewed the definitions included in this chapter against the corresponding Federal definitions in 40 CFR parts 51, 60, and 70 and for conformity with the State's regulations. EPA believes the revised definitions are consistent with the corresponding Federal definitions, with the following clarifications.

As discussed in EPA's January 12, 1995 **Federal Register** notice of proposed interim approval of South Dakota's title V program (see 60 FR 2919), EPA believes clarification regarding two of the State's definitions is necessary to ensure that the provisions are interpreted consistently with the Federal regulations:

(1) The definition of "federally enforceable" which appears at ARSD 74:36:01:01(28) reads as follows:

> "Federally enforceable," all limits and conditions that are enforceable by the administrator of EPA pursuant to federal law. These limits and conditions include those requirements developed pursuant to this article, those appearing in 40 CFR 60 and 61 (July 1, 1993), requirements within the state implementation plan and permit requirements established pursuant to this article or 40 CFR 51 Subpart I (July 1, 1993). The use of this term does not impede the Department's authority under state law to enforce these limits and conditions.

This definition is significant for determining whether a source is subject to preconstruction and operating permitting requirements as a major source or as a minor source, because it is used in defining the "potential to emit" of a source. To be consistent with EPA's definition of "federally enforceable," the second sentence of the above definition cannot and should not be read to expand on the first sentence of the definition. For example, requirements developed pursuant to ARSD Article 74:36 might be, but would not necessarily be, federally enforceable. Such Federal enforceability would depend on whether such requirements had been included in a source's preconstruction or operating permit issued under an EPA-approved program, whether such requirements had been approved by EPA as part of the SIP, or whether such requirements were already considered Federal regulations (such as NSPS promulgated in 40 CFR part 60 which South Dakota has incorporated by reference in ARSD 74:36:07). EPA's interpretation is that the requirements delineated in the second sentence of the definition are only federally enforceable if they are enforceable by the administrator of EPA pursuant to Federal law.

(2) The second sentence of the definition of "major source" in ARSD 74:36:01:08(1) reads as follows:

> Emissions from any oil exploration or production well and its associated equipment and emissions from any pipeline compressor or pump station may not be aggregated with emissions from other similar units, whether or not such units are in a contiguous area or under common control, to determine whether such units or stations are major sources.

To be consistent with the Federal regulations, this sentence must be read as only being applicable to a determination of whether a source is major under section 112 of the Act. This language cannot be applied when determining whether a source is major under other sections of the Act.

With these interpretations, EPA believes the definitions in ARSD 74:36:01 are consistent with the corresponding Federal regulations. EPA is approving all of the definitions in ARSD 74:36:01, with the exception of two definitions related to the State's acid rain program which EPA will be acting on separately: "acid rain permit" and "acid rain program" in ARSD 74:36:01:01(2) and (3).

b. ARSD 74:36:02 Ambient Air Quality

This chapter was revised to refer to the Federal regulations for the National Ambient Air Quality Standards (NAAQS), methods of sampling and analysis, air quality monitoring networks, and ambient air monitoring in 40 CFR parts 50, 53, and 58. The State's regulation is consistent with the relevant Federal requirements and is approvable.

c. ARSD 74:36:03 Air Quality Episodes

This chapter was revised to refer to the Federal guidelines for emergency episode plans in 40 CFR 51.151–153 and appendix L. The State's regulation is consistent with the relevant Federal requirements and is approvable.

d. ARSD 74:36:04 Operating Permits for Minor Sources

This chapter was revised extensively to combine the State's existing minor source construction permit and FESOP requirements into one permitting system and to ensure compliance with the Federal requirements for both construction permit programs and FESOP programs. This chapter only applies to sources which are not considered to be 40 CFR part 70 sources (i.e., sources which are not required to obtain a title V operating permit). (Note that the State's construction permitting program for new and modified major sources is the State's PSD permitting program in ARSD 74:36:09.) Specifically, a new source in South Dakota must obtain an operating permit prior to construction, and an existing source must obtain a permit in order to operate the source. Such operating permits will be valid for five years and must be renewed.

(1) Construction Permit Program.

The minor source construction permit element of the State's permitting program must meet the corresponding Federal requirements in 40 CFR 51.160–164, in order to be approved by EPA. As detailed in the Technical Support Document (TSD) accompanying this notice, EPA believes the State's construction permit requirements meet all of the corresponding Federal requirements in 40 CFR 51.160–164.

(2) FESOP Program.

On June 28, 1989, EPA published criteria for approving and incorporating into the SIP regulatory programs for the issuance of FESOPs (see 54 FR 27282). Permits issued pursuant to an operating permit program approved into the SIP as meeting these criteria may be considered federally enforceable. The EPA has encouraged States to develop such FESOP programs in conjunction with title V operating permit programs to enable sources to limit their potential to emit to below the title V applicability thresholds. (See the September 18, 1992 guidance document entitled, "Limitation of Potential to Emit with Respect to Title V Applicability Thresholds," from John Calcagni, Director, Air Quality Management Division, Office of Air Quality Planning and Standards (OAQPS), Office of Air and Radiation, U.S. EPA.) In addition, on November 3, 1993, EPA announced in a guidance document entitled, "Approaches to Creating Federally Enforceable Emissions Limits," from John S. Seitz, Director, OAQPS, that this mechanism could be extended to create federally enforceable limits for emissions of HAPs if the program were approved pursuant to section 112(l) of the Act. (See Section III. below for further details on EPA's section 112(l) approval of South Dakota's FESOP program.)

As detailed in the TSD, EPA has reviewed the State's permitting program for conformity with the FESOP criteria outlined in the June 28, 1989 **Federal Register** notice and believes the State's program adequately meets those requirements, although one clarification regarding their rules needs to be made:

South Dakota's rules do not specifically provide for submittal of each proposed and final permit to EPA on a timely basis. However, EPA has established procedures in the annual State-EPA agreement requiring the State to submit to EPA proposed and final permits which would limit the potential to emit of a source so that it would not be considered major. EPA reiterates that requirement in this document. That is, for any operating permit issued by the State to be considered federally enforceable, the State must submit the proposed and final permit to EPA in a timely manner, as well as meet all of the other requirements of its program and the June 28, 1989 **Federal Register**.

Thus, EPA is approving South Dakota's construction permit/FESOP program because it adequately meets the requirements of the June 28, 1989 **Federal Register** and 40 CFR 51.160–164. Permits issued by the State that conform to the State's rules and corresponding Federal requirements will be considered federally enforceable. See the TSD accompanying this document for further details.

e. ARSD 74:36:06 Regulated Air Pollutants

In this chapter, the State combined its Control of Particulate Emissions regulation previously codified in ARSD 74:26:06 and its Control of Sulfur Compound Emissions regulation previously codified in ARSD 74:26:07 into one chapter. The State made minor revisions to simplify its particulate matter emission regulations, which EPA believes are consistent with the Act and approvable.

In addition, the State made revisions to its regulations controlling SO_2 emissions in this chapter, as a result of EPA's nationwide effort to have SO_2 enforceability deficiencies identified

and corrected in SIPs before title V operating permit programs become effective. Because the title V operating permits will initially incorporate underlying SIP requirements, it is important that the underlying SIP is enforceable so that the permits themselves will be enforceable. Thus, on March 8, 1991, EPA provided a list of enforceability deficiencies in South Dakota's SO_2 emission control rules. The Region used the "SO_2 SIP Enforceability Checklist" when reviewing South Dakota's SO_2 rules for enforceability deficiencies. This checklist was included as an attachment to the November 28, 1990 memorandum from Robert Bauman and Rich Biondi to the Air Branch Chiefs, and it focused on the following topics:

(1) Clarity;

(2) Averaging times consistent with protection of the SO_2 NAAQS;

(3) Clear compliance determinations;

(4) Continuous emission monitoring;

(5) Adequate reporting and recordkeeping requirements;

(6) Director's discretion issues; and

(7) Stack height issues.

The State of South Dakota subsequently adopted revisions to address the deficiencies outlined in EPA's March 8, 1991 letter. Those revisions include: clarifying the applicability of this chapter to include units required to be permitted under article 74:36; specifying a 3-hour rolling averaging time, consistent with the SO_2 NAAQS, for the SO_2 emission limitations of this chapter; and referring to test methods listed in chapter 74:36:11 and including appropriate reference methods in that chapter. Recordkeeping and reporting requirements are addressed through the operating permit rules in ARSD 74:36:05:16.

EPA believes the State has adequately addressed the SO_2 deficiencies identified in EPA's March 8, 1991 letter. Therefore, EPA is approving the State's SO_2 regulations.

f. ARSD 74:36:07 New Source Performance Standards

In this chapter, the State has adopted new NSPS by incorporating by reference the Federal NSPS for subparts Dc, QQ, RR, VV, XX, AAA, JJJ, NNN, and SSS of 40 CFR part 60, as in effect on July 1, 1993. Also, the State updated the incorporation by reference citations of its existing NSPS to reflect the July 1, 1993 version of 40 CFR part 60. In addition, the State added a provision clarifying that the term "administrator," as used in the Federal regulations incorporated into the State's regulations, means the State except for those authorities which cannot be delegated to the State, in which case "administrator" means both EPA and the State. Since this chapter incorporates by reference the Federal NSPS in 40 CFR part 60, it is consistent with Federal requirements and approvable.

g. ARSD 74:36:10 New Source Review

In this chapter, the State adopted provisions for new and modified major stationary sources proposing to locate in attainment/unclassified areas but which cause or contribute to a violation of the NAAQS, in accordance with the requirements in 40 CFR 51.165(b). The State currently has no areas designated nonattainment for the NAAQS, so the State is currently not required to adopt nonattainment NSR provisions. EPA has reviewed the provisions in this chapter against the corresponding Federal requirements in 40 CFR 51.165 and found it to be consistent and therefore approvable.

h. ARSD 74:36:11 Stack Performance Testing

This chapter was revised to refer to the Federal test methods in 40 CFR part 51, appendix M, and 40 CFR part 60 as the test methods required to be used by sources and to make other minor revisions. EPA has reviewed the revisions to this chapter and has found they are consistent with the corresponding Federal requirements and approvable.

i. ARSD 74:36:12 Control of Visible Emissions

Minor revisions were made to this chapter, mainly to update the incorporation by reference of 40 CFR part 60, appendix A to reflect the July 1, 1993 version. EPA has reviewed the revisions to this chapter and has found they are consistent with the corresponding Federal requirements.

j. ARSD 74:36:13 Continuous Emission Monitoring Systems

(1) Continuous Emission Monitoring Requirements.

This new chapter was added to authorize the State to require major sources to install continuous emission monitors (CEMs) and to require that such CEMs meet the Federal performance specifications in 40 CFR part 60. EPA has reviewed these requirements adopted in ARSD 74:36:13:01–05 and has found these rules to be consistent with the corresponding Federal requirements and approvable.

(2) Enhanced Monitoring and Compliance Certification.

This regulation also address EPA's nationwide SIP call regarding the new enhanced monitoring and compliance certification requirements of the amended Act. On October 22, 1993, EPA announced in the **Federal Register** that SIP calls pursuant to section 110(k)(5) of the Act would be issued in order to implement the enhanced monitoring requirements of section 114(a)(3) of the Act and the periodic monitoring requirements for operating permits under sections 502(b)(2) and 504 of the Act (see 58 FR 54677). This SIP call is required because existing SIPs are inadequate in that they may be interpreted to limit the types of testing or monitoring data that may be used for determining compliance and establishing violations.

On July 7, 1994, the EPA notified the Governor of South Dakota that a SIP revision was necessary to meet the aforementioned requirements of the Act. EPA's letter provided the States with two options for regulatory language that, if adopted by the State and submitted to EPA for approval in the SIP, would satisfy the requirements of this SIP call. In Sections 74:36:13:06–07 of the ARSD, the State has adopted provisions which are essentially identical to the regulatory language provided in option 2 of the attachment to EPA's July 7, 1994 letter, as follows:

(a) In ARSD 74:36:13:06, the State has added a provision stating that, when submitting compliance certifications, an owner or operator of a source may use monitoring as required under 40 CFR 70.6(a)(3) in addition to any specified compliance methods. The practical effect of this provision is that the SIP is now more flexible and inclusive and does not preclude the use of enhanced monitoring.

(b) In ARSD 74:36:13:07, the State has added provisions stating that any credible evidence may be used to determine if a violation has occurred at a source. The rule provides that information from monitoring methods approved in a federally enforceable operating permit or in the SIP, as well as from any other federally enforceable monitoring and testing methods (including those in 40 CFR Parts 51, 60, 61, and 75), may be used by the State as credible evidence to determine compliance.

EPA believes the State has adequately satisfied the requirements of that SIP call letter and, therefore, is approving Sections 74:36:13:06–07 regarding enhanced monitoring and compliance certifications.

k. ARSD 74:36:15 Open Burning

The State made revisions to this chapter by further detailing those items that could not be disposed of by open burning, and by providing ability for small municipalities to burn solid wastes. Other minor revisions were also made. EPA has reviewed the revisions and believes they are consistent with the requirements of the Act and approvable.

III. Approval of South Dakota's Construction and Operating Permit Program Under Section 112(l) of the Act

In this action, EPA is also approving South Dakota's combined construction/FESOP permit program in ARSD 74:36:04 under section 112(l) of the Act for the purpose of creating federally enforceable limits on the potential to emit of HAPs listed pursuant to section 112(b) of the Act. Approval under section 112(l) is necessary to allow the State to create federally enforceable limits on the potential to emit of HAPs, because SIP approval of this permitting program only extends to the control of HAPs which are photochemically reactive organic compounds or particulate matter. Federally enforceable limits on photochemically reactive organic compounds or particulate matter may have the incidental effect of limiting certain HAPs.[1] As a legal matter, no additional program approval by EPA is required in order for these "criteria" pollutant limits to be recognized as federally enforceable. However, section 112 of the Act provides the underlying authority for controlling all HAP emissions.

As discussed above and in the TSD, the criteria which are used in approving minor source construction permit programs are located in 40 CFR 51.160–164. EPA believes the most significant criteria in 40 CFR part 51 for creating federally enforceable limits through construction permits are those in 40 CFR 51.160–162. Further, as discussed in EPA's January 25, 1995 memorandum from John S. Seitz, Director of the Office of Air Quality Planning and Standards, and Robert I. Van Heuvelen, Director of the Office of Regulatory Enforcement, entitled "Options for Limiting the Potential to Emit of a Stationary Source Under Section 112 and Title V of the Clean Air Act," in order for EPA to consider any construction permit terms federally enforceable, such permit conditions must be enforceable as a practical matter. South Dakota's permitting program will allow the State to issue permits that are enforceable as a practical matter. Thus, any permits issued in accordance with South Dakota's construction permit program and which are practically enforceable would be considered federally enforceable.

EPA believes that the five approval criteria for approving FESOP programs into the SIP, as specified in the June 28, 1989 **Federal Register** notice, are also appropriate for evaluating and approving such programs under section 112(l). The requirements outlined in the June 28, 1989 notice need not be unique to criteria pollutants since the reason that the notice does not address HAPs is simply that it was written prior to the 1990 Amendments to section 112.

In addition to meeting the criteria in 40 CFR 51.160–164 for construction permits and the criteria in the June 28, 1989 **Federal Register** notice for FESOPs, a permitting program that addresses HAPs must meet the statutory criteria for approval under section 112(l)(5). Section 112(l) allows EPA to approve a program only if it: (1) Contains adequate authority to assure compliance with any section 112 standards or requirements; (2) provides for adequate resources; (3) provides for an expeditious schedule for assuring compliance with section 112 requirements; and (4) is otherwise likely to satisfy the objectives of the Act.

EPA plans to codify the approval criteria for programs limiting potential to emit of HAPs through amendments to subpart E of 40 CFR part 63, the regulations promulgated to implement section 112(l) of the Act. (See 58 FR 62262, November 26, 1993.) EPA believes it has the authority under section 112(l) to approve programs to limit the potential to emit of HAPs directly under section 112(l) prior to this revision to subpart E of 40 CFR part 63. Given the timing problems posed by impending deadlines under section 112 and title V, EPA believes it is reasonable to read section 112(l) to allow for approval of programs to limit potential to emit prior to promulgation of a rule specifically addressing this issue. EPA is therefore approving South Dakota's combined construction permit/FESOP program now so that South Dakota may begin to issue federally enforceable synthetic minor permits as soon as possible. EPA also plans to codify programs approved under section 112(l) without further rulemaking once the revisions to subpart E are promulgated.

As discussed in Section II.A.2.d. above and in the TSD, EPA believes South Dakota's combined construction permit/FESOP program meets the applicable Federal criteria for approval of such programs in the SIP. In addition, South Dakota's construction and operating permit program meets the statutory criteria for approval under section 112(l)(5), as follows:

Regarding the statutory criteria of section 112(l)(5), EPA believes South Dakota's permitting program contains adequate authority to assure compliance with section 112 requirements since the third criterion of the June 28, 1989 notice is met, i.e., since the State's program does not provide for waiving any section 112 requirement. Sources that become minor through a permit issued pursuant to these programs would still be required to meet section 112 requirements applicable to non-major sources.

Regarding the requirement for adequate resources, the State has committed to provide for adequate resources to implement and enforce the program. EPA will monitor the State's implementation of the program to assure that adequate resources continue to be available.

EPA also believes that South Dakota's construction and operating permit program provides for an expeditious schedule for assuring compliance with section 112 requirements. This program will be used to allow a source to establish a voluntary limit on potential to emit so as to avoid being subject to a Federal requirement applicable on a particular date. Nothing in the State's program would allow a source to avoid or delay compliance with the Federal requirement if it fails to obtain the appropriate federally enforceable limit by the relevant deadline.

Finally, EPA believes it is consistent with the intent of the section 112 and the Act for States to provide a mechanism through which sources may avoid classification as a major source by obtaining a federally enforceable limit on potential to emit.

Accordingly, EPA finds that South Dakota's construction permit/FESOP program satisfies the applicable criteria for establishing federally enforceable limitations on potential to emit both criteria and hazardous air pollutants. Thus, EPA is approving South Dakota's construction permit/FESOP program in ARSD 74:36:04 under section 112(l) of the Act.

---

[1] EPA issued guidance addressing the technical aspects of how these criteria pollutant limits may be recognized for purposes of limiting a source's potential to emit of HAPs to below section 112 major source levels. Please refer to the January 25, 1995 EPA policy from John Seitz and Robert Van Heuvelen entitled "Options for Limiting the Potential to Emit of a Stationary Source under Section 110 and Title V of the Clean Air Act," available at the EPA office listed at the beginning of this document.

IV. Final Action

EPA is approving the revisions to the South Dakota SIP which were submitted by the State on March 7, 1995 and on November 12, 1993. Specifically, EPA is replacing the existing State regulations approved in the SIP with the following chapters of the ARSD, effective on January 5, 1995: 74:36:01–74:36:04, 74:36:06; 74:36:07, 74:36:10–74:36:13, and 74:36:15. However, EPA is not taking action at this time on two definitions in ARSD 74:36:01 related to the State's acid rain program which EPA will be acting on separately: "acid rain permit" and "acid rain program" in ARSD 74:36:01:01(2) and (3).

In addition to approving South Dakota's construction permit/FESOP program in ARSD 74:36:04 as part of the SIP, EPA is also approving this program under section 112(l) of the Act for the purposes of creating federally enforceable permit conditions on HAPs. Note that in order for EPA to consider operating permits issued under ARSD 74:36:04 to be federally enforceable, the State must submit the proposed and final permits to EPA in a timely manner, as well as meet the other requirements of its program and the June 28, 1989 **Federal Register**.

This approval provides the State with the authority for implementation and enforcement of the following subparts of 40 CFR part 60: A, D, Da, Db, Dc, E, Ea, F, I, K, Ka, Kb, O, Y, DD, GG, HH, LL, QQ, RR, VV, XX, AAA, JJJ, NNN, OOO, and SSS, effective July 1, 1993. However, the State's NSPS authorities do not include those authorities which cannot be delegated to the states, as defined in 40 CFR part 60.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, EPA is proposing to approve the SIP revision should adverse or critical comments be filed. Under the procedures established in the May 10, 1994 **Federal Register** (59 FR 24054), this action will be effective November 6, 1995 unless, by October 6, 1995, adverse or critical comments are received.

If such comments are received, this action will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective on November 6, 1995.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to a SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600, *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

Approvals of SIP submittals under section 110 and subchapter I, part D of the Clean Air Act do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on small entities affected. Moreover, due to the nature of the Federal-state relationship under the Clean Air Act, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (1976); 42 U.S.C. 7410(a)(2).

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under Section 110 of the Clean Air Act. These rules may bind State, local and tribal governments to perform certain actions and also require the private sector to perform certain duties. The rules being approved by this action will impose no new requirements; such sources are already subject to these regulations under State law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action. EPA has also determined that this final action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 6, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review must be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

This action has been classified as a Table 3 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by a July 10, 1995 memorandum from Mary Nichols, Assistant Administrator for Air and Radiation. The Office of Management and Budget (OMB) has exempted this regulatory action from E.O. 12866 review.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: August 10, 1995.

Jack W. McGraw,

Acting Regional Administrator.

Chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart QQ—South Dakota

2. Section 52.2170 is amended by adding paragraph (c)(16) to read as follows:

§ 52.2170 Identification of plan.

* * * * *

(c) * * *

(16) On November 12, 1993 and March 7, 1995, the designee of the Governor of South Dakota submitted revisions to the plan, which included revised regulations for definitions, minor source construction and federally enforceable state operating permit (FESOP) rules, source category emission limitations, sulfur dioxide rule corrections, new source performance standards (NSPS), new source review (NSR) requirements for new and modified major sources impacting nonattainment areas, and enhanced monitoring and compliance certification requirements. The State also requested that the existing State regulations approved in the South Dakota SIP be replaced with the following chapters of the recently recodified Administrative Rules of South Dakota (ARSD): 74:36:01–74:36:04, 74:36:06; 74:36:07, 74:36:10–74:36:13, and 74:36:15, as in effect on January 5, 1995.

(i) Incorporation by reference.

(A) Revisions to the Administrative Rules of South Dakota, Air Pollution Control Program, Chapters 74:36:01 (except 74:36:01:01(2) and (3)); 74:36:02–74:36:04, 74:36:06; 74:36:07, 74:36:10–74:36:13, and 74:36:15, effective April 22, 1993 and January 5, 1995.

3. A new section 52.2184 is added to read as follows:

§ 52.2184 Operating permits for minor sources.

Emission limitations and related provisions established in South Dakota minor source operating permits, which are issued in accordance with ARSD 74:36:04 and which are submitted to EPA in a timely manner in both proposed and final form, shall be enforceable by EPA. EPA reserves the right to deem permit conditions not federally enforceable. Such a determination will be made according to appropriate procedures and will be based upon the permit, permit approval procedures, or permit requirements which do not conform with the operating permit program requirements of EPA's underlying regulations.

[FR Doc. 95–21879 Filed 9–5–95; 8:45 am]

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 417

[OMC–014–FC]

Medicare Program; Payments to HMOs and CMPs and Appeals: Technical Amendments

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule with comment period.

SUMMARY: This rule clarifies and updates portions of the HCFA regulations that pertain to payment for services furnished to Medicare enrollees by health maintenance organizations (HMOs) and competitive medical plans (CMPs); appeals by Medicare enrollees concerning payment for those services; and appeals by HMOs and CMPs with regard to their Medicare contracts.

This rule completes the special project aimed at the total technical revision of part 417. Part 417 contains the regulations applicable to all prepaid health care organizations, that is, HMOs, CMPs, and health care prepayment plans (HCPPs).

These are technical and editorial changes that do not affect the substance of the regulations. They are intended to make it easier to find particular provisions, to eliminate needless repetition and remove obsolete content, and to better ensure uniform understanding of the rules.

DATES: *Effective dates:* These rules are effective as of October 1, 1995.

Comment date: We will consider comments received by October 6, 1995.

ADDRESSES: Mail written comments (1 original and 3 copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: OMC–014–FC, PO Box 26688, Baltimore, MD 21207.

If you prefer, you may deliver your written comments (1 original and 3 copies) to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, or
Room C5–09–26, 7500 Security Boulevard, Baltimore, MD 21244–1850

Due to staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code OMC–014–FC.

Written comments received timely will be available for public inspection as they are received—generally beginning approximately 3 weeks after publication of the document, in Room 309–G of the Department's offices at 200 Independence Avenue, SW., Washington, DC, Monday through Friday, from 8:30 a.m. to 5 p.m. (phone: (202) 690–7890).

Although we cannot respond to individual comments, if we revise this rule as a result of comments, we will discuss all timely comments in the preamble to the revised rule.

FOR FURTHER INFORMATION CONTACT: Tracy Jensen, (410) 786–1033.

SUPPLEMENTARY INFORMATION:

A. Background

The previous 4 technical regulations of the special project have—

- Removed obsolete content;
- Designated the remaining text under 17 subparts that identify the different program aspects so that it is easier to refer to those aspects and to find particular rules;
- Through nomenclature and definition changes, established certain terms to be used throughout part 417, so as to preclude confusion, make clear that responsibility for the prepaid health care programs has been delegated to HCFA, and ensure use of the most precise terms available;
- Redesignated certain portions of part 417 to free section numbers needed so that new rules can be incorporated in logical order; and
- Established a separate subpart C to set forth the many requirements for the organization and operation of HMOs. Under previous rules, these were compressed into a single section (§ 417.107).

As a result of the redesignations, §§ 417.107 through 417.119 were made available for new rules that are required because of statutory amendments that affect the furnishing of services by Federally qualified HMOs, or may be needed because of future changes in the statute. Similarly, §§ 417.128 through 417.139 are available for additional rules on the organization and operation of those HMOs.

B. Changes made by this rule

This technical rule affects the following subparts:

Subpart N—Medicare Payment to HMOs and CMPs—General Rules
Subpart O—Medicare Payment: Cost Basis;
Subpart P—Medicare Payment: Risk Basis;
Subpart Q—Beneficiary Appeals; and,
Subpart R—Contract Appeals.

Changes to the first three subparts reflect a general change of approach—

use of the term "payment" rather than "reimbursement". Changes in all five subparts, such as use of the active voice, are intended to improve clarity. They also provide more headings, revise confusing word order, and remove obsolete provisions (rules that applied to contract periods that began before 1986).

In subpart Q, the revisions add a paragraph explaining the statutory basis for the beneficiary appeals rules and expand the "Scope" paragraph to reference a recently added provision that gives the beneficiary the right to request immediate PRO review of a determination that he or she no longer needs inpatient hospital care.

Other Required Information

Waiver of Proposed Rulemaking and Delayed Effective Date

The changes made by this rule are technical and editorial in nature. Their aim is to simplify, clarify, and update subparts N through R of part 417 without substantive change.

Accordingly, we find that notice and opportunity for public comment are unnecessary and that there is good cause to waive proposed rulemaking procedures.

In addition, it is important, for the convenience of the public, that these changes be effective as of October 1, 1995, so that they can be included in the 1995 edition of the Code of Federal Regulations on which the public relies. Therefore, we find good cause to also waive the usual 30-day delay in the effective date

As previously indicated, however, we will consider timely comments from anyone who believes that, in making the technical and editorial changes, we have unintentionally altered the substance.

Paperwork Reduction Act

Sections 417.558, 417.576, and 417.600 of the regulations amended by this technical rule contain requirements that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). The requirement for a certified cost report (§ 417.576(b)) has OMB approval under number 0938–0165, with an expiration date of 9–30–95. The burden for this report is estimated at 200 hours for record keeping and 260 hours for completing the report. The requirements for justification of exception to cost limits (§ 417.558(c)) and for grievance and appeals procedures (§ 417.600(b)) are being submitted for OMB approval. If you comment on these requirements, please send a copy directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10235, Executive Office Building, Washington, DC 30503.

Regulatory Impact Statement

Consistent with the Regulatory Flexibility Act (RFA) and section 1102(b) of the Social Security Act, we prepare a regulatory flexibility analysis for each rule, unless the Secretary certifies that the particular rule will not have a significant economic impact on a substantial number of small entities, or a significant impact on the operation of a substantial number of small rural hospitals.

The RFA defines "small entity" as a small business, a nonprofit enterprise, or a governmental jurisdiction (such as a county, city, or township) with a population of less than 50,000. We also consider all providers and suppliers of services to be small entities. For purposes of section 1102(b) of the Act, we define small rural hospital as a hospital that has fewer than 50 beds, and is not located in a metropolitan statistical area.

We have not prepared a regulatory flexibility analysis because we have determined and we certify that these rules (which make only technical and editorial changes with no substantive effect) will not have a significant economic impact on a substantial number of small entities or a significant impact on the operation of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this rule was not reviewed by the Office of Management and Budget.

List of Subjects in 42 CFR Part 417

Administrative practice and procedure, Health maintenance organizations (HMO), Medicare.

42 CFR part 417 is amended as set forth below.

PART 417—HEALTH MAINTENANCE ORGANIZATIONS, COMPETITIVE MEDICAL PLANS, AND HEALTH CARE PREPAYMENT PLANS

A. The authority citation for part 417 continues to read as follows:

Authority: secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh), Secs. 1301, 1306, and 1310 of the Public Health Service Act (42 U.S.C. 300e, 300e–5, and 300e–9); and 31 U.S.C. 9701.

B. Subpart N is amended as set forth below.

Subpart N—Medicare Payment to HMOs and CMPs: General Rules

1. Section 417.524 is revised to read as follows:

§ 417.524 Payment to HMOs or CMPs: General.

(a) *Basic rule.* The payments that HCFA makes to an HMO or CMP under this subpart and subparts O and P of this part for furnishing covered Medicare services are in place of any payment that HCFA would otherwise make to a beneficiary or the HMO or CMP under sections 1814(b) and 1833(a) of the Act.

(b) *Basis of payment.* (1) HCFA pays the HMOs or CMPs on either a reasonable cost basis or a risk basis depending on the type of contract the HMO or CMP has with HCFA.

(2) In certain cases a risk HMO or CMP also receives payments on a reasonable cost basis for certain Medicare enrollees who retain nonrisk status, as provided in § 417.444, after the HMO or CMP enters into a risk contract.

§ 417.526 [Amended]

2. In § 417.526, "reimbursement" is revised to read "payment" each time it appears.

3. Section 417.528 is amended to revise the section heading to revise, paragraphs (a) through (c) and to add a heading to paragraph (d) to read as follows:

§ 417.528 Payment when Medicare is not primary payer.

(a) *Limits on payments and charges.* (1) HCFA may not pay for services to the extent that Medicare is not the primary payer under section 1862(b) of the Act and part 411 of this chapter.

(2) The circumstances under which an HMO or CMP may charge, or authorize a provider to charge, for covered Medicare services for which Medicare is not the primary payer are stated in paragraphs (b) and (c) of this section.

(b) *Charge to other insurers or the enrollee.* If a Medicare enrollee receives from an HMO or CMP covered services that are also covered under State or Federal worker's compensation, automobile medical, or any no-fault insurance, or any liability insurance policy or plan, including a self-insured plan, the HMO or CMP may charge, or authorize a provider that furnished the service to charge—

(1) The insurance carrier, employer, or other entity that is liable to pay for these services; or

(2) The Medicare enrollee, to the extent that he or she has been paid by the carrier, employer, or other entity.

(c) *Charge to group health plans (GHPs) or large group health plans (LGHPs).* An HMO or CMP may charge a GHP or LGHP for covered services it furnished to a Medicare enrollee and may charge the Medicare enrollee to the extent that he or she has been paid by the GHP or LGHP for these covered services if—

(1) The Medicare enrollee is covered under the plan; and

(2) Under section 1862(b) of the Act, HCFA is precluded from paying for the covered services .

(d) *Responsibilities of HMO or CMP.* * * *

C. Subpart O is amended as set forth below.

Subpart O—Medicare Payment: Cost Basis

1. Section 417.530 is revised to read as follows:

§ 417.530 Basis and scope.

This subpart sets forth the principles that HCFA follows to determine the amount it pays for services furnished by a cost HMO or CMP to its Medicare enrollees. These principles are based on sections 1861(v) and 1876 of the Act and are, for the most part, the same as those set forth—

(a) In part 412 of this chapter, for paying the costs of inpatient hospital services which, for cost HMOs and CMPs, are considered "reasonable" only if they do not exceed the amounts allowed under the prospective payment system; and

(b) In part 413 of this chapter, for the costs of all other covered services.

§ 417.531 [Amended]

2. In § 417.531, the following changes are made:

a. In paragraph (a), "reimbursement" is revised to read "payment", and "participating in the Medicare program" is removed.

b. In paragraph (b), introductory text, "the HMO or CMP may be reimbursed" is revised to read "HCFA pays the HMO or CMP".

§ 417.532 [Amended]

3. In § 417.532, the following changes are made:

a. Throughout § 417.532, "reimbursement" is revised to read "payment" and "reimburses" is revised to read "pays".

b. In paragraph (a)(3), "Except as specified in paragraph (a)(4) of this section," is removed and "in judging" is revised to read "In judging".

c. Paragraph (a)(4) is removed.

d. In paragraph (f), "will determine" is revised to read "determines".

e. Paragraph (g) is revised to read as follows:

§ 417.532 General considerations.

* * * * *

(g) *Direct payment by HCFA.* (1) If the HMO or CMP elects to have HCFA pay for provider services, HCFA pays each provider on a reasonable cost basis or under the PPS system, whichever is appropriate for the particular provider under part 412 or part 413 of this chapter.

(2) In computing the Medicare payment to the HMO or CMP, HCFA deducts these payments and any other payments made by the Medicare intermediary or carrier on behalf of the HMO or CMP (such as payment for emergency or urgently needed services under § 417.558).

§ 417.533 [Amended]

4. In § 417.533, the following changes are made:

a. In the introductory text, the phrase "is responsible for" is revised to read "must".

b. In paragraphs (a), (b), and (c), "Determining", "Making", and "Carrying" are revised to read "Determine", "Make", and "Carry", respectively.

§ 417.536 [Amended]

5. In § 417.536, the following changes are made:

a. The section heading is revised to read "*Cost payment principles.*"

b. In paragraph (a), first sentence, the phrase "or reasonable cost reimbursement" is removed.

c. In paragraphs (a), (f)(3), and (m), "reimbursement" is revised to read "payment".

d. In paragraph (m), the heading is revised to read "*Limitations on payment.*"; in the introductory text, "reimbursed" is revised to read "paid"; and "subpart E of part 405, and" is removed.

§ 417.538 [Amended]

6. In § 417.538, the following changes are made:

a. Paragraph (a) is revised to read as set forth below.

b. The heading of paragraph (b) is revised to read "*Included costs.*"

c. The heading of paragraph (d) is revised to read "*Limitation on payment.*" and in the last sentence, "such costs" is revised to read "those costs".

§ 417.538 Enrollment and marketing costs.

(a) *Principle.* Costs incurred by an HMO or CMP in performing the enrollment and marketing activities described in subpart k of this part are allowable.

* * * * *

§ 417.544 [Amended]

7. In § 417.544, in paragraph (a), the paragraph designations (1), (2), and (3) are added, preceding the first, second, and third sentences and in paragraph (b), the paragraph designations (1) and (2) are added preceding the first and second sentences.

§ 417.548 [Amended]

9. In § 417.548, the following changes are made:

a. In paragraph (a), "reimbursable" is revised to read "payable".

b. In paragraph (b), in the second sentence, "For example, in" is removed and "(c) *Example.* In" is inserted in its place, and the parenthetical phrase is revised to read "(rather than the payment amounts determined under part 412 or part 413 of this chapter)".

10. Section 417.550 is revised to read as follows:

§ 417.550 Special Medicare program requirements.

(a) *Principle.* HCFA pays the full reasonable cost incurred by an HMO or CMP for activities that are solely for Medicare purposes and unique to Medicare contracts under section 1876 of the Act.

(b) *Application.* HCFA pays the full reasonable cost of the following activities:

(1) Reporting increases and decreases in the number of Medicare enrollees.

(2) Obtaining independent certification of the HMO's or CMP's cost report to the extent that it is for Medicare purposes.

(3) Reporting special data that HCFA requires solely for program planning and evaluation.

(c) *Prior approval requirement.* The costs specified in paragraph (b) of this section must be separately budgeted and approved by HCFA before the contract period begins.

(d) *Limit on full payment.* Full payment is limited to the costs specified in paragraph (b) of this section. All other administrative costs must be apportioned in accordance with § 417.552.

§ 417.552 [Amended]

11. In § 417.552, the following changes are made:

a. In the introductory text of paragraph (a), "Except as provided in § 417.556(c)" is removed and "the" is revised to read "The".

b. In paragraph (a)(1), "§§ 417.530 through 417.576; and" is revised to read "this subpart; and".

§ 417.554 [Amended]

12. In § 417.554, the regulation citations at the end are revised to read "§ 405.480, part 412, and §§ 413.5 and 413.24 of this chapter."

13. Section 417.558 is revised to read as follows:

§ 417.558 Emergency, urgently needed, and out-of-area services for which the HMO or CMP accepts responsibility.

(a) *Source of payment.* Either HCFA or the HMO or CMP may pay a provider for emergency or urgently needed services or other covered out-of-area services for which the HMO or CMP accepts responsibility.

(b) *Limits on payment.* If the HMO or CMP pays, the payment amount may not exceed the amount that is allowable under part 412 or part 413 of this chapter.

(c) *Exception to limit on payment.* Payment in excess of the limit imposed by paragraph (b) of this section is allowable only if the HMO or CMP demonstrates to HCFA's satisfaction that it is justified on the basis of advantages gained by the HMO or CMP, as set forth in § 417.548.

§ 417.560 [Amended]

14. In § 417.560, the following changes are made:

a. In paragraph (a) introductory text, "will base" is revised to read "bases".

b. In paragraph (d)(1), "(1) Except as provided in paragraph (d)(2) of this section," is removed, and "the Medicare share" is revised to read "The Medicare share".

c. Paragraph (d)(2) is removed.

15.–16. Section 417.564 is revised to read as follows:

§ 417.564 Apportionment and allocation of administrative and general costs.

(a) *Costs not directly associated with providing medical care.* Enrollment, marketing, and other administrative and general costs that benefit the total enrollment of the HMO or CMP and are not directly associated with furnishing medical care must be apportioned on the basis of a ratio of Medicare enrollees to the total HMO or CMP enrollment.

(b) *Costs significantly related to providing medical services.* (1) The following administrative and general costs, which bear a significant relationship to the services furnished, are not apportioned to Medicare directly; they must be allocated or distributed to the HMO or CMP components and then apportioned to Medicare in accordance with §§ 417.552 through 417.560:

(i) Facility costs.

(ii) Interest expense.

(iii) Medical record costs.

(iv) Centralized purchasing costs.

(v) Accounting and data processing costs.

(vi) Other administrative and general costs that are not included in paragraph (a) of this section.

(2) The allocation or distribution process must be as follows:

(i) If a separate entity or department of an HMO or CMP performs administrative functions the benefit of which can be quantitatively measured (such as centralized purchasing and data processing), the total allowable costs of this entity or department must be allocated or distributed to the components of the HMO or CMP in reasonable proportion to the benefits received by these components.

(ii) If a separate entity or department of an HMO or CMP performs administrative functions the benefit of which cannot be quantitatively measured (such as facility costs), the total allowable costs of this entity or department must be allocated or distributed to the components of the HMO or CMP on the basis of a ratio of total incurred and distributed costs per component to the total incurred and distributed costs for all components.

§ 417.568 [Amended]

17. In § 417.568, the following changes are made:

a. In paragraph (a)(1), "payable by Medicare" is revised to read "payable by HCFA", and the comma after "enrollees" is removed.

b. In paragraph (a)(2), the phrase "the HMO or CMP must follow" is added immediately before "standardized definitions * * *", and the last three words "must be followed." are removed.

c. In paragraph (b)(2), "as described in this paragraph" is revised to read "as provided in paragraph (b)(3) of this section".

d. In paragraph (b)(3), "based on this basis" is revised to read "developed on this basis" and "will be acceptable" is revised to read "is acceptable".

e. Paragraph (c) is revised to read as set forth below.

f. In paragraph (d), "the HMO or CMP", the last time it appears, is revised to read "it".

§ 417.568 Adequate financial records, statistical data, and cost finding.

* * * * *

(c) *Provider services furnished directly by the HMO or CMP.* If the HMO or CMP furnishes provider services directly, the provider is subject to the cost-finding and cost-reporting requirements set forth in parts 412 and 413 of this chapter. The provider must use an approved cost-finding method described in § 413.24 of this chapter to determine the actual cost of these covered services.

* * * * *

§ 417.576 [Amended]

18. In § 417.576, the following changes are made:

a. In the following paragraphs, "reimbursement" is revised to read "payment": paragraphs (b)(2)(ii), (c)(1), (c)(2)(ii), (d) heading, introductory text, and (d)(1), and (e)(1).

b. In the following paragraphs, "reimbursable" is revised to read "payable": paragraphs (c)(1) and (d)(2).

c. In paragraph (b)(2), "§§ 417.532 through 417.566" is revised to read "this subpart".

d. In paragraph (c)(1), "providing" is revised to read "furnishing".

e. In paragraph (c)(2)(ii), "an insignificant amount" is revised to read "an insignificant portion".

f. Paragraphs (b)(3) and (e)(3) are revised to read as set forth below:

§ 417.576 Final settlement.

* * * * *

(b) *Certified cost report as basis for final settlement.* * * *

(3) *Failure to report required financial information.* If the HMO or CMP fails to submit the required cost report and supporting documents within 180 days (or an extended period approved by HCFA under paragraph (b)(1) of this section), HCFA may—

(i) Consider the failure to report as evidence of likely overpayment; and

(ii) Initiate recovery of amounts previously paid, or reduce interim payments, or both.

* * * * *

(e) *Basis for retroactive adjustment.* * * *

(3) Any withholding continues until the earliest of the following occurs:

(i) The overpayment is liquidated.

(ii) The HMO or CMP enters into an agreement with HCFA to refund the overpaid amount.

(iii) HCFA, on the basis of subsequently acquired information, determines that there was no overpayment.

(iv) The decision of a hearing specified in paragraph (d)(4) of this section is that there was no overpayment.

D. Subpart P is amended as set forth below.

Subpart P—Medicare Payment: Risk Basis

§ 417.580 [Amended]

1. In § 417.580, paragraph (a), "reimbursed" is revised to read "pays".

§ 417.582 [Amended]

2. In § 417.582 the heading is revised and three definitions are added in alphabetical order, to read as follows:

§ 417.582 Definitions.

AAPCC stands for adjusted average per capita cost.

ACR stands for adjusted community rate.

* * * * *

APCRP stands for average of per capita rates of payment.

* * * * *

§ 417.584 [Amended]

3. In § 417.584, the following changes are made.

a. The introductory text of the section and paragraph (c) are revised to read as set forth below.

b. In paragraph (d), "§ 417.592(e)" is revised to read "§ 417.592(b)(2)"; "will reduce" is revised to read "reduces"; and the last sentence is removed.

§ 417.584 Payment to HMOs and CMPs with risk contracts.

Except in the circumstances specified in § 417.440(d) for inpatient hospital care, and as provided in § 417.585 for hospice care, HCFA makes payment for covered services only to the HMO or CMP.

* * * * *

(c) *Adjustments to payments.* If the actual number of Medicare enrollees differs from the estimated number on which the amount of advance monthly payment was based, HCFA adjusts subsequent monthly payments to take account of the difference.

* * * * *

§ 417.585 [Amended]

4. In § 417.585, the following changes are made:

a. The section heading is revised to read: "*Special rules: Hospice care.*"

b. In paragraph (a), "No payment is made effective the first day" is revised to read: "This no-payment rule is effective from the first day".

c. In paragraph (b), Introductory text, "for only" is revised to read "but only for".

d. In paragraph (b)(2), "hospice care was elected" is revised to read "the enrollee elected hospice care".

e. In paragraph (c), the clause "are made to the hospice participating in Medicare elected by the enrollee" is revised to read "is made to the Medicare-participating hospice elected by the enrollee".

§ 417.586 [Removed]

5. Section 417.586 is removed.

§ 417.588 [Amended]

6. In § 417.588, the following changes are made.

a. In paragraph (a), "resulting in an AAPCC" is revised to read "to establish an AAPCC".

b. In paragraph (c)(2), "A further adjustment is made by HCFA" is revised to read "HCFA makes a further adjustment".

7. Section 417.592 is revised to read as follows:

§ 417.592 Additional benefits requirement.

(a) *General rules.* (1) An HMO or CMP that has an APCRP (as determined under § 417.590) greater than its ACR (as determined under § 417.594) must elect one of the options specified in paragraph (b) of this section.

(2) The dollar value of the elected option must, over the course of a contract period, be at least equal to the difference between the APCRP and the proposed ACR.

(b) *Options*—(1) *Additional benefits.* Provide its Medicare enrollees with additional benefits in accordance with paragraph (c) of this section.

(2) *Payment reduction.* Request HCFA to reduce its monthly payments.

(3) *Combination of additional benefits and payment reduction.* Provide fewer than the additional benefits required under paragraph (b)(1) of this section and request HCFA to reduce the monthly payments by the remaining difference between the APCRP and the ACR.

(4) *Combination of additional benefits and withholding in a stabilization fund.* Provide fewer than the additional benefits required under paragraph (b)(1) of this section, and request HCFA to withhold in a stabilization fund (as provided in § 417.596) the remaining difference between the APCRP and the ACR.

(c) *Special rules: Additional benefits option.* (1) The HMO or CMP must determine additional benefits separately for enrollees entitled to both Part A and Part B benefits and those entitled only to Part B.

(2) The HMO or CMP may elect to provide additional benefits in any of the following forms—

(i) A reduction in the HMO's or CMP's premium or in other charges it imposes in the form of deductibles or coinsurance.

(ii) Health benefits in addition to the required Part A and Part B covered services.

(iii) A combination of reduced charges and additional benefits.

(d) *Notification to HCFA.* (1) The HMO or CMP must give HCFA notice of its ACR and its weighted APCRP at least 45 days before its contract period begins.

(2) An HMO or CMP that elects the option of providing additional benefits must include in its submittal—

(i) A description of the additional benefits it will provide to its Medicare enrollees; and

(ii) Supporting evidence to show that the selected benefits meet the requirements of paragraph (a)(2) of this section with respect to dollar value equivalence.

8. Section 417.594 is amended to revise paragraphs (a), (b)(1) and (b)(2), (c), (d), and (e) to read as follows:

§ 417.594 Computation of adjusted community rate (ACR).

(a) *Basic rule.* Each HMO or CMP must compute its basic rate as follows:

(1) Compute an initial rate in accordance with paragraph (b) of this section.

(2) Adjust and reduce the initial rate in accordance with paragraphs (c) and (d) of this section.

(b) *Computation of initial rates.* (1) The HMO or CMP must compute its initial rate using either of the following systems:

(i) A community rating system as defined in § 417.104(b); or

(ii) A system, approved by HCFA, under which the HMO or CMP develops an aggregate premium for all its enrollees and weights the aggregate by the size of the various enrolled groups that compose its enrollment.

(For purposes of this section, enrolled groups are defined as employee groups or other bodies of subscribers that enroll in the HMO or CMP through payment of premiums.)

(2) Regardless of which method the HMO or CMP uses—

(i) The initial rate must be equal to the premium it would charge its non-Medicare enrollees for the Medicare-covered services;

(ii) The HMO or CMP must compute the rates separately for enrollees entitled to Medicare Part A and Part B and for those entitled only to Part B; and

(iii) The HMO or CMP must identify and take into account anticipated revenue from health insurance payers for those services for which Medicare is not the primary payer as provided in § 417.528.

* * * * *

(c) *Adjustment of initial rates*—(1) *Purpose of adjustment.* The purpose of adjustment is to reflect the utilization characteristics of Medicare enrollees.

(2) *Adjustment by the HMO or CMP.* The HMO or CMP may adjust the rate for a particular service using more than one of the following factors if they do not duplicate each other:

(i) *Unit of service.* If the HMO or CMP purchases or identifies services on a unit of service basis and the unit of service is defined the same for all enrollees, the HMO or CMP may make an adjustment in its initial rate to reflect the number of units of services furnished to its Medicare enrollees in comparison to those furnished to other enrollees.

(ii) *Complexity or intensity of services.* The HMO or CMP may make an adjustment to reflect the differences in the complexity or intensity of services furnished to its Medicare enrollees if the calculation of its initial rate includes the elements of this adjustment.

(3) *Support documentation.* All adjustments made by the HMO or CMP must be accompanied by adequate supporting data. If an HMO or CMP does not have sufficient enrollment experience to develop this data, it may, during its initial contract period, use documented statistics from a nationally recognized statistical source.

(4) *Adjustment by HCFA.* If the HMO or CMP does not have adequate data to adjust the initial rate calculated under paragraph (b) of this section to reflect the utilization characteristics of its Medicare enrollees, HCFA will, at the HMO's or CMP's request, adjust the initial rate. HCFA adjusts the rate on the basis of differences in the utilization characteristics of—

(i) Medicare and non-Medicare enrollees in other HMOs or CMPs; or

(ii) Medicare beneficiaries (in the HMO's or CMP's area, or State, or the United States) who are eligible to enroll in an HMO or CMP and other individuals in that same area, or State, or the United States.

(d) *Reduction of adjusted rates.* The HMO or CMP or HCFA further reduces the adjusted rates by the actuarial value of applicable Medicare deductibles and coinsurance.

(e) *HCFA review*—(1) *Submission of data.* The HMO or CMP must submit its ACR and the methodology used to compute it for HCFA review and approval, and must include adequate supporting data.

(2) *Appeals procedures.* (i) If HCFA determines that an HMO's or CMP's ACR computation is not acceptable, the HMO or CMP may, within 30 days after receipt of notice of the determination, file with HCFA a request for a hearing.

(ii) The request must state why the HMO or CMP believes the determination is incorrect, and include any supporting evidence the HMO or CMP considers pertinent.

(iii) A hearing officer designated by HCFA conducts the hearing in accordance with the hearing procedures set forth in §§ 405.1819 through 405.1833 of this chapter.

§ 417.596 [Amended]

9. In § 417.596, the following changes are made:

a. In paragraphs (a), (b), and (c)(1), "the average of its per capita rates of payment" is revised to read "its APCRP".

b. In paragraphs (c)(1) and (c)(2), "will not" is revised to read "does not".

c. In paragraph (d), "for the purpose of establishing and maintaining" is revised to read "to establish and maintain".

§ 417.597 [Amended]

10. In paragraph (a) of § 417.597, in the introductory text, "the average of its per capita rates of payment" is revised to read "its APCRP".

§ 417.598 [Amended]

11. In § 417.598, "will conduct" is revised to read "conducts".

E. Subpart Q is amended as set forth below.

Subpart Q—Beneficiary Appeals

1. Section 417.600 is revised to read as follows:

§ 417.600 Basis and scope.

(a) *Statutory basis.* (1) Section 1869 of the Act provides the right to a hearing and to judicial review for any individual dissatisfied with a determination regarding his or her Medicare benefits.

(2) Section 1876 of the Act provides for Medicare payments to HMOs and CMPs that contract with HCFA to enroll Medicare beneficiaries and furnish Medicare-covered health care services to them. Section 1876(c)(5) provides that—

(i) An HMO or CMP must establish grievance and appeals procedures; and

(ii) Medicare enrollees dissatisfied because they do not receive health care services to which they believe they are entitled, at no greater cost than they believe they are required to pay, have the following appeal rights:

(A) The right to an ALJ hearing if the amount in controversy is $100 or more.

(B) The right to judicial review of the hearing decision if the amount in controversy is $1000 or more.

(iii) The Medicare enrollee and the HMO or CMP are parties to the hearing and to the judicial review.

(b) *Scope.* This subpart sets forth—

(1) The appeals procedures, as required by section 1876(c)(5)(B) of the Act for Medicare enrollees who are dissatisfied with an "organization determination" as defined in § 417.606;

(2) The applicability of grievance procedures established by the HMO or CMP under section 1876(c)(5)(A) of the Act and § 417.604(a) for complaints that do not involve an organization determination;

(3) The responsibility of the HMO or CMP—

(i) To develop and maintain procedures; and

(ii) To ensure that all Medicare enrollees have a complete written explanation of their grievance and appeal rights, of the steps to follow, and of the time limits for each step of the procedures; and

(4) The special rules that apply when a beneficiary requests immediate PRO review of a determination that he or she no longer needs inpatient hospital care.

§ 417.602 [Amended]

2. In § 417.602, the heading is revised to read "*§ 417.602 Definitions.*" and the definition of "enrollee" is removed.

3. Section 417.604 is revised to read as follows:

§ 417.604 General provisions.

(a) *Responsibilities of the HMO or CMP.* (1) The HMO or CMP must establish and maintain—

(i) Appeals procedures that meet the requirements of this subpart for issues that involve organization determinations; and

(ii) Grievance procedures for dealing with issues that do not involve organization determinations.

(2) The HMO or CMP must ensure that all enrollees receive written information about the grievance and appeals procedures that are available to them.

(b) *Limits on applicability of this subpart.* (1) If an enrollee requests immediate PRO review (as provided in § 417.605) of a determination of noncoverage of inpatient hospital care—

(i) The enrollee is not entitled to subsequent review of that issue under this subpart; and

(ii) The PRO review decision is subject to the appeals procedures set forth in part 473 of this chapter.

(2) Any determination regarding services that were furnished by the HMO or CMP, either directly or under arrangement, for which the enrollee has no further liability for payment are not subject to appeal.

(3) Services included in an optional supplemental plan under (§ 417.440(b)(2)) are subject only to a grievance procedure.

(4) Physicians and other individuals who furnish services under arrangement with an HMO or CMP have no right of appeal under this subpart.

(c) *Applicability of other regulations.* Unless otherwise provided in this subpart, regulations at 20 CFR, part 404, subparts J and R, (pertaining respectively to conduct of hearings and representation of parties under title II of the Act) are applicable under this subpart.

§ 417.628 [Removed]

4. Section 417.628 is removed.

5. In § 417.632, paragraphs (c) and (d) are revised to read as follows:

§ 417.632 Request for hearing.

* * * * *

(c) *Parties to a hearing.* (1) The parties to a hearing must be the parties to the reconsideration and any other person or entity whose rights with respect to the reconsideration may be affected by the hearing, as determined by the ALJ.

(2) The HMO or CMP must be made a party to the hearing but does not have a right to request a hearing.

(d) *ALJ action when the amount in controversy is less than $100.* (1) If the request plainly shows that the amount in controversy is less than $100, the ALJ dismisses the request.

(2) If, after a hearing is initiated, the ALJ finds that the amount in controversy is less than $100, he or she discontinues the hearing and does not rule on the substantive issues raised in the appeal.

F. Subpart R is amended as set forth below.

Subpart R—Medicare Contract Appeals

§ 417.644 [Amended]

1. In § 417.644, the following changes are made:

a. In paragraph (a), "will notify the HMO or CMP in writing" is revised to read "gives the HMO or CMP written notice".

b. In paragraph (c), "Notice of an initial determination specified in § 417.640 is mailed to the HMO or CMP" is revised to read "HCFA mails the notice to the HMO or CMP".

2. Section 417.648 is revised to read as follows:

§ 417.648 Reconsideration: Applicability.

(a) Reconsideration is the first step for appealing an organization determination specified in § 417.640 (a) or (b).

(b) HCFA reconsiders either of the specified determinations if the HMO or CMP files a written request in accordance with § 417.650.

§ 417.652 [Amended]

3. In § 417.652, "will provide" is revised to read "provides".

4. Section 417.656 is revised to read as follows:

§ 417.656 Notice of reconsidered determination.

(a) HCFA gives the parties written notice of the reconsidered determination.

(b) The notice—

(1) Contains findings with respect to the HMO's or CMP's qualifications to enter into a contract with HCFA under section 1876 of the Act;

(2) States the specific reasons for the reconsidered determination; and

(3) Informs the party of its right to a hearing if it is dissatisfied with the determination.

§ 417.666 [Amended]

5. In § 417.666, "will designate" is revised to read "designates".

§ 417.668 [Amended]

6. In § 417.668, "will designate" is revised to read "designates".

§ 417.670 [Amended]

7. In § 417.670, the following changes are made:

a. In paragraph (a), "will fix", "send", and "must also inform" are revised to read "fixes", "sends", and "also informs", respectively.

b. In paragraph (c), "any change in time or place or of adjournment" is revised to read "any change in time or place of hearing, or of adjournment or postponement".

§ 417.676 [Amended]

8. In § 417.676, the following changes are made:

a. In paragraph (a), "will be open" is revised to read "is open".

b. In paragraph (b), "will inquire" is revised to read "inquires", and "must receive" is revised to read "receives".

c. In paragraph (c), "The parties will be provided" is revised to read "The hearing officer provides the parties".

d. In paragraph (d), "will decide" is revised to read "decides".

§ 417.678 [Amended]

9. In § 417.678, "will rule" is revised to read "rules".

§ 417.680 [Amended]

10. In § 417.680, paragraph (b), "will be" is revised to read "are".

§ 417.682 [Amended]

11. In § 417.682, in paragraphs (a) and (c), "will be" is revised to read "is".

§ 417.686 [Amended]

12. In § 417.686, in paragraph (a), "will be" is revised to read "is".

§ 417.690 [Amended]

13. In § 417.690, the following changes are made:

a. In paragraph (a), "will issue" is revised to read "issues".

b. In paragraph (b), "will provide" is revised to read "provides".

§ 417.692 [Amended]

14. In § 417.692, the following changes are made:

a. In paragraph (c)(1), "will be" is revised to read "is".

b. In paragraph (c)(2), "will specify" is revised to read "specifies".

§ 417.694 [Amended]

15. In § 417.694, "final and binding" is revised to read "binding".

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: July 31, 1995.

BILLING CODE 4120-01-P

NATIONAL SCIENCE FOUNDATION

45 CFR Part 670

Conservation of Antarctic Animals and Plants

AGENCY: National Science Foundation.

ACTION: Final rule with request for comments.

SUMMARY: The National Science Foundation is amending its regulations to designate additional Antarctic Specially Protected Areas, to redesignate one site as a Specially Protected Area which was formerly designated as a Site of Special Scientific Interest, and to revise the designations of Specially Protected Areas consistent with Antarctic Treaty Consultative meeting recommendations. These regulations, issued pursuant to section 6(b)(3) of the Antarctic Conservation Act of 1978 (16 U.S.C. 2405(b)(3)), are being revised to reflect recommendations adopted by the Antarctic Treaty parties at the 16th Antarctic Consultative Meeting.

EFFECTIVE DATE: September 6, 1995.

ADDRESSES: Comments should be sent to Joyce A. Jatko, Office of Polar Programs, Room 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

FOR FURTHER INFORMATION CONTACT: Joyce A. Jatko at the address above or by telephone at (703) 306–1030.

SUPPLEMENTARY INFORMATION: Since these regulations were originally issued

in 1979, several Antarctic Treaty Consultative Meetings have been held in accordance with Article IX of the Antarctic Treaty. The regulations have been amended from time to time based on recommendations adopted at these meetings. The amendments that are the subject of this rule implement recommendations XVI–4, XVI–8 and XVI–9 of the 16th Antarctic Treaty Consultative Meeting (16th ATCM). Because the amendments merely implement recommendations adopted at the 16th ATCM, public comments were not obtained before making the amendment effective.

The recommendations which are the subject of this amendment are as follows:

Recommendation XVI–4 re-designates Site of Special Scientific Interest No. 30, Avian Island, Marguerite Bay, Antarctic Peninsula as Specially Protected Area No. 21 and provides that it be subject to the management plan accompanying the description of the protected area.

Recommendation XVI–8 provides that Cryptogram Ridge, Mount Melbourne, Victoria Land, be designated as Specially Protected Area No. 22 and be subject to the management plan annexed thereto.

Recommendation XVI–9 provides that Forlidas Pond and Davis Valley Ponds be designated as Specially Protected Area No. 23 and be subject to the management plan annex thereto.

Specially Protected Area No. 21: Avian Island (67°46′ S, 68°54′ W) lies 0.25 km south of the south-west tip of Adelaide Island in north-west Marguerite Bay, south-west Antarctic Peninsula. The Area consists of Avian Island together with its littoral zone. It is 1.45 km long by 0.8 km at its widest (total area about 49 ha), and rises to just over 40 m altitude in the south. It is almost entirely ice-free in summer. There are several shallow melt pools, the largest being on the eastern raised beach terrace. There are two small dilapidated refuge huts, one near the north-west and the other near the mid-east shores of the island. The Area is unique in the Antarctic Peninsula region for its abundance and diversity of breeding seabirds. The Blue-eyed shag colony is one of the largest known in the Antarctic, and the Adelie penguin colony is the largest on the Antarctic Peninsula.

Specially Protected Area No. 22: Mount Melbourne (74°21′ S, 164°42′ W lies between Wood Bay and Campbell Glacier, northern Victoria Land, on the western side of the Ross Sea. The Area includes most of Cryptogram Ridge on the southern rim of the main summit crater (2,733 m altitude), and extends to about 1,200 m by 500 m. Geothermal activity occurs along about 300–400 m of the ridge and is marked by discontinuous areas of ice-free ground, surrounded by numerous ice hummocks up to 1 m high and scattered hollow ice towers up to several meters in diameter and 4 m high. The warm ice-free areas are mostly gently sloping with narrow terraces up to 1.5 m wide. The geothermal ground within the Area supports a unique community of bryophytes, algae and microbiota, including the only known occurrence in the Antarctic of the moss *Campylopus pyriformis.*

Specially Protected Area No. 23: Forlidas Pond, about 100 m in diameter, is situated near the east end of the Dufek Massif in a small unnamed dry valley about 1 km to the east of the northern edge of the Forlidas Ridge and about 1 km northwest of Davis Valley. The unnamed dry valley is separated from Davis Valley by a northeast trending ridge several kilometers long. The position of Forlidas Pond is 82°27′15″ S, 15°21′ W. The Area includes smaller ponds that occur along the ice margin at the northern edge of Davis Valley, a short distance east of Forlidas Pond. The Area consists of two parts about 500 meters apart and includes all that area within 500 m of the center of Forlidas Pond and all that area within a 500 m radius of several meltwater ponds at the ice margin along the northern edge of Davis Valley. The Area contains some of the most southerly freshwater ponds known in Antarctica containing plant life.

Determinations

I have determined, under the criteria set forth in Executive Order 12866, that this rule is not a significant regulatory action requiring review by the Office of Information and Regulatory Affairs. I have also determined that this rule involves a foreign affairs function of the United States and is, therefore, exempt from the notice requirements of section 553 of the Administrative Procedure Act and from regulatory flexibility analysis requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612. Finally, I have reviewed this rule in light of section 2 of Executive Order 12778 and certify for the National Science Foundation that this rule meets the applicable standards provided in sections 2(a) and 2(b) of that order.

List of Subjects in 45 CFR Part 670

Antarctica, Conservation.

Pursuant to the authority granted by 16 U.S.C. 2405(b)(3), NSF hereby amends 45 CFR Part 670 as set forth below.

PART 670—[AMENDED]

1. The authority citation for Part 670 continues to read as follows:

Authority: 16 U.S.C. 2405, as amended.

2. Section 670.30 is revised to read as follows:

§ 670.30 Designation of specially protected areas.

The Act states that the Director shall designate as a specially protected area, each area identified under the Agreed Measures as needing special protection. The following areas have been so identified and designated as Specially Protected Areas:

(a) SPA 1, Taylor Rookery, MacRobertson Land
(b) SPA 2, Rookery Islands, Holme Bay
(c) SPA 3, Ardrey Island and Odbert Island, Budd Coast
(d) SPA 4, Sabrina Island, Balleny Islands
(e) SPA 5, Beaufort Island, Ross Sea
(f) SPA 7, Cape Hallett, Victoria Land
(g) SPA 8, Dion Islands, Marguerite Bay, Antarctic Peninsula
(h) SPA 9, Green Island, Berthelot Islands, Antarctic Peninsula
(i) SPA 13, Moe Island, South Orkney Islands
(j) SPA 14, Lynch Island, South Orkney Islands
(k) SPA 15, Southern Powell Island and adjacent islands, South Orkney Islands
(l) SPA 16, Coppermine Peninsula, Robert Island
(m) SPA 17, Litchfield Island, Arthur Harbor, Palmer Archipelago
(n) SPA 18, North Coronation Island, South Orkney Islands
(o) SPA 19, Lagotellerie Island, Marguerite Bay
(p) SPA 20, 'New College Valley', Caughley Beach, Cape Bird, Ross Island
(q) SPA 21, Avian Island, North-west Marguerite Bay
(r) SPA 22, Cryptogram Ridge, Mount Melbourne, Victoria Land
(s) SPA 23, Forlidas Pond and Davis Valley Ponds

Note: Maps specifying these areas in greater detail may be obtained from the Director.

§ 670.34 [Amended]

3. Section 670.34 is amended by removing paragraph (b)(30) and redesignating paragraphs (b)(31)–(b)(36) as paragraphs (b)(30)–(b)(35).

Dated: August 18, 1995.

Lawrence Rudolph,

General Counsel, National Science Foundation.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 393

[FHWA Docket No. MC–94–9]

RIN 2125–AD37

Parts and Accessories Necessary for Safe Operation; Automatic Brake Adjusters and Brake Adjustment Indicators

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The FHWA is adopting a final rule requiring the use of automatic brake adjusters (ABAs) on hydraulically-braked commercial motor vehicles (CMVs) and air-braked CMVs manufactured on or after October 20, 1993, and October 20, 1994, respectively. This rulemaking is intended to: Ensure that the operational standards for brakes in the Federal Motor Carrier Safety Regulations (FMCSRs) are consistent with the manufacturing standards in the Federal Motor Vehicle Safety Standards (FMVSSs), Nos. 105 and 121, which now require the installation of automatic brake adjusters and adjustment indicators on certain CMVs manufactured on or after these dates; and improve the safety of operation of CMVs by reducing the incidence of brakes that are out of adjustment.

EFFECTIVE DATE: October 6, 1995.

FOR FURTHER INFORMATION CONTACT: Ms. Deborah M. Freund, Office of Motor Carrier Standards, (202) 366–2981, or Mr. Charles Medalen, Office of the Chief Counsel, (202) 366–1354, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

On August 3, 1994, the FHWA published a notice of proposed rulemaking in the **Federal Register** (59 FR 39518) to require the use of ABAs on hydraulically-braked CMVs manufactured on or after October 20, 1993, and air-braked CMVs manufactured on or after October 20, 1994. These were the effective dates of the National Highway Traffic Safety Administration's (NHTSA) amendments to its Federal Motor Vehicle Safety Standards (FMVSSs) Nos. 105 and 121. The FHWA also proposed a requirement for brake adjustment indicators (BAIs) on air-braked CMVs with external adjustment mechanisms manufactured on or after October 20, 1994.

Because the FHWA also believed there were opportunities for improvements to the operational safety of CMVs manufactured prior to the effective dates of the amendments to FMVSS Nos. 105 and 121, the agency requested information regarding the potential impacts of requiring CMVs subject to the FMCSRs to be retrofitted with ABAs, and of requiring air-braked CMVs with external adjustment mechanisms to be retrofitted with BAIs. The FHWA requested comments on eight questions specifically concerning the issue of retrofits:

1. Should air-braked CMVs manufactured before the effective date of NHTSA's rule be required to be retrofitted with ABAs?

2. Should all air-braked CMVs with external brake adjustment mechanisms be required to be retrofitted with brake adjustment indicators?

3. If certain CMVs are to be retrofitted, how much time should be allowed for installation of the new equipment?

4. Are there certain types or configurations of air-braked vehicles that cannot be equipped with ABAs because of space limitations around the axles and wheels?

5. Should different periods be specified for retrofitting single-unit trucks, tractors, converter dollies, and trailers?

6. The requirements proposed by this NPRM would exclude air-braked vehicles that were not subject to FMVSS No. 121 on the date of manufacture. (Vehicles not subject to the requirements are listed under paragraph S3 of § 571.121, and include certain types of limited- or specialized-use vehicles such as wide trailers, vehicles equipped with an axle with a gross axle weight rating of 13,154 kilograms (29,000 pounds) or more, any truck or bus that has a speed attainable in 3.2 kilometers (2 miles) of not more than 53 km/hr (33 mph), heavy hauler trailer sets, and load divider dollies.) Should specific types of CMVs, or CMVs used in unique operations, (i.e., CMVs that are *not* subject to the requirements of FMVSS 121, but are subject to the FMCSRs) be exempt from a requirement to be retrofitted with ABAs? Should these specific types of air-braked CMVs manufactured on or after October 20, 1994, be required to be *equipped* with ABAs prior to being placed in operation in interstate commerce? Please provide details.

7. What are the costs associated with retrofitting an ABA compared to replacement of a manual brake adjuster (MBA)? Please include the cost of the device, the time required to complete the installation, and a representative hourly salary of the mechanic performing the installation. Please also include a "loss of use" cost figure if a CMV were to be taken out of revenue service for retrofitting at some time other than a time when a brake adjuster would normally be due for replacement. How often do tractors and trailers visit a facility where retrofitting could take place?

8. Should the FHWA consider a retrofitting requirement for hydraulically-braked CMVs? Please address the cost questions asked in Question 7.

Discussion of Comments

Twenty-seven commenters responded to the notice: The Heavy Duty Brake Manufacturers Council (HDBMC), an association of 10 heavy duty brake component manufacturers; 3 manufacturers of brake components (Rockwell International, Haldex Corporation, Midland-Grau Heavy Duty Systems); a manufacturer of brake adjustment indicators (Tattle-Tale); a motor carrier using a brake adjustment indicator of its own design (Sebring Container Corporation); a private motor carrier (Wilbur-Ellis); a manufacturer of trucks and truck-tractors (Volvo GM Heavy Truck Corporation); a manufacturer of heavy construction equipment (Cedarapids Inc.); 6 national transportation and trade associations (Steamship Operators Intermodal Committee (SOIC), American Trucking Associations (ATA), National Automobile Dealers Association (NADA), National Private Truck Council (NPTC), National School Transportation Association (NSTA), Petroleum Marketers Association of America (PMAA); 2 CMV leasing companies (Riteway Leasing Company and XTRA Corporation); a drivers' organization (the Owner Operator Independent Drivers Association (OOIDA)); a public transportation authority (Metro-Dade Transit Authority); an intermodal transportation provider (Union Pacific Railroad Company); the Commercial Vehicle Safety Alliance (CVSA), an association of Federal, State, and Provincial officials responsible for the administration and enforcement of motor carrier safety regulations in the United States, Canada, and Mexico; the European Union, which submitted its comments via the European Commission General Agreement on Tariffs and Trade (GATT) Enquiry Point; 2 State highway safety enforcement agencies (Maine State Police, State of

Connecticut Department of Motor Vehicles); 2 highway safety organizations (Insurance Institute for Highway Safety (IIHS) and Advocates for Highway and Auto Safety (AHAS)); and 1 private individual.

In-Use Requirement

Almost without exception, commenters who addressed the proposed requirement to adopt rules parallel to the NHTSA's recent amendments to FMVSSs Nos. 105 and 121 responded favorably. These commenters included the Maine State Police, the State of Connecticut Department of Motor Vehicles; HDBMC; Wilbur-Ellis; IIHS, NPTC, AHAS, OOIDA, NSTA, and Midland-Grau. Haldex and Rockwell International limited their comments to air-braked vehicles.

The ATA noted that manufacturers have provided, and motor carriers voluntarily used, automatic brake adjusters for a number of years, and that, even in the absence of Federal regulations, the marketplace is adopting this technology on its merits. Although it generally favored the proposed in-use requirement, the ATA raised several arguments concerning ABAs and brake maintenance. It stated that out-of-adjustment brakes are a maintenance problem that "can be compounded if the addition of such equipment causes fleets to determine that they will no longer need to look at their brakes as frequently and if the automatic adjusters are not serviced." The ATA also quoted a NHTSA study, which noted that carefully-maintained manual brake adjusters (MBAs) can keep strokes within tolerances comparable to ABAs. The ATA added that MBAs "can be set to a closer adjustment" than ABAs because ABAs "must provide extra stroke to prevent over-adjustment when brake drums are hot."

The FHWA generally agrees with this portion of the ATA's comment; however, the cited research performed by the NHTSA ("Automatic Brake Adjusters for Heavy Vehicle Air Brake Systems," February 1991, report DOT–HS–807–724 (PB 91–215814)) and the National Transportation Safety Board ("Heavy Vehicle Airbrake Performance," April 29, 1992, report NTSB/SS–92/01 (PB 92–917003)) has demonstrated that not all MBAs are well maintained. (Copies of both of these reports have been placed in the docket.) The preambles to the FHWA's NPRM and the NHTSA's rulemakings on ABAs clearly stated that "automatic" brake adjusters do not in any way imply that they are "maintenance-free" devices. Nevertheless, the FHWA continues to believe that ABAs can reduce instances of brakes out-of-adjustment, and CMVs being declared out-of-service, due to this condition.

The ATA asserted that ABAs "are not mandatory for safety." It argued that, should a regulation be imposed prohibiting the replacement of an ABA with an MBA, the vehicle should not be placed out of service because of the substitution unless the vehicle's brakes are found to be out of adjustment.

The FHWA's intent in issuing this rulemaking is to require an ABA installed in accordance with the requirements of FMVSS Nos. 105 or 121 to be replaced in kind, so the vehicle continues to perform as originally manufactured. Motor carriers have considerable experience selecting replacement parts; the replacements must be chosen to ensure that the systems in which they are installed continue to operate safely.

Regarding the ATA's concern about a CMV equipped with an MBA (where an ABA is required by the FMVSSs and the FMCSRs) being placed out of service, the FHWA notes that, under the current provisions of the CVSA's North American Uniform Out-of-Service Criteria, the presence of an MBA would not be a cause for placing a CMV out-of-service unless the condition of the brake, or its state of adjustment, were such that it would be likely to cause an accident or a breakdown. The FHWA notes that the CVSA's comments to this docket did not address changing the criteria with respect to the presence or absence of ABAs.

Finally, while the ATA agreed with the intent of the NPRM, it expressed concern that the proposed language would specifically reference an FMVSS. The ATA stated that, by requiring vehicle users to ensure that replacement parts meet the FMVSS, the FHWA would, in effect, require consumers [motor carriers, CMV operators] to "create the technical expertise of manufacturers for themselves." The ATA asserted that, if the FHWA wants CMV users to purchase parts which meet the FMVSS, then the FHWA must work with the NHTSA to assure that new parts are labeled with compliance information or a code, similar to the requirements for fuel tanks under § 393.67(f) of the FMCSRs.

An in-use requirement for a CMV part or accessory that references an FMVSS does not place any unique burden on the CMV's operator. For example, § 393.11 provides an in-use standard for lighting devices and reflectors; it states that CMVs must meet the requirements of 49 CFR 571.108 (FMVSS 108) in effect at the time of manufacture of the vehicle. Commercial motor vehicle operators have ample experience in obtaining replacement parts for vehicle subsystems. In fact, at least one ABA manufacturer (Gunite) provides cross-reference lists to show appropriate replacements for original equipment manufacturers' devices.

In closing, the ATA recommended that the FHWA and the NHTSA work together to focus the FMVSSs and the FMCSRs on CMV maintenance difficulties. The ATA stated that such items as wear indicators, component identification, and access for inspection have been largely ignored in the Federal standards, yet they play a major role in equipment operation and ease of inspection. The FHWA takes these concerns into account to the greatest extent practicable, and will continue to do so as the agency works to develop performance-based regulations through its Zero-Base Regulatory Review Program.

The CVSA did not take a position on the proposed in-use requirements. It noted that most inspectors are familiar with ABAs, although they may need some minimal "recognition" training for new or different systems. The CVSA was concerned that BAIs provide consistent information to motor carrier personnel throughout the BAI's service life. The CVSA made the observation that some BAIs use paint on the pushrod to indicate adjustment status, and that, when the paint wears, it may give a false reading.

The FHWA has consulted with the NHTSA regarding this matter. Some manufacturers use epoxy and baked-on coatings for marking/color-coding pushrods, but it is possible that some may use paint. If a BAI is not maintained to provide an accurate reading of brake adjustment status, the motor carrier will be in violation of the FMCSRs.

Sebring Container Corporation commented on their favorable experience with BAIs. Two commenters noted that many buses are equipped with ABAs: the NSTA indicated that its members who responded to a small survey all used ABAs, and Metro-Dade Transit Authority buses all have ABAs. Union Pacific Railroad Company favored the in-use rule. The European Commission expressed a concern that the FMVSS requirement was more restrictive than European requirements.

Volvo and the ATA addressed the wording of the proposed rule. Volvo suggested the language be modified to define more clearly the class of vehicles subject to the requirement, specifically CMVs with air brake systems that meet the requirements of FMVSS No. 121 (49

CFR 571.121, paragraph S5.1.8) at the time of manufacture. It pointed out that FMVSS No. 121 exempts some vehicles, such as those with gross axle weight ratings in excess of 13,154 kg (29,000 lbs.), and that the language originally proposed would have required ABAs on all CMVs, irrespective of the FMVSS No. 121 requirements. This would necessitate retrofitting for which components may not exist.

The FHWA has revised the language of § 393.53(a) and § 393.53(b) to clarify their applicability to CMVs that are subject to the requirements of FMVSS Nos. 105 and 121, respectively, at the time of their manufacture.

The ATA also offered alternative language for the proposed rule: "Each commercial motor vehicle manufactured with a hydraulic brake system on or after October 20, 1993, and equipped with an automatic means of brake adjustment to comply with FMVSS 105, shall remain equipped with an automatic brake adjustment system." Similarly for CMVs equipped with air brakes: "Each commercial motor vehicle manufactured with an air brake system on or after October 20, 1994, and equipped with an automatic means of brake adjustment to comply with FMVSS 121, shall remain equipped with an automatic brake adjustment system."

The FHWA disagrees with the ATA's suggested rewording because it could be interpreted to permit devices that do not comply with the ABA requirements of FMVSSs Nos. 105 and 121 at the time when the CMV was manufactured to be used as replacement parts. The agency's intent, in proposing an in-use rule, was to require that replacement ABAs continue to conform to the FMVSSs, much as replacement lighting devices and reflectors must continue to conform to the requirements of FMVSS No. 108.

Retrofitting ABAs on Hydraulically-Braked CMVs

The following commenters addressed the questions concerning a potential retrofitting requirement, but did not address the proposed in-use requirement: Riteway Leasing Company, SOIC, Tattle-Tale, NADA, PMAA, Cedarapids, Michael J. Meyer, and XTRA Corporation.

With two exceptions, those who commented on this issue were strongly opposed to a retrofitting requirement for these vehicles. Most cited potential major engineering changes that would be required for axles as well as brakes. For example, HDBMC stated that hydraulic disc brakes inherently provide automatic adjustment. It added that automatically-adjusted hydraulic drum brakes have internal adjustment mechanisms, and retrofitting would, in most cases, require replacement of the entire brake assembly. In some cases, the hub and drum, or even the entire axle, would have to be replaced. The HDBMC noted that, since the 1983 model year, all class 6, 7, and 8 hydraulic brake trucks [1] manufactured by major U.S. manufacturers have had automatic adjustment features. Mandating a retrofit would therefore be superfluous except for a very few vehicles, and their retrofitting costs would be exorbitant.

Both Rockwell International and Wilbur-Ellis noted that hydraulically-braked CMVs provide the driver an indication of brake adjustment through the brake pedal travel.

The ATA's comments reiterated many of the points made by others. It noted that adjustment systems for hydraulic drum brakes are internal to the brakes, integral to their design, and cannot practically be retrofitted.

The NADA and the NPTC were opposed to a retrofit for hydraulically-braked CMVs. Haldex stated that retrofit is impractical for hydraulic brakes. The NSTA was concerned with potential retrofitting problems, including safety and voiding of the FMVSS certification applicable at the time of manufacture. It also questioned whether retrofit kits would be available for older buses in fleets, some of which are over 20 years old, and whether they could be installed and made to operate properly. Midland-Grau Heavy Duty Systems noted that the majority of hydraulically-braked CMVs already are equipped with ABAs. Union Pacific Railroad Company recommended against retrofits for hydraulically-braked CMVs because of the high costs involved. It noted that hydraulically-braked vehicles have had self-adjusting brakes on most units for many years, and that relatively few CMVs currently in service are not so equipped. The CVSA commented that hydraulic brake systems are not disassembled to inspect their component parts during the course of inspecting a CMV, and that a decision regarding hydraulic brake systems would not affect inspection procedures.

Commenting in favor of a retrofit requirement for hydraulically-braked CMVs, the AHAS stated that ABAs are necessary for all CMVs. The AHAS was "convinced that the benefits gained by retrofitting ABAs and BAIs to the entire existing commercial fleet would far outweigh any costs to industry, especially if a reasonable phase-in program was put in place." The AHAS did not, however, provide any figures to substantiate this statement. The AHAS also stated that it was unsure of the benefits of BAIs for hydraulic or air-over-hydraulic systems, and that it did not know how BAIs could be retrofitted.

The Maine State Police (Maine) also stated that retrofits should be required, without differentiating between air-braked and hydraulically-braked CMVs. It recommended effective dates of October 20, 1996, for tractors and trucks, and October 20, 1997, for trailers, semitrailers, and converter dollies. Maine also recommended that limited- or specialized-use vehicles also be subject to a retrofitting requirement, but it provided no additional information or technical material to support this viewpoint.

The FHWA acknowledges the concerns expressed by the commenters over retrofitting hydraulically-braked CMVs. The engineering work required to accomplish this retrofit would be complex and costly. The engineering complexity of designing and installing a retrofitted system would potentially go beyond the maintenance capabilities of all but the most sophisticated organizations. Because the design of hydraulic brakes is generally not amenable to this type of modification, an engineering retrofit, if done improperly, could actually degrade the performance of the brake system, or render it inoperative. Therefore, in view of the possible adverse safety impacts, the FHWA has decided not to require retrofitting for hydraulically-braked CMVs.

Questions Concerning Retrofitting of ABAs and BAIs on Air-Braked CMVs

The remaining questions posed by the NPRM covered retrofitting ABAs and BAIs on air-braked CMVs. While few commenters expressed strong opinions for or against retrofitting, nearly all voiced concerns. Commenters cited the current limited production capacity of ABA manufacturers, potential engineering modifications required for brake system component mountings because of the limited space around brake chambers on some vehicles, and potential difficulty in locating the vehicles and taking them out of revenue service to retrofit ABAs. Specific comments on each of the numbered questions asked in the NPRM follow, along with the FHWA's response:

1. Should air-braked CMVs manufactured before the effective date of NHTSA's rule be required to be retrofitted with ABAs?

---

[1] Class 6: 8,846–11,794 kg (19,501–26,000 lbs); Class 7: 11,795–14,969 kg (26,001–33,000 lbs); and Class 8: over 14,969 kg (33,000 lbs).

In Favor

The AHAS stated it would strongly support such an initiative as an appropriate complement to the FMVSSs. The AHAS strongly believes that the FHWA should not consider mandating ABAs without also requiring (1) the use of BAIs, and (2) submissions of certifications by interstate carriers of their preventive maintenance programs which ensure optimal maintenance and operation of ABAs.

Maine believed that retrofits should be required.

Metro-Dade stated it would support an ABA retrofit proposal, noting that its urban bus fleet is equipped with ABAs.

Sebring stated that it will install ABAs as replacements for manual brake adjusters, as needed.

Opposed

Wilbur-Ellis opposed retrofitting because the cost would not justify the safety benefit, and ABAs must still be maintained and brake clearances checked. It recommended aggressive roadside enforcement.

The ATA opposed mandatory retrofit for existing equipment, reasoning that motor carriers lack technical expertise to assure replacement parts comply with the FMVSSs; this is the responsibility of the manufacturer. It stated that hydraulic brakes and some air brakes cannot be retrofitted, and that motor carriers are "unable to redesign equipment which was built not having to comply * * *." The ATA stated that most tractors manufactured since the late 1980s have ABAs, but that ABAs have not been standard equipment on most trailers. It contended that the current rule requiring brakes to be kept in adjustment is "actually more comprehensive" than a retrofit requirement, because the mere presence of ABAs does not guarantee that brakes will be kept in adjustment. The ATA added that retrofits should not be required because many installations lack the space to make the substitution; there may be design limitations within the initial system; and current systems operate safely but may not do so after retrofitting. It stated that consumer reworking of vehicles could create legal liability issues: an example would be a retrofit that could require removing brackets from heat-treated axles, potentially leading to a structural failure. Finally, the ATA asserted that the record demand for ABAs for new CMVs subject to FMVSS No. 121 has rationed aftermarket supply.

The NADA believed the requirements would be unduly burdensome to the motor carrier industry.

The NPTC stated "There is still some concern surrounding the effectiveness of ABAs * * *. (T)he technology still has room for improvement * * *." While it opposed retrofitting, the NPTC proposed that vehicles that had already been retrofitted be required to maintain their ABAs.

The OOIDA stated that it was adamantly opposed to a retrofit requirement. "Time and cost are not justified by the marginal safety benefit that would result." It believed that retrofitting would be cost-prohibitive "for a vast portion of the trucking industry, especially owner-operators," and that the FHWA should defer to the opinion and expertise of the NHTSA.

Haldex was concerned that retrofitted ABAs might not be able to keep air chambers operating within allowable limits due to wear and lack of maintenance of other brake components. It stated that "Improvement in overall operational safety of these retrofitted vehicles may be less than expected unless other brake maintenance is performed at the time of the retrofit." Haldex also stated that, although the company would benefit from a requirement to retrofit all CMVs, it could not enthusiastically support such a proposal because of the potential high costs to the trucking industry and because it believed that past maintenance histories would lead to uncertain future benefits from the devices.

The NSTA was concerned that retrofitting could affect safety and potentially void the FMVSS certification applicable at time of manufacture. It questioned whether retrofit kits would be available for older buses (up to 20 years old), and whether the ABAs could be installed and made to operate properly.

The PMAA cited safety and economic concerns, particularly for small businesses. The PMAA believed that current regulations requiring brake inspection and adjustment were sufficient.

Union Pacific cited an extremely high cost burden, and added that the time during which vehicles would be out of revenue service would jeopardize the transportation system's ability to move the Nation's freight on a timely basis.

Mr. Michael J. Meyer, a mechanic with 14 years of experience and 14 additional years as an owner-operator, believed a retrofitting requirement would lead drivers to ignore brakes, as well as to miss other potential equipment problems, because they would take shortcuts in performing under-vehicle inspections.

XTRA Corporation cited cost, possible customer non-awareness of the applicability of a retrofitting requirement to leased trailers, and the difficulty of customers in "obtaining adequate compliance with the technical aspects of retrofitting." It added that a substantial number of its trailers are not used in long-distance hauls, but are drayed to and from intermodal ramps. It also noted that many of its trailers are leased for storage and for use as offices, and should not be required to be retrofitted.

Other Commenters' Concerns

The HDBMC believed that the FHWA should consider air-braked CMV ABA retrofits "when physically possible and economically feasible." While the HDBMC declared that consideration of retrofitting "is laudable," it cautioned that many concerns would need to be addressed; for example, not all automatic slack adjusters interchange with manual slack adjusters.

Volvo echoed the HDBMC's view, stating that retrofits will, in some cases, require more than a one-for-one replacement. Volvo noted that design changes go "forward" to new products, and that not all are backward-compatible for use as service replacements with older equipment.

Midland-Grau stated that a complete analysis of all combinations of ABAs and foundation brake set-ups must be made. It urged an evaluation of the risk of incomplete or incorrect installation against potential safety benefits, and advised the FHWA to review past experiences with retrofit requirements, such as that for steering axle brakes. Midland-Grau also recommended that the FHWA include requirements to use devices that meet the appropriate SAE Recommended Practices, and to perform technical evaluations to prevent safety degradation for incomplete or incorrect retrofits.

The State of Connecticut Department of Motor Vehicles supported a retrofit proposal, provided confirmation of compatibility could be made in advance.

Rockwell believed that ABAs "do not function in exactly the same manner and that adjustment rate and clearance can affect brake certification," although it stated that it did not have data to validate its concern. Rockwell asserted it would be prudent to recommend that replacement ABAs and BAIs be of the same type with which the brake was originally equipped. Rockwell contended that "new, small, unproven suppliers" may introduce devices designed to conform to "somewhat ambiguous NHTSA requirements," and that their lack of knowledge and experience may result in the introduction of ineffective and non-conforming devices. If retrofitting were to be mandated, Rockwell asks the FHWA to consider (1) production capabilities and parts availability, (2) expense and inconvenience to CMV owners, and (3) such technical and performance issues as fit, possible mechanical incompatibility, and mixing of different types of ABAs on a single vehicle.

The CVSA questioned whether there would be a sufficient supply of ABAs over a short retrofit period. It suggested that "[o]ne alternative to consider is the discontinuance of the manufacture of non-ABAs and when replacing systems, replace them with ABAs."

Agency's Response to These Comments

It is certainly not the FHWA's intent to force CMV operators to attempt to redesign brake systems or axles in order to accommodate ABAs. If a motor carrier is considering retrofitting ABAs, it should consult with appropriate technical experts (such as the original-equipment manufacturers of the vehicle and the brake system) to ensure that the CMV and its brakes will continue to operate safely.

As for the AHAS' recommendation for certification of preventive-maintenance programs, it should be noted that § 396.3(a)(1) of the FMCSRs requires that: "Parts and accessories shall be in safe operating condition *at all times*" (emphasis added). Preventive maintenance is a central element of a CMV maintenance program, and FHWA compliance reviews include an assessment of motor carrier maintenance records. Furthermore, CMVs are subject to roadside inspection programs, using uniform CVSA inspection procedures, and to the periodic inspection requirement of § 396.17. In addition, § 396.25 requires brake inspectors to be capable of performing brake service or inspection tasks through brake-related training, experience, or a combination thereof totaling at least one year. The FHWA believes that an additional program to "certify" motor carriers' preventive maintenance programs would achieve little.

The agency disagrees with CVSA's comment that the manufacture of MBAs should be halted. The FHWA does not have the regulatory authority to place such a requirement on manufacturers. Also, as other commenters have pointed out, some CMVs were never designed to accept ABAs, even as an option. Replacing MBAs with ABAs could require engineering modifications to the affected CMVs.

In view of the potential adverse safety impact of a retrofit rule, should it be performed incorrectly, and the significant costs of such a rule, the FHWA will not require retrofitting ABAs on air-braked CMVs.

2. Should all air-braked CMVs with external brake adjustment mechanisms be required to be retrofitted with brake adjustment indicators?

In Favor

The HDBMC stated it would support BAI retrofit when it is physically possible and economically feasible. It asked that the FHWA consider specifying SAE standards designating BAI markings and identification. It also suggested that replacement brake chambers with SAE-marked BAIs be mandated.

Connecticut would strongly support BAI retrofit for air brakes to ease pretrip inspections and reduce the time necessary for maintenance and roadside inspections.

Riteway recommended that all tractors, trailers, trucks, and buses be equipped with "air brake stroke indicators." It noted that the company has used indicators "for some time" and has not had a BAI-equipped unit cited for out of adjustment brakes.

Lindy's Enterprise Inc., manufacturer of Tattle-Tale, a visual brake stroke indicator, enclosed product literature and a partial list of customers. "Our products have been on many over-the-road tractors, trailers, and trucks with great success. We not only feel that our product could save annual inspection costs but help achieve safety results as well."

Sebring developed a BAI for its own fleet. It believes that its brake maintenance and adjustment programs have improved.

Wilbur-Ellis recommended BAI retrofit for s-cam brakes.

The NPTC stated it would support a BAI retrofit requirement, but that the method used to indicate brake out-of-adjustment status should not be specified.

Metro-Dade supported a BAI retrofit requirement.

The CVSA stated that retrofit of BAIs would be desirable as it would aid in recognizing brake adjustment problems.

Opposed

Maine opposed BAI retrofitting because benefits would be very limited.

Rockwell believed that the benefit of BAIs is marginal compared to ABAs. It cited factors such as the expense of the devices, control of the placement accuracy of retrofit marks/indicators, safety issues from owners improperly disassembling or assembling a brake chamber, and the production capability of established suppliers.

The ATA believed that internal system BAIs using air chamber assemblies incorporating marked pushrods are the most satisfactory arrangement. It feared that required retrofitting might involve replacing brake chambers to achieve a proper match of size and brake stroke. It was also concerned that aftermarket BAIs may be easily knocked out of position by road debris, dirt, snow, and physical contact with other vehicle parts.

The NADA opposed BAI retrofitting for the same reasons it opposed ABA retrofitting.

The AHAS believed that ABAs will not correct chronic problems with out-of-adjustment air brakes unless used with easily-seen adjustment indicators and "vigorous educational campaigns by Federal and State authorities." It stated that the FHWA should not consider mandating ABAs without also requiring the use of BAIs. The AHAS expressed particular concern on retrofitting CMVs with "boot-covered" air brake pushrods, because it believed that BAIs were probably not feasible for that design. The AHAS added that "this proprietary approach to air brake chamber design can permanently forswear the considerable additional benefits of supplementing ABAs with BAIs on air brakes," and recommended that the FHWA coordinate with the NHTSA.

The OOIDA opposed any requirement for retrofitting of brake components. It believed that, given the "typical useful life" of Class 7 or 8 motor vehicles, and allowing for "any reasonable" amount of time fully to implement a retrofit rule, a manufacturing standard would achieve virtually the same result.

Haldex cited fleet turnover in its opposition to BAI retrofit. It believed that a mandate for stroke indicators could be made without one for ABAs, but that an ABA retrofit without including BAIs could create a false sense of security due to maintenance concerns on older vehicles.

Midland-Grau cautioned that a complete brake system analysis would be required, as for an ABA retrofit.

Union Pacific and XTRA Corporation would oppose retrofit of BAIs for the same reasons that they would oppose ABA retrofit.

Agency's Response to These Comments

As several of the brake manufacturers pointed out, the original design of the brake system must be considered in

determining whether or not a retrofitted item would function properly. The accuracy, precision, and, most notably, the durability of most retrofitted BAIs is questionable. While marked pushrods on replacement air chamber assemblies might prove the most durable, it is not reasonable to expect a motor carrier to replace an air chamber in proper operating condition for that sole purpose.

The FHWA has consulted with the NHTSA on the matter of BAIs on boot-covered pushrods. Very few CMVs use boot-covered pushrods. Those CMVs that are so equipped are generally used for operations where the brake chambers could be contaminated with dust and debris. They are exempt from the FMVSS BAI requirement because they do not have an exposed pushrod. This is not a loophole for manufacturers, but a recognition that certain operating environments require enclosed pushrods.

3. If certain CMVs are to be retrofitted, how much time should be allowed for installation of the new equipment?

Comments

Commenters suggested phase-in periods ranging from one to seven years. Metro Dade suggested that only one year would be necessary to retrofit a transit fleet. The NPTC suggested a minimum two-year retrofit period for hydraulically-braked CMVs and a minimum of a five-year retrofit for air-braked CMVs. The OOIDA and Union Pacific recommended at least three years, while the ATA and the AHAS recommended four years. The SOIC and Haldex recommended at least five years. XTRA Corporation stated that the responsibility to retrofit would fall upon their customers because it has relinquished control to the lessee. It noted that most leases run five to six years, so its commercial situation dictated against requiring retrofitting in a shorter period than seven years.

Midland-Grau commented that retrofit time required would be a function of the specific products selected, and any vehicle modifications needed, such as brake chamber pushrod length changes to fit a new ABA and clevis, interference rework, and brake chamber modifications to fit stroke indicator components.

Other factors cited by commenters that would affect a phase-in period included the ability of manufacturers to meet the demands for new CMVs as well as retrofitted ones, time lags in distribution channels, scheduling of vehicles for retrofit, and costs to CMV operators. In particular, Haldex and the ATA contended that ABA manufacturers currently have inadequate capacity to simultaneously supply "record levels" of new CMVs and a large retrofit demand.

The AHAS recommended two alternative phased-in schedules. In the first, 10 percent of the entire existing commercial fleet would be retrofitted beginning one year following the promulgation of the final rule, followed by 25 percent in the second year, 60 percent in the third year, with 100 percent compliance by the end of the fourth year. The AHAS also suggested, as an alternative choice for motor carriers, a two-year implementation delay after a final rule was issued, followed by a requirement for 100 percent compliance in the third year.

Agency Response to These Comments

Since the agency has decided not to require retrofitting of any kind, a discussion of these comments is unnecessary.

4. Are there certain types or configurations of air-braked vehicles that cannot be equipped with ABAs because of space limitations around the axles and wheels?

Comments

Rockwell, Haldex, the PMAA, and the ATA stated that space limitations can prevent installation of ABAs, and have in fact done so. Rockwell added that an improperly installed ABA may impair brake performance by limiting brake chamber stroke, and that use of long stroke chambers may influence performance as well.

Haldex noted that, in the last five years, most U.S.-built CMVs offered ABAs at least as an option, but, because of design differences, not all manufacturers' ABAs fit each application. Haldex stated that some vehicles built over 15 years ago, as well as some Japanese vehicles, use a "camshaft spline" with uncommon dimensions which is not currently available from any ABA manufacturer. (Haldex did not provide specifics on the design.) Haldex stated that it has had difficulties retrofitting other Japanese vehicles which were not originally designed to offer ABAs as an option.

The ATA commented that slack adjusters, which it believes comprise at least 95 percent of the adjustment mechanisms used for air brakes, must fit into cramped quarters between brake, axle, suspension, and frame components. "This problem is particularly difficult on tractors but also occurs with trailers, especially those of a specialty nature." The OOIDA repeated this concern, adding that "[t]he modifications that would be necessary to accommodate ABAs on such vehicles vary from relatively small machining operations to outright wheel replacement."

The PMAA also expressed concerns about space and necessary clearances for retrofitted ABAs to work effectively. The PMAA believes that "[w]hile a newly-designed vehicles could easily accommodate the variety of components on the market, older vehicles would not be able to follow suit. This is primarily due to the fact that the brake and structural system of the existing vehicle or trailer is already fixed in place during the manufacturing process. Adding adjusters to these vehicles and trailers would require extensive alterations requiring cutting welded bracket anchors from the brake system and engineering a completely redesigned brake system." The PMAA believed that such redesign is beyond the technical capabilities of operators like petroleum marketers and truck/trailer service facilities. It believed that a leading cause of ABA failure is improper installation, and that, even when performed by factory-trained personnel, many units still fail. "It is reasonable to surmise that the more technically-difficult retrofit by untrained personnel would yield a higher rate of brake failure * * *."

The NADA and the NPTC also believed that some CMVs cannot be equipped with ABAs. XTRA Corporation stated that it owned approximately 1,000 older remanufactured trailers which cannot be converted.

Several commenters did not view a potential retrofitting requirement as a problem. Sebring believed that all its tractors and trailers could be easily equipped. Union Pacific stated that it was not aware of any type of trucks, tractors, or trailers that cannot be equipped due to space limitations. The HDBMC, Midland-Grau, Metro Dade, and the CVSA recommended that the FHWA defer to the judgement of CMV manufacturers.

While it opposed the notion of a retrofitting requirement, the ATA suggested that the requirement only apply to those CMVs which, when new, had ABAs offered as a substitute option for MBAs. The ATA stated that it recognized that there may be problems identifying those vehicles.

Agency's Response to These Comments

The FHWA agrees with the commenters' concerns regarding the difficulty of making engineering modifications (relocation of welded brackets, replacement of atypical components, reconfiguration of components in tight quarters) to permit some CMVs originally equipped with MBAs to retrofit ABAs. With the exception of Haldex, none of the commenters provided information on specific classes of CMVs that could be readily identified as presenting unique retrofit challenges.

As discussed in the agency's response to the comments to Question 1, it has never been the FHWA's intent to promulgate a rule which would force CMV operators to attempt to redesign brake systems or axles in order to accommodate an ABA. The FHWA will not prohibit retrofitting of ABAs. Nevertheless, motor carriers considering retrofitting ABAs when MBAs are replaced should consult the appropriate technical experts to ensure that the brake system of the affected CMV will continue to operate safely.

5. Should different periods be specified for retrofitting single-unit trucks, tractors, converter dollies, and trailers?

Comments

Maine recommended that trucks and tractors be retrofitted by October 20, 1996, and that trailers, semitrailers, and converter dollies be retrofitted by October 20, 1997.

Rockwell suggested that the FHWA might set priorities for vehicle types based on model years and benefit-risk analysis.

The HDBMC and Haldex advised that any retrofitting requirement be phased-in by vehicle type and year of manufacture. Haldex believed that trailers should have priority over tractors because they have longer useful lives, but receive less maintenance during their lives. Haldex cautioned that combination vehicles are susceptible to jackknife accidents if the tractor brakes are in better working order than trailer brakes. Haldex also noted that new vehicles accumulate more miles, and older vehicles would be retired from service before a retrofit were to be required.

While the NADA indicated that its survey respondents were universally opposed to retrofits, it requested that the time-frame for a potential requirement consider limitations in labor, parts, and shop facilities.

The AHAS believed that its recommended phase-in period discussed earlier should apply simultaneously to tractors, trailers, and single-unit tankers that carry hazardous materials. It suggested that additional lead time be provided for other CMVs and non-air-braked CMVs.

While opposing retrofitting, the OOIDA maintained that different periods should not be specified because they would lead to confusion, needless enforcement activity, and penalties for mistakes of fact.

Sebring said that different periods may be needed but did not elaborate on that statement.

Midland-Grau believed that different periods should be specified according to potential installation problems, but it did not elaborate.

Metro-Dade stated that this issue was not applicable to transit agencies.

Union Pacific opposed the notion of different retrofit periods for different types of CMVs because it would require excessive management to enforce.

The CVSA asked that the FHWA consider a phase-in period and the need for mechanic training.

XTRA Corporation urged that no retrofitting requirements be imposed on intermodal containers, trailers, or chassis, or on remanufactured trailers, or on mobile storage trailers.

Agency's Response to This Comment

As stated earlier in this notice, retrofitting requirements will not be imposed.

6. Should specific types of CMVs, or CMVs used in unique operations, (i.e., CMVs that are *not* subject to the requirements of FMVSS 121, but are subject to the FMCSRs) be exempt from a requirement to be retrofitted with ABAs? Should these specific types of air-braked CMVs manufactured on or after October 20, 1994, be required to be *equipped* with ABAs prior to being placed in operation in interstate commerce?

Comments

Maine and Sebring believed that limited or specialized use vehicles not subject to the FMVSS No. 121 requirements should be subject to a requirement for retrofit of ABAs. Neither provided elaboration. The CVSA recommended that CMVs currently equipped with slack adjusters be required to have ABAs unless there is a specific retrofitting problem for that type of vehicle. Those situations should be handled as exceptions.

The HDBMC, Rockwell, Haldex, Midland-Grau, and the ATA recommended against including CMVs not subject to the FMVSSs. Rockwell believed it "might be awkward" to require ABAs on vehicles "not subject to other federal braking requirements." Haldex argued that there was insufficient justification for ABAs on limited- and specialized-use vehicles, noting that there is little industry experience with ABAs on these vehicles, and that retrofitting might be impractical because of installation difficulties.

The ATA stated that specialized vehicles which are exempt from FMVSS No. 121 requirements have been given this status by the NHTSA "based on the facts that doing so will not compromise public safety and that these vehicles cannot be constructed in a manner consistent with more 'normal' equipment." The ATA added that these vehicles could not have been readily built with ABAs, that retrofit should not be considered, and that these vehicles must still meet the FMCSR's requirements for inspection and safe operation.

The NADA stated that its members support "maximum possible grandfathering" of non-FMVSS 121 CMVs as part of their universal opposition to a retrofit mandate.

The NPTC stated that a member had suggested that trucks and trailers over 8,165 kg (18,000 lbs) GVW, which have been equipped with ABAs, be required to maintain the ABAs or improve them, but that any retrofitting requirement exempt trucks under 8,165 kg (18,000 lb) GVW because the benefits of ABAs on those vehicles are not clear. The NPTC did not elaborate on that comment.

The AHAS believed that no vehicle or load-carrying dolly should be exempted if it can sustain highway speeds. However, it allowed that low-speed vehicles that usually operate for short distances and under special permit can be considered as long as the FHWA "will avoid the creation of a loophole for exploitation."

The OOIDA opposed retrofitting of any air-braked vehicles, and stated that the FHWA "should defer to NHTSA" on this issue.

Union Pacific stated that certain vehicles should be excluded.

Cedarapids opposed retrofitting construction equipment, citing an economic impact without an increase in highway safety. It was concerned that ABAs could exacerbate brake problems because dirt and dust would cause high failure rates of ABAs while providing a false sense of security to construction equipment operators. However, "[f]or normal highway vehicles, we agree and applaud your efforts to increase highway safety."

XTRA Corporation urged that no retrofitting requirements be imposed on intermodal containers, trailers, or chassis, or on remanufactured trailers, or on mobile storage trailers.

Agency's Response to This Comment

As noted above, this final rule does not require retrofitting of any kind.

Some of the comments nonetheless deserve a brief response.

The FHWA agrees with the ATA's and Cedarapids' comments. The NHTSA is responsible for determining compliance with, or exemptions from, FMVSS No. 121. The definition of off-road construction equipment is to be narrowly construed and limited to equipment which, by its design, appearance, and function, is obviously not intended for use on a public road. The FHWA has provided regulatory guidance (58 FR 60734, November 17, 1993) concerning the applicability of the FMCSRs to "off road" motorized construction equipment, i.e., motor scrapers, backhoes, compactors, excavators, tractors, trenchers, and bulldozers (Question 6 to § 390.5, Definitions), as follows:

> Such equipment is routinely found at construction sites and is operated by personnel requiring specialized skills. Occasionally, such equipment is moved to or from construction sites by "driving" the "vehicles" short distances on public highways. Their appearance on the highway is only incidental to their primary function, they are not designed to operate in traffic, and their mechanical manipulation often requires a different set of knowledge and skills. The types of construction equipment discussed above do not come within the definition of a "CMV" and hence the operators and equipment are not subject to the FMCSRs.

As for the NPTC's comment concerning an exemption for CMVs under 8,165 kg (18,000 lbs) GVWR, the general applicability of the FMCSRs to CMVs over 4,536 kg (10,000 lbs) GVWR is required by statute (49 U.S.C. 31132(1)).

The FHWA cannot "defer to NHTSA" on operational standards for CMVs, as OOIDA suggested, because that agency's regulatory authority is limited to manufacturing standards. However, the FHWA and the NHTSA work closely together on regulations of common interest to both agencies.

7. What are the costs associated with retrofitting an ABA compared to replacement of an MBA? Include: the cost of the device, installation time, mechanic's hourly salary, and a "loss of use" cost figure if a CMV were to be taken out of revenue service for retrofitting at some time other than a time when a brake adjuster would normally be due for replacement. How often do tractors and trailers visit a facility where retrofitting could take place?

Comments

The HDBMC stated that detailed answers to this question would be furnished in individual responses from HDBMC member companies.

The SOIC estimated a range of labor and materials costs for each intermodal chassis from $185 to $275, averaging around $220. It estimated a cost of $48 million for its members to retrofit, and questioned the "indeterminate reductions in traffic accidents" that would result. The SOIC stated that it anticipated no technical problems related to a retrofitting requirement, but that administrative difficulties of locating, capturing, and transporting chassis to repair facilities may be significant and difficult to quantify. It suggested a program of conversion "in association with annual inspections required by the FMCSRs."

Sebring estimated that in 1990 a local repair shop needed one hour per wheel to install four automatic slack adjusters (ASAs). Labor charges were $25 per hour, and the ASAs cost approximately $55 each. The first retrofit of a BAI of Sebring's own design took 30 minutes, and others took 10 minutes/wheel.

Rockwell estimated the cost of parts and labor to replace MBAs at $50 per wheel; to retrofit an ABA, $100 per wheel.

Wilbur-Ellis estimated costs at around $80 for an ASA, installation time of 0.75 to one hour each, and a labor rate of $45 to $50 per hour. Downtime was estimated at one day per truck, and perhaps more. The total retrofitting cost for three-axle delivery truck would be approximately $700. Most of Wilbur-Ellis' locations are in rural areas where air brake repair facilities are not readily available.

The ATA believed that "re-engineering" systems to accommodate ABAs on CMVs not originally designed for them would be a major cost element of retrofitting. The ATA stated that, "in many instances, the vehicle would have to be either scrapped or sold somewhere else in the world where it could be used, since the retrofit could not be economically justified." The ATA estimated the following costs for retrofit of vehicles originally designed to accommodate ASAs: One hour per brake, assuming no severe corrosion or other interfering factor; labor, $25 per hour (different in various parts of the country); $65 for an ABA, $12.50 for an MBA. If brake chambers needed to be replaced to accomplish a BAI retrofit, they would cost an additional $55 each. The ATA believed that costs for parts and labor alone would make retrofit cost-prohibitive; it did not include costs of vehicle down-time in these figures. The ATA estimated that 3.8 million trailers would require 12 million ABAs to be retrofitted "within the given period" at a cost of $108 million.

The NADA estimated costs at from $75/brake to $250/tandem and believed there would be considerable CMV-to-CMV variation.

The NPTC estimated costs at $200 to $750 for straight trucks and single axle trailers, and $900 to $1000 for tandem-axle tractors.

While the AHAS was "convinced that the benefits gained by retrofitting ABAs and BAIs to the entire existing commercial fleet would far outweigh any costs to industry, especially if a reasonable phase-in program was put in place," it did not provide any figures to substantiate this statement.

The OOIDA stated that costs can vary considerably, depending on application, configuration of foundation brake mounting, make and type of ABA, and where the work is performed. It provided the following information, based on discussions with several midwest truck dealerships: ABAs, $35 to $75; hourly shop rates from $47 to $49.50; time to simply remove brake adjusters and install ABAs, from 20 to 90 minutes. The OOIDA added that retrofit may require replacement of other system components to conform to ABA design and various mounting configurations. The OOIDA asserted that owner-operators are already operating on thin profit margins, and that any that any loss of use of a CMV would be an unjustifiable burden.

Haldex stated that ABAs retail for approximately 4 to 5 times the cost of an MBA; aftermarket prices range from $50 to $75. It estimated installation time at around 15 minutes per wheel; however, the potential need to change air chamber pushrod length could double that time. "On the average, a vehicle would be out of [revenue] service for no less than 90 minutes for an ABA retrofit." Haldex also stated that data available to the company indicated that major fleets generate an average of approximately $100 to $150 per hour in revenue, so each vehicle undergoing retrofit would also cost the motor carrier $150 to $225 in revenue foregone.

Metro-Dade stated that the "Cost to retrofit would be insignificant if done in conjunction with a brake rebuild."

The PMAA believed that costs might include re-engineering of brake and structural systems to provide additional space needed for installation. It believed that, in many cases, retrofitting may not be economically feasible because of the complexity of the redesign. In other cases, redesign would not be technically possible. It stated "In cases such as these, the cost of compliance would equal the cost of the vehicle and trailer." The PMAA estimated the following costs for CMVs that could be retrofitted: $65 for ABAs; labor, $40 per hour; 6 hours for installation if there is no extensive corrosion; total: $670. For a complex brake system redesign, it estimated costs up to $2300 per vehicle. The PMAA estimated costs for its industry segment at $14,740,000.

Midland-Grau stated that it was difficult to estimate a typical cost, and that an evaluation was needed.

Union Pacific provided the following cost estimates. Tandem tractors: material, $400; labor, 2 hours at $60 per hour; total $520. Tandem trailers: material, $300; 3 hours labor at $60 per hour; total $480.

XTRA Corporation estimated direct costs of approximately $300/unit for its entire fleet of trailers and chassis, including materials and an average of 2.5 hours of labor. It noted that additional costs that needed to be considered included loss of revenue, recordkeeping, and customers' costs resulting from temporary removal of their trailers from service. Logistical considerations would be XTRA Corporation's time to locate the CMV and to plan and schedule its retrofit, and their customers' cooperation in accomplishing it.

Agency's Response to This Comment

The ABAs were estimated to cost between $35 and $75; most commenters estimated a range of $50 to $75. They might take from 20 minutes to 1.5 hours to install; 45 minutes to one hour was the most common range noted. Mechanics' hourly salaries were figured at $25 to $60, with $40 to $45 most commonly noted.

At the low end of the range, a $50 ABA that takes a mechanic earning $40 per hour 0.75 hour to install would cost the motor carrier $80. At the high end, a $75 ABA that takes a $45 per hour mechanic one hour to install would cost the motor carrier $120. For purposes of estimating, the FHWA will use a rounded average of $100 per ABA installed, excluding the motor carrier's revenue loss for the time the CMV is not in service.

Estimates of the numbers of registered CMVs from the FHWA's 1993 edition of *Highway Statistics* are as follows: Commercial and private trucks (excluding truck tractors, and light and farm trucks), 2.4 million; truck tractors, 1.3 million; private and commercial trailers and semitrailers, 3.9 million; and private and commercial buses, 115,000. However, many of these 7.6 million CMVs are not in interstate commerce. The FHWA estimated in 1993 that there were 3.6 million CMVs operating in interstate commerce. The agency believes that the ATA's estimate of 3.8 million CMVs potentially subject to a retrofitting requirement may be somewhat high because single-unit trucks and buses with hydraulic brake systems would not have been included in such a proposal. The ATA estimated slightly more than three retrofitted ABAs per vehicle (12 million ABAs/3.8 million CMVs=3.15 ABAs/CMV). This also might be a low estimate: Most semitrailers would need 4 ABAs, and one-axle semitrailers would need two ABAs, but tractors would need up to 6. However, using the ATA's estimate of 12 million ABAs, the cost for parts and labor would be $1.2 billion, rather than the $108 million figure stated in its docket comment. If we were to exclude tractors and air-braked single-unit CMVs, some 2.7 million trailer retrofits (two-thirds of the U.S. trailer and semitrailer fleet), requiring four ABAs each, would cost an estimated $1.08 billion for parts and labor.

Some commenters noted, and the FHWA agrees, that the logistical costs of locating a CMV for retrofitting and removing it from revenue service could exceed the costs of labor and materials. On the other hand, the cost of retrofitting ABAs probably would not exceed the value of the CMV unless the vehicle was at or past the end of its useful life. In general, however, the data and cost estimates show that retrofitting ABAs would involve significant expense to the motor carrier industry.

While ABAs have real advantages over MBAs, the FHWA has determined that the costs associated with a retrofitting requirement do not clearly exceed the benefits that could be anticipated. This is especially true given that the estimated $1 billion retrofit cost would only apply to trailers, and semitrailers, not to truck-tractors or air-braked single-unit trucks. Even with several years of lead time, the annual cost to the motor carrier industry would be several hundred million dollars. None of the commenters that favored a retrofit requirement provided an analysis or estimate of its expected impact on CMV accidents. The FHWA, therefore, will not require retrofitting.

Discussion of Final Rule

Proper brake adjustment is critical to safe CMV operation. The NHTSA has estimated that nearly 4,000 CMV accidents per year are caused by out-of-adjustment brakes. The NTSB's review of 97 serious heavy truck accidents investigated from 1969 to 1981 cited out-of-adjustment brakes as a causal or contributing factor in 28 percent of those accidents. Out-of-adjustment brakes are also the primary equipment-related cause for CMVs to be placed out of service during roadside inspections; for Fiscal Year 1992, 36.2 percent of vehicles placed out-of-service were cited for this deficiency.

Aside from the clear safety benefits of maintaining proper brake adjustment, ABAs can have a positive benefit on motor carrier productivity by preventing CMVs from being placed out of service, reducing roadside service calls and the resulting delays to transportation operations.

Virtually all commenters to the NPRM who responded to the in-use requirement were in favor of it. The ATA noted that manufacturers have provided, and motor carriers voluntarily have been using, ABAs for a number of years. Even in the absence of Federal regulations, the marketplace was adopting the technology on its merits.

Finally, the FHWA strives to maintain consistency between the manufacturing standards for commercial motor vehicles contained in the NHTSA's Federal Motor Vehicle Safety Standards (FMVSSs), and the operations and maintenance regulations contained in the FMCSRs.

The FHWA has concluded that both motor carriers and the traveling public may derive substantial operational and safety benefits from the use of automatic brake adjusters and brake adjustment indicators.

The final rule, therefore, amends the FMCSRs by adding a new § 393.53, Automatic Brake Adjusters and Brake Adjustment Indicators, to Subpart C, Brakes.

The provisions of paragraphs (a), (b), and (c) require that automatic brake adjusters and brake adjustment indicators installed on newly manufactured CMVs to comply with the requirements of FMVSS Nos. 105 and 121 be maintained by the motor carriers operating those CMVs.

These provisions will apply to all CMVs operated in the United States, irrespective of the country where the CMV is based. Canadian and Mexican vehicles manufactured on or after the effective dates of the NHTSA rules will be required to conform to this regulation.

Rulemaking Analyses and Notices

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The FHWA has determined that this action is not a significant regulatory action within the meaning of Executive Order 12866 or significant within the meaning of Department of Transportation regulatory policies and procedures. This rule makes the operational standards for brakes in the FMCSRs consistent with the manufacturing standards in the FMVSS Nos. 105 and 121. It requires automatic brake adjusters and brake adjustment indicators installed on newly manufactured CMVs in accordance with those manufacturing standards to be maintained by the motor carriers operating those vehicles. The FHWA believes that promulgation of this final rule is necessary to assure that the safety benefits of the NHTSA rule are fully realized. Based on the NHTSA's research, the FHWA believes that operation and maintenance costs of the automatic brake adjusters and adjustment indicators required under the new FMVSSs will be lower than costs of the devices previously required. It is anticipated that the economic impact of this rulemaking will be minimal; therefore, a full regulatory evaluation is not required.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (5 U.S.C. 601–612), the FHWA has evaluated the effects of this rule on small entities. This rule modifies the operational standards for brakes in the FMCSRs to make them consistent with the manufacturing standards in the FMVSS Nos. 105 and 121, which now require the installation of automatic brake adjusters and adjustment indicators on certain newly-manufactured CMVs. Under this final rule, motor carriers are only required to maintain these devices. The final rule does not impose a retrofitting requirement for vehicles manufactured prior to the effective date of the NHTSA's rules. This is consistent with other requirements linking the FMCSRs to the FMVSS Nos. 105 and 121. The FHWA believes that operation and maintenance costs of the vehicles equipped with automatic brake adjusters and adjustment indicators will be lower than costs of the manual devices previously required. Therefore, the FHWA hereby certifies that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12612 (Federalism Assessment)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this action does not have sufficient federalism implications to warrant the preparation of a federalism assessment.

To be eligible for Motor Carrier Safety Assistance Program funds, a State's regulations for interstate transportation must be the same as the FMCSRs and Federal Hazardous Materials Regulations. Regulations for intrastate transportation may be at variance only so long as they fall within the parameters of the Tolerance Guidelines in 49 CFR part 350, Appendix C.

The FHWA intends to provide training and informational materials to the States to aid them in this process. The FHWA works with the Commercial Vehicle Safety Alliance on training and enforcement issues, and will continue to do so.

Paperwork Reduction Act

This action does not contain a collection of information requirement for purposes of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act

The agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and has determined that this action would not have any effect on the quality of the environment.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 393

Freight transportation, Highway safety, Highways and roads, Motor carriers, Motor vehicle safety.

In consideration of the foregoing, the FHWA is amending title 49, Code of Federal Regulations, part 393, as follows:

PART 393—[AMENDED]

1. The authority citation for part 393 is revised to read as follows:

Authority: Section 1041(b) of Pub. L. 102–240, 105 Stat. 1914, 1993 (1991); 49 U.S.C. 31136 and 31502; 49 CFR 1.48.

2. In subpart C, § 393.53 is added to read as follows:

§ 393.53 Automatic brake adjusters and brake adjustment indicators.

(a) *Automatic brake adjusters (hydraulic brake systems).* Each commercial motor vehicle manufactured on or after October 20, 1993, and equipped with a hydraulic brake system, shall meet the automatic brake adjustment system requirements of Federal Motor Vehicle Safety Standard No. 105 (49 CFR 571.105, S5.1) applicable to the vehicle at the time it was manufactured.

(b) *Automatic brake adjusters (air brake systems).* Each commercial motor vehicle manufactured on or after October 20, 1994, and equipped with an air brake system shall meet the automatic brake adjustment system requirements of Federal Motor Vehicle Safety Standard No. 121 (49 CFR 571.121, S5.1.8) applicable to the vehicle at the time it was manufactured.

(c) *Brake adjustment indicator (air brake systems).* On each commercial motor vehicle manufactured on or after October 20, 1994, and equipped with an air brake system which contains an external automatic adjustment mechanism and an exposed pushrod, the condition of service brake under-adjustment shall be displayed by a brake adjustment indicator conforming to the requirements of Federal Motor Vehicle Safety Standard No. 121 (49 CFR 571.121, S5.1.8) applicable to the vehicle at the time it was manufactured.

Issued on August 30, 1995.

Rodney E. Slater,

Federal Highway Administrator.

Proposed Rules

Federal Register
Vol. 60, No. 172
Wednesday, September 6, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Part 23

[95–21]

RIN 1557–AB45

Leasing

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of the Comptroller of the Currency (OCC) is proposing to revise its regulation governing the personal property lease financing transactions of national banks. This proposal is another component of the OCC's Regulation Review Program to update and streamline OCC regulations and to reduce unnecessary regulatory costs and other burdens. The proposal revises the regulation to improve its clarity. In addition, the OCC has identified several areas where substantive changes may be appropriate based upon comments received in this rulemaking.

DATES: Comments must be received by November 6, 1995.

ADDRESSES: Comments should be directed to: Communications Division, 250 E Street, SW., Washington, DC 20219, Attention: Docket No. 95–21. Comments will be available for public inspection and photocopying at the same location.

FOR FURTHER INFORMATION CONTACT: Morris Morgan, Credit and Management Policy, Chief National Bank Examiner's Office 202/874–5170; Jacqueline Lussier, Senior Attorney, Legislative and Regulatory Activities 202/874–5090, Aline J. Henderson, Senior Attorney, Bank Activities and Structure, Chief Counsel's Office 202/874–5300.

SUPPLEMENTARY INFORMATION:

Introduction

The OCC is proposing to revise 12 CFR part 23, which governs personal property lease financing transactions by national banks. This proposal is another component of the OCC's Regulation Review Program. The principal goal of the Program is to review all of the OCC's rules with a view toward eliminating provisions that do not contribute significantly to maintaining the safety and soundness of national banks or to accomplishing the OCC's other statutory responsibilities. Another important goal is to clarify regulations so that they more effectively convey the standards the OCC seeks to apply.

The OCC first adopted part 23 in mid-1991.[1] The OCC's experience to date suggests that a complete, substantive rewrite of the regulation is not warranted at this time, but that revisions to improve its clarity would be useful. Accordingly, the proposal revises the regulation by shortening and streamlining its text; reorganizing many of its provisions and adding paragraph headings; and conforming its style to that of the OCC's other rules. In addition, the OCC has identified several areas, described in the Discussion section below, where substantive changes may be appropriate based upon the comments received in response to this proposal.

Background

National banks may engage in leasing activities pursuant to two independent sources of authority. First, under 12 U.S.C. 24(Seventh), national banks may engage in personal property lease financing transactions (Section 24(Seventh) Leases) when the lease is the functional equivalent of a loan.[2] The OCC has interpreted the functional equivalency standard to mean that Section 24(Seventh) Leases must be "net, full-payout leases." Under the current regulation, the net lease requirement means that the lessor national bank may not provide certain enumerated services such as repairs, maintenance, or insurance in connection with the leased property. The full-payout requirement means that the bank must expect to recover the full acquisition and financing costs of the leasing transaction from sources that include the estimated, unguaranteed residual value of the leased property, but that the bank may rely on estimated residual value only to a limited extent. There is no aggregate limit on a national bank's investment in Section 24(Seventh) Leases.

In 1987, Congress gave national banks a second, explicit source of authority to engage in the personal property lease financing. The Competitive Equality Banking Act (CEBA)[3] amended 12 U.S.C. 24 by adding a new paragraph Tenth, which allows national banks to invest in tangible personal property, including vehicles, manufactured homes, machinery, equipment, and furniture, for lease financing transactions on a net lease basis. Investment in personal property to be leased under the authority of 12 U.S.C. 24(Tenth) (CEBA Leases) may not exceed 10 percent of a national bank's assets. Although a national bank must expect to recover its full acquisition and financing costs in a CEBA leasing transaction from the same sources as the regulation specifies for a Section 24(Seventh) leasing transaction, CEBA Leases are not subject to a maximum estimated residual value limit.

Both Section 24(Seventh) Leases and CEBA Leases are governed by standards set forth in part 23. The current version of part 23 contains three subparts: subpart A applies to all lease financing transactions; subpart B contains additional requirements applicable only to CEBA Leases; and subpart C contains additional requirements applicable only to Section 24(Seventh) Leases. The proposal retains the three-subpart structure, but revises and reorganizes the rule's provisions to enhance clarity. A derivation table showing these changes appears at the conclusion of this preamble.

The *Discussion* portion of the preamble contains a section-by-section description of the proposed revisions.

Discussion

Subpart A—General Provisions

Authority, Purpose, and Scope (Proposed § 23.1)

Current Section 23.1(a) sets out the authority of national banks to engage in personal property lease financing transactions. The proposal does not change the authority provision, but it adds subsections describing the purpose of part 23 and the scope of its respective subparts. Current 23.1(b), which authorizes a national bank to recover its acquisition and financing costs from rentals, tax benefits, and the residual value of the leased property, is relocated to proposed § 23.3.

Definitions (Proposed § 23.2)

The current regulation does not contain a definitions section. Proposed § 23.2 defines several terms, including "CEBA Lease," "conforming lease," "off-lease property," and "Section 24(Seventh) Lease" for the purpose of making the operative provisions of the regulation shorter and easier to read.

Current § 23.2 contains both a definition of the term "net lease" and operative provisions, including the so-called "distress clauses," which allow a national bank to take reasonable action to protect its interest in leased property, and a provision that allows a national bank to arrange for a third party to provide operational services that the bank is precluded from providing under a net lease. The definition of "net lease" is retained in proposed § 23.2(d) without substantive change; the operative provisions are moved to proposed § 23.4.

Proposed § 23.2(c) contains a definition of the term "full-payout lease." The term is defined as a lease financing transaction in which the unguaranteed portion of the estimated residual value of the leased property[4] on which a bank relies for recovery of its acquisition and financing costs is no greater than 25 percent of the cost of the leased property to the lessor. This estimated residual value limit is the same as the limit that currently appears at § 23.11(a) of the current regulation. Other, operative provisions of the current regulation that pertain to residual value are retained in subpart C of part 23, as described below.

The purpose of a residual value limit is to ensure that a lessor bank relies primarily on the creditworthiness of the lessee to recover its entire investment in the leased property. When the OCC adopted the current residual value limit in 1979, it selected 25 percent as the level that best protected national banks from the increased risk that results from excessive reliance on residual value. That amount was based in part on the OCC's experience at that time in examining and supervising banks engaged in Section 24(Seventh) lease financing activities. *See* 44 FR 22388, 22390 (April 13, 1979) (adoption of interpretive rule establishing estimated residual value limit of 25 percent).[5]

Since then, national banks have been given authority to enter into CEBA Leases, which are not subject to a maximum residual value limit (but are restricted in aggregate amount to 10 percent of a national bank's total consolidated assets). National banks do not appear to be engaged in CEBA leasing to the full extent of their statutory authority, and liberalization of the residual value limit for Section 24(Seventh) Leases may therefore be unnecessary.

The OCC is interested in commenters' views on this question, and specifically invites comment on whether the residual value limit for Section 24(Seventh) Leases should be modified. In addressing this question, commenters may wish to discuss the effect of Financial Accounting Standards Board Statement of Financial Accounting Standard 13, "Accounting for Leases," which, as a practical matter, may affect the extent to which a national bank relies on residual value. Commenters who support a more flexible limit on residual value for Section 24(Seventh) Leases are asked to identify any increased risk that may accompany a new limit and to discuss how the OCC should address that risk.

Recovery of Investment (Proposed § 23.3)

Proposed § 23.3 is the same as current § 23.1(b), which requires that a national bank entering into a lease financing transaction must reasonably expect to recover its full investment in the leased property as well as its estimated financing costs over the life of the lease from three sources: rentals, estimated tax benefits, and the estimated residual value of the leased property.

As its placement in subpart A of part 23 indicates, the recovery of investment provision applies both to CEBA Leases and to Section 24(Seventh) Leases. The maximum estimated residual value requirement that appears in the definition of the term "full-payout lease," however, applies only to Section 24(Seventh) Leases. Neither the current regulation nor the proposal limits the extent to which a national bank may rely on residual value to recover its acquisition and financing costs in a CEBA Lease transaction.

Net Lease Requirement (Proposed § 23.4)

A new paragraph (a) is added to proposed § 23.4. This paragraph contains an explicit statement of the requirement that national banks may engage in a lease financing transaction, and in activities incidental to the transaction, only if the lease is a net lease. The current rule does not contain a plain statement of this basic requirement. The statement is added for purposes of clarity and completeness; it is not intended to change the requirement.

The incidental activities clause in proposed § 23.4(a) reflects the OCC's long-standing interpretations authorizing national banks to engage in activities incidental to leasing. As the placement of the incidental activities reference within subpart A of part 23 indicates, the OCC takes the position that a national bank may engage in incidental activities with respect both to Section 24(Seventh) Leases and CEBA Leases.

The activities incidental to leasing that the OCC has authorized to date for national banks acting as lessors include:[6] providing management, marketing, and administrative services through an operating subsidiary; offering credit life insurance to lessees; and acquiring rights under maintenance contracts associated with purchased leases.[7] The OCC does not propose to include a list of permissible activities incidental to leasing in part 23. Commenters are, however, invited to address the desirability of retaining this case-by-case approach and to discuss incidental activities that may be appropriate for OCC consideration. In particular, the OCC is seeking comment on whether it should, on a case-by-case basis, permit national banks to lease real estate when the real estate lease is incidental to a personal property lease financing transaction. This issue may arise, for example, when a bank wishes to lease personalty, such as machinery, that is affixed to the land on which it sits.

---

[1] 56 FR 28314 (June 20, 1991). The final regulation replaced the OCC's interpretive ruling on lease financing transactions, which had been codified at 12 CFR 7.3400. Much of the substance of this interpretive ruling was retained, however, in the portions of part 23 that apply to Section 24(Seventh) Leases.

[2] *See M & M Leasing Corp.* v. *Seattle First National Bank*, 563 F.2d 1377 (9th Cir. 1977), *cert. denied*, 436 U.S. 956 (1978) (upholding national banks' authority under 12 U.S.C. 24(Seventh) to engage in personal property lease financing transactions if the lease is the functional equivalent of a loan).

[3] Pub. L. 100–86, § 108, 101 Stat. 552, 579 (August 10, 1987). *See also* S. Rep. No. 100–19, 100th Cong., 1st Sess. 43 (1987) (CEBA expanded national banks' leasing authority in order to enable them to respond to customer demand for a broader range of lease financing transactions and to compete with thrift and other nonbank lessors).

[4] The "estimated residual value" is the estimated market value of leased property at the end of the lease term; the "unguaranteed portion" of the estimated residual value is the estimated residual value at the end of the lease term less any portion of the estimated residual value guaranteed by the lessee, the manufacturer, or a third party. *See* 12 CFR 23.1(b), 23.11.

[5] In 1979, the regulations promulgated by the Board of Governors of the Federal Reserve System (FRB) that authorized a bank holding company or its subsidiary to engage in lease financing activities limited the reliance placed on residual value to a maximum of 20 percent of the cost of the property. In 1982, the FRB decided to conform its residual value provisions to the OCC's limit for Section 24(Seventh) Leases. The FRB based its decision, in part, on the fact that the OCC had not identified any significant increased risk from permitting reliance on the slightly higher level of 25 percent. *See* 57 FR 20958, 20959–60 (May 18, 1982) (final regulation; discussion of bases for FRB action). The FRB's regulation appears at 12 CFR 225.25(b)(5).

[6] The OCC has also authorized national banks to engage in incidental activities with respect to lease financing transactions to which the bank is not a party. These activities include acting as finder or performing similar functions as agent or broker. *See* 12 CFR 7.7200. They also include providing lease consulting services such as financial advice; providing management, brokerage, and finder services; and performing lease servicing for third parties. *See, e.g.*, OCC Interpretive Letter No. 567 (Oct. 29, 1991) *reprinted in* [1991–92 Transfer Binder] Fed. Banking L. Rep. (CCH) ¶ 83,337; Letter from Wallace S. Nathan (Oct. 28, 1985) (unpublished); Letter from Peter Liebesman (June 15, 1981) (unpublished).

Copies of unpublished letters are available in the OCC's public comment file for this rulemaking.

The substance of proposed § 23.4(b) is the same as that of current § 23.2(b), (c), and (d), but the text has been revised so that it is shorter and simpler. For example, the provisions specifying the conditions under which a national bank may take appropriate action to protect its interests have been amended so that they no longer require that a change in condition be "unexpected" or that a bank's increased exposure to risk be "significant." As is the case in current § 23.2, proposed § 23.4(b) provides that the actions a national bank may take to salvage or protect its investment under the distress clauses include the actions described in the definition of net lease at § 23.2(d).

Investment in Personal Property (Proposed § 23.5)

Current § 23.3, which governs the acquisition of property to be leased, the disposition of the property at the conclusion of the lease term or upon the lessee's default, and the use of short-term leases, has been moved to proposed § 23.5 with certain clarifying changes. For example, the text of the provision covering bridge or interim leases has been rewritten to state more clearly the current rule that a bank's use of a bridge or interim lease pending the long-term disposition of off-lease property does not extend the off-lease holding period. Property is "off-lease" at the expiration of the lease term or upon the lessee's default on the lease agreement prior to expiration.

Current § 23.3(b) requires that a national bank dispose of or re-lease off-lease property as soon as practicable, but not later than two years from the date the lease expires. Proposed § 23.5(b) is substantively the same but contains new language to clarify that the two-year holding period runs either from the date the lease expires or from the date of the lessee's default, depending on the reason that the national bank takes possession or control of the leased property.

Both Section 24(Seventh) Leases and CEBA Leases are subject to this holding period limitation for off-lease assets. Property that the bank retains in anticipation of re-leasing must be revalued when it comes off-lease at the lower of current fair market value or book value. Upon the expiration of the two-year period, national banks are required to write-off any remaining book value for off-lease assets.

The OCC has considered whether it should extend the holding period for off-lease property. For example, a longer holding period may be appropriate where markets for particular types of property become depressed, and the two-year period might be insufficient to allow national banks to proceed with the orderly liquidation or re-lease of the property. The OCC, however, lacks empirical data on the experiences national banks have had in attempting to liquidate or re-lease specific kinds of off-lease property within the current holding period and, accordingly, is not now proposing any change.

The OCC would consider modifying the holding period in the final revisions of part 23 if commenters present persuasive reasons, supported by empirical evidence, for doing so. Accordingly, the OCC requests comment on the following issues: (1) Should the holding period for off-lease assets be extended and, if so, should it be extended for all categories of assets or only for particular categories? (2) If the holding period were extended, what is a reasonable additional time period, in general or for particular categories of assets? (3) What evidence supports extension of the holding period? (4) If the holding period were extended, how should the OCC ensure that banks do not use the longer period to retain property for essentially speculative purposes? The OCC invites specific comment on the experiences of national banks in attempting to liquidate or re-lease specific kinds of off-lease personal property that are relevant to the issue of extending the holding period requirement.

Requirement for Separate Records (Proposed § 23.6)

Proposed § 23.6 retains the requirement in current § 23.4 that national banks maintain separate records for CEBA Leases and Section 24(Seventh) Leases. Minor revisions have been made to shorten and clarify the text.

Applicability of Consumer Laws (Current § 23.6; Removed in Proposal)

Current § 23.6 states that nothing in part 23 shall be construed to be in conflict with the duties, liabilities and standards imposed by the Consumer Leasing Act of 1976, 12 U.S.C. 1667 *et seq.* (CLA). The OCC is proposing to remove this section because other consumer protection laws and regulations may also apply to personal property lease financing, making the cross-reference potentially misleading. Of course, this change does not affect the applicability of the CLA or any other consumer credit laws to national banks' lease financing activities, and national banks must know and comply with the full range of requirements that govern these activities.

Application of Lending Limits; Restrictions on Transactions With Affiliates (Proposed § 23.7)

The proposal continues to subject lease financing transactions to lending limits and transactions with affiliates restrictions, but clarifies that the transactions with affiliates restrictions apply only if the lessee is an affiliate of the lessor bank. The proposal also retains the reservation of the OCC's authority to impose other limits or restrictions. These provisions currently appear at § 23.5; they are relocated in the proposal to § 23.7.

Subpart B—CEBA Leases

Provisions Applicable to CEBA Leases (Proposed §§ 23.8, 23.9, and 23.10)

Proposed §§ 23.8, 23.9, and 23.10 contain the requirements applicable to CEBA Leases, including a statement of the general rule authorizing investment in CEBA Leases, the limits placed on banks' exercise of their CEBA leasing authority, and a transition rule for CEBA Leases entered into after CEBA's enactment but before the effective date of the OCC's final implementing rule. The substance of these provisions is the same as that of current §§ 23.7, 23.8, and 23.9. Minor changes have been made to shorten and clarify the text.

---

[7] See Letter from H. Joe Selby, Nov. 24, 1976 (unpublished) (management, marketing, and administrative services through an operating subsidiary); Letter from Peter Liebesman, Jan. 14, 1985 (unpublished) (credit life insurance); Letter from J.T. Watson, May 14, 1975 (unpublished) (rights under maintenance contracts associated with purchased leases).

Subpart C—Section 24(Seventh) Leases

General Rule (Proposed § 23.11)

Current § 23.10 states the general rule authorizing national banks to engage in lease financing pursuant to 12 U.S.C 24(Seventh). The substance of proposed § 23.11 is the same as this current rule. The reference to incidental activities in the current rule has been deleted as redundant, however, given the treatment of incidental activities in proposed § 23.4. Other, minor revisions have been made to shorten and clarify the text.

Estimated Residual Value (Proposed § 23.12)

Current § 23.11 prescribes not only the residual value limit that applies to Section 24(Seventh) Leases but also certain other provisions that apply to a bank's reliance on or estimate of residual value. First, the amount of any estimated residual value guaranteed by a manufacturer, the lessee, or a third party that is not an affiliate of the bank may exceed 25 percent of the original cost of the property if the bank has determined that the guarantor has the resources to meet the guarantee and the bank can document its determination. Second, the estimated residual value amounts must be reasonable given the type of property leased and the relevant circumstances, so that realization of the lessor bank's full investment and the cost of financing the property primarily depends on the creditworthiness of the lessee and any guarantor of the residual value, and not on the residual market value of the leased item. Finally, when a bank leases personal property to a government entity, its estimates of residual value may be based on future transactions that it reasonably anticipates will occur.

The estimated residual value limit has been incorporated into a definition of the term "full-payout lease" that appears in proposed § 23.2. The other provisions remain substantively unchanged but have been moved to proposed § 23.12 with minor revisions to shorten and clarify the text.

Transition Rule (Proposed § 23.13)

Current § 23.12 provides that leases executed before June 12, 1979,[8] are not subject to part 23 and prescribes rules for renewing those leases. Proposed § 23.13 retains these provisions with minor revisions to shorten and clarify the text.

The OCC welcomes comments on any aspect of the proposed regulation, particularly on those issues specifically noted in this preamble.

DERIVATION TABLE

[This table directs readers to the provision(s) of the current regulation, if any, upon which the proposed revision is based.]

Revised provision	Original provision	Comments
§ 23.1	§ 23.1(a)	Modified.
§ 23.2(a), (b), (c)		Added.
§ 23.2(d)	§ 23.2(a)	Modified.
§ 23.3	§ 23.1(b)	Modified.
§ 23.4(a)		Added.
§ 23.4(b)	§ 23.2 (b), (c), (d).	Modified.
§ 23.5	§ 23.3	Modified.
§ 23.6	§ 23.4	Modified.
§ 23.7	§ 23.5	Modified.
	§ 23.6	Removed.
§ 23.8	§ 23.7	Modified.
§ 23.9	§ 23.8	Modified.
§ 23.10	§ 23.9	Modified.
§ 23.11	§ 23.10	Modified.
§ 23.12	§ 23.11	Modified.
§ 23.13	§ 23.12	Modified.

Regulatory Flexibility Act

It is hereby certified that this proposal, if adopted as a final rule, will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. This proposal, if adopted as a final rule, will reduce the regulatory burden on national banks, regardless of size, by simplifying and clarifying existing regulatory requirements.

Executive Order 12866

The OCC has determined that this proposal is not a significant regulatory action under Executive Order 12866.

Unfunded Mandates Reform Act of 1995

The OCC has determined that the requirements of this proposal will not result in expenditures by State, local, and tribal governments, or by the private sector, of more than $100 million in any one year. Accordingly, a budgetary impact statement is not required under section 202 of the Unfunded Mandates Reform Act of 1995.

List of Subjects in 12 CFR Part 23

National banks, Banking, Leasing, Lease financing transactions.

Authority and Issuance

For the reasons set out in the preamble, part 23 of title 12, chapter I, of the Code of Federal Regulations is proposed to be amended as set forth below:

1. Part 23 is revised to read as follows:

PART 23—LEASING

Subpart A—General Provisions

Sec.
23.1 Authority, purpose, and scope.
23.2 Definitions.
23.3 Recovery of investment.
23.4 Net lease requirement.
23.5 Investment in personal property.
23.6 Requirement for separate records.
23.7 Application of lending limits; restrictions on transactions with affiliates.

Subpart B—CEBA Leases

23.8 General rule.
23.9 Lease term.
23.10 Transition rule.

Subpart C—Section 24(Seventh) Leases

23.11 General rule.
23.12 Estimated residual value.
23.13 Transition rule.

Authority: 12 U.S.C. 1; 12 U.S.C. 24(Seventh) and 24(Tenth); 12 U.S.C. 93a.

Subpart A—General Provisions

§ 23.1 Authority, purpose, and scope.

(a) *Authority.* A national bank may engage in personal property lease financing transactions pursuant to 12 U.S.C. 24(Seventh) and 12 U.S.C. 24(Tenth).

(b) *Purpose.* The purpose of this part is to set forth standards for personal property lease financing transactions authorized for national banks.

(c) *Scope.* A national bank that enters into a lease under the authority of 12 U.S.C. 24(Seventh) must comply with subparts A and C of this part. A national bank that enters into a lease under the authority of 12 U.S.C. 24(Tenth) must comply with subparts A and B of this part.

§ 23.2 Definitions.

(a) *CEBA Lease* means a personal property lease entered into under the authority of 12 U.S.C. 24(Tenth).

(b) *Conforming lease* means:

(1) A CEBA Lease that conforms with the requirements of subparts A and B of this part; or

(2) A Section 24(Seventh) Lease that conforms with the requirements of subparts A and C of this part.

(c) *Full-payout lease* means a lease financing transaction in which any unguaranteed portion of the estimated residual value relied upon by the bank to yield the return of its full investment in the leased property, plus the estimated cost of financing the property over the term of the lease, does not exceed 25 percent of the original cost of the property to the lessor.

---

[8] June 12, 1979, was the effective date of the OCC's final rule amending 12 CFR 7.3400 to reflect the Ninth Circuit's decision in the *M&M Leasing* case.

UMI

(d) *Net lease* means a lease under which the bank will not, directly or indirectly, provide or be obligated to provide for:

(1) Servicing, repair, or maintenance of the leased property during the lease term;

(2) Purchasing parts and accessories for the leased property; however, improvements and additions to the leased property may be leased to the lessee upon the lessee's request in accordance with any applicable requirements for maximum estimated residual value;

(3) Loan of replacement or substitute property while the leased property is being serviced;

(4) Purchasing insurance for the lessee, except where the lessee has failed in its contractual obligation to purchase or maintain the required insurance; or

(5) Renewal of any license or registration for the property unless renewal by the bank is necessary to protect its interest as owner or financier of the property.

(e) *Off-lease property* means personal property that reverts to a national bank's possession or control upon the expiration of a lease or upon the default of the lessee.

(f) *Section 24(Seventh) Lease* means a personal property lease entered into under the authority of 12 U.S.C. 24(Seventh).

§ 23.3 Recovery of investment.

A national bank that enters into a lease financing transaction must reasonably expect to realize the return of its full investment in the leased property, plus the estimated cost of financing the property over the term of the lease, from:

(1) Rentals;

(2) Estimated tax benefits; and

(3) The estimated residual value of the property at the expiration of the term of the lease.

§ 23.4 Net lease requirement.

(a) *General rule.* A national bank may engage in a lease financing transaction and activities incidental to the transaction only if the lease qualifies as a net lease.

(b) *Exceptions*—(1) *Change in conditions.* If, in good faith, a national bank believes that there has been a change in conditions that threatens its financial position by increasing its exposure to loss, then the bank may:

(i) As the owner and lessor under a net lease, take reasonable and appropriate action (including the actions specified in § 23.2(d)) to salvage or protect the value of the property or its interests arising under the lease;

(ii) As the assignee of a lessor's interest in a lease, become the owner and lessor of the leased property pursuant to its contractual rights, or take any reasonable and appropriate action (including the actions specified in § 23.2(d)) to salvage or protect the value of the property or its interests arising under the lease.

(2) *Provisions to protect the bank's interests.* A national bank may include any provisions in a lease, or make any additional agreements, to protect its financial position or investment in the event of a change in conditions that would increase its exposure to loss.

(3) *Arranging for services by a third party.* A national bank may arrange for any of the services enumerated in § 23.2(d) to be provided to a lessee by a third party at the expense of the lessee.

§ 23.5 Investment in personal property.

(a) *Requirement for written agreement.* A national bank may acquire specific personal property to be leased only after the bank has entered into either:

(1) A legally binding written agreement that indemnifies the bank against loss in connection with its acquisition of the property; or

(2) A legally binding written commitment to enter into a conforming lease.

(b) *Two-year holding period.* At the expiration of the lease (including any renewals or extensions with the same lessee), or in the event of a default on a lease agreement prior to the expiration of the lease term, a national bank shall either liquidate the property or re-lease it under a conforming lease as soon as practicable. In any event, liquidation or re-lease shall occur not later than two years from the date of the expiration of the lease or the date of the lessee's default. Property that the bank retains in anticipation of re-leasing must be revalued at the lower of current fair market value or book value before the bank enters into any subsequent lease.

(c) *Bridge or interim leases.* During the two-year holding period allowed by paragraph (b) of this section, a bank may enter into a short-term bridge or interim lease pending the sale of off-lease property or the re-lease of the property under a long-term conforming lease. A short-term bridge or interim lease must be a net lease, but it need not comply with any other requirement of subpart B or C of this part.

§ 23.6 Requirement for separate records.

If a national bank enters into both CEBA Leases and Section 24(Seventh) Leases, the bank's records must distinguish the CEBA Leases from the Section 24(Seventh) Leases.

§ 23.7 Application of lending limits; restrictions on transactions with affiliates.

A national bank's lease financing transactions are subject to the lending limits prescribed by 12 U.S.C. 84 or, if the lessee is an affiliate of the bank (as defined by 12 U.S.C. 371c), to the restrictions on transactions with affiliates prescribed by 12 U.S.C. 371c and 371c–1. The OCC may also determine that other limits or restrictions apply.

Subpart B—CEBA Leases

§ 23.8 General rule.

Pursuant to 12 U.S.C. 24(Tenth), a national bank may invest in tangible personal property, including, without limitation, vehicles, manufactured homes, machinery, equipment, or furniture for lease financing transactions, or may become the owner and lessor of tangible personal property by purchasing the property from another lessor in connection with the bank's purchase of the related lease, provided that: the lease is a conforming lease; and the aggregate book value of all tangible personal property held for lease under the authority of 12 U.S.C. 24(Tenth) does not exceed 10 percent of the bank's consolidated assets.

§ 23.9 Lease term.

(a) *Initial term.* A CEBA Lease must have an initial term of not less than 90 days.

(b) *Exception.* The 90-day term requirement prescribed by paragraph (a) of this section does not apply to the acquisition of property subject to an existing lease with a remaining maturity of less than 90 days, provided that, at its inception the lease was a conforming lease.

§ 23.10 Transition rule.

(a) *General rule.* CEBA Leases entered into prior to July 22, 1991, may continue to be administered in accordance with the lease financing terms agreed to by the bank/lessor and the lessee. For purposes of applying the lending limits and the restrictions on transactions with affiliates described in § 23.7, however, a bank that enters into a new extension of credit to a customer, including a lease, shall include all outstanding leases regardless of the date on which they were made.

(b) *Renewal of non-conforming leases.* A national bank may renew a CEBA Lease that was entered into prior to July 22, 1991, and that is not a conforming lease only if the following conditions are satisfied:

(1) The bank entered into the CEBA Lease in good faith;

(2) The expiring lease contains a binding agreement requiring that the bank renew the lease at the lessee's option, and the bank cannot reasonably avoid its commitment to do so; and

(3) The bank determines in good faith and demonstrates by appropriate documentation that renewal of the lease is necessary to avoid financial loss and to recover its investment in and its cost of financing the property.

Subpart C—Section 24(Seventh) Leases

§ 23.11 General rule.

Pursuant to 12 U.S.C. 24(Seventh), a national bank may become the legal or beneficial owner and lessor of, or otherwise acquire, personal property; or may become the owner and lessor of personal property by purchasing the property from another lessor in connection with the bank's purchase of the related lease, provided that: the lease is a net, full-payout lease representing a noncancelable obligation of the lessee (notwithstanding the possible early termination of that lease); and the lease is a conforming lease.

§ 23.12 Estimated residual value.

(a) *Recovery of investment and costs.* A national bank's estimates of the residual value of the property and the portion of the estimated residual value that the bank relies upon to satisfy the requirements of a full-payout lease, as defined in § 23.2(c), must be reasonable in light of the nature of the leased property and all circumstances relevant to the transaction. The bank's realization of its full investment in the leased property, plus the estimated cost of financing the property over the term of the lease, must depend primarily on the creditworthiness of the lessee and any guarantor of the residual value, and not on the residual value of the leased item.

(b) *Estimated residual value subject to guarantee.* The amount of any estimated residual value guaranteed by the manufacturer, the lessee, or a third party may exceed 25 percent of the original cost of the property if the bank determines and demonstrates by appropriate documentation that the guarantor has the resources to meet the guarantee and the guarantor is not an affiliate of the bank, as defined by 12 U.S.C. 371c.

(c) *Leases to government entities.* Calculations of estimated residual value on leases of personal property to Federal, State, or local government entities may be based on future transactions or renewals that the bank reasonably anticipates will occur.

§ 23.13 Transition rule.

(a) *Exclusion.* Subpart A and this subpart shall not apply to any § 24(Seventh) Leases executed prior to June 12, 1979. For purposes of applying the lending limits and the restrictions on transactions with affiliates described in § 23.7, however, a bank that enters into a new extension of credit to a customer, including a lease shall include all outstanding leases regardless of the date on which they were made.

(b) *Renewal of non-conforming leases.* A national bank may renew a Section 24(Seventh) Lease that was entered into prior to June 12, 1979, and that is not a conforming lease only if the following conditions are satisfied:

(1) The bank entered into the Section 24(Seventh) Lease in good faith;

(2) The expiring lease contains a binding agreement requiring that the bank renew the lease at the lessee's option, and the bank cannot reasonably avoid its commitment to do so; and

(3) The bank determines in good faith and demonstrates by appropriate documentation that renewal of the lease is necessary to avoid financial loss and to recover its investment in and its cost of financing the property.

Dated: August 14, 1995.

Eugene A. Ludwig,

Comptroller of the Currency.

BILLING CODE 4810-33-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 895 and 898

[Docket No. 94N–0078]

Medical Devices; Proposed Performance Standards for Electrode Lead Wires and Proposed Banning of Unprotected Electrode Lead Wires; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending to October 20, 1995, the comment period on a proposed rule that published in the **Federal Register** of June 21, 1995 (60 FR 32406). The document proposed to establish a performance standard for electrode lead wires, and to make unprotected electrode lead wires a banned device upon the effective date of the standard. FDA is taking this action in response to two requests for an extension of the comment period.

DATES: Written comments by October 20, 1995.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Marquita B. Steadman, Center for Devices and Radiological Health (HFZ–84), Food and Drug Administration, 2094 Gaither Rd., Rockville, MD 20850, 301–594–4765, ext. 145.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 21, 1995 (60 FR 32406), FDA issued a proposed rule to establish a performance standard for electrode lead wires, and to make unprotected electrode lead wires a banned device upon the effective date of the standard.

FDA has received two requests from trade associations for a 90-day extension of the comment period. The reasons given for the requests are that the proposed rule has raised potential implications beyond those previously anticipated, and additional time is needed for the consideration of these issues and the preparation of meaningful comments.

The agency agrees in part with the requests, however, it believes that due to the public health significance of this issue, an extension for the entire length of time requested is not appropriate. The agency is extending the comment period for 45 days, to October 20, 1995.

Interested persons may, on or before October 20, 1995, submit to the Dockets Management Branch (address above) written comments regarding this proposed rule. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 30, 1995.

Joseph A. Levitt,

Deputy Director for Regulations Policy, Center for Devices and Radiological Health.

BILLING CODE 4160-01-F

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 95–7–6789b; FRL–5280–2]

Approval and Promulgation of State Implementation Plans; California State Implementation Plan Revision; South Coast Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the California State Implementation Plan (SIP) which control oxides of nitrogen (NO_x) from industrial, commercial, and institutional boilers, steam generators, and process heaters. The intended effect of proposing approval of these rules is to regulate emissions of NO_x in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). In the Rules Section of this **Federal Register**, the EPA is approving the state's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for this approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this action should do so at this time.

DATES: Comments on this proposed rule must be received in writing by October 6, 1995.

ADDRESSES: Written comments on this action should be addressed to: Daniel A. Meer, Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Copies of the rules and EPA's evaluation report of each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rules are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95812.

South Coast Air Quality Management District, 21865 E. Copley Drive, Diamond Bar, CA 91765–4182.

FOR FURTHER INFORMATION CONTACT: Mae Wang, Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901, Telephone: (415) 744–1200.

SUPPLEMENTARY INFORMATION: This document concerns South Coast Air Quality Management District Rule 1146, Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters, and Rule 1146.1, Emissions of Oxides of Nitrogen from Small Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters. Both of these rules were submitted to EPA on July 13, 1994 by the California Air Resources Board. For further information, please see the information provided in the direct final action which is located in the Rules Section of this **Federal Register**.

Authority: 42 U.S.C. 7401–7671q.

Dated: August 8, 1995.

Felicia Marcus,

Regional Administrator.

40 CFR Part 52

[SD6–1–6947b and SD5–1–6191b; FRL–5279–4]

Clean Air Act Approval and Promulgation of State Implementation Plan for South Dakota; Revisions to the Air Pollution Control Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: In this document, the EPA is proposing approval of revisions to the South Dakota State Implementation Plan (SIP) submitted by the State of South Dakota on November 12, 1993 and March 7, 1995. The submittals included regulatory revisions to the State's definitions, minor source construction and federally enforceable state operating permit (FESOP) rules, source category emission limitations, sulfur dioxide (SO_2) rules, new source performance standards (NSPS), new source review (NSR) requirements for new and modified major sources impacting nonattainment areas, and enhanced monitoring and compliance certification requirements. In the final rules section of this **Federal Register**, the EPA is acting on the State's SIP submittals in a direct final rule without prior proposal because the Agency views these submittals as noncontroversial and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If the EPA receives adverse comments, then the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this notice. Any parties interested in commenting on this notice should do so at this time.

DATES: Comments on this proposed action must be received in writing by October 6, 1995.

ADDRESSES: Written comments should be addressed to Vicki Stamper, 8ART–AP, at the EPA Regional Office listed below. Copies of the documents relevant to this proposed rule are available for public inspection during normal business hours at the following locations: Air Programs Branch, Environmental Protection Agency, Region VIII, 999 18th Street, suite 500, Denver, Colorado 80202–2466; and South Dakota Department of Environment and Natural Resources, Division of Environmental Regulation, Joe Foss Building, Pierre, South Dakota 57501.

FOR FURTHER INFORMATION CONTACT: Vicki Stamper, 8ART–AP, Environmental Protection Agency, Region VIII, 999 18th Street, suite 500, Denver, Colorado 80202–2466, (303) 293–1765.

SUPPLEMENTARY INFORMATION: See the information provided in the direct final rule of the same title which is located in the Rules Section of this **Federal Register**.

Dated: August 10, 1995.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 25

[IB Docket No. 95–117; FCC 95–285]

Satellite Application and Licensing Procedures

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission has proposed rules and policies to streamline application and licensing requirements for satellite space and earth stations under the commission's rules regarding satellite communications. Among other things, this document proposes to waive the construction permit requirement for satellite space stations and modify the license term for temporary fixed earth stations and the implementation period for Very Small Aperture Terminal ("VSAT") earth stations. The item also proposes amendments concerning minor modifications for earth stations, inclined orbit operations of space stations, and application and licensing forms. Comments are requested on all aspects of the proposals.

DATES: Comments must be submitted on or before October 4, 1995; reply comments must be submitted on or before October 25, 1995.

ADDRESSES: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Paula Ford, International Bureau, Satellite Policy Branch, (202) 739–0733; Frank Peace, International Bureau, Satellite Engineering Branch, (202) 739–0513; Kathleen Campbell, International Bureau, Satellite Policy Branch, (202) 739–0729.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking in IB Docket No. 95–117; FCC 95–285, adopted July 13, 1995 and released August 11, 1995. The complete text of this Notice of Proposed Rulemaking is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC and also may be purchased from the Commissions's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

The following collection of information contained in the *Notice* has been submitted to the Office of Management and Budget for review under Section 3507(d) of the Paperwork Reduction Act (44 U.S.C. 3507(d)). For copies of the submissions contact Dorothy Conway at (202) 418–0217 or access our fax on demand system at 202–418–0177 from the handset on your fax machine and using the document retrieval number 6000000. Persons wishing to comment on this collection of information should direct their comments to Timothy Fain (202) 395–3561, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503. Specifically, the Commission requests that parties provide comments on: (1) The necessity of the proposed collection of information for the proper performance of the functions of the agency, including whether the information has practical utility; (2) the accuracy of the agency's estimates of the burden of the proposed collection of information; (3) enhancing the quality, utility, and clarity of the information to be collected; and (4) minimizing the burden of the collection of information on parties responding. Comments must be filed with the Office of Management and Budget within sixty days of publication of this summary in the **Federal Register**. A copy of any comments filed with the Office of Management and Budget should also be sent to the following address at the Commission: Federal Communications Commission, Records Management Division, Room 234, Paperwork Reduction Project, Washington, DC 20554. For further information contract Judy Boley, (202) 418–0210.

Title: In the Matter of Streamlining the Commission's Rules and Regulations for Satellite Application and Licensing Procedures.

Action: Proposed new and revised collection.

Affected Public/Respondents: Businesses or other for profit, including small businesses.

Frequency of Response: On occasion, annually.

REPORTING REQUIREMENTS

Proposed sections	No. of respondents	Hours per response	Total annual reporting hours
Space Stations: 25.113, 25.114, 25.140, 25.210, 25.280, 25.300	125	9.5	1,187.5
Earth Stations: 25.115, 25.118, 25.134, 25.277, 25.300	500	2.5	1,250
Proposed FCC Form 312 (used by both space and earth stations)	300	4	1,200
Information for Adjacent Satellite Interference Analysis Database	50	24	*1,200

*Represents the hours for the periodic reporting of information. We propose to collect the information whenever there is a new processing round. The 1,200 figure represents reporting hours for the year in which information is collected.

Needs and Uses: In accordance with the Communications Act, the information collected will be used by the Commission in granting various authorizations and determining the technical, legal, and financial qualifications of a satellite applicant or licensee.

As required by Section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the expected impact on small entities of the proposals suggested in this document.

Summary of Notice of Proposed Rulemaking

In light of the evolving satellite technology, the Commission commenced a review of its operations in order to eliminate outdated regulations and unnecessary burdens that impede the introduction of satellite services to the public and the efficient processing of satellite applications and licenses. As a result of this review, the Commission created the International Bureau. Soon after its creation, the new International Bureau held a roundtable discussion in February with representatives of industry and members of the public to solicit suggestions on ways to improve satellite application and licensing policies and procedures. Many of the recommendations made during that roundtable discussion have been incorporated in this Notice of Proposed Rulemaking.

The proposals amend or eliminate existing requirements, and codify in Part 25 of the Commission's rules, various technical and procedural policies and guidelines that have not yet been specifically codified. Among other things, the *Notice* proposes to waive the construction permit requirement for satellite space stations; increase the license term, from one year to ten years, for temporary fixed earth stations operating in the C-band; eliminate the four year implementation period for VSATs allowing VSAT licensees to construct their network over the course of their ten year license term; eliminate the annual reporting requirement for VSATs; simplify the earth and space station application process by revising and consolidating FCC Forms 430, 493, 702, and 704; eliminate redundant reporting requirements for earth and space stations; allow earth station operators to make minor technical modifications to their stations without prior authorization from the Commission; and allow satellites to operate in inclined orbits without prior authorization from the Commission.

Given the large outlay of capital and long-term planning necessary to establish satellite systems, it is necessary to ensure that potential applicants and service providers are not hampered by unnecessary and sometimes redundant regulations. The proposed amendments recognize the need of the satellite industry to operate in an environment defined by growth, innovation, efficiency, and competition. Comments are requested on all aspects of these proposals. Specific proposals and recommendations are requested for any additional streamlining rule changes.

Ordering Clauses

Accordingly, *It is Ordered* that pursuant to the authority contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended, 47 U.S.C. §§ (4)(i) and 303, NOTICE IS HEREBY GIVEN of our intent to adopt the rule revisions set forth below and the proposed form set forth below.

It is Further Ordered that the Secretary shall send a copy of this Notice of Proposed Rulemaking, including the Initial Regulatory, Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act, Public Law No. 96–354, 94 Stat. 1164, 5 U.S.C. § 601 *et seq* (1981).

Administrative Matters

This is a non-restricted notice and comment rulemaking proceeding. Ex parte presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in the Commission's rules. *See generally* 47 CFR 1.1202, 1.1203, and 1.1206(a). The Sunshine Agenda period is the period of time that commences with the release of public notice that a matter has been placed on the Sunshine Agenda and terminates when the Commission (1) releases the text of a decision or order in the matter; (2) issues a public notice stating that the matter has been deleted from the Sunshine Agenda; or (3) issues a public notice stating that the matter has been returned to the staff for further consideration, whichever occurs first. 47 CFR 1.1202(f). During the Sunshine Agenda period, no presentations, ex parte or otherwise, are permitted unless specifically exempted. 47 CFR 1.1203.

Pursuant to applicable procedures set forth in Sections 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before October 4, 1995 and reply comments on or before October 25, 1995. To file formally in this proceeding, you must file an original and five copies of all comments, reply comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comments send additional copies to Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the Federal Communications Commission, Reference Center, Room 239, 1919 M Street, NW., Washington, DC 20554. For further information concerning this rulemaking contact Paula Ford at (202) 739–0733.

Initial Regulatory Flexibility Act Statement

As required by Section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis ("IRFA") of the expected impact on small entities of the proposals suggested in this document. The IRFA is set forth in Appendix A. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments on the rest of the Notice, but they must have a separate and distinct heading designating them as responses to the Initial Regulatory Flexibility Analysis.

List of Subjects in 47 CFR Part 25

Satellites.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

Proposed Rules

Part 25 of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

PART 25—SATELLITE COMMUNICATIONS

1. The authority citation for part 25 continues to read as follows:

Authority: Sections 101–404, 76 Stat. 419–427; 47 U.S.C. 701–744, Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U.S.C. 303.

2. Section 25.113 is amended by revising paragraphs (a) and (d) to read as follows:

§ 25.113 Construction permits.

(a) Except as provided in paragraph (b) of this section or in § 25.131, construction permits must be obtained for all fixed or temporary fixed earth stations governed by this part. Simultaneous application for a construction permit and station license may be made for all earth station facilities governed by this part.

* * * * *

(d) A launch authorization must be applied for and granted before a space station may be launched and operated in orbit. Request for launch authorization may be included in an application for space station license. A launch authorizaiton and station license may also be requested at any time for a space station constructed as an on-ground spare satellite. However, an application for authority to launch and operate an on-ground spare domestic satellite will be considered to be a newly filed application for cut-off purposes, except where the space station to be launched is determined to be an emergency replacement for a previously authorized space station that has been lost as a result of a launch failure or a catastrophic in-orbit failure.

3. Section 25.114 is revised to read as follows:

§ 25.114 Applications for space station authorizations.

(a) A comprehensive proposal shall be submitted for each proposed space station in narrative form with attached exhibits as described in paragraph (c) of this section. If an applicant is proposing more than one space station, information common to all space stations may be submitted in a consolidated system proposal.

(b) Each application for a new or modified space station authorization must constitute a concrete proposal for Commission evaluation, although the applicant may propose altrnatives that increase flexibility in accommodating the satellite in orbit. Each application must also contain the formal waiver required by Section 304 of the Communications Act, 47 U.S.C. 304.

The technical information for a proposed satellite system need not be filed on any prescribed form but should be complete in all pertinent details. The format of the applications should conform to the specifications of § 1.49 of this chapter.

(c) The following information shall be contained in each application:

(1) Name, address, and telephone number of the applicant.

(2) Name, address, and telephone number of the person(s), including counsel, to whom inquiries or correspondence should be directed.

(3) Type of authorization requested (*e.g.*, launch authority, station license, modification of authorization).

(4) General description of overall system facilities, operations and services.

(5) Radio frequencies and polarization plan (including beacon, telemetry, and telecommand functions), center frequency and polarization of transponders (both receiving and transmitting frequencies), emission designators and allocated bandwidth of emission, final amplifier output power (identify any net losses between output of final amplifier and input of antenna and specify the maximum EIRP for each antenna beam), identification of which antenna beams are connected or switchable to each transponder and TT&C function, receiving system noise temperature, the relationship between satellite receive antenna gain pattern and gain-to-temperature ratio and saturation flux density for each antenna beam (may be indicated on antenna gain plot), the gain of each transponder channel (between output of receiving antenna and input of transmitting antenna) including any adjustable gain step capabilities, and predicted receiver and transmitter channel filter response characteristics.

(6)(i) For satellites in geostationary-satellite orbit, orbital location, or locations if alternatives are proposed, requested for the satellite, the factors that support such an orbital assignment, the range of orbital locations from which adequate service can be provided and the basis for determining that range of orbital locations, and a detailed explanation of all factors that would limit the orbital arc over which the satellite could adequately serve its expected users.

(ii) For satellites in non-geostationary-satellite orbits, the number of space stations and applicable information relating to the number of orbital planes, the inclination of the orbital plane(s), the orbital period, the apogee, the perigee, the argument(s) of perigee, active service arc(s), and right ascension of the ascending node(s).

(iii) For 1.6/2.4 GHz Mobile-Satellite Service space stations, the feeder link frequencies requested for the satellite, together with the demonstration required by § 25.203 (j) and (k).

(7) Predicted space station antenna gain contour(s) for each transmit and each receive antenna beam and nominal orbital location requested. These contour(s) should be plotted on an area map at 2 dB intervals down to 10 dB below the peak value of the parameter and at 5 dB intervals between 10 dB and 10 dB below the peak values, with the peak value and sense for polarization clearly specified on each plotted contour.

(8) A description of the types of services to be provided, and the areas to be served, including a description of the transmission characteristics and performance objectives for each type of proposed service, details of the link noise budget, typical or baseline earth station parameters, modulation parameters, an overall link performance analysis (including an analysis of the effects of each contributing noise and interference source).

(9) For satellites in geostationary-satellite orbit, accuracy with which the orbital inclination, the antenna axis attitude, and longitudinal drift will be maintained.

(10) Calculation of power flux density levels within each coverage area and of the energy dispersal, if any, needed for compliance with § 25.208.

(11) Arrangement for tracking, telemetry, and control.

(12) Physical characteristics of the space station including weight and dimensions of spacecraft, detailed mass (on ground and in-orbit) and power (beginning and end of life) budgets, and estimated operational lifetime and reliability of the space station and the basis for that estimate.

(13) Detailed information demonstrating the financial qualifications of the applicant to construct and launch the proposed satellites. Applications for domestic fixed-satellite systems and mobile-satellite systems shall provide the financial information required by § 25.140 (b) through (e), § 25.142(a)(4), or § 25.143(b)(3), as appropriate. Applications for international satellite systems authorized pursuant to *Establishing of Satellite Systems Providing International Communications*, 101 FCC 2d 1046 (1985), *recon.*, 61 RR 2d 649 (1986), *further recon.*, 1 FCC Rcd 439 (1986) (available at the Commission's Library in Washington, DC), shallprovide the information required by that decision.

(14) Qualifications of applicant. FCC Form 312, Main Form. If FCC Form 312, Main Form, is already on file, indicate date, radio service and file number of most recent filing.

(15) A clear and detailed statement of whether the space station is to be operated on a common carrier basis, or whether noncommon carrier transactions are proposed. If noncommon carrier transactions are proposed, describe the nature of the transactions and specify the number of transponders to be offered on a noncommon carrier basis.

(16) Dates by which construction will be commenced and completed, launch date, and estimated date of placement into service.

(17) Public interest considerations in support of grant.

(18) Applications for authorizations for domestic fixed-satellite space stations shall also include the information specified in § 25.140.

(19) Applications for international fixed-satellite authorizations shall also provide all information necessary to comply with the policies and procedures set forth in Establishing of Satellite Systems Providing International Communications, 101 FCC 2d 1046 (1985) (available at the Commission's Library in Washington, DC), as modified by Permissible Services of U.S. license International Communications Satellite Systems, Order, FCC 92–95 released April 8, 1992 (available through the Commission's Public Reference Room in Washington, DC).

(20) Applications for authorizations in the Radiodetermination Satellite Service shall also include the information specified in § 25.141.

(21) Applications for authorizations in the Mobile Satellite Service in the 1545–1559/1646.5–1660.5 MHz frequency bands shall also provide all information necessary to comply with the policies and procedures set forth in *Rules and Policies Pertaining to the Use of Radio Frequencies in a Land Mobile Satellite Service*, 2 FCC Rcd 485 (1987) (available at the Commission's Library in Washington, DC).

(22) Applications to license multiple space station systems in the non-voice, non-geostationary mobile-satellite service under blanket operating authority shall also provide all information specified in § 25.142.

(23) Applications for authorizations in the 1.6/2.4 GHz Mobile-Satellite Service shall also provide all information specified in § 25.143.

(d) Applicants requesting authority to construct and/or launch a system comprised of technically identical, non-geostationary satellite orbit mobile-satellite service space stations may file a single "blanket" application containing the information specified in paragraph (c) of this section for each representative space station.

4. Section 25.115 is amended by revising paragraphs (a), (b), and (c)(1), (c)(2) and (d) to read as follows:

§ 25.115 Application for earth station authorizations.

(a) Transmitting earth stations. Except as provided under § 25.113(b), Commission authorization must be obtained for authority to construct and/or operate a transmitting earth station. Applications shall be filed on FCC Form 312, Main Form and Schedule C, and include the information specified in § 25.130.

(b) Receive-only earth stations. Applications to license or register receive only earth stations shall be filed on FCC Form 312, Main Form and Schedule C, and conform to the provisions of § 25.131.

(c) * * *

(1) An FCC Form 312, Main Form and Schedule B, for each large (5 meters or larger) hub station operating with the network.

(2) An FCC Form 312, Main Form and Schedule B, for each representative type of small antenna (less than 5 meters).

* * * * *

(d) User transceivers in the non-voice, non-geostationary mobile-satellite service need not be individually licensed. Service vendors may file blanket applications for transceivers units using FCC Form 312, Main Form and Schedule C, and specifying the number of units to be covered by the blanket license. Each application for a blanket license under this section shall include the information described in § 25.135.

5. Section 25.117 is amended by revising the first sentence of paragraph (a) to read as follows:

§ 25.117 Modification of station license.

(a) Except as provided for in § 25.118 (Modifications not requiring prior authorization), no modification of a radio station governed by this part which affects the parameters or terms and conditions of the station authorization shall be made except upon application to and grant of such application by the Commission. * * *

* * * * *

6. Section 25.118 through 25.120 are redesignated as §§ 25.119 through 25.121, respectively.

7. A new § 25.118 is added to read as follows:

§ 25.118 Modifications not requiring prior authorization.

(a) Equipment in an authorized earth station may be replaced without prior authorization or notification if the replacement equipment is electrically identical to the replaced equipment.

(b) A licensee providing service on a private carrier basis may change its operations to common carrier status without obtaining prior Commission authorization by notifying the Commission by letter within 30 days after the completed change to common carrier status.

(c) Earth station licensees may make facility changes without obtaining prior Commission authorization, by notifying the Commission by letter within 30 days after the modification is completed, if frequency coordination procedures, as necessary, are complied with in accordance with § 25.251, and the modification does not involve:

(1) An increase in EIRP or EIRP density;

(2) An increase in transmitter power;

(3) A change in coordinates for stations operating in C–Band;

(4) A change in coordinates of 10 seconds or greater for stations operating in Kuband;

(5) A change or addition to antenna facilities.

8. The newly designated § 25.119 is amended by revising the first sentences of paragraph (c) and (d) and the last sentence of paragraph (f) to read as follows:

§ 25.119 Assignment or transfer of control of station authorization.

* * * * *

(c) Assignment of license. FCC Form 312, Main Form and Schedule A, shall be submitted to assign voluntarily (as by, for example, contract or other agreement) or involuntarily (as by, for example, death, bankruptcy, or legal disability) the station authorization. * * *

(d) Transfer of control of corporation holding license. FCC Form 312, Main Form and Schedule A, shall be submitted in order to transfer voluntarily or involuntarily (*de jure or de facto*) control of a corporation holding any licenses. * * *

* * * * *

(f) * * * Within 30 days of consummation, the Commission shall be notified by letter of the date of consummation and the file numbers of the applications involved in the transaction.

9. The newly designated § 25.120 is amended by revising the last sentence of paragraph (a) to read as follows:

§ 25.120 Application for special temporary authorization.

(a) * * * A copy of the request for special temporary authority also shall be forwarded to the Commission's Columbia Operations Center in Columbia, Maryland.

* * * * *

10. The newly designated § 25.121 is amended by revising paragraph (a) to read as follows:

§ 25.121 License term and renewals.

(a) License term. Licenses for facilities governed by this part will be issued for a period of 10 years.

* * * * *

11. Section 25.130 is amended by revising paragraph (a) to read as follows:

§ 25.130 Filing requirements for transmitting earth stations.

(a) Application for a new or modified transmitting earth station facility shall be submitted on FCC Form 312, Main Form and Schedule C, accompanied by any required exhibits.

* * * * *

12. Section 25.131 is amended by revising paragraphs (a), (d), and (j) to read as follows:

§ 25.131 Filing requirements for receive-only earth stations.

(a) Except as provided in paragraphs (b) and (j) of this section, applications for a license for a receive-only earth station shall be submitted on FCC Form 312, Main Form and Schedule C, accompanied by any required exhibits.

* * * * *

(d) Applications for registration shall be filed on FCC Form 312, Main Form and Schedule C, accompanied by the coordination exhibit required by 25.203, and any other required exhibits. Any application that is deficient or incomplete in any respect shall be immediately returned to the applicant without processing.

* * * * *

(j) Receive-only earth stations operating with (1) INTELSAT space stations, (2) international space stations, or (3) U.S. domestic and non-U.S. space stations for reception of services from other countries, shall file an FCC Form 312, Main Form and Schedule C, requesting a license for such station. Receive-only earth stations used to receive INTELNET I services from INTELSAT space stations need not file for licenses. *See Deregulation of Receive-Only Satellite Earth Stations Operating with the INTELSAT Global* Communications Satellite System, Declaratory Ruling, RM No. 4845, FCC 86–214 (released May 19, 1986) (available through the Commission's Reference Center in Washington, D.C.).

13. Section 25.134 is amended by revising the first sentences of paragraphs (a) and (b) and adding paragraph (d) to read as follows:

§ 25.134 Licensing Provisions of Very Small Aperture Terminal (VSAT) Networks.

(a) All applications for digital VSAT networks with maximum outbound downlink EIRP densities of +6.0 dBW/4 kHz per carrier and earth station antennas with maximum input power densities of −14 dBW/4 kHz and maximum hub EIRPs of 78.3 dBW will be processed routinely. * * *

(b) Each applicant for digital and/or analog VSAT network authorization proposing to use transmitted satellite carrier EIRP densities in excess of +6.0 dBW/4 kHz per carrier and +13.0 dBW/4 kHz, respectively, and/or maximum antenna input power densities of −14.0 dBW/4 kHz dBW and −8.0 dBW/4 kHz, respectively, shall conduct an engineering analysis using the Sharp, Adjacent Satellite Interference Analysis (ASIA) program. * * *

* * * * *

(d) An application for VSAT authorization shall be filed on FCC Form 312. Main Form and Schedule B. A VSAT licensee applying to renew its license must include on FCC Form 405, the number of constructed VSAT units in its network.

14. Section 25.140 is revised to read as follows:

§ 25.140 Qualifications of domestic fixed-satellite space stations.

(a) Each applicant for a space station authorization in the domestic fixed-satellite service must demonstrate, on the basis of the documentation contained in its application, that it is legally, financially, technically, and otherwise qualified to proceed expeditiously with the construction, launch and/or operation of each proposed space station facility immediately upon grant of the requested authorization.

(b) Each applicant must provide the following information:

(1) The information specified in § 25.114.

(2) An interference analysis to demonstrate the compatibility of its proposed system 2 degrees from any authorized space station. An applicant should provide details of its proposed r.f. carriers which it believes should be taken into account in this analysis. At a minimum, the applicant must include, for each type of r.f. carrier, the link noise budget, modulation parameters, and overall link performance analysis. (See, e.g., appendices B and C to Licensing of Space Stations in the Domestic Fixed-Satellite Service, Docket No. 81–704, FCC No. 83–184 (released August 16, 1983) (available through the Commission's Reference Center in Washington, D.C.))

(3) The applicant's current financial ability to meet the:

(i) Estimated costs of proposed construction and/or launch, and any other initial expenses for the space station(s); and

(ii) Estimated operating expenses for one year after launch of the proposed space station(s).

(c) Each application for authority to construct and/or launch a space station shall demonstrate the applicant's current financial ability to meet the costs specified in paragraph (b)(3) of this section by submitting the following financial information verified by affidavit:

(1) A balance sheet current for the latest fiscal year and documentation of any financial commitments reflected in the balance sheet (such as, for example, loan agreements and service contracts) together with an exihibit demonstrating that the applicant has current assets and operating income sufficient to satisfy the requirements of paragraph (c) of this section. If the applicant is owned by more than one corporate parent, it must submit evidence of a commitment to the proposed satellite program by management of the corporate parent upon whom it is relying for financial resources;

(2) If the submissions of paragraph (c)(1) of this section do not satisfy paragraph (b)(3) of this section, the applicant shall submit additional information as listed in paragraphs (c)(2) (i) through (iv) to satisfy paragraph (b)(3) of this section.

(i) The terms of any fully negotiated loan or other form of credit arrangement intended to be used to finance the proposed construction, acquisition, or operation of the requested facilities including such information as the identity of the creditor (or creditors), the amount committed, letters of commitment, detailed terms of the transaction, including the details of any contingencies, and a statement that the applicant complies with paragraph (d) of this section.

(ii) The terms of any fully negotiated sale or placement of any equity or other form of ownership interest, including the sale, or long-term lease for the lifetime of the satellite, of proposed satellite transponder capacity in the level of detail as specified in paragraph (c)(2)(i) of this section.

(iii) The terms of any grant or other external funding commitment intended to be used to finance the proposed construction, acquisition, or operation of the requested facilities, including such information as the identity of the grantor(s), the amount committed, letters of commitment, and detailed terms of the transaction, including the details of any contingencies;

(iv) Any financing arrangements contingent on further performance by either party, such as marketing of satellite capacity or raising additional financing, will not satisfy the requirements of paragraph (b)(3) of this section.

(3)Whatever other information or details the Commission may require with regard to a specific application or applicant;

(d) Any loan or other credit arrangement providing for a chattel mortgage or secured interest in any proposed facility must include a provision for a minimum of ten (10) days prior written notification to the licensee or permittee, and to the Commission, before any such equipment may be repossessed under any default provision of the agreement.

(e) An applicant found to be qualified pursuant to paragraph (a) of this section may be initially assigned up to two orbital locations in each pair of frequency bands proposed. Authorizations to construct ground spares are at the applicant's risk that launch authorization will not be granted by the Commission.

(f) Each applicant found to be qualified pursuant to paragraph (a) of this section may be assigned no more than one additional orbital location beyond its current authorizations in each frequency band in which it is authorized to operate, provided that its in-orbit satellites are essentially filled and that it has no more than two unused orbital locations for previously authorized but unlaunched satellites in that band.

(g) In the event that one or more applications satisfying the requirements of this section are ready for grant, any orbital location occupied by a satellite that is determined to be a part of a system that is not essentially filled may be cancelled and colocation of in-orbit satellites may be required. The Commission may take this action if, in so doing, it would allow the grant of pending applications that satisfy the requirements of this section. If a cancellation is made, the licensee will be afforded a period of 30 days to notify the Commission which of its assigned locations should be cancelled.

15. Section 25.141 is amended by revising paragraph (c) to read as follows:

§ 25.141 Licensing provisions for the radiodetermination satellite service.

* * * * *

(c) User transceivers. Individual user transceivers will not be licensed. Service vendors may file blanket applications for transceiver units using FCC Form 312, Main Form and Schedule C, and specifying the number of units to be covered by the blanket license. Each application must demonstrate that transceiver operations will not cause interference to other users of the spectrum.

* * * * *

16. Section 25.142 is amended by revising paragraph (c) introductory text to read as follows:

§ 25.142 Licensing provisions for the non-voice, non-geostationary mobile-satellite service.

* * * * *

(c) Reporting requirements. All operators of non-voice, non-geostationary mobile-satellite service systems shall, on June 30 of each year, file a report with the International Bureau and the Commission's Columbia Operations Center in Columbia, Maryland containing the following information:

* * * * *

17. Section 25.143 is amended by revising paragraph (e)(1) introductory text to read as follows:

§ 25.143 Licensing provisions for the 1.6/2.4 GHz Mobile-Satellite Service.

* * * * *

(e) * * *

(1) All operators of 1.6/2.4 GHz mobile-satellite systems shall, on June 30 of each year, file with the International Bureau and the Commission's Columbia Operations Center, Columbia, Maryland a report containing the following information:

* * * * *

18. Section 25.155 is amended by revising paragraph (b) to read as follows:

§ 25.155 Mutually exclusive applications.

* * * * *

(b) A space station application will be entitled to comparative consideration with one or more conflicting applications only if:

(1) The application is mutually exclusive with another application; and

(2) The application is received by the Commission in a condition acceptable for filing by the "cut-off" date specified in a public notice.

19. Section 25.210 is amended by revising paragraphs (j) introductory text and (j)(3), to read as follows:

§ 25.210 Technical requirements for space stations in the Fixed-Satellite Service.

* * * * *

(j) All operators of space stations shall, on June 30 of each year, file a report with the International Bureau and the Commission's Columbia Operations Center in Columbia, Maryland containing the following information.

* * * * *

(3) A detailed description of the utilization made of each transponder on each of the in-orbit satellites. That description should identify the total capacity or the percentage of time each transponder is actually used for transmission, and the amount of unused system capacity in the transponder.

* * * * *

20. Section 25.211 is amended by adding paragraph (d), to read as follows:

§ 25.211 Video Transmissions in the Domestic Fixed-Satellite Service.

* * * * *

(d) In the 6 GHz band, an earth station with an equivalent diameter of 9 meters or smaller may be routinely licensed for transmission of full transponder services if the maximum power into the antenna does not exceed 450 watts (26.5 dBW). In the 14 GHz band, an earth station with an equivalent diameter of 5 meters or smaller may be routinely licensed for transmission of full transponder services if the maximum power into the antenna does not exceed 500 watts (27 dBW).

21. Section 25.212 is amended by adding paragraphs (c) and (d), to read as follows:

§ 25.212 Narrowband transmissions in the Fixed-Satellite Service.

* * * * *

(c) In the 14 GHz band, and earth station with an equivalent diameter of 1.2 meters or greater may be routinely licensed for transmission of narrowband analog services with bandwidths up to 200 kHz if the maximum power densities into the antenna do not exceed −8 dBW/4 kHz and the maximum transmitted satellite carrier power densities do not exceed 13 dBW/4 kHz.

(d) In the 6 GHz band, an earth station with an equivalent diameter of 4.5 meters or greater may be routinely licensed for transmission of SCPC services if the maximum power densities into the antenna do not exceed +0.5 dBW/4 kHz for analog SCPC carriers with bandwidths up to 200 kHz, and do not exceed −2.7 dBW/4 kHz for digital SCPC carriers.

22. Section 25.251 is revised to read as follows:

§ 25.251 Special requirements for coordination.

(a) The administrative aspects of the coordination process are set forth in §§ 21.100(d) and 21.706 (c) and (d) of this chapter in the case of coordination of terrestrial stations with earth stations, and in § 25.203 in the case of coordination of earth stations with terrestrial stations.

(b) The technical aspects of coordination are based on Appendix 28 of the International telecommunications Union Radio Regulations and certain recommendations of the ITU Radiocommunication Sector ("ITU–R") which may be obtained through the International Telecommunication Union, General Secretariat—Sales Section, Places des Nations, CH–1211 Geneva 20, Switzerland or by phone 011–41–22–730–6141 or fax 011–41–22–730–5194. Applicants and operators will find it helpful to be aware of the latest revisions of these documents.

§§ 25.252 through 25.256 [Removed and reserved]

23. Sections 25.252 through 25.256 are removed and reserved.

24. Section 25.272 is amended by revising the first sentence of paragraph (b) to read as follows:

§ 25.272 General inter-system coordination procedures.

* * * * *

(b) Each space station licensee shall maintain on file with the Commission and with its Columbia Operations Center in Columbia, Maryland a current listing of the names, titles, addresses and telephone numbers of the points of contact for resolution of interference problems. * * *

* * * * *

25. Section 25.274 is amended by revising the first sentence of paragraph (f) to read as follows:

§ 25.274 Procedures to be followed in the event of harmful interference.

* * * * *

(f) At any point, the system control center operator may contact the Commission's Columbia Operations Center in Columbia, Maryland to assist in resolving the matter. * * *

* * * * *

26. Section 25.277 is amended by revising paragraph (c) introductory text to read as follows:

§ 25.277 Temporary fixed earth station operations.

* * * * *

(c) The licenses of an earth station which is authorized to conduct temporary fixed operations in bands shared co-equally with terrestrial fixed stations shall provide the following information to the Director of the Columbia Operations Center at P.O. Box 250, Columbia, Maryland 21045 (phone number 301–725–3474 and fax number 301–206–2896) and to the licensees of all terrestrial facilities lying within the coordination contour of the proposed temporary fixed earth station site before beginning transmissions:

* * * * *

27. A new § 25.280 is added to read as follows:

§ 25.280 Inclined orbit operations.

Satellite operators may commence operation in incline orbit mode without obtaining prior Commission authorization provided that the Commission is notified by letter within 30 days after commencement. The notification shall include:

(a) The date of commencement of included orbit operation;

(b) The initial inclination;

(3) The rate of change in inclination per year; and

(4) The expected end-of-life of the satellite accounting for inclined orbit operation.

28. Section 25.308 is redesignated as § 25.281.

29. Subpart E is removed and reserved.

BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

48 CFR Part 52

Federal Acquisition Regulation; Use and Charges Clause Class Deviation

AGENCY: Department of Defense (DoD).

ACTION: Notice of proposed class deviation.

SUMMARY: The Department of Defense (DoD) is proposing a class deviation from the Federal Acquisition Regulation (FAR) that simplifies the method of determining rental charges for government property. The proposed class deviation will allow defense contractors to propose rental charges for the commercial use of government property and real property while revisions to the FAR are being drafted.

DATES: Comments on the proposed class deviation should be submitted in writing at the address shown below on or before November 6, 1995 to be considered in the formulation of the final class deviation.

ADDRESSES: Interested parties should submit written comments to: Ms. Angelena Moy, MPI, Room 3E144, Pentagon, Washington, DC 20301–3000. FAX (703) 695–7596.

FOR FURTHER INFORMATION CONTACT: Ms. Angelena Moy, telephone (703) 695–1099.

SUPPLEMENTARY INFORMATION:

A. Background

On September 16, 1994 (59 FR 47583) the Director of Defense Procurement announced an initiative to rewrite FAR Part 45, Government Property, to make it easier to understand and to minimize the burdens imposed on contractors and the Government. The Director of Defense Procurement is providing a forum for an exchange of ideas and information with government and industry personnel by holding public meetings, soliciting public comments, and publishing notices of public meetings in the **Federal Register**. Interested parties were invited to provide written suggestions or comments in the notice of public hearing dated September 16, 1994 (59 FR 47583). Twenty-two commentors provided approximately 500 comments, including a recommendation that simplifying the procedures for computing rental charges for government property would reduce administrative burdens and provide cost savings.

In order to expedite implementation of simplified government property rental procedures, DoD is proposing a class deviation from current FAR methods of determining rental charges for commercial use of government property. The proposed class deviation was included in discussions during the public hearings that have been held on the rewrite of FAR Part 45. DoD proposes to deviate from the clause at FAR 52.245–9 as follows:

Part 52—Solicitation Provisions and Contract Clauses

52.245–9 Use and Charges

- Deviation authorizes DoD to use the following clause in lieu of the clause at 52.245–9. This clause requires contractors, for real property and associated fixtures, to obtain certified property appraisals that compute a monthly, daily, or hourly rental rate for comparable commercial property. Rental charges would be determined by multiplying the rental time by an appraisal rental rate expressed as a rate per hour. For other government property, rental charges will be the smaller of two percent of the property's acquisition cost multiplied by the ratio of rental time to time available for use, or by the method described for real property and associated fixtures.

Use and Charges (APR 1984) (Deviation)

(a) *Deviations.*

As used in this clause—

Acquisition cost means the acquisition cost recorded in the contractor's property control system or, in the absence of such record, the value attributed by the Government to a government property item for purposes of determining a reasonable rental charge.

Government property means property owned, licensed, or leased by the Government.

Real property means land and rights in land, ground improvements, utility distribution systems, and buildings and other structures. It does not include foundations and other work necessary for installing special tooling, special test equipment, or equipment.

Rental period means the calender period during which government property is made available for commercial purposes.

Rental time means the number of hours, to the nearest whole hour, rented property is actually used for commercial purposes. It includes time to set up the property for such purposes, perform required maintenance, and restore the property to its condition prior to rental.

Time available for use means the number of hours, to the nearest whole hour, in the rental period.

(b) *General.* (1) Rental requests must be submitted to the administrative Contracting Officer, identify the property desired, propose a rental period, and calculate an estimated rental charge.

(2) The Contractor shall not use government property for commercial purposes until a rental charge for real property, or estimated rental charge for other property, is agreed upon. Rented property may be used only on a non-interference basis.

(3) Notwithstanding any other provision of this contract, the Contractor is responsible for any loss, theft, or destruction of, or damage to, government property during its use for commercial purposes.

(c) *Estimated rental charge.* The estimated rental charge submitted with the Contractor's rental request shall be computed by substituting the Contractor's best estimate of the time the property might be used for commercial purposes for rental time in the formulae described in paragraph (d) of this clause.

(d) *Final rental charge*—(1) *Real property and associated fixtures*—(i) The Contractor shall obtain, at its expense, a property appraisal from an independent licensed or certified appraiser that computes a monthly, daily, or hourly rental rate for comparable commercial property no more than one year prior to the date the property is desired for commercial use and submit the appraisal to the administrative Contracting Officer at least 30 days prior to that date. Except as provided in paragraph (d)(1)(iv) of this clause, the administrative Contracting Officer shall use the appraisal rental rate to determine an equitable rental charge.

(ii) Rental charges shall be determined by multiplying the rental time by the appraisal rental rate expressed as a rate per hour. Monthly or daily rental rates shall be divided by 720 or 24, respectively, to determine an hourly rental rate.

(iii) The Contractor may request consideration of an alternate basis for computing the rental charge if it considers a time based rental unreasonable or impractical.

(iv) When the administrative Contracting Officer has reason to believe the appraisal rental rate is not reasonable, he or she shall promptly notify the Contractor and provide his or her rationale. The parties may agree on an alternate means for computing a reasonable rental charge.

(2) *Other government property.* The final rental charge shall be the smaller of—

(i) Two percent (2%) of the property's acquisition cost multiplied by the ratio of rental time to time available for use where time shall be expressed in increments not less than one hour; or,

(ii) A rental charge based upon the appraisal method described in paragraph (d)(1) of this clause subject to the constraints of that paragraph.

(e) *Rental payments.* (1) Rent is due at the time and place specified by the Contracting Officer. If a time is not specified, the rental is due 60 days following completion of the rental period. The Contractor shall calculate the rental due, and furnish records or other supporting data in sufficient detail to permit the administrative Contracting Officer to verify the rental time.

(2) Interest will be charged if payment is not made by the specified payment date or, in the absence of a specified date, the sixty-first day following completion of the rental period. Interest will accrue at the "Renegotiation Board Interest Rate" (published in the Federal Register semiannually on or about January 1st and July 1st) for the period in which the rent is due.

(3) At any time during the rental period, the Government may revoke commercial use authorization and require the Contractor, at the Contractor's expense, to return the property to the Government, restore the property to its pre-rental condition, or both.

(f) The Government's acceptance of any rental payment under this clause, in whole or in part, shall not be construed as a waiver or relinquishment of any rights it may have against the Contractor stemming from the Contractor's unauthorized use of government property or any other failure to perform this contract according to its terms.

(End of clause)

Notices

Federal Register
Vol. 60, No. 172
Wednesday, September 6, 1995

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act) 44 U.S.C. Chapter 35).

Agency: Bureau of Export Administration (BXA).

Title: U.S. Industry Reporting Requirements for Compliance with the Chemical Weapons Treaty.

Agency Form Number(s): None assigned.

OMB Approval Number: None.

Type of Request: New Collection.

Burden: 15,620 hours.

Number of Respondents: 3,000.

Avg Hours Per Response: Varies but ranges between 2.5 and 9 hours depending on the requirement.

Needs and Uses: The Chemical Weapons Convention is a multilateral arms control treaty that seeks to achieve an international ban on chemical weapons. Under this treaty, each participating country will be required to make initial and annual declarations on facilities producing, processing, consuming, importing or exporting specified toxic chemicals and precursors. This collection will not go into effect until the treaty is ratified.

Affected Public: Businesses or other for–profit organizations, Federal Government, State, Local or Tribal Government.

Frequency: Annually.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Quarterly Report on Exports of Parts to Service Equipment Shipped Against a Validated Export License.

Agency Form Number: None.

OMB Approval Number: 0694–0003.

Type of Request: Extension of a currently approved collection.

Burden: 5 hours.

Number of Respondents: 2.

Avg Hours Per Response: 30 minutes (4 reports for each respondent).

Needs and Uses: This reporting requirement allows exporters to export parts to service U.S. equipment to proscribed countries provided that the equipment was previously exported from the U.S. under a validated license. Exporters are required to submit quarterly reports providing basic information on shipments. BXA uses this information to make sure that there are no excessive shipments of spare parts.

Affected Public: Businesses or other for–profit organizations.

Frequency: Quarterly.

*Respondent's Obligation:*Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: National Ocean Service (NOS) Customer Needs Survey.

Agency Form Number: None assigned.

OMB Approval Number: None

Type of Request: New Collection.

Burden: 25 hours.

Number of Respondents: 50.

Avg Hours Per Response: 30 minutes.

Needs and Uses: This survey is designed to ascertain customer needs for National Ocean Service products and services. The information will be used as a basis for modifying or supplementing the organization's current product and service offerings.

Affected Public: Individuals, Businesses or other for–profit organizations, Not–for–profit institutions, Federal Government, State, Local or Tribal Government.

Frequency: One–time survey.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Application for Fisheries Obligation Guarantee.

Agency Form Number: NOAA 88–1.

OMB Approval Number: 0648–0012.

Type of Request: Extension of a currently approved collection.

Burden: 10,400 hours.

Number of respondents: 1,300.

Avg Hours Per Response: 8 hours.

Needs and Uses: An application form is needed from commercial fishermen who wish to obtain guaranteed financing under the Fisheries Obligation Guarantee Program. The information is used to determine eligibility and monitor program participation.

Affected Public: Individuals, Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: National Oceanic and Atmospheric Administration.

Title: Marine Recreational Fishery Statistics Survey.

Agency Form Number: None assigned.

OMB Approval Number: 0648–0052.

Type of Request: Extension of a currently approved collection.

Burden: 23,118 hours.

Number of Respondents: 571,233.

Avg Hours Per Response: Varies but averages between 1 and 7 minutes depending on the requirement.

Needs and Uses: This survey conducts random telephone interviews of residents of coastal county households to obtain data on marine recreational fishing effort and it conducts random field interviews of anglers returning from fishing trips. The data obtained are used to calculate bimonthly estimates of marine recreational fishing participation, effort and catch by species. The effort and catch estimates are used in the development, implementation and monitoring of fishery management programs by the National Marine Fisheries Service, regional fishery management councils, interstate marine fishery commissions and state fishery agencies.

Affected Public: Individuals, Businesses or other–for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Fishermen's Contingency Fund.

Agency Form Number: NOAA 88–164, 88–166.

OMB Approval Number: 0648–0082.

Type of Request: Extension of a currently approved collection.

Burden: 13,650 hours.

Number of Respondents: 1,065.

Avg Hours Per Response: Ranges between 5 minutes and approximately 13 hours depending on the requirement.

Needs and Uses: Title IV of the Outer Continental Shelf Lands Act Amendments established the Fishermen's Contingency Fund to compensate commercial fishermen for property or economic loss caused by oil and gas obstructions on the U.S. Outer Continental Shelf. An application and a report are needed from commercial fishermen to apply for compensation. The information is used in making a decision on the claimants's eligibility for compensation and to determine the amount of payment.

Affected Public: Individuals, Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Fishing Vessel and Gear Damage Compensation Fund.

Agency Form Number: 88–178.

OMB Approval Number: 0648–0094.

Type of Request: Extension of a currently approved collection.

Burden: 8.000 hours.

Number of Respondents: 400.

Avg Hours Per Response: 20 hours.

Needs and Uses: An application form is needed from commercial fishermen who wish to file a claim under Section 10 of the Fishermen's Protective Act. The purpose of the fund is to compensate fishermen for fishing vessel or fishing gear damage or loss caused by foreign or domestic vessels.

Affected Public: Individuals, Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Copies of the above information collection proposals can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to Don Arbuckle, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, D.C. 20503.

Dated: August 25, 1995

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510-CW-F

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census.

Title: Field Representative Exit Questionnaire.

Form Number(s): BC–1294.

Agency Approval Number: 0607–0404.

Type of Request: Extension of a currently approved collection.

Burden: 13 hours.

Number of Respondents: 160.

Avg Hours Per Response: 5 minutes.

Needs and Uses: In a continuous effort to devise policy and practice aimed at reducing turnover among field representatives (FR)s--our field interviewing staff–the Census Bureau needs to collect data on the reasons FRs leave the Bureau. The exit questionnaire helps the Census Bureau identify specific reasons for the turnovers. Approximately every quarter, a sample of one--half of all FRs voluntarily resigning within the period will be contacted by telephone to complete a questionnaire. Interviewers hired to conduct the census enumeration or related tests are not included in the sample. Based on the survey results the Census Bureau can develop both general and specific plans to reduce turnover.

Affected Public: Individuals or households.

Frequency: Quarterly.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, Room 10202 New Executive Office Building,Washington, DC 20503.

Dated: August 31, 1995.

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 95–22072 Filed 9–5–95; 8:45 am]

BILLING CODE 3510-07-F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census.

Title: Survey of State Government Pass–through Expenditures.

Form Number(s): CF–1.

Agency Approval Number: 0607–0505.

Type of Request: Reinstatement, with change, of a previously approved collection for which approval has expired.

Burden: 795 hours.

Number of Respondents: 1,060.

Avg Hours Per Response: 45 minutes.

Needs and Uses: The Census Bureau plans to reinstate this survey to again collect data from all state governments on how they allocate (pass–through) Federal formula grant funds to recipients at the county level, and how pass–through allocations change from year to year. We plan to collect this data annually from state governments over the next three years. Data collected will be used in estimating these pass–through expenditures in future years in the Consolidated Federal Funds Report which the Census Bureau provides annually to Congress. Current estimating procedures are based on data last collected for fiscal year 1986 and are outdated.

Affected Public: State, local or tribal government.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, Room 10202 New Executive Office Building, Washington, DC 20503.

Dated: August 31, 1995.

BILLING CODE 3510-07-F

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishment and Amendment of Import Limits and Amendment of a Restraint Period for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Turkey

August 30, 1995.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing and amending limits and amending a restraint period.

EFFECTIVE DATE: September 7, 1995.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–6718. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

A notice published in the **Federal Register** on June 23, 1995 (60 FR 32656) announces a limit for cotton and man-made fiber underwear in Categories 352/652 for the period March 28, 1995 through March 27, 1996. In an exchange of notes dated July 26, 1995 and August 23, 1995, the Governments of the United States and the Republic of Turkey agreed, pursuant to Article 6 of the Uruguay Round Agreements Act and the Uruguay Round Agreement of Textiles and Clothing (ATC), to establish a limit for textile products in Categories 352/652 for a three-year term—March 28, 1995 through December 31, 1995; January 1, 1996 through December 31, 1996; January 1, 1997 through December 31, 1997; and January 1, 1998 through March 27, 1998. Also, the two governments agreed to increase the 1995 base sublimit for Categories 338–S/339–S/638–S/639–S.

The 1995 limits for Categories 335, 338/339/638/639, 338–S/339–S/638–S/639–S, 350 and 351/651 are being adjusted, variously, for special shift and carryforward.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to amend the current limit for Categories 352/652 to begin on March 28, 1995 and extend through December 31, 1995 at an increased level and to adjust the current limits for Categories 335, 338/339/638/639, 338–S/339–S/638–S/639–S, 350 and 351/651.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Also see 60 FR 17338, published on April 5, 1995.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing, but are designed to assist only in the implementation of certain of their provisions.

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

August 30, 1995.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on June 16, 1995, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of cotton and man-made fiber textile products in Categories 352/652, produced or manufactured in Turkey and exported during the twelve-month period which began on March 28, 1995 and extends through March 27, 1996.

This directive also amends, but does not cancel, the directive issued to you on March 30, 1995 concerning imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in Turkey and exported during the twelve-month period which began on January 1, 1995 and extends through December 31, 1995.

Effective on September 7, 1995, you are directed to amend the restraint period for Categories 352/652 to end on December 31, 1995 at a level of 1,681,644 dozen[1] and to adjust the limits for the following categories for the period January 1, 1995 through December 31, 1995, as provided for under the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted twelve-month limit[a]
Limits not in group	
335	265,523 dozen.
338/339/638/639	4,960,608 dozen of which not more than 3,562,811 dozen shall be in Categories 338–S/339–S/638–S/639–S[b].
350	524,320 dozen.
351/651	770,144 dozen.

[a]1 The limits have not been adjusted to account for any imports exported after December 31, 1994.

BILLING CODE 3510-DR-F

COMMODITY FUTURES TRADING COMMISSION

Applications of the Chicago Mercantile Exchange as a Contract Market in Mexico 30 Stock Index Futures and Option Contracts

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures and futures option contracts.

SUMMARY: The Chicago Mercantile Exchange (CME or Exchange) has applied for designation as a contract market in Mexico 30 stock index futures and option contracts. The Acting Director of the Division of Economic Analysis (Division) of the Commission, acting pursuant to the authority delegated by Commission Regulation

---

[1] The limit has not been adjusted to account for any imports exported after March 27, 1995.

140.96, has determined that publication of the proposals for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATES: Comments must be received on or before October 6, 1995.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the CME contract markets in Mexico 30 stock index futures and options.

FOR FURTHER INFORMATION CONTACT: Please contact Stephen Sherrod of the Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, telephone 202–254–7303.

SUPPLEMENTARY INFORMATION: According to the CME, the Mexico 30 stock index is designed to be representative of the Mexican stock market, and is an adjusted capitalization-weighted index of 30 large and liquid Mexican stocks traded on the Bolsa Mexicana de Valores. The capitalizations of component stocks are adjusted to keep their individual index weights equal to or smaller than 25%. The computation of the index will be the responsibility of the Bridge company. The CME and the Chicago Board Options Exchange will maintain the index jointly.

Copies of the terms and conditions of the proposed contracts will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K street, NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the Exchange in support of the applications for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552 (1987)) and the Commission's regulations thereunder (17 CFR Part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views, or arguments on the terms and conditions of the proposed contracts, or with respect to other materials submitted by the Exchange in support of the applications, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, by the specified date.

Issued in Washington, DC, on August 30, 1995.

John Mielke,

Acting Director.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Information Collection Proposal

AGENCY: Corporation for National and Community Service (CNS).

ACTION: Information Collection Request submitted to the Federal Office of Management and Budget for Review.

SUMMARY: This notice provides information about an information collection proposal by the Corporation for National Service, AmeriCorps Recruitment Office, currently under review by the Office of Management and Budget (OMB).

DATES: OMB and CNS will consider comments on the proposed collection of information and recordkeeping requirements received within 20 days from the date of publication. Copies of the proposed forms and supporting documents may be obtained by contacting the Corporation for National Service.

ADDRESSES: Send comments to both:

Bruce J. Cohen, Director, AmeriCorps Recruitment, 1201 New York Ave., NW., Washington, DC 20525

and

Debra Bond, Desk Officer for CNS, Office of Management and Budget, 3002 New Executive Office Bldg., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Bruce Cohen, (202) 606–5000.

SUPPLEMENTARY INFORMATION:

Office of CNS Issuing Proposal: AmeriCorps Recruitment.

Title of Form: AmeriCorps Referral Form.

Need and Use: The AmeriCorps Referral form is used by the AmeriCorps Recruitment Office to meet requirements mandated by federal law (National and Community Service Act of 1993). The information collected via the form assists with AmeriCorps Member recruitment and placement for program management, planning, and required recordkeeping.

Type of Request: Revision of currently approved collection.

Respondent's Obligation to Reply: Voluntary.

Frequency of Data Collection: On occasion.

Estimated Number of Responses: 50,000 (annually).

Average Burden Hours per Response: 0.05 Hours (3 minutes).

Estimated Annual Reporting or Disclosure Burden: 2,500 hours.

Regulatory Authority: 42 U.S.C. 12592 (Pub. L. 103–82).

Dated: August 31, 1995.

Bruce J. Cohen,

Director, AmeriCorps Recruitment.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. TM96–1–91–000]

ANR Storage Company; Notice of Proposed Changes in FERC Gas Tariff Annual Charges Adjustment Clause Provisions

August 30, 1995.

Take notice that on August 25, 1995, ANR Storage Company (ANR Storage) tendered for filing to become part of its FERC Gas Tariff, Original Volume No. 2, Seventh Revised Sheet No. 1(a), with a proposed effective date of October 1, 1995.

ANR Storage states that Seventh Revised Sheet No. 1(a) reflects the new ACA rate to be charged per the Annual Charge Adjustment clause provisions established by the Commission in Order No. 472, issued on May 29, 1987. The new ACA rate to be charged by ANR Storage will be effective October 1, 1995.

ANR Storage states that copies of the filing were served upon the company's jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 7, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. RP91–143–031 and RP95–422–000]

Great Lakes Gas Transmission Limited Partnership; Notice of Compliance Tariff Filing

August 30, 1995.

Take notice that on August 25, 1995, Great Lakes Gas Transmission Limited Partnership (Great Lakes), tendered for filing proposed changes in its FERC Gas Tariff, to become effective October 1, 1995, as more fully described in its Description of Prospective Tariff Sheets contained in its filing. The tariff sheets submitted are as follows:

Second Revised Volume No. 1

Second Revised Sheet No. 4
First Revised Sheet No. 4A
First Revised Sheet No. 5
Second Revised Sheet No. 6

Original Volume No. 2

Seventeenth Revised Sheet No. 151
Fourteenth Revised Sheet No. 223
Fourteenth Revised Sheet No. 245
Eighth Revised Sheet No. 269
Fourteenth Revised Sheet No. 294
Ninth Revised Sheet No. 603
Sixth Revised Sheet No. 604

Great Lakes states that the above tariff sheets are filed to reinstate systemwide rolled-in rates on its system, in compliance with the Commission's July 26, 1995, Order on Remand, in which it reversed its prior incremental rate decisions.

Any person desiring to be heard or to protest the above referenced tariff sheets should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 7, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the commission and are available for public inspection in the Public Reference Room.

Also in compliance with the Order on Remand, Great Lakes tendered for filing pro forma tariff sheets reflecting systemwide rolled-in rates on its system for the period November 1, 1991 through September 30, 1995, during which incremental rates were required to be charged by the Commission's Opinion Nos. 367 and 368, which the Commission has now reversed. The following is a listing of the pro forma tariff sheets and the dates they are to become effective:

Second Revised Volume No. 1

Pro Forma Sheet No. 4—November 1, 1994; November 1, 1993
Pro Forma Sheet No. 4A—November 1, 1994
Pro Forma Sheet No. 5—November 1, 1993

First Revised Volume No. 1

Pro Forma Sheet No. 4—April 1, 1993; November 1, 1991
Pro Forma Sheet No. 57(i)—April 1, 1993; November 1, 1991

Original Volume No. 2

Pro Forma Sheet No. 53—November 1, 1993; April 1, 1993; November 1, 1991
Pro Forma Sheet No. 77—April 1, 1993; November 1, 1991
Pro Forma Sheet No. 78—April 1, 1993; November 1, 1991
Pro Forma Sheet No. 151—November 1, 1993; April 1, 1993; November 1, 1991
Pro Forma Sheet No. 223—November 1, 1993; April 1, 1993; November 1, 1991
Pro Forma Sheet No. 245—November 1, 1993; April 1, 1993; November 1, 1991
Pro Forma Sheet No. 269—November 1, 1993; April 1, 1993; November 1, 1991
Pro Forma Sheet No. 294—November 1, 1993; April 1, 1993; November 1, 1991
Pro Forma Sheet No. 603—November 1, 1993; April 1, 1993; November 1, 1991

Pro Forma Sheet No. 604—November 1, 1993; April 1, 1993; November 1, 1991
Pro Forma Sheet No. 865—April 1, 1993; November 1, 1991
Pro Forma Sheet No. 866—April 1, 1993; November 1, 1991
Pro Forma Sheet No. 905—April 1, 1993; November 1, 1991
Pro Forma Sheet No. 906—April 1, 1993; November 1, 1991
Pro Forma Sheet No. 1008—April 1, 1993; November 1, 1991

Original Volume No. 3

Pro Forma Sheet No. 2—October 1, 1993; April 1, 1993; January 1, 1993; October 1, 1992; January 1, 1992; November 1, 1991
Pro Forma Sheet No. 3—October 1, 1993; April 1, 1993; January 1, 1993; October 1, 1992; May 1, 1992; January 1, 1992; November 1, 1991

In addition, Great Lakes included its Refund and Surcharge Plan, and supporting schedules, in its filing.

Any person desiring to be heard or to protest the above referenced pro forma tariff sheets should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 29, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Great Lakes states that copies of the filing were served upon all parties to these proceedings, each of Great Lakes customers, and the Public Service Commissions of the States of Michigan, Minnesota and Wisconsin.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22050 Filed 9–5–95; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM96–1–65–000]

Jupiter Energy Corporation; Notice of Proposed Changes in FERC Gas Tariff

August 30, 1995.

Take notice that on August 23, 1995, Jupiter Energy Corporation (Jupiter Energy) tendered for filing to become part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheets, with a proposed effective date of October 1, 1995:

Ninth Revised Sheet No. 4A
Ninth Revised Sheet No. 5A
Ninth Revised Sheet No. 6A

Jupiter Energy states that the filed tariff reflect revision, pursuant to Section 154.38(d)(6) of the Commission's Regulations, of Jupiter Energy's Annual Charge Adjustment ("ACA") surcharge. The new surcharge rate is 0.23¢ Mcf.

Jupiter Energy states that copies of the filing have been served on the Company's jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 7, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Jupiter Energy's filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

FR Doc. 95–21988 Filed 9–5–95; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP95–421–000]

Koch Gateway Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

August 30, 1995.

Take notice that on August 24, 1995, Koch Gateway Pipeline Company (Koch Gateway), tendered for filing to become part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheets, to be effective October 1, 1995:

Sixth Revised Sheet No. 20
Sixth Revised Sheet No. 21
Sixth Revised Sheet No. 22
Sixth Revised Sheet No. 24
Second Revised Sheet No. 3904
First Revised Sheet No. 3905
Original Sheet No. 3906

Koch Gateway states that this filing is submitted as a limited application pursuant to Section 4 of the Natural Gas Act, 15 U.S.C. 717c (1988), and the Rules and Regulations of the Federal Energy Regulatory Commission.

Koch Gateway states that on August 4, 1995, it filed an application for the Commission's special permission to withdraw the filing in Docket No. RP95–295–000 which would have permitted the recovery of Koch Gateway's Account No. 191 costs through a direct bill mechanism.

Koch Gateway states that the above tariff sheets are being submitted in order to permit recovery of pre-July 31, 1991 costs in its Account No. 191 through prospective surcharges on transportation service under Rate Schedules FTS, FTS–SCO, NNS, NNS–SCO and ITS. Koch Gateway proposes that ninety percent of the stranded Account No. 191 costs be allocated to firm service with the remaining ten percent being allocated to interruptible transportation service.

Koch Gateway also states that copies of its filing are being served upon Koch Gateway customers, state commissions, all intervenors in RP95–295–000 and other interested parties.

Any person desiring to be heard or to protest seid filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's regulations. All such motions or protests should be filed on or before September 7, 1995. Protests will be considered by the Commission in determining appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP95–714–000]

NorAm Gas Transmission Company; Notice of Request Under Blanket Authorization

August 30, 1995.

Take notice that on August 28, 1995, NorAm Gas Transmission Company (Applicant), 525 Milam Street, P.O. Box 21734, Shreveport, Louisiana 71151 filed in Docket No. CP95–714–000 for approval under §§ 157.205 and 157.212 of the Commission's Regulations to construct and operate, delivery points for Arkla, a division of NorAm Energy Corp. (Arkla), all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate the following facilities for deliveries of natural gas to Arkla, to serve its new domestic and commercial customers: (a) One 1-inch delivery tap and first cut regulatory on Applicant's Line T to serve Metropolitan Life Insurance Company in Philips County, Arkansas; (b) one 1-inch delivery tap and first-cut regulator on Applicant's Line T to serve Ray Fuller Farms in Monroe County, Arkansas. The estimated annual volumes through these facilities are 2,550 MMBtu annually and 48 MMBtu on a peak day. The cost of construction is $4,598.00, which will be reimbursed by Arkla.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP95–185–006]

Northern Natural Gas Company; Notice of Petition To Place Tariff Sheets Into Effect

August 30, 1995.

Take notice that on August 25, 1995, Northern Natural Gas Company (Northern) filed a motion to place the following tariff sheet into effect on September 1, 1995:

Substitute Twenty-First Revised Sheet No. 53

Northern states that the filing moves into effect as of September 1, 1995, the gathering rate previously accepted and suspended by the Commission's March 30, 1995, suspension order.

Northern further states that copies of the motion have been mailed to each of its customers and interested State Commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). All such protests must be filed on or before September 7, 1995. Protests will be considered by the Commission in determining the appropriate proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM96–1–41–000]

Paiute Pipeline Company; Notice of Change in Annual Charge Adjustment

August 30, 1995.

Take notice that on August 24, 1995, Paiute Pipeline Company (Paiute) tendered for filing and acceptance the following tariff sheet to be a part of its FERC Gas Tariff:

Second Revised Volume No. 1–A

Second Revised Sheet No. 10

Paiute states that the purpose of said filing is to revise its annual charge adjustment surcharge in order to recover the Commission's annual charges for the 1995 fiscal year.

Paiute has requested that the Commission accept its tariff sheet to become effective on October 1, 1995.

Paiute states that copies of this filing have been mailed to all jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before September 7, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for inspection.

[Docket No. TM96–1–111–000]

Steuben Gas Storage Company; Notice of Proposed Changes in FERC Gas Tariff Annual Charges Adjustment Clause Provisions

August 30, 1995.

Take notice that on August 25, 1995, Steuben Gas Storage Company (Steuben) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 2, Third Revised Sheet No. 1(A), with a proposed effective date of October 1, 1995.

Steuben states that Third Revised Sheet No. 1(A) reflects the new ACA rate to be charged per the Annual Charge Adjustment clause provisions established by the Commission in Order No. 472, issued on May 29, 1987. The new ACA rate to be charged by Steuben will be effective October 1, 1995.

Steuben states that copies of the filing were served upon the company's Jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 7, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. CP95–699–000]

Trailblazer Pipeline Company; Notice of Request Under Blanket Authorization

August 30, 1995.

Take notice that on August 21, 1995, Trailblazer Pipeline Company (Trailblazer), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP95–699–000 a request pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to construct and operate a new natural gas delivery point under Trailblazer's blanket certificate issued in Docket No. CP82–

497–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Trailblazer proposes to construct and operate a new delivery point located in Gage County, Nebraska for Farmland Industries, Inc. (Farmland). Trailblazer states that it would deliver, on an interruptible basis, up to 30,000 Mcf of gas per day to Farmland for use as feedstock. Trailblazer estimates that the new facilities, consisting of a 4-inch sidetap, a 6-inch meter and approximately 3,500 feet of 6-inch pipeline, would cost $222,000. Trailblazer asserts that it has sufficient capacity to provide the proposed services without detriment or disadvantage to its peak day and annual delivery capacity.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the date after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[Docket No. TM96–1–119–000]

Young Gas Storage Company, Ltd.; Notice of Proposed Changes in FERC Gas Tariff Annual Charges Adjustment Clause Provisions

August 30, 1995.

Take notice that on August 25, 1995, Young Gas Storage Company, Ltd. (Young) submitted for filing to become part of its FERC Gas Tariff, Original Volume No. 1, First Revised Sheet No. 5, with a proposed effective date of October 1, 1995.

Young states that the tariff sheets reflect a decrease of $0.0001 per Mcf in the ACA adjustment charge, resulting in a new ACA rate of $0.0023 per Mcf based on Young's 1995 ACA billing.

Young requested that the new $0.0023 cent per Mcf ACA charge be effective October 1, 1995.

Young states that copies of this filing have been served on Young's jurisdictional customers and public bodies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR Sections 385.214 and 385.211). All such petitions or protests should be filed on or before September 7, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. RP92–236–005]

Williston Basin Interstate Pipeline Company; Notice of Compliance Filing

August 30, 1995.

Take notice that on August 24, 1995, Williston Basin Interstate Pipeline Company (Williston Basin), tendered for filing, under protest, certain revised tariff sheets to First and Second Revised Volume Nos. 1 and Original Volume Nos. 1–A, 1–B and 2 of its FERC Gas Tariff.

Williston Basin states that the revised tariff sheets were filed in compliance with the Commission's "Order Affirming in part and Reversing in Part Initial Decision" issued July 25, 1995 in Docket Nos. RP9 2–236–000, et al. as more fully described in the filing.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). All such protests should be filed on or before September 7, 1995. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not service to make protestants parties to the proceeding. Copies of the filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM96–1–76–000]

Wyoming Interstate Company, Ltd.; Notice of Filing

August 30, 1995.

Take notice that on August 25, 1995, Wyoming Interstate Company, Ltd. (WIC) submitted for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, Third Revised Sheet No. 5, and to become part of its FERC Gas Tariff, Second Revised Volume No. 2, Third Revised Sheet No. 4 and Fourth Revised Sheet No. 5 to become effective October 1, 1995.

WIC states that the tariff sheets reflect a decrease of $0.0001 per Mcf in the ACA adjustment charge, resulting in a new ACA rate of $0.0023 per Mcf based on WIC's 1995 ACA billing.

WIC requested that the new $0.0023 cent per Mcf ACA charge be effective October 1, 1995.

WIC states that copies of this filing have been served on WIC's jurisdictional customers and public bodies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such petitions or protests should be filed on or before September 7, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Pubic Reference Room.

BILLING CODE 6717-01-M

[Docket No. EG95–87–000, et al.]

Entergy Power Marketing Corporation, et al.; Electric Rate and Corporate Regulation Filings

August 28, 1995.

Take notice that the following filings have been made with the Commission:

1. Entergy Power Marketing Corporation

[Docket No. EG95–87–000]

Take notice that on August 23, 1995, Entergy Power Marketing Corporation (EPMC), 900 S. Shackleford Road, Suite 210, Little Rock, Arkansas 72211, filed with the Federal Energy Regulatory Commission, an application for determination of exempt wholesale generator (EWG) status pursuant to Part 365 of the Commission's Regulations.

EPMC is a Delaware corporation that will be engaged directly, or indirectly through one or more affiliates as defined in Section 2(a)(11)(B) of PUHCA, and exclusively in the business of owning or operating, or both owning and operating, all or part of one or more eligible facilities and selling electric energy at wholesale.

EPMC intends to own, control or hold with the power to vote at least 5% of the voting securities of Entergy Power Development Corporation (EPDC). The Commission previously has determined that EPDC is an EWG. EPDC owns (i) 100% of Entergy Richmond Power Corporation (Entergy Richmond) and (ii) interests in a number of foreign EWGs. Entergy Richmond is an EWG and owns and operates an eligible facility consisting of a 250 MW electric generating facility that is located in Richmond, Virginia.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

2. Rig Gas Inc.

[Docket No. ER95–480–002]

Take notice that on August 24, 1995, Rig Gas Inc. (Rig) filed certain information as required by the Commission's March 16, 1995, letter order in Docket No. ER95–480–000. Copies of Rig's informational filing are on file with the Commission and are available for public inspection.

3. Southwestern Electric Power Company

[Docket No. ER95–1301–000]

Take notice that on August 24, 1995, Southwestern Electric Power Company (SWEPCO), provided additional information in this docket.

SWEPCO served copies of the filing on all parties to the proceeding and the Public Utility Commission of Texas. Copies are also available for inspection at SWEPCO's offices in Shreveport, Louisiana.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

4. New England Power Company

[Docket No. ER95–1360–000]

Take notice that on August 23, 1995, New England Power Company filed an amendment clarifying its earlier submission in this docket.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

5. Southern California Edison Company

[Docket No. ER95–1489–000]

Take notice that on August 23, 1995, Southern California Edison Company (Edison), tendered for filing supplements to its initial filing in the above docket. The supplements amend the rate to be effective June 1, 1995 for the Edison-Riverside Washington Water Power Firm Transmission Service Agreement between Edison and the City of Riverside, correct the losses stated for the Edison-IID Firm Transmission Service Agreement between Edison and Imperial Irrigation District, and correct a typographical error in the losses shown for the Edison-AEPCO Firm Transmission Service Agreement between Edison and the Arizona Electric Power Cooperative.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

6. Illinova Power Marketing, Inc.

[Docket No. ER95–1577–000]

Take notice that on August 17, 1995, Illinova Power Marketing, Inc. (IPMI) tendered for filing a letter from the Executive Committee of the Western Systems Power Pool (WSPP) approving IPMI's application for membership in the WSPP. IPMI requests it be permitted to become a member of the WSPP. In order to receive the benefits of pool membership, IPMI requests waiver of the Commission's prior notice requirement to allow its WSPP membership to become effective August 15, 1995, but in no event later than 60 days from this filing.

A copy of the filing was served on WSPP.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

7. American Electric Power Service Corporation

[Docket No. ER95–1596–000]

Take notice that on August 21, 1995, the American Electric Power Service Corporation (AEPSC), tendered for filing, as an Initial Rate Schedule, a Power Sales Tariff.

The Power Sales Tariff and the associated service schedule provides for the sale of operating capacity and energy that the AEP Companies are willing to make available, from AEP System resources on a firm or non-firm basis. AEPSC requests an effective date of September 1, 1995.

A copy of the filing was served upon the Eligible Entities listed in Appendix II to the filing and the state regulatory commissions of Indiana, Kentucky, Michigan, Ohio, Tennessee, Virginia and West Virginia.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

8. New England Power Company

[Docket No. ER95–1597–000]

Take notice that on August 21, 1995, New England Power Company (NEP), tendered for filing an Agreement with Pepperell Power Associates Limited Partnership (Pepperell) regarding the disconnection of the interconnection of Pepperell's 40 megawatt cogeneration facility with NEP's transmission system.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

9. Kentucky Utilities Company

[Docket No. ER95–1599–000]

Take notice that on August 21, 1995, Kentucky Utilities Company tendered for filing an executed Service Agreement for Power Services with CNG Power Services Corporation.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

10. Houston Lighting & Power Company

[Docket No. ER95–1605–000]

Take notice that on August 21, 1995, Houston Lighting & Power Company (HL&P) tendered for filing three executed transmission service agreements (TSA) and LG&E Power Marketing, Inc. (LG&E) for Economy Energy Transmission Service under HL&P's FERC Electric Tariff, Original Volume No. 1, for Transmission Service To, From and Over Certain HVDC Interconnections. The three TSAs provide for the transmission of economy energy supplied, respectively, by South Texas Electric Cooperative, Inc. (STEC), Air Liquide and The Dow Chemical Company (Dow), and scheduled to and over the East HVDC Interconnection. HL&P has requested effective dates of August 15, 1995 for the TSA covering energy supplied by STEC, August 16, 1995 for the TSA covering energy supplied by Air Liquide, and August 18, 1995 for the TSA covering energy supplied by Dow.

Copies of the filing were served on LG&E and the Public Utility Commission of Texas.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

11. Rochester Gas and Electric Corporation

[Docket No. ER95–1606–000]

Take notice that on August 22, 1995, Rochester Gas and Electric Corporation (RG&E), tendered for filing a Service Agreement for acceptance by the Federal Energy Regulatory Commission (Commission) between RG&E and GPU Service Corporation. The terms and conditions of service under this Agreement are made pursuant to RG&E's FERC Electric Rate Schedule, Original Volume 1 (Power Sales Tariff) accepted by the Commission in Docket No. ER94–1279. RG&E also has requested waiver of the 60-day notice provisions pursuant to 18 CFR 35.11.

A copy of this filing has been served on the Public Service Commission of the State of New York.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

12. Union Electric Company

[Docket No. ER95–1607–000]

Take notice that on August 22, 1995, Union Electric Company (UE), tendered for filing a Transmission Service Agreement dated August 23, 1995 between LG&E Power Marketing Inc. (LPMI) and UE. UE asserts that the purpose of the Agreement is to set out specific rates, terms, and conditions for transactions from UE to LPMI.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

13. Public Service Electric and Gas Company

[Docket No. ER95–1610–000]

Take notice that on August 23, 1995, Public Service Electric and Gas Company (PSE&G), tendered for filing an initial rate schedule to provide fully interruptible transmission service to North American Energy Conservation, Inc., for delivery of non-firm wholesale electrical power and associated energy output utilizing the PSE&G bulk power transmission system.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

14. Central Illinois Public Service Company

[Docket No. ER95–1611–000]

Take notice that on August 23, 1995, Central Illinois Public Service Company (CIPS) submitted a Service Agreement, dated September 1, 1995, establishing Stand Energy Corporation as a customer under the terms of CIPS' Coordination Sales Tariff CST–1 (CST–1 Tariff).

CIPS requests an effective date of September 1, 1995, for the service agreement and, accordingly, seeks waiver of the Commission's notice requirements. Copies of this filing were served upon Stand Energy Corporation and the Illinois Commerce Commission.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

15. Central Power and Light Company

[Docket No. ER95–1612–000]

Take notice that on August 23, 1995, Central Power and Light Company (CPL) filed a one-time rate decrease to the Public Utilities Board of the City of Brownsville, Texas, Kimble Electric Cooperative, Inc., Magic Valley Electric Cooperative, Inc., Madina Electric Cooperative, Inc., Robstown Utilities of the City of Robstown, Texas, and South Texas Electric Cooperative, Inc.

CPL requests an effective date of August 24, 1995, for the tariff sheets implementing the one-time rate decrease and, accordingly, CPL seeks waiver of the Commission's notice requirements. CPL served copies of the filing on each of the affected customers, Rio Grande Electric Cooperative, Inc. and the Public Utility Commission of Texas.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

16. Tampa Electric Company

[Docket No. ER95–1613–000]

Take notice that on August 23, 1995, Tampa Electric Company (Tampa Electric) tendered for filing three agreements with the Orlando Utilities Commission (OUC): (1) A Transmission Facilities Purchase and Sale Agreement; (2) an Agreement to Coordinate Construction of Interconnecting Facilities; and (3) an Operating Agreement With Respect to Interconnection.

Tampa Electric proposes that the agreements be made effective as of August 23, 1995, and therefore requests waiver of the Commission's notice requirement.

Tampa Electric states that a copy of the filing has been served on OUC and the Florida Public Service Commission.

Comment date: September 11, 1995, in accordance with Standard Paragraph E at the end of this notice.

17. Acme POSDEF Partners, L.P.

[Docket No. QF85–311–003]

On August 14, 1995, Acme POSDEF Partners, L.P. (Applicant) submitted for filing an amendment to its filing in this docket.

The amendment provides additional information pertaining to the ownership of its cogeneration facility. No determination has been made that the submittal constitutes a complete filing.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

BILLING CODE 6717–01–P

[Docket No. ER95–1614–000, et al.]

Vantus Energy Corporation, et al.; Electric Rate and Corporate Regulation Filings

August 30, 1995.

Take notice that the following filings have been made with the Commission:

1. Vantus Energy Corporation

[Docket No. ER95–1614–000]

Take notice that on August 23, 1995, Vantus Energy Corporation (Vantus), tendered for filing an application for waivers and blanket approvals under regulations of the Commission and for an order accepting its Electric Rate Schedule FERC No. 1. Vantus is a wholly-owned, indirect subsidiary of Pacific Gas and Electric Company.

Vantus intends to engage in electric capacity and energy transactions as a marketer. In these transactions Vantus intends to charge market rates as mutually agreed to by Vantus and the purchaser. All other terms of the transaction would also be determined by negotiation between the parties. All sales and purchases will be arms-length transactions.

Comment date: September 14, 1995, in accordance with Standard Paragraph E at the end of this notice.

2. Entergy Power Marketing Corporation

[Docket No. ER95–1615–000]

Take notice that on August 23, 1995, Entergy Power Marketing Corporation filed Rate Schedule No. 1, which would permit it to make sales of capacity and energy at market-based rates, as more fully described in the filing.

Comment date: September 14, 1995, in accordance with Standard Paragraph E at the end of this notice.

3. Coastal Electric Services Company

[Docket No. ER95–1616–000]

Take notice that on August 23, 1995, Coastal Electric Services Company (CESC), tendered for filing its request that the Commission recognize CESC as a member of the Western Systems Power Pool (WSPP), amend the WSPP Agreement to include CESC, and, pursuant to 18 CFR 35.3 and 35.11, waive notice requirements for good cause shown. CESC requests an effective date of one day after filing for the proposed amendment.

Copies of the filing were served upon the WSPP Executive Committee.

Comment date: September 14, 1995, in accordance with Standard Paragraph E at the end of this notice.

4. Koch Power Services, Inc.

[Docket No. ER95–1617–000]

Take notice that on August 24, 1995, Koch Power Services, Inc. (KPSI), tendered for filing with the Federal Energy Regulatory Commission, pursuant to 18 CFR 35.13, a letter requesting FERC approval of KPSI's membership within the Western Systems Power Pool (WSPP), a copy of a letter dated August 17, 1995, indicating that the WSPP Executive Committee approved KPSI's WSPP membership application and an executed copy of the signatory page to the WSPP Agreement.

A copy of the filing was served to the WSPP Executive Committee Chairman and General Counsel.

Comment date: September 14, 1995, in accordance with Standard Paragraph E at the end of this notice.

5. Georgia Power Company

[Docket No. ER95–1618–000]

Take notice that on August 24, 1995, Georgia Power Company (Georgia Power), submitted for filing revised tariff sheets to Rate Schedules "C" and "D" to its Partial Requirements Tariff. The purpose of this filing is to amend energy rates contained in the foregoing tariff to reflect the energy-related costs incurred by Georgia Power to ensure compliance with the Phase I sulfur dioxide emissions limitations of the Clean Air Act Amendment of 1990.

Comment date: September 14, 1995, in accordance with Standard Paragraph E at the end of this notice.

6. MidAmerican Energy Company

[Docket No. ER95–1619–000]

Take notice that on August 24, 1995, MidAmerican Energy Company (MidAmerican) filed with the Commission three Service Agreements with Heartland Energy Services, Inc. (Heartland) dated August 3, 1995, Enron Power Marketing, Inc. (Enron) dated August 14, 1995, and InterCoast Power Marketing Company (InterCoast) dated August 14, 1995, entered into pursuant to Section 4.0 of MidAmerican's Non-Firm Point-to-Point Transmission Service Tariff which was accepted for filing by the Commission in Docket No. ER95–188–000.

MidAmerican requests an effective date of August 3, 1995, for the Agreement with Heartland, August 14, 1995 for the Agreement with Enron, and August 14, 1995, for the Agreement with InterCoast, and accordingly seeks a waiver of the Commission's notice requirement. MidAmerican has served a copy of the filing on Heartland, Enron, InterCoast, the Iowa Utilities Board, the Illinois Commerce Commission and the South Dakota Public Utilities Commission.

Comment date: September 14, 1995, in accordance with Standard Paragraph E at the end of this notice.

7. MidAmerican Energy Company

[Docket No. ER95–1620–000]

Take notice that on August 24, 1995, MidAmerican Energy Company (MidAmerican) filed with the Commission three Umbrella Service Agreements with Heartland Energy Services, Inc. (Heartland) dated August 3, 1995, Enron Power Marketing, Inc. (Enron) dated August 14, 1995 and InterCoast Power Marketing Company (InterCoast) dated August 14, 1995, entered into pursuant to Section 5.2 of MidAmerican's Firm Point-to-Point Transmission Service Tariff which was accepted for filing by the Commission in Docket No. ER95–188–000.

MidAmerican requests an effective date of August 3, 1995 for the Agreement with Heartland, August 14, 1995 for the Agreement with Enron, and August 14, 1995 for the Agreement with InterCoast, and accordingly seeks a waiver of the Commission's notice requirement. MidAmerican has served a copy of the filing on Heartland, Enron, InterCoast, the Iowa Utilities Board, the Illinois Commerce Commission and the South Dakota Public Utilities Commission.

Comment date: September 14, 1995, in accordance with Standard Paragraph E at the end of this notice.

8. PacifiCorp

[Docket No. ER95–1621–000]

Take notice that on August 24, 1995, PacifiCorp, tendered for filing in accordance with 18 CFR Part 35 of the Commission's Rules and Regulations, Transmission Service Agreements with Energy Resource Marketing, Inc. (ERM) and Coastal Electric Services Company (Coastal) under, PacifiCorp's FERC Electric Tariff, Original Volume No. 5, Service Schedule TS–5.

Copies of this filing were supplied to ERM, Coastal, the Washington Utilities and Transportation Commission and the Public Utility Commission of Oregon.

A copy of this filing may be obtained from PacifiCorp's Regulatory Administration Department's Bulletin Board System through a personal computer by calling (503) 464–6122 (9600 baud, 8 bits, no parity, 1 stop bit).

Comment date: September 14, 1995, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22051 Filed 9–5–95; 8:45 am]

BILLING CODE 6717–01–P

[Project No. 2431–008 Michigan and Wisconsin]

Wisconsin Electric Power Company; Notice of Availability of Final Environmental Assessment

August 30, 1995.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for major new license for the existing Brule Hydroelectric Project located on the Brule River in Iron County, Michigan and Florence County, Wisconsin, near Crystal Falls, Wisconsin, and has prepared a final Environmental Assessment (EA) for the existing project. In the EA, the Commission's staff has analyzed the potential environmental effects of the existing project and has concluded that approval of the project, with appropriate enhancement measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

On June 29, 1994, a draft EA was issued and distributed to all parties, and comments were requested on the draft EA to be filed within 45 days. All comments have been considered in this final EA.

Copies of the final EA are available for review in the Public Reference Branch, Room 3104 of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22003 Filed 9–5–95; 8:45 am]

BILLING CODE 6717–01–M

[Project Nos. 2522–002, et al.]

Hydroelectric Applications [Wisconsin Public Service Corporation, et al.]; Notice of Applications

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1a. *Type of Application:* New Major License.

b. *Project No.:* 2522–002.

c. *Date Filed:* December 18, 1991.

d. *Applicant:* Wisconsin Public Service Corporation (WPSC).

e. *Name of Project:* Johnson Falls Project.

f. *Location:* On the Peshtigo River (river mile 60) in Marinette County, Wisconsin.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. §§ 791(a)-825(r).

h. *Applicant Contact:* Mr. Edward Newman, Director of Environmental Services, Power Supply and Engineering, Wisconsin Public Service Corp., P.O. Box 19002, Green Bay, Wisconsin 54307, (414) 433–1294.

i. *FERC Contact:* James Haimes at (202) 219–2780.

j. *Deadline Date:* See standard paragraph D10.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D10.

l. *Description of Project:* The constructed Johnson Falls Project is a peaking project that consists of the following: (1) A reservoir with a surface area of 130.5 acres with a maximum depth of 40 feet, and a volume of 2500 acre-feet at elevation 814.0 feet NGVD; (2) two earth embankments with a 2-foot-thick concrete core wall and a combined length of 188 feet; (3) an unregulated spillway section consisting of a concrete gravity overflow dam with crest length of 9 feet and crest elevation 814.45; (4) a concrete gated spillway section 117-feet-long with (a) conventional ogee overflow segment at elevation 802.40; and (b) six 12-foot-high by 14-foot-wide radial gates; (5) a nonoverflow concrete gravity dam with a vertical upstream face and crest elevation of 818.0 feet; (6) three 4-foot-square sluice gates, located in the nonoverflow dam; (7) a 66.5-foot-wide power intake with six gates; and (8) a powerhouse consisting of (a) a 34-foot-wide by 66.5-foot-long by 42-foot-high concrete, steel, and brick structure, (b) two identical 3-phase 60-cycle, Allis-Chalmers vertical shaft generators rated at 1,760 kW, directly connected to (c) two Allis-Chalmers vertical shaft 2,500-horsepower turbines operating at 150 rpm.

The existing license requires the Wisconsin Public Service Corporation (WPSC) to operating in a peaking mode and provide a minimum release of 29 cubic feet per second (cfs). The applicant may elect to operate the Project in a run-of-river mode when daily flows are projected to be less than 200 cfs for an extended period of time.

WPSC proposes to: (1) Operate in a peaking mode but increase the minimum flow from 29 cfs to 150 cfs year long; (2) place all of the shoreline on this reservoir, from the high water mark back 400 feet, in an old growth classification as well as the five miles of river shoreline downstream from the project; (3) work with the fishery resource agencies to attempt to establish or enhance a population of both brown trout and brook trout (4) monitor the recreational pressure demands every 5 years.

m. *Purpose of Project:* Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: A4 and D10.

o. *Available Locations of Application:* A copy of the application is available for inspection and reprod[illegible]tion at the Commissio[illegible] Pu[illegible]ference and Files Maint[illegible]an[illegible]ch, located at 941 North C[illegible]et, N.E., Room 3104, Washin[illegible].C. 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Wisconsin Public Service Corporation's office at 700 North Adams Street, Green Bay, Wisconsin 54307–9002, (414) 433–1294.

2a. *Type of Application:* New Major License.

b. *Project No.:* 2525–004.

c. *Date filed:* December 18, 1991.

d. *Applicant:* Wisconsin Public Service Corporation (WPSC).

e. *Name of Project:* Caldron Falls Project.

f. *Location:* On the Peshtigo River (river mile 70) in Marinette County, Wisconsin.

g. *Filed pursuant to:* Federal Power Act, 16 USC §§ 791(a)–825(r).

h. *Applicant Contact:* Mr. Edward Newman, Director of Environmental Services, Power Supply and Engineering, Wisconsin Public Service Corp., P.O. Box 19002, Green Bay, Wisconsin 54307, (414) 433–1294.

i. *FERC Contact:* James Haimes at (202) 219–2780.

j. *Deadline Date:* See standard paragraph D10.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D10.

l. *Description of Project:* The constructed Caldron Falls Project is a peaking project that consists of the following: (1) A reservoir with a surface area of 1,180 acres, a maximum depth of 40 feet and a volume of 11,570 acre-feet at elevation 982.0 feet NGVD; (2) two earth embankments with a 2-foot-thick concrete core wall and a combined length of 1,250 feet; (3) an unregulated spillway section consisting of a concrete gravity overflow dam 121 feet long; (4) a concrete gated spillway section 110 feet long with (a) conventional ogee overflow segment, and (b) six 12-foot-high by 14 foot-wide radial gates; (5) a nonoverflow concrete gravity dam with crest at elevation 986 and vertical upstream face; (6) two 4-foot-square sluice gates, located in the nonoverflow dam; (7) a 7-foot-wide gated concrete trash sluice, located adjacent to the power intake; (8) a 52-foot-wide power intake with four 10.3-foot-high by 10.5-foot-wide gates; (9) one 10-foot diameter penstock 210 feet long; (10) one 10-foot diameter penstock 220 feet long; and (11) a powerhouse consisting of (a) a 29-foot-wide by 76-foot-long by 35-foot-high steel and brick structure, and (b) two identical 3 phase, 60 cycle Allis-Chalmers vertical umbrella type generators rated at 3,200 kW directly connected to (c) two Allis-Chalmers type FV 4,650 horsepower vertical turbines operating at 225 rpm.

The existing license requires Wisconsin Public Service Corporation (WPSC) to operate in a peaking mode and provide a minimum release of 23 cubic feet per second (cfs). The applicant may also elect to operate the Project in a run-of-river mode when daily flows are projected to be less than 200 cfs for an extended period of time.

WPSC currently proposes to: (1) Continue operating in a peaking mode; (2) increase the minimum release flow from 23 cfs to 50 cfs from June through March; (3) increase the minimum release flow to 350 cfs from April through May; and (4) monitor the recreational pressure demands every 5 years.

m. *Purpose of Project:* Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: A4 and D10.

o. *Available Locations of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, N.E., Room 3104, Washington, D.C. 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Wisconsin Public Service Corporation's office at 700 North Adams Street, Green Bay, Wisconsin 54307–9002, (414) 433–1294.

3a. *Type of Application:* New Major License.

b. *Project No.:* 2546–001.

c. *Date filed:* December 19, 1991.

d. *Applicant:* Wisconsin Public Service Corporation (WPSC).

e. *Name of Project:* Sandstone Rapids Project.

f. *Location:* On the Peshtigo River (river mile 50) in Marinette County, Wisconsin.

g. *Filed pursuant to:* Federal Power Act, 16 USC §§ 791(a)–825(r).

h. *Applicant Contact:* Mr. Edward Newman, Director of Environmental Services, Power Supply and Engineering, Wisconsin Public Service Corp., P.O. Box 19002, Green Bay, Wisconsin 54307, (414) 433–1294.

i. *FERC Contact:* James Haimes at (202) 219–2780.

j. *Deadline Date:* See standard paragraph D10.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D10.

l. *Description of Project:* The constructed Sandstone Rapids Project is a peaking project that consists of the following: (1) A reservoir with a surface area of 150 acres with a maximum depth of 39 feet, and a volume of 1,400 acre-feet at elevation 724.1 feet NGVD; (2) two earth embankments with a 2-foot-thick concrete core wall and a combined length of 420 feet and crest elevation of 729.50; (3) an unregulated spillway section consisting of a concrete gravity overflow dam with a crest length of 26 feet at elevation 724.1; (4) a concrete gated spillway section with (a) conventional ogee overflow crest at elevation 712.1; and (b) six 12-foot-high by 14-feet-wide radial gates; (5) an 85.5-foot-long nonoverflow dam concrete gravity structure with a vertical upstream face and crest elevation 729.50; (6) two 4-foot-square sluice gates, located in the nonoverflow dam; (7) a power intake with four gates; and (8) a powerhouse consisting of (a) 41-foot-wide by 85.6-foot-long by 42-foot-high concrete and brick structure; (b) two identical 3-phase 60-cycle, Allis-Chalmers vertical shaft generators rated at 1,920 kW directly connected to (c) two Allis-Chalmers vertical shaft 2,500-horsepower turbines operating at 150 rpm.

The existing license requires the Wisconsin Public Service Corporation (WPSC) to operate in a peaking mode and provide a minimum release of 31 cubic feet per second (cfs). The applicant may elect to operate the Project in a run-of-river mode when daily flows are projected to be less than 200 cfs for an extended period of time.

WPSC currently proposes to: (1) Operate in a peaking mode but increase the minimum flow from 31 cfs to a minimum flow of 200 cfs; (2) establish an old growth/no cut area from the river shoreline back to the top of the slope of the land that is oriented to the river; and (3) monitor the recreational pressure demands every 5 years.

m. *Purpose of Project:* Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: A4 and D10.

o. *Available Locations of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, N.E., Room 3104, Washington, D.C. 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Wisconsin Public Service Corporation's office at 700 North Adams Street, Green Bay, Wisconsin 54307–9002, (414) 433–1294.

4a. *Type of Application:* Subsequent Minor License.

b. *Project No.:* 2560–001.

c. *Date Filed:* December 19, 1991.

d. *Applicant:* Wisconsin Public Service Corporation (WPSC).

e. *Name of Project:* Potato Rapids Project.

f. *Location:* On the Peshtigo River (river mile 15) in Marinette County, Wisconsin.

g. *Filed Pursuant to:* Federal Power Act, 16 USC §§ 791(a)–825(r).

h. *Applicant Contact:* Mr. Edward Newman, Director of Environmental Services, Power Supply and Engineering, Wisconsin Public Service Corp., P.O. Box 19002, Green Bay, Wisconsin 54307, (414) 433–1294.

i. *FERC Contact:* James Haimes at (202) 219–2780.

j. *Deadline Date:* See standard paragraph D10.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D10.

l. *Description of Project:* The constructed Potato Rapids Project is a run-of-river project that consists of the following: (1) A reservoir with a surface area of 350 acres with a maximum depth of 20 feet, and a volume at elevation 621.5 feet of 3,100 acre-feet; (2) Three earth dikes with a combined length of 4,134 feet and a crest elevation of 625 feet; (3) a concrete gated spillway section with (a) 225-foot-long conventional concrete gravity section, (b) three 15-foot-high by 26-foot-wide radial gates, and (c) four 6.5-foot-high and 20-foot-wide radial gates; (4) a 217-foot-long nonoverflow concrete gravity dam with a vertical upstream face and crest elevation of 623.7; (5) a 8-foot-wide trash sluiceway, located adjacent to the powerhouse; (6) a 56-foot-wide power intake with three gates; and (7) a powerhouse consisting of (a) a 34-foot-wide by 56-foot-long by 31-foot-high concrete powerhouse; (b) one 3-phase, 60-cycle Allis-Chalmers umbrella type generator rated at 500 kW, directly connected to (c) one Leffel vertical shaft 780-horsepower turbine operating at 128.5 rpm, and (d) two 3-phase, 60-cycle General Electric umbrella type generators rated at 440 kW, directly connected to (e) two S Morgan Smith vertical shaft 676-horsepower turbines operating at 128.5 rpm.

The existing license requires the Wisconsin Public Service Corporation (WPSC) to operate in a run-of-river mode maintaining a target reservoir level of 621.25 (NGVDS) ± 0.25 feet.

WPSC currently proposes to: (1) Continue operating in a run of river mode with no changes to the flow; and (2) monitor recreational pressure demands every 5 years.

m. *Purpose of Project:* Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: A4 and D10.

o. *Available Locations of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, N.E., Room 3104, Washington, D.C. 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Wisconsin Public Service Corporation's office at 700 North Adams Street, Green Bay, Wisconsin 54307–9002, (414) 433–1294.

5a. *Type of Application:* Subsequent Minor License.

b. *Project No.:* 2581–002.

c. *Date filed:* December 19, 1991.

d. *Applicant:* Wisconsin Public Service Corporation (WPSC).

e. *Name of Project:* Peshtigo Project.

f. *Location:* On the Peshtigo River (river mile 12) in Marinette County, Wisconsin.

g. *Filed Pursuant to:* Federal Power Act, 16 USC §§ 791(a)–825(r).

h. *Applicant Contact:* Mr. Edward Newman, Director of Environmental Services, Power Supply and Engineering, Wisconsin Public Service Corp., P.O. Box 19002, Green Bay, Wisconsin 54307, (414) 433–1294.

i. *FERC Contact:* James Haimes at (202) 219–2780.

j. *Deadline Date:* See standard paragraph D10.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D10.

l. *Description of Project:* The constructed Peshtigo Project is a run-of-river project that consists of the following: (1) A reservoir with a surface area of 460 acres with a maximum depth of 15 feet and a volume of 4,600 acre-feet at elevation 603.0 feet NGVD; (2) a concrete spillway which consists of (a) an ungated section with 61 foot-long crest at elevation 603.0, and (b) a gated section with crest at elevation 591 that includes six 12-foot-high by 14-foot-wide radial gates; (3) a 96-foot-long nonoverflow concrete gravity dam with a vertical upstream face and crest at elevation 605.75; (4) a 96-foot-wide power intake with eight gates; and (5) a powerhouse consisting of (a) 41-foot-wide by 96.5-foot-long by 28-foot-high concrete powerhouse, (b) one 3-phase, 60-cycle General Electric vertical shaft generator rated at 224 Kw directly connected to (c) a 410-horsepower turbine operating at 109 rpm, and (d) one 3-phase, 60-cycle General Electric vertical shaft generator rated at 360 Kw, directly connected to (e) a Francis type Z, 560-horsepower turbine operating at 100 rpm.

WPSC currently proposes: (1) to operate in a run-of-river mode with no changes to the flow; and (2) monitor recreational pressure demands every 5 years.

m. *Purpose of Project:* Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: A4 and D10.

o. *Available Locations of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, N.E., Room 3104, Washington, D.C. 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Wisconsin Public Service Corporation's office at 700 North Adams Street, Green Bay, Wisconsin 54307–9002, (414) 433–1294.

6a. *Type of Application:* New Major License.

b. *Project No.:* 2595–005.

c. *Date Filed:* December 18, 1991.

d. *Applicant:* Wisconsin Public Service Corporation (WPSC)

e. *Name of Project:* High Falls Project.

f. *Location:* On the Peshtigo River (river mile 62) in Marinette County, Wisconsin.

g. *Filed Pursuant to:* Federal Power Act, 16 USC §§ 791(a)–825(r)

h. *Applicant Contact:* Mr. Edward Newman, Director of Environmental Services, Power Supply and Engineering, Wisconsin Public Service Corp., P.O. Box 19002, Green Bay, Wisconsin 54307, (414) 433–1294.

i. *FERC Contact:* James Haimes at (202) 219–2780.

j. *Deadline Date:* See standard paragraph D10.

k. *Status of Environmental Analysis:* This application is ready for environmental analysis at this time—see attached paragraph D10.

l. *Description of Project:* The constructed High Falls Project is a peaking project that consists of the following: (1) A reservoir with a surface area of 1,670 acres with a maximum depth of 54 feet, and a volume of 15,810 acre-feet at elevation 897.0 feet NGVD; (2) two earth embankments with a 2-foot-thick-concrete core wall and a combined length of 4,025 feet; (3) an unregulated spillway section consisting of a concrete gravity overflow dam 128 feet long with crest at elevation 897.0; (4) a concrete gated spillway section 105 feet long with (a) a conventional ogee overflow segment, and (b) six 12-foot-high by 14-foot-wide radial gates; (5) a nonoverflow concrete gravity dam with a vertical upstream face and crest at elevation 902.0; (6) two non-operating 4-foot-square sluice gates, located in the nonoverflow dam; (7) a 125-foot-wide power intake with eight gates; (8) five 8-foot-diameter, 60-foot-long steel penstocks; (9) two 3-foot-diameter, 60-foot-long steel penstocks; and (10) a powerhouse consisting of (a) an 83-foot-wide by 136-foot-long by 36-foot-high structural steel and brick structure, and (b) five identical 3-phase, 60-cycle Allis-Chalmers horizontal shaft generators rated at 1,400 Kw directly connected to (c) five Allis-Chalmers horizontal shaft 1,900 horsepower turbines operating at 360 rpm.

The existing license requires Wisconsin Public Service Corporation (WPSC) to operate in a peaking mode and provide a minimum release of 25 cubic feet per second (cfs). The applicant may elect to operate the Project in a run-of-river mode when daily flows are projected to be less than 200 cfs for an extended period of time.

WPSC currently proposes to: (1) Continue operating in a peaking mode, but with no defined or set minimum release flow (instead, WPSC proposes to operate the project in coordination with upstream and downstream projects to maintain target reservoir water levels); and (2) monitor the recreational pressure demands every 5 years.

m. *Purpose of Project:* Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: A4 and D10.

o. *Available Locations of Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, NE., Room 3104, Washington, DC 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Wisconsin Public Service Corporation's office at 700 North Adams Street, Green Bay, Wisconsin 54307–9002, (414) 433–1294.

Standard Paragraphs

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. Under the Commission's regulations, any competing development application must be filed in response to and in compliance with public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

D10. Filing and Service of Responsive Documents—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to section 4.34(b) of the regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice (October 13, 1995 for all projects). All reply comments must be filed with the Commission within 105 days from the date of this notice (November 27, 1995 for all projects).

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS", "REPLY COMMENTS", "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC. 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 1027, at the above address. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

Dated: August 30, 1995, Washington, DC.

Lois D. Cashell,

Secretary.

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Brymore Energy Inc. authorization to import and export up to a combined total of 200 Bcf of natural gas from and to Canada over a two-year term beginning the date of first import or export delivery after August 13, 1995.

This order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, August 16, 1995.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs, Office of Fossil Energy.

Canada Imperial Oil Limited; Order Granting Blanket Authorization To Import and Export Natural Gas From and to Canada

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Canada Imperial Oil Limited blanket authorization to import and export a combined total of up to 146 Bcf of natural gas from and to Canada. This authorization is for a period of two years beginning on the date of the initial import or export, whichever occurs first, after October 31, 1995.

This order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on August 16, 1995.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5292–5]

Air Pollution Control; Proposed Action on Clean Air Act Grant to the Santa Barbara Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed determination with request for comments and notice of opportunity for public hearing.

SUMMARY: The U.S. EPA has made a proposed determination that a reduction in expenditures of non-Federal funds for the Santa Barbara Air Pollution Control District (SBAPCD) in Goleta, California is a result of a non-selective reduction in expenditures. This determination, when final, will permit the SBAPCD to keep the financial assistance awarded to it for FY–94 by EPA under section 105(c) of the Clean Air Act (CAA).

DATES: Comments and/or requests for a public hearing must be received by EPA at the address stated below by October 6, 1995.

ADDRESSES: All comments and/or requests for a public hearing should be mailed to: Laurie Amaro, Air Grants Section (A–2–3), Air and Toxics Division, U.S. EPA Region IX, 75 Hawthorne Street, San Francisco, California 94105–3901; FAX (415)744–1076.

FOR FURTHER INFORMATION CONTACT: Laurie Amaro, Air Grants Section (A–2–3), Air and Toxics Division, U.S. EPA Region IX, 75 Hawthorne Street, San Francisco, California 94105–3901 at (415) 744–1247.

SUPPLEMENTARY INFORMATION: Under the authority of Section 105 of the CAA, EPA provides financial assistance to the SBAPCD, whose jurisdiction includes Santa Barbara County in California, to aid in the operation of its air pollution control programs. In FY–94, EPA awarded the SBAPCD $459,086, which represented approximately 10% of the SBAPCD's budget.

Section 105(c)(1) of the CAA, 42 U.S.C. 7405(c)(1), provides that "[n]o agency shall receive any grant under this section during any fiscal year when its expenditures of non-Federal funds for recurrent expenditures for air pollution control programs will be less than its expenditures were for such programs during the preceding fiscal year. In order for [EPA] to award grants under this section in a timely manner each fiscal year, [EPA] shall compare an agency's prospective expenditure level to that of its second preceding year." EPA may still award financial assistance to an agency not meeting this requirement, however, if EPA, "after notice and opportunity for public hearing, determines that a reduction in expenditures is attributable to a non-selective reduction in the expenditures in the programs of all Executive branch agencies of the applicable unit of Government." CAA section 105(c)(2). These statutory requirements are repeated in EPA's implementing regulations at 40 CFR 35.210(a).

In its FY–94 section 105 application, which EPA reviewed in early 1994, the SBAPCD projected expenditures of non-Federal funds for recurrent expenditures (or its maintenance of effort (MOE)) of $4,221,583. This MOE would have been sufficient to meet the MOE requirements of the CAA. In January of 1995, however, the SBAPCD submitted to EPA documentation which shows that its actual FY–94 MOE was $3,450,870. This amount represents a shortfall of $736,219 from the MOE of $4,187,089 for the preceding fiscal year (FY–93). In order for the SBAPCD to be eligible to keep its FY–94 grant, EPA must make a determination under section 105(c)(2).

In FY–94, the SBAPCD was an operating department within the County of Santa Barbara under the direction of the County Board of Supervisors. The Board of Supervisors, during the fiscal years of 91/92, 92/93 and 93/94, issued policies directing county-wide budget cuts. These budget cuts were necessary as a result of declining economic conditions which caused the business community to curtail operations, resulting in a decline of county revenues from sources such as permit fees and taxes. The SBAPCD submitted documentation to EPA which shows that over the last three years county-wide budget cuts became severe enough in 93/94 that SBAPCD instituted a number of cost cutting measures including: eliminating a position, freezing all hiring, and instituting new programs to reduce costs such as permit streamlining and computer-assisted permit processing.

The SBAPCD's MOE reductions resulted from a loss of county revenues, including permit fees, due to circumstances beyond its control. The budget cuts instituted by the Board of Supervisors, affected all county agencies equally. EPA proposes to determine that the SBAPCD's lower FY–94 MOE level meets the section 105(c)(2) criteria as resulting from a non-selective reduction of expenditures. Pursuant to 40 CFR 35.210, this determination will allow the SBAPCD to keep the funds received from EPA for FY–94.

This notice constitutes a request for public comment and an opportunity for public hearing as required by the Clean Air Act. All written comments received by October 6, 1995 on this proposal will be considered. EPA will conduct a public hearing on this proposal only if a written request for such is received by EPA at the address above by October 6, 1995. If no written request for a hearing is received, EPA will proceed to a final determination.

Dated: August 18, 1995.

David P. Howekamp,

Acting Regional Administrator.

[FR Doc. 95–22058 Filed 9–5–95; 8:45 am]

BILLING CODE 6560–50–P

[FRL–5292–8]

Meeting of the Ozone Transport Commission for the Northeast United States

AGENCY: Environmental Protection Agency.

ACTION: Notice of meeting.

SUMMARY: The United States Environmental Protection Agency is announcing its Fall meeting of the Ozone Transport Commission to be held on September 28, 1995.

This meeting is for the Ozone Transport Commission to deal with appropriate matters within the transport region, as provided for under the Clean Air Act Amendments of 1990. This meeting is not subject to the provisions of the Federal Advisory Committee Act, Public Law 92–463, as amended.

DATES: The meeting will be held on September 28, 1995 from 10:00 a.m. to 4:00 p.m.

PLACE: The meeting will be held at: The Inn at Essex, 70 Essex Way, Essex Junction, VT 05452.

FOR FURTHER INFORMATION CONTACT: EPA: Doug Gutro, State Relations Coordinator, Region I, U.S. Environmental Protection Agency, John F. Kennedy Federal Building, Boston, MA 02203, (617) 565–3383.

THE STATE CONTACT: Host Agency: Dick Valentinetti, Vermont Department of Environmental Conservation, 103 South Main Street, Building 3 South, Waterbury, VT 05671–0402, (802) 241–3840.

FOR DOCUMENTS AND PRESS INQUIRIES CONTACT: Stephanie A. Cooper, Ozone Transport Commission, 444 North Capitol Street, N.W., Suite 604, Washington, DC 20001, (202) 508–3840.

SUPPLEMENTARY INFORMATION: The Clean Air Act Amendments of 1990 contain at Section 184 provisions for the "Control of Interstate Ozone Air Pollution." Section 184(a) establishes an ozone transport region comprised of the States of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, parts of Virginia and the District of Columbia.

The Assistant Administrator for Air and Radiation of the Environmental Protection Agency convened the first meeting of the commission in New York City on May 7, 1991. The purpose of the Transport Commission is to deal with appropriate matters within the transport region.

The purpose of this notice is to announce that this Commission will meet on September 28, 1995. The meeting will be held at the address noted earlier in this notice.

Section 176A(b)(2) of the Clean Air Act Amendments of 1990 specifies that the meetings of Transport Commissions are not subject to the provisions of the Federal Advisory Committee Act. This meeting will be open to the public as space permits.

TYPE OF MEETING: Open.

AGENDA: Copies of the final agenda will be available from Stephanie Cooper of the OTC office, (202) 508–3840 on Wednesday, September 20, 1995. The purpose of this meeting is to review air quality needs within the Northeast and Mid-Atlantic States, consider the development of market-based programs in the region, and to discuss stationary and mobile source portions of ozone State Implementation Plans.

John DeVillars,

Regional Administrator, EPA Region I.

[FR Doc. 95–22057 Filed 9–5–95; 8:45 am]

BILLING CODE 6560-50-P

[OPP–34081; FRL 4972–4]

Certain Chemicals; Availability of Reregistration Eligibility Decision Documents for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability and opening of public comment period.

SUMMARY: This notice announces the availability of the Reregistration Eligibility Decision (RED) documents for the pesticide chemicals cases Chloro-*m*-xylenol, Dowicil CTAC, Fosamine Ammonium, Piperalin, Polybutene, Terbuthylazine, and (*Z*)-9-tricosene. It also begins a 60–day public comment period of these documents. The REDs are the Agency's summary documents of its scientific assessments of the human health and environmental data bases for these pesticide chemicals. They also include the Agency's regulatory conclusions regarding the future registration of uses and products containing these chemicals as active ingredients.

DATES: Written comments on these decisions must be submitted by October 6, 1995.

ADDRESSES: Three copies of comments identified with the docket number "OPP–34081" and the case number (noted below), should be submitted to: By mail: OPP Pesticide Docket, Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: OPP Pesticide Docket, Rm. 1132, Crystal Mall 2 (CM#2), 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number "OPP–34081". No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in "SUPPLEMENTARY INFORMATION" of this document.

Information submitted as a comment in response to this Notice may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public docket. Information not marked confidential will be included in the public docket without prior notice (including comments and data submitted electronically). The public docket and docket index, including printed paper versions of electronic comments, which does not include any information claimed as CBI will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: Technical questions on the above listed RED documents should be directed to the appropriate Chemical Review Managers:

Chemical Name	Case No.	Chemical Review Manager	Telephone No.	E-mail Address
Chloro-*m*-xylenol	3045	Yvonne Brown	(703) 308–8073	Brown.yvonne@epamail.epa.gov
Dowicil CTAC	3069	Ron Kendall	(703) 308–8068	Kendall.ron@epamail.epa.gov
Fosamine Ammonium	2355	Kathy Davis	(703) 308–8156	Davis.kathy@epamail.epa.gov
Piperalin	3114	Barbara Briscoe	(703) 308–8177	Briscoe.barbara@epamail.epa.gov
Polybutene	4076	Mark Wilhite	(703) 308–8586	Wilhite.mark@epamail.epa.gov
Terbuthylazine	2645	Virginia Dietrich	(703) 308–8157	Dietrich.virginia@epamail.epa.gov
(*z*)-9-Tricosene	4112	Tom Myers	(703) 308–8074	Myers.tom@epamail.epa.gov

To request a copy of any of the above listed RED documents, or a RED Fact Sheet, contact the OPP Pesticide Docket, Public Response and Program Resources Branch, in Rm. 1132 at the address given above or call (703) 305–5805.

SUPPLEMENTARY INFORMATION: The Agency has issued Reregistration Eligibility Decision (RED) documents for the pesticide chemical cases listed above. Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1988, EPA is conducting a reregistration program to reevaluate older pesticides, those initially registered prior to November 1, 1984, to make sure they meet current scientific and regulatory standards. If necessary, modifications to use patterns and application methods may be required to reduce risks to appropriate levels. All registrants of products containing one or more of the above listed active ingredients have been sent the appropriate RED documents and must respond to labeling requirements and product specific data requirements (if applicable) within 8 months of receipt. Products containing other active ingredients will not be reregistered until those other active ingredients are determined to be eligible for reregistration.

The reregistration program is being conducted under Congressionally-mandated time frames, and EPA recognizes both the need to make timely reregistration decisions and to involve the public. Therefore, EPA is issuing these REDs as final documents with a 60–day comment period. Although the 60–day public comment period does not affect the registrant's response due date, it is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the RED. All comments will be carefully considered by the Agency. If any comment significantly affects a RED, EPA will amend the RED by publishing the amendment in the **Federal Register**.

Electronic copies of the REDs and RED fact sheets can be downloaded from the Pesticide Special Review and Reregistration Information System at 703–308–7224, and also can be reached on the Internet via fedworld.gov and EPA's gopher server, gopher.epa.gov.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Notice of Receipt of Voluntary Cancellation Request of Registration of VAPAM-B Foaming Fumigant Containing the Active Ingredient Metam-Sodium

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This Notice, issued pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), announces EPA's receipt of a request from Zeneca Ag Products to cancel the registration for VAPAM-B Foaming Fumigant (EPA Registration Number 10182–185).

DATES: Written comments must be submitted on or before October 6, 1995.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [OPP–64028]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

FOR FURTHER INFORMATION CONTACT: By mail: Wilhelmena Livingston, Special Review Branch, Special Review and Reregistration Division (7508W), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Special Review Branch, 3rd floor, 2800 Crystal Drive, Arlington, VA. (703) 308–8025; e-mail: livingston wilhelmena@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: This Notice announces the receipt of a request from Zeneca Ag Products to cancel its registration of VAPAM-B Foaming Fumigant.

I. Background

Pursuant to section 6(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the Administrator may seek cancellation of a product if a pesticide or its labeling or other material required to be submitted for registration does not comply with the provisions of this act. The Agency issued a letter to Zeneca Ag Products (Zeneca) on March 15, 1995, notifying the registrant that a Confidential Statement of Formula (CSF) was not on file with the Agency for VAPAM-B Foaming Fumigant, a product that contains metam-sodium. The letter indicated that an up-to-date CSF or a request for voluntary cancellation must be received by the Agency within 30 days of receipt of the March 15, 1995 letter.

II. Request for Voluntary Cancellation

On March 28, 1995, Zeneca Ag Products submitted a letter to EPA requesting voluntary cancellation of the registration for VAPAM-B Foaming Fumigant (EPA registration number 10182–185), pursuant to FIFRA section 6(f)(1). Zeneca indicated in the letter that the subject product has not been manufactured or distributed in many years, therefore, Zeneca requests voluntary cancellation of the registration for VAPAM-B Foaming Fumigant. EPA intends to approve the proposed voluntary cancellation unless Zeneca withdraws or amends its request before the end of the comment period.

III. Procedures for Withdrawal of Request

If Zeneca chooses to withdraw its request for cancellation, it must submit such withdrawal in writing to Wilhelmena Livingston, Special Review Branch, Special Review and Reregistration Division (7508W), Environmental Protection Agency, 401 M St., S.W., Washington, DC 20460, postmarked on or before October 6, 1995. This written withdrawal of the request for cancellation must include a current CSF for the product, and a commitment to pay any reregistration or registration maintenance fees due, as well as to fulfill any applicable unsatisfied data requirements.

IV. Provisions for Existing Stocks

Under the authority of FIFRA section 6(a)(1), EPA will establish certain limitations on the distribution and use of exiting stocks of VAPAM-B Foaming Fumigant subject to any final cancellation notice. EPA defines the term "existing stock" to mean any quantity of VAPAM-B Foaming Fumigant in the United States on the effective date of the cancellation of a registration granted by the Agency. Such existing stocks include VAPAM-B Foaming Fumigant that have been formulated, packaged, and labeled and are being held for shipment or release or have been shipped or released into commerce.

Consistent with the Agency's established policy for determinations concerning existing stocks (56 FR 29362), the Agency will permit Zeneca to sell and distribute existing stocks of this product for up to 1 year after the effective date of this cancellation. Any sale or distribution of the product by Zeneca after that 1 year period will be a violation of federal law. Any existing stocks remaining in the possession of all other persons after 1 year may continue to be sold, distributed, and used until such existing stocks are exhausted.

V. Comments

Persons interested in commenting on the proposed cancellation are invited to submit their written comments on or before October 6, 1995 to the address given above.

VI. Public Docket

A record has been established for this notice under docket number "[OPP–64028]" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

BILLING CODE 6560–50–F

[OPPTS–59348; FRL–4975–2]

Certain Chemicals; Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME–95–10. The test marketing conditions are described below.

DATES: This notice becomes effective August 28, 1995. Written comments will be received until September 21, 1995.

ADDRESSES: Written comments, identified by the docket number [OPPTS–59348] and the specific TME number should be sent to: TSCA Non-Confidential Information Center (NCIC), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. NEB–607 (7407), 401 M St., SW., Washington, D.C. 20460, (202) 554–1404, TDD (202) 554–0551.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: ncic@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by [OPPTS–59348]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found under "SUPPLEMENTARY INFORMATION".

FOR FURTHER INFORMATION CONTACT: Shirley Howard, New Chemicals Branch, Chemical Control Division (7405), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–447H, 401 M St. SW., Washington, D.C. 20460, (202) 260–3780.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to human health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury.

EPA hereby approves TME–95–10. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and within the time period and restrictions specified below, will not present an unreasonable risk of injury to human health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

Advance notice of receipt of the application was not published. Therefore, an opportunity to submit comments is being offered at this time. EPA may modify or revoke the test marketing exemption if comments are received which cast significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury.

The following additional restrictions apply to TME–95–10. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until five years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.
2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.
3. Copies of the bill of lading that accompanies each shipment of the TME substance.

TME–95–10

Date of Receipt: July 18, 1995. The extended comment period will close September 21, 1995.

Applicant: Riechhold Chemicals, Inc.

Chemical: (G) Polyurethane Adhesives.

Use: (G) Laminate Adhesive and Veneer Adhesive.

Production Volume: 90,900 kg/yr.

Number of Customers: Confidential.

Test Marketing Period: 12 months, Commencing on first day of commercial manufacture.

Risk Assessment: EPA identified no significant health or environmental concerns for the test market substance. Therefore, the test market activities will not present any unreasonable risk of injury to human health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention cast significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to human health or the environment.

A record has been established for this notice under docket number [OPPTS–59348] (including comments and data submitted electronically as described above). A public version of this record, including printed, pager versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 12 noon to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in the TSCA nonconfidential information center (NCIC), Rm. NEB–607, 401 M St., SW., Washington, D.C. 20460.

Electronic comments can be sent directly to EPA at:

ncic@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

FEDERAL RESERVE SYSTEM

CNB Bancshares of Victoria, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than September 29, 1995.

A. Federal Reserve Bank of Dallas (Genie D. Short, Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. CNB Bancshares of Victoria, Inc., Victoria, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens Bancorp of Delaware, Inc., Wilmington, Delaware, and thereby indirectly acquire Citizens National Bank, Victoria, Texas.

In connection with this application, Citizens Bancorp of Delaware, Inc., Wilmington, Delaware, also has applied to become a bank holding company by acquiring 100 percent of the voting shares of Citizens National Bank, Victoria, Texas.

2. Magnolia Partnership Investments, Ltd, Beaumont, Texas; to become a bank holding company by acquiring 44.3 percent of the voting shares of First of Groves Corporation, Groves, Texas, and thereby indirectly acquire First Bank & Trust Company, Groves, Texas, and First National Bank, Silsbee, Texas.

Board of Governors of the Federal Reserve System, August 30, 1995.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–F

Norwest Corporation; Application to Engage in Nonbanking Activities

Norwest Corporation, Minneapolis, Minnesota, and its wholly owned subsidiary Norwest Financial Services, Inc., Des Moines, Iowa (NFS) (together, Applicants), have given notice pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) (BHC Act) and § 225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)(3)) to engage *de novo* through NFS's wholly owned subsidiaries, Orlandi Valuta, Los Angeles, California, and Orlandi Valuta Nacional, Boulder City, Nevada (together, Companies), in the activity of transmitting money for customers within the United States, including Puerto Rico, the U.S. Virgin Islands, and Guam (domestic money transmission).

Orlandi currently engages solely in the activity of transmitting money to a foreign country (Mexico) on behalf of customers. The activity is conducted through Orlandi's office locations and Orlandi's network of outside representatives. Companies will use this network following the acquisition and, subject to licensing and other regulatory requirements, intend to expand the network to include Applicants' consumer finance offices. A "hotline" telephone will be located at the office of the outside representative. This telephone will be connected directly to Companies' office and the customer will speak directly with an employee of Companies. The customer will provide the information regarding the recipient and the dollar amount to be transferred. The outside representative will collect the money from the customer and deposit the funds in a designated account at a local bank chosen by the outside representative. These funds will be held *in trust* for the benefit of the remitting customer and will not be commingled with any other funds of Companies or the outside representative. Companies will collect the funds deposited in the outside representative's account by means of an ACH transaction or similar transaction. Companies will deposit an amount equal to the transmitted funds in an account at a bank at a location near the disbursement site. The local disbursement site will notify the recipient that the funds are available to be picked up. When the recipient comes to the disbursement site, a check drawn on the local bank will be issued to the recipient with funds immediately available for the recipient to cash or deposit the check.

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with Board approval, engage in any activity which the Board, after due notice and opportunity for hearing, has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. This statutory test requires that two separate tests be met for an activity to be permissible for a bank holding company. First, the Board must determine that the activity is, as a general matter, closely related to banking. Second, the Board must find in a particular case that the performance of the activity by the applicant bank holding company may reasonably be expected to produce public benefits such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices.

The Board has not previously approved money transmission activiteswithun the United States. The Board has previously approved, by order, however, the activity of transmitting money for customers to a foreign county. *See Philippine Commercial International Bank*, Federal Reserve Bulletin 270 (1991); *Berger Bank A/S*, 76 Federal Reserve Bulletin 457 (1990); *Skandinaviska Enskilda Banken*, 69 Federal Reserve Bulletin 42 (1983); *European-American Bancorp, European-American Bancorp*, 63 Federal Reserve Bulletin 595 (1977). In this regard, on August 28, 1995, the Board approved the notice by Applicants to acquire Orlandi and thereby engage in the activity of transmitting money for customers to Mexico. Applicants believe that the proposed activities meet the *National Courier* standard because the activity of domestic money transmission is identical to the previously approved activity of transmitting money for customers to a foreign country, except that the recipient will be located in the United States.

In publishing the proposal for comment, the Board does not take a position on issues raised by the proposal. Notice of the proposal is published solely in order to seek the views of interested persons on the issues presented by the application and does not represent a determination by the Board that the proposal meets, or is likely to meet, the standards of the BHC Act.

Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than October 4, 1995. Any request for a hearing on this application must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of the reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Minneapolis.

Board of Governors of the Federal Reserve System, August 30, 1995.

William W. Wiles,

Secretary of the Board.

[FR Doc. 95-22000 Filed 9-5-95; 8:45 am]

BILLING CODE 6210-01-F

PRESIDENTIAL ADVISORY COMMITTEE ON GULF WAR VETERANS' ILLNESSES

Meeting

AGENCY: Presidential Advisory Committee on Gulf War Veterans' Illnesses.

ACTION: Notice of open meeting.

SUMMARY: Under the provisions of the Federal Advisory Committee Act, this notice is hereby given to announce an open meeting concerning the Presidential Advisory Committee on Gulf War Veterans' Illnesses. The panel will meet in open session to discuss various clinical issues related to Gulf War veterans' illnesses. Captain Marguerite Knox, Clinical Assistant Professor in the College of Nursing, University of South Carolina, will chair this panel meeting of the committee.

DATES: September 18, 1995, 9:00 a.m.–5:00 p.m.

TENTATIVE AGENDA:

Monday, September 18, 1995

9:00 a.m. Panel convenes to hear presentations on the VA and DoD clinical care systems

12:30 p.m. Lunch

2:00 p.m. Panel reconvenes to take public comment

5:00 p.m. Panel adjourns

A final agenda will be available at the meeting.

PLACE: The Radisson Plaza Hotel, 101 South Tyron Street, Charlotte, North Carolina.

FOR FURTHER INFORMATION CONTACT: Michael E. Kowalok, Presidential Advisory Committee on Gulf War Veterans' Illnesses, 1411 K Street, N.W., suite 1000, Washington, D.C. 20005, telephone 202–761–0066, fax: 202–761–0310.

PUBLIC PARTICIPATION: Members of the public who wish to present oral statements during the panel meeting should contact the Advisory Committee at the address or telephone number listed above at least five business days prior to the meeting. This panel has a particular interest in hearing about the experiences of veterans of the Persian Gulf War with the DoD and VA clinical systems. Reasonable provisions will be made to include presentations on the agenda, and requests from individuals who have not yet had an opportunity to address the Advisory Committee will take priority. The panel Chair is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Advisory Committee will be permitted to do so at any time.

SUPPLEMENTARY INFORMATION: The President established the Presidential Advisory Committee on Gulf War Veterans' Illnesses by Executive Order 12961, May 26, 1995. The purpose of this committee is to review and provide recommendations on the full range of government activities associated with Gulf War veterans' illnesses. The committee reports to the President through the Secretary of Defense, Secretary of Health and Human Services, and the Secretary of Veterans Affairs. The committee members are individuals with expertise relevant to the functions of the committee, and are appointed by the President from non-Federal sectors.

Dated: September 1, 1995.

L.M. Bynum,

Designated Federal Officer.

BILLING CODE 5000-04-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration on Aging

[Program Announcement 13655.911]

Grants to Indian Tribal Organizations for Supportive and Nutritional Services for Older Indians

AGENCY: Administration on Aging (AoA), OS, HHS.

ACTION: Announcement of availability of funds and opportunity to apply under the Older Americans Act, Title VI, Grants for Native Americans, Part A–Indian Program.

SUMMARY: The Administration on Aging will accept applications for funding in Fiscal Year 1996 under the Older Americans Act, title VI, Grants for Native Americans, part A–Indian Program, from all current title VI, part A grantees, current grantees who wish to leave a consortium and apply as a new grantee, and eligible federally recognized Indian tribal organizations that are not now participating in title VI. Successful applications from new grantees will be funded if funds permit.

DATES: December 5, 1995.

ADDRESSES: See Appendix A.

FOR FURTHER INFORMATION CONTACT: M. Yvonne Jackson, Ph.D., Office for American Indian, Alaskan Native, and Native Hawaiian Programs, Administration on Aging, Department of Health and Human Services, Wilbur J. Cohen Federal Building, Room 4257, 330 Independence Avenue, SW, Washington, DC 20201, telephone (202) 619–2713.

SUPPLEMENTARY INFORMATION:

1. Background and Program Purpose

The Administration on Aging (AoA) is responsible for administering title VI, part A of the Older Americans Act, which provides for grants to Indian tribal organizations representing federally recognized Tribes for the provision of nutritional and supportive services to Indian elders.

The 1978 Amendments to the Older Americans Act created title VI, Grants for Indian Tribal Organizations. The purpose of this title is to promote the delivery of supportive and nutritional services for Indian elders that are comparable to services provided under title III of the Older American Act. (Title III of the Older Americans Act, entitled "Grants for State and Community Programs on Aging" is the nationwide program of supportive and nutritional services which serves persons over age 60 of all ethnic groups.)

In the Older Americans Act Amendments of 1987, the name of title VI was changed to Grants for Native Americans, and part B—Native Hawaiian Programs—was added.

Nutritional services and information and assistance services are required by the Act. Nutritional services include congregate meals and home-delivered meals. Supportive services include information and assistance, transportation, chore services, and other supportive services which contribute to the welfare of older Native Americans.

2. Eligibility of an Indian Tribal Organization or Indian Tribe To Receive a Grant

To be eligible to receive a grant, a tribal organization or Indian tribe must meet the application requirements contained in sections 612(a) and 612(b) of the Act, which are: "(1) the tribal organization represents at least 50 individuals who are 60 years of age or older; and (2) the tribal organization demonstrates the ability to deliver supportive services, including nutritional services." For purposes of title VI, part A, the terms "Indian tribe" and "tribal organization" have the same meaning as in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

This announcement concerns all federally recognized Indian tribal organizations, those currently participating in title VI, part A individually or as members of a consortium and those that are not currently participating in title VI, part A.

3. Available Funds

Distribution of funds among tribal organizations is subject to the availability of appropriations to carry out title VI, part A. As stated in section 614A(b) of the Act the amount of the grant made under this part to a tribal organization for fiscal year 1992 and for each subsequent fiscal year shall be not less than the amount of the grant made under this part to the tribal organization for fiscal year 1991 as stated under section 614A(a) of the Act. If the funds appropriated to carry out this part in a fiscal year subsequent to fiscal year 1991 exceed the funds appropriated to carry out this part in fiscal year 1991, then the amount of the grant (if any) made under this part to a tribal organization for the subsequent fiscal year shall be: (1) Increased by such amount as the Assistant Secretary considers to be appropriate, in addition to the amount of any increase required by subsection (a), so that the grant equals or more closely approaches the amount of the grant made under this part to the tribal organization for fiscal year 1980; or (2) an amount the Assistant Secretary considers to be sufficient if the tribal organization did not receive a grant under this part for either fiscal year 1980 or fiscal year 1991.

Applications from current grantees who are a part of a consortium and wish to leave the consortium will be treated as new grant applications. Successful new grant applications for both current grantees who are leaving a consortium and tribal organizations who are not current grantees will be funded pending availability of additional funds.

Information on typical grant levels in Fiscal Year 1994 is given below as a guide to POSSIBLE funding levels for Tribes representing the following documented numbers of Indian elders over age 60:

Population range (No. of older Indians age 60 years and over, represented by the tribal organization).	Amounts of awards in FY 1994
50 to 100	$49,000
101 to 200	56,000
201 to 300	64,500
301 to 400	73,000
401 to 500	81,600
501 to 1500	95,000
1501+	125,000

4. Application Process

Applicants should submit applications, describing their proposed plans for nutritional and supportive services for older Indians for *project period April 1, 1996–March 31,1999*, as described in section 5 below, "Content of the Application."

A three year project period was chosen in order to reduce the paperwork burden on the grantees. It is the intent of this agency to conduct on site monitoring at least once during the three year project period.

The Program Performance and Financial Status reports, due on a semi-annual basis, will be reviewed for compliance with the program regulations. Failure to submit the required reports during the project period may result in loss of future funds and possibly termination of the grant within the project period.

Thirty days prior to the end of each budget period within the three year project period grantees shall notify AoA as to their desire to continue as a grantee. Failure to submit this documentation within the required timeframe may result in loss of grant funding. At the beginning of each budget period within the three year project period grantees will be notified of the funding level for the subsequent year.

One original application, signed by the principal official of the Tribe, and two copies of the complete application including all attachments must be submitted to the Administration on Aging, Grants Management Division, Margaret Tolson, Director, 330 Independence Avenue, SW., Washington, DC 20201. Incomplete applications will not be considered for funding.

5. Content of the Application

The application must meet the criteria in sections 614(a) and (b) of the Act, and title 45 of the Code of Federal Regulations, § 1326.19. The application may be presented in any format selected by the tribal organization. Contact the AoA Regional Office in your geographic area if you have questions concerning the content of the application. The application must include the following information:

A. Objectives and Need for Assistance

This section must include objectives, expressed in measurable terms, which are related to the current supportive and nutrition service needs of the elders to be represented by the Tribal Organization. This section must also include a discussion of how the needs were evaluated.

B. Results or Benefits Expected

The application should describe the results or benefits expected from each service proposed.

C. Approach

(1) Description and Method of Delivery of Each Service

(a) Nutrition. Nutrition services are required. There should be a description of the methods, facilities, and staff to be used in preparing, serving, and delivering meals, and the estimated number of persons to be served. The nutrition services provided, either directly or by way of a grant or contract, must be substantially in compliance with the provisions of part C, title III, which include:

1. Provide at least one hot or other appropriate meal a day, 5 or more days a week in a congregate setting, and any additional meals which the recipient of a grant may elect to provide. A "meal", as used in section 307(a)(13), 308(b)(7), 311(a)(4), 331(1), 336, 338(a)(1), and 339, 339A of the Act and § 1321.17, § 1321.59 and § 1321.64, is a planned event in a day at which a variety of prepared foods are provided to an individual. These foods shall comply with the U.S. Dietary Guidelines for Americans published by the Secretary of the Department of Health and the Secretary of the Department of Agriculture and provide the nutrients specified in the current, daily Recommend Dietary Allowances, as established by the Food and Nutrition Board of the National Research Council of the National Academy of Sciences as specified in Section 339(2) unless the meal is a special meal provided to meet the health, religious, or ethnic considerations of eligible individuals. Snacks, partial meals, and second helpings are not considered meals.

2. Provide at least one home delivered hot, cold, frozen, dried, canned, or supplemental food (with a satisfactory storage life) meal per day, 5 or more days a week, and any additional meals which the recipient of a grant may elect to provide. The above definition of a meal also applies here. Thus, neither individual grocery items nor food vouchers may not be used in lieu of home delivered meals.

If no title VI, part A funds are to be used for nutrition services, the application must state how such services are provided in other ways, and how they are financed.

(b) Information and Assistance. Information and assistance services are required. They must be available for older Indians living in the title VI part A service area and there should be a description of what information and assistance services will be provided and how they will be provided. The estimated number of individuals to be served should be stated. If no title VI, part A funds are to be used for information and assistance services, the application must state how such services are provided in other ways, and how they are financed.

(C) Other Supportive Services. The application must describe any other supportive services to be provided wholly or partly by title VI, part A funds. The description should include what supportive services will be provided and how they will be provided. The approximate number of persons to be served by each service should be stated.

Legal assistance and ombudsman services may be provided, but are not required. However, if provided, they should be reported as "Supportive Services."

If a tribal organization elects to provide legal services, it must substantially comply with the requirements in title 45 of the Code of Federal Regulations § 1321.71, and all legal assistance providers must comply fully with the requirements in § 1321.71(d) through § 1321.71(k).

Transportation of persons to nutrition sites or other places is to be considered as a "Supportive Service."

(D) Coordination with title III. The application should provide a description of how title VI and title III resources are to be coordinated within the title VI service area, including information and assistance service.

(2) Evaluation Criteria

The application must discuss the criteria to be used to evaluate the results and successes of the program, based on the objective indicated in Item A above. It will also explain the methodology that will be used to determine if the needs identified and discussed are being met and if the results and benefits identified in Item B above are being achieved.

D. Geographic Location

The application must include both a narrative description of the title VI, part A service area, and a map with the service area identified. The area to be served by title VI, part A must have clear geographic boundaries. If the geographic area overlaps with another current title VI, part A grantee or new applicant then coordination of services without duplication must be developed between the two applicants and clearly outlined in the application. This agreement must be signed by the principal official of both tribal organizations. A "Consortium Agreement" is included in the attachments of this **Federal Register** announcement. There is no prohibition, however, on its overlapping with areas served by title III.

E. Additional Information

(1) Older Indians in the Title VI, Part A Service Area

The law requires that a tribal organization must represent at least 50 persons aged 60 years or over in order to be eligible for title VI funding. Therefore, the number of persons aged 60 or over living in the proposed title VI service area must be stated in the application. The tribal organization may use Bureau of Statistics population figures, or may develop its own population statistics, but they must be certified from the Bureau of Indian Affairs in order to establish eligibility. The amount of the grant is based on this

number of Indians or Alaskan Natives aged 60 years or over in the proposed service area. Thus, the application should include only the number of Indians and Alaskan Natives aged 60 years or over in the proposed service area and not the total population census of all tribal members, age 60 and above, if not all the tribal members live in the proposed service area. If there is overlap between two or more title VI, part A applicants, as stated under "Geographic Location", the eligible elders can only be counted once and included in one application. The applicants are responsible for determining how the eligible elders will be counted. The same elder may not be counted by both applicants. This must be stated clearly in the application and signed by the principal official of the tribal organization.

As a separate matter, the regulations allow a Tribe to define, based on its own criteria, who the Tribe will consider to be an "older Indian" for purposes of eligibility to receive title VI services. If a Tribe selects a different definition of "older Indian" for service delivery, the application must state the age selected, and the number of Indians under age 60 eligible to be served. If more than one Tribe is included in the application, this information must be stated separately for each Tribe. All Tribes in a consortium must use the same age for "older Indian."

(2) Resolution

The tribal organization representing a federally recognized Tribe must submit an original copy of the Tribal council resolution authorizing participation in title VI, part A. If the tribal organization represents a consortium of more than one Tribe, a resolution is required from each participating Tribe, specifically authorizing representation by the tribal organization for the purpose of title VI, part A of the Older Americans Act.

(3) Program Assurances

Title VI, part A Program Assurances must be included in the application. The title VI, part A Program Assurances are those provisions identified in section 614(a) of the Older Americans Act, and in title 45 of the Code of Federal Regulations § 1326.19(d), issued August 31, 1988 (see Appendix B). The tribal organization must state that it agrees to abide by all the provisions for the entire project period being applied for April 1, 1993–March 31, 1996.

Copies of the title III and title VI current law and regulations, and of part 92, may be obtained from the Regional Program Director for the Administration on Aging. (See appendix A)

(4) Certification Forms

Certifications are required of the applicant regarding (a) lobbying; (b) debarment, suspension, and other responsibility matters; and (c) drug-free workplace requirements. Please note that a duly authorized representative of the applicant organization must attest to the applicant's compliance with these certifications.

(5) Identifying Information

Applications must identify both the principal official of the tribal organization, and the proposed title VI program director: Name, Title, Address including Zip Code, Telephone Number, and, if available, the FAX Number. The tribal organization's EIN (Employer Identification Number) must also be included.

If the applicant tribal organization is a consortium, the applicant must list the federally recognized tribes which are included. A copy of each tribal resolution must be enclosed.

6. Closing Date for Application

To be eligible for consideration, applications must be received or postmarked on or before December 5, 1995. (Applicants are cautioned to request a legibly dated U.S. Postal service postmark, or to obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks are not acceptable as proof of timely mailing.)

7. Action on Applications

Awards will be made by the Assistant Secretary on Aging Funding decisions will be announced as soon as possible.

Catalog of Federal Domestic Assistance Program #93.655 Grants to Indian Tribes and Native Hawaiians. This Program Announcement is not subject to E.O. 12372.

Dated: July 7, 1995.

Fernando M. Torres-Gil,

Assistant Secretary for Aging.

Appendix B

Older Americans Act—Section 614(a)—No grant may be made under this part unless the eligible tribal organization submits an application to the Assistant Secretary which meets such criteria as the Assistant Secretary may by regulation prescribe. Each such application shall—

(1) Provide that the eligible tribal organization will evaluate the need for supportive and nutrition services among older Indians to be represented by the tribal organizations;

(2) Provide for the use of such methods of administration as are necessary for the proper and efficient administration of the program to be assisted;

(3) Provide that the tribal organization will make such reports in such form and containing such information, as the Assistant Secretary may reasonably require, and comply with such requirements as the Assistant Secretary may impose to assure the correctness of such reports;

(4) Provide for periodic evaluation of activities and projects carried out under the application;

(5) Establish objectives consistent with the purposes of this part toward which activities under the application will be directed, identify obstacles to the attainment of such objectives, and indicate the manner in which the tribal organization proposes to overcome such obstacles;

(6) Provide for establishing and maintaining information and assistance

services to assure that older Indians to be served by the assistance made available under this part will have reasonably convenient access to such services;

(7) Provide a preference for Indians aged 60 and older for full or part-time staff positions whenever feasible;

(8) Provide assistance that either directly or by way of grant or contact with appropriate entities nutrition services will be delivered to older Indians represented by the tribal organization substantially in compliance with the provisions of part C of title III, except that in any case in which the need for nutritional services for older Indians represented by the tribal organization is already met from other sources, the tribal organization may use the funds otherwise required to be expended under this clause for supportive services;

(9) Contain assurance that the provision of sections 307(a)(14)(A) (i) and (iii), 307(a)(14)(B), and 307(a)(14)(C) will be complied with whenever the application contains provisions for the acquisition, alteration, or renovation of facilities to serve as multipurpose senior centers;

(10) Provide that any legal or ombudsman services made available to older Indians represented by the tribal organization will be substantially in compliance with the provisions of title III relating to the furnishing of similar services; and
